Club Gets Awards NORATADATA CLUB WINS AT DISTRICT CONVENTION

The early lamb crop report issued by the USDA last week says what many Sterling County ranchers have known for several weeks. The early lamb crop is down.

Indications in Texas point to a drop of one percent in the early lamb crop—those born prior to March 1. The forecasters figures gives it as 844,000 head this year compared to last year's 852,000 head. This one percent drop is due, so they say, to a smaller number of ewes on ranches and farms.

The early lamb crop in the eleven principal early lambing states is down three per cent due to an increase in the number of breeding ewes on hand. Three states, Arizona, Idaho and Washington had more ewes, but Texas, California, Kansas, Missouri, Oregon, Kentucky, Tennessee, and Virginia had fewer.

Live beetles, with small jewels glued to their backs are being seized along the border by plant quarantine inspectors of the USDA.

The beetles are the newest craze in jewelry and are being sold in Mexico as curios. They are about an inch long and usually have a small chain attached to them so they can be fastened to the wearer's clothing but can still crawl around.

The species being used are reported to be wood feeders and have not been known to cause damage in Mexico. They do belong to a family of insects that are injurious however so they are being seized. The Japanese beetle caused no damage in Japan but it has caused much damage in this country. Geographic changes of locations sometimes change an insect's habits; hence the halt on the importing of the "jewelry."

The coming of warm weather means livestockmen face a time of danger in regard to

screwworms. The season for shearing, dehorning and working livestock may provide a chance for screwworms to get a foothold if not reported.

At the present time, all confirmed cases are being treated as an emergency by the Southwest Animal Health Research Foundation officials in an attempt to keep down all cases. They urge livestock producers to treat all wounds to remove the chance.

Prompt reporting is another means of keeping tabs on all cases. The foundation can take measures to wipe out the infestation and perhaps prevent an outbreak in an area.

Several cases of worms have been sent in from this area of the state this week. Forrest Smith took in several samples from the W. N. & L. R. Reed ranch Monday. Ed Hyman, county agent of Tom Green County, says that worms were sent in from the ranch of C. A. Cole between Christoval and Eldorado. These worms were found, the telephone call to Mission was made, and they directed him to divide the sample. A half is to be sent in and the other half kept at the ranch to await the arrival of an inspector. Thus far, no reports on the identification of the samples has been made.

Last year, the first samples from Sterling County were sent in and confirmed as screwworms on April 25. The sample was sent in by Jeff Davis and Jim Hinshaw. After that, samples were sent in in increasing numbers from the county.

During the week just ended, March 22, fifteen cases were detected in Texas. Non-screwworms sent in for the same week totaled 42 for Texas, 2 for New Mexico, and 1 from Mexico.

Sterile fly release totaled 93,269,050 for the week of March 10-16.

Such packs are made up and sent in to a central place. Then they are sent wherever needed. The clubwomen said if Sterling did not have a credit of packs at the central depot, we would not be entitled to any case of need here.

If you have old sheets that you would donate, take them to Mrs. Bill Brooks or Mrs. Charles Allen. If you can't take them yourself, Mrs. Allen will call for them at your home.

Water your yard. The bargain rates on water are now in effect, in fact they went into effect the 20th of March, said city secretary Mrs. Johnny Donalson.

After a customer uses the first 5,000 gallons for \$5, all over that will be billed out at 25c per thousand gallons, said Mrs. Donalson.

The minimum here is \$3.50 (for 3,000 gallons). The next 2,000 gallons are billed out at 75c per thousand. Then the special summer rates will be in effect.

The NEW Santa Fe Trail

A report on some of Santa Fe's newest milestones

BY THE PRESIDENT OF THE SANTA FE

In 1963, Santa Fe is investing some 90 million dollars on new equipment and improvements.

All this money is being used to keep the Santa Fe up-to-date in every way.

As a matter of fact, so many new and exciting things are happening on the Santa Fe today that some people are calling it "The New Santa Fe Trail."

Here are just a few highlights of the many improvements.

- 2548 new boxcars.
- 500 Mechanical Temperature Control cars.
- 550 covered hopper cars.
- 194 double and triple deck autoveyors.
- 181 flat cars.
- 58 new diesel locomotives.
- 24 hi-level passenger cars.
- 31 semi-lightweight mail and baggage cars.
- Increasing our microwave communication system to 2064 route miles.
- Experimenting with new and more efficient freight cars such as compartmentalized cars for automobile parts.
- Advancing our piggy-back operations to include joint rail-truck rates.

And we haven't been standing still up until now. We've invested over a billion dollars in progress since World War II. For example:

- The new cut-off line into Dallas.
- Major line relocations in Arizona.

- Equipped 3560 new freight cars with "Shock Control" devices for damage-free shipment of fragile freight. (More of these cars are on order.)
- Equipped 7745 freight cars with roller bearings.
- Designed and built the first multi-level automobile transport cars—the autoveyors—which are now used by all the major railroads.

To keep pace with changing times and with the rapid growth of the areas we serve, we keep constantly on the move toward a better way to serve you and to strengthen a vital part of our national defense.

It is our aim to keep the Santa Fe Trail always new.

To qualify for the National Honor Society a student must be in the top 15% of his class and meet the approval of all the faculty. Joanna is editor of the school paper, "Campus Corral" and is on the staff of the high school annual.

doughBelly Price Reports

From all the yap yap in the papers, J.F. Kennedy has shore been raising the big racket and putting A chunk under it down in the South American Countries.

What I think don't amount to anything but it looks like if we would stay at home and let them people take care of their business the whole shebang would get along better.

