IODINE, the familiar cut disinfectant, can also be used for bigger jobs, namely disinfecting swimming pools, say Stanford University researchers. Iodine in pools, they have found, is safe, effective and less irritating to eyes than chlorine.

AN ADEQUATE school science program, says the National Science Teachers Association, must start in kindergarten or first grade, must be made cohesive from level to level through grade 12 or beyond and must include a full range of contemporary knowledge and ideas.

PIPELINES may be the nation's best transportation bet for food and supplies in the event of enemy attack, according to Tube Turns, Louisville. Welded underground pipes are virtually fallout proof and can survive the blast of practically anything but a direct nuclear bomb hit.

Social Security

"Area residents should file their social security claims before they retire in order to insure prompt payment of benefits," Floyd B. Ellington, social security district manager in San Angelo, said today.

Many people of retirement age do not get their first social security checks as early as they might, simply because they waited too long to apply for their benefits, Ellington pointed out.

Applications may be filed any time within three months of when a person wants benefits to start. Since the average processing time of a claim is 4 weeks, Ellington advised people to take advantage of this early filing and submit their applications as soon as possible.

Many claims are delayed because the applicants do not have the necessary information or papers to establish their eligibility for benefits, he said. These delays could be avoided if people would get in touch with social security office ahead of time to find out what they should bring with them when they apply for benefits.

Ellington stated that a short visit or phone call to the social security office before the time of filing can significantly speed up the processing time of the application.

The San Angelo District Office is located at 204 Continental Bldg. The phone number is 653-6861.

Versatile 4-H's Awarded Honors For '63 Projects

Two Southwest Texas youths are among the state's delegation to the 42nd National 4-H Club Congress in Chicago.

Carey Wilson, 18, of Pyote, and David Pape, 19, of Prade Ranch in Edwards County, won expense-paid trips as 1963 state award winners in their club projects.

They expect to visit the International Live Stock Exposition. Guided tours of two world famous museums, serious discussions, a whirl of parties, and a concert are a few of the highlights of the congress program.

Wilson, the electric winner, got sidetracked into electronics in 1958 when he was showing a steer at the Fort Worth Stock Show. He became fascinated with a ham radio operator's display.

The youth soon bought his own short-wave set and then greatly expanded it, building his own power supply and transmitters. He also built a tape recorder and a water pump.

Wilson, the son of Mr. and Mrs. John H. Wilson, is a student at Texas A & M University. His trip is sponsored by the Westinghouse Educational Foundation.

Wilson has grossed over \$6,500 from his club projects. "It was some time before I realized the human and cultural advantages of 4-H, in addition to its financial aspects,"

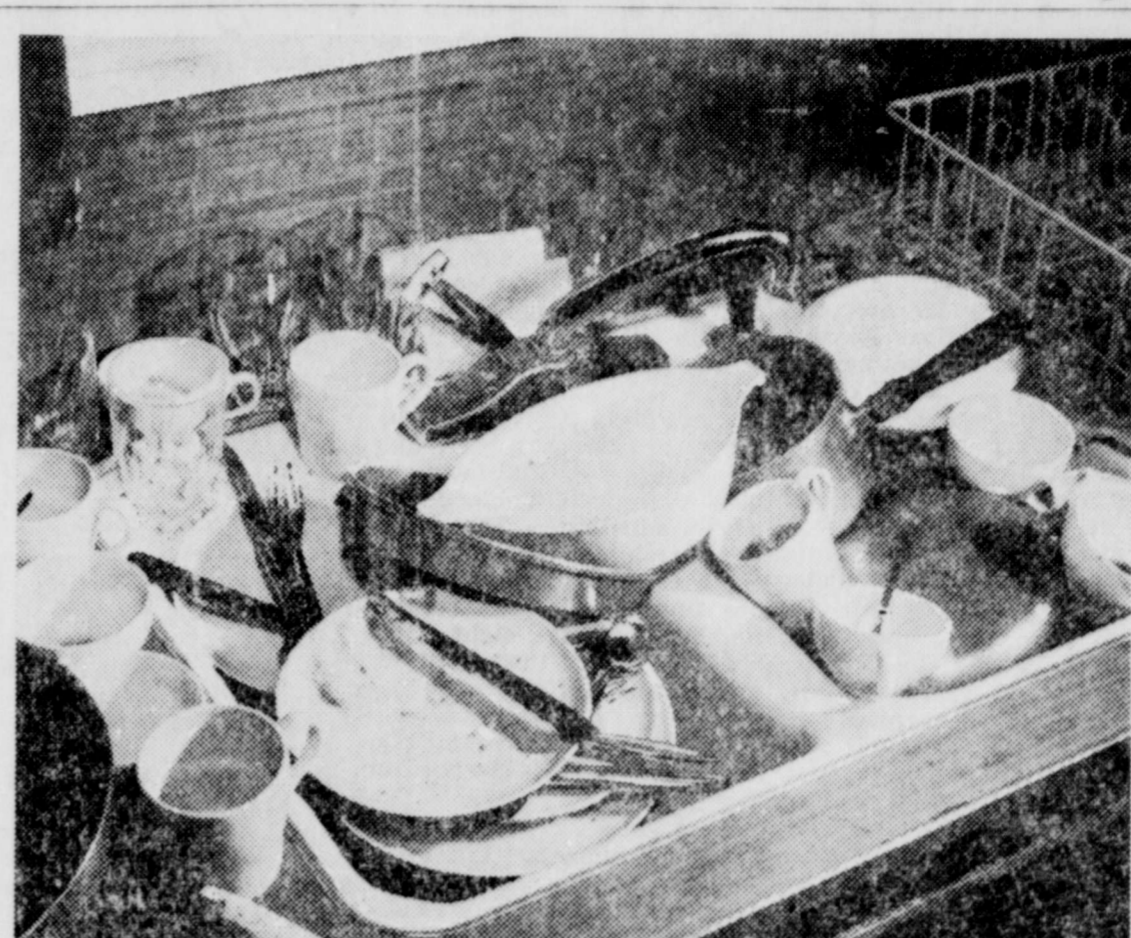

Wilson Pape

he relates. "I began to find more satisfaction in helping younger 4-H members than I did in winning the stock show." His parents operate a 15,000 acre ranch in Ward County.

Pape, the agricultural award winner, built up herds of angora goats, horses, cattle and sheep and is using income from them to pay his expenses at West Texas State College.

Last year he showed the grand champion fat lamb at the Edwards County Junior Live-stock Show. His trip was provided by International Harvester Company.

who's doing the dishes tonight?

That's a silly question. I take it for granted you are, mom. Do you know that it's been proven the average woman puts in over sixty 8-hour working days per year in hand-washing dishes? . . . time that you can put to far better use.

An automatic dishwasher is the answer to your dishwashing chore. It will save you more than half of your after-meal cleanup time, and keep the kitchen neat and clean after between meal snacks. As sure as I'm Reddy Kilowatt, you'll have to admit that continuing to do the dishes by hand is about as pointless as laundering the clothes by hand.

Wool Applications

January 31 is the Deadline for filing 1963 Wool Applications at ASCS Office.

Ranchers have until the end of January to file applications for 1963 marketing year payments under the National Wool Act, Charles Cunningham, ASCS Office Manager, reminded producers today. He emphasized that January 31, 1964 is the last day for accepting payment applications in connection with marketings of either wool or lambs during 1963.

Since this is several months earlier than under previous wool programs, the ASCS Office urges that producers avoid possible confusion by filing their applications on completed sales as soon as possible.

The 1963 marketing year under the wool program ended December 31, 1963. Future wool marketing years will be for 12 months and will coincide with the calendar year. The January 31, 1964 deadline for filing 1963 applications is in line with normal program procedure of continuing to accept such applications for one month following the end of the marketing year.

The 1963 program payments—which probably will begin in April—will cover shorn wool and unshorn lambs marketed during the 9 month period April 1, 1963, through December 31, 1963. Later marketings will be eligible for payments for the 1964 marketing year, which began January 1, 1964.

The necessary sales records accompanying the applications will be the basis for calculating the national average price received by ranchers for wool during the 1963 marketing year. When the average price can be determined, the payment rates for shorn wool and unshorn lambs sold during the 1963 marketing year will be announced. Congress authorized the National Wool Act in order to encourage the domestic production of wool.

There are times when all time-honored omens and signs fail. Such a day was the past Monday. The date of the Sterling County Livestock Show has long been known as a day of bad weather. But the 1964 show will have to go down in the books as a good day weatherwise. It was cool enough for the sheep but warm enough for the humans involved so all in all it was a good day.

There were forty-two exhibitors in the show. Twenty-three were 4-H Club boys and girls; there were nineteen FFA boys competing. The forty-two exhibitors showed fifty-eight crossbred lambs, forty-one finewool lambs, sixteen Rambouillet ewes, eight Rambouillet rams, three Suffolk ewes, three Suffolk rams and six groups of three range ewe lambs. Placing results and sale results are listed elsewhere in this paper.

Next show is the Abilene Fat Stock Show. Dates for the Abilene show are Sunday, January 19 through Wednesday, the 22nd. This is another show usually favored by winter's cooler blasts from the Arctic. Perhaps it will be neglected also.

The success of the screw-worm eradication program thus far has prompted program officials to cut back sterile fly production during the next few weeks by fifty per cent. Seventy million flies will be produced weekly in the weeks ahead. Eradication workers feel this production will be sufficient to fight the screwworm battle in the state for awhile. Along with the reduction in fly production, the number of employees has been reduced by 175 for the

No screwworm cases have been reported in the state for the past few weeks. This is the principal reason for the reduction in personnel and fly production. This will result in quite a financial saving for those supporting the program and their money will go further. As soon as it is necessary production can be upped and the program put into full production.

During 1963, producers in 182 counties of the state's 254 counties sent in 4,916 screwworm cases; during 1962 there were 49,434 cases in 242 counties. Officials feel that the reporting in 1963 was more effective than in 1962 and that even better control has been achieved than the figures would indicate.

Sheep producers are reminded that they must file their sales receipts for the sale of wool or unshorn lambs in the ASCS office before January 31, 1964. If they have been filed, they must be signed before that date to qualify for incentive payment in 1964 for the 1963 production year, according to Charles Cunningham, local ASCS office manager.