You don't hear of them big shots coming to this country and telling us what to do. When they do give us A visit once in A while, all they want is to get their hand in our pocket. But that is nothing uncommon, everybody does that.

Mr Kennedy is going to give the big talk on T.V., today. But we won't know whether to believe it or not. The way the papers talk, we have not been getting things as they was. But I guess the Amrican people don't need to know too much. They need all the time they have to make the income taxes.

But we are still eating regular and that is more than some of them foreigners is doing. Money ain't nothing anyway, you can't it or drink it. But it A nice commodity to have laying around.

It looks like they are trying to corral Castro but that bird ain't no dummy. He may not come out on top but he will be in on the final tally, I bet. And he won't be among the strays, either. Kruchey old boy is going to see to that.

Nikata is using him as A front man to keep the United States from doing what it should do. Going down there and combing the lice out of them whiskers and telling Fidel what to do and then see that he does it. Fidel is cutting A wide swath and causing A lot of big headaches among big countries. But it don't seem like anything can be done about it.

Company Cheese Cake Easy To Make

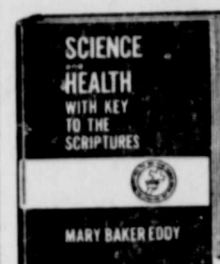

Cooks of yesteryear had good reason to be philosophic about the problems encountered in making a good cheese cake. But today, modern products and techniques newly developed by the Borden Kitchen have eliminated these problems and assure the homemaker of uniformly excellent results.

Company Cheese Cake (Makes 16 to 20 servings)

- | | |
|--|---------------------------------|
| 1½ cups zwieback crumbs | 1 cup (½ pint) heavy cream |
| ½ cup sugar | 2 tablespoons potato starch |
| 1 tablespoon cinnamon | 5 tablespoons lemon juice |
| ½ teaspoon salt | 1 tablespoon grated lemon rind |
| ½ cup butter, melted | Apricot or strawberry preserves |
| 4 (8-oz.) packages Borden's Cream Cheese | |
| 6 eggs, separated | |
| ¾ cup sugar | |

Blend together zwieback crumbs, ½ cup of sugar, cinnamon, salt and butter; press mixture against bottom and sides of 9 or 10-inch spring form pan. Bake in hot oven (400° F.) 8 to 10 minutes. Let cream cheese stand at room temperature until softened. Beat egg yolks with remaining sugar until light. Mash cheese with fork; add to egg yolks; beat well with rotary beater. Blend in cream. Stir in potato starch, juice and rind. Beat egg whites until stiff but not dry. Gently fold into mixture. Pour into pan. Put in cold oven; set oven to slow (325° F.). Bake 1 hour, or until set. Turn off heat; open door; let stand in oven 15 minutes until slightly cool. Spread with preserves. Remove rim of pan; place with bottom tin intact on serving plate. Refrigerate until cold.

In the first chapter of Science and Health with Key to the Scriptures by Mary Baker Eddy there is an inspiring and practical explanation of prayer.

A great number of people, through the study of this chapter, have found needed health, harmony, supply and well-being.

Science and Health may be read or examined, together with the Bible, at any Christian Science Reading Room. Or it may be purchased at \$3.

Westbrook and McDonald have filed and their names are printed on the ballots. No other filings for names were noted.

Absentee balloting in the school election can be made at the county clerk's office up through the 3rd of April, it was said.

Other members of the local board are David Glass, John Copeland, Jr., Reynolds Foster, Tommy Foster and Roy Morgan.

For Social Security

Over fifty million people have worked long enough under social security to qualify for cash disability benefits if they become disabled. This means that they have social security credits for five years (20 quarters) out of the past ten years, Floyd B. Ellington, district manager of the San Angelo Social Security office said. In the case of a severe disability, the worker and his dependents may be eligible for monthly cash social security disability benefits if he meets this work requirement. It is not necessary to be completely helpless to qualify for social security disability benefits. These benefits are payable to those who suffer from a crippling disease or a severe impairment which makes them unable to do any substantial work.

Disabled adult sons and daughters of retired, deceased, or disabled workers may also receive childhood disability benefits if they become disabled before they reached age 18.

Anyone suffering a severe disability which prevents him from doing any substantial work should get in touch with the local social security office to determine his eligibility under the Social Security disability program, Ellington stated. He may be losing benefits if he fails to apply for them promptly. The social security district office will explain to disabled workers and their families their rights under the law.

Cheese For Dessert

Long the epicure's favorite dessert, the wide variety of cheeses now in abundant supply can add a satisfying quality to today's menus. Cheese adds extra nutrition in the form of high quality protein. Camembert Cheese in particular, is favored by the gourmet. The color, texture and flavor develop as the cheese ripens. Let this cheese warm at room temperature before serving as a spread for crackers. The Borden Kitchen suggests this gourmet specialty: Gently fried Camembert accompanied by slim slices of apple or a bunch of chilled grapes for a memorable dessert or party delight. It goes equally well with other fruit. Instantly made coffee is an excellent accompaniment to this dessert or late-snack offering.

Camembert Croquettes
(makes one dozen)

- 6 (1 1/4-oz.) portions Borden's Camembert Cheese, well chilled
- 1 egg, beaten
- 1/2 cup dry bread crumbs

Cut each chilled Camembert cheese wedge in half. Dip chilled cheese wedges into beaten egg; coat thoroughly. Dip into bread crumbs; cover thoroughly. Fry in deep fat (375°F.) until golden brown, about 1/2 minute. Drain on absorbent paper. Serve immediately with apple slices or chilled grapes.
