

STERLING CITY NEWS-RECORD

VOL. 72 "Since 1890" PUBLISHED EVERY FRIDAY AT STERLING CITY, TEXAS MAY 29, 1964 No. 22

AROUND THE COUNTY

ARTHUR BARLEMANN, JR. COUNTY AGENT

Rosanne Foster, Jeanie McDonald, and Mrs. Ross Foster are the Sterling County 4-H representatives at the District Seven 4-H Club camp Wednesday through Friday of this week. The camp is a joint camp for club boys and girls of the district. All club members going to camp must be senior club members, or over fourteen years of age.

At camp, they will receive training in various activities, wildlife, and also take part in recreation and athletics to balance the working part of the camp.

All county extension agents are also attending the camp along with the club members and leaders from the district.

Site of the camp is the Camp Christian Retreat at Lake Brownwood.

Next week, seven 4-H Club members and two mothers are making the trip to College Station for the annual 4-H Club Round Up and state contests. They will leave Sterling City on Tuesday morning and return home on Thursday.

The district first place range conservation demonstration team composed of Barbara Durham and Rosanne Foster will be competing with other winners in the state division of their contest. Last year, they placed second in the state in competition with 22 other teams from the state.

Jeanie McDonald will be competing in the individual demonstration division of the range conservation demonstration contest. Jeanie is the first entrant from Sterling County in the individual demonstration. Two years ago she did team with Barbara in the team division where they placed third.

Barbara and Rosanne are demonstrating the control of mesquite as a range conservation measure. The conservation of soil and water on rangeland through grazing is the subject of Jeanie's demonstration.

The range judging team members are David Foster, James Morgan, Larry Stewart and Jack Clark. David, James and Larry have been competing in this contest for a number of years. They have placed second last year in the state contests. Jack was a member of the grass team last year.

The club members will be guests at a barbecue sponsored by the 4-H Recognition Committee on Tuesday night. Wednesday morning they will take part in the various contests for which they have qualified. Awards in the various contests will be announced Wednesday afternoon and the banquet honoring the winners will be held that night. Thursday morning they will start home.

Very little damage has been found by anyone yet as a result of the casebearer infestation on pecans. The eggs of the pest have not been as numerous as last year thus far.

As a result of Tuesday night's rain here, much of the residual effect of the spray was lost. If the trees have been sprayed for more than a week, all residual effect was gone anyway and the rain did not hurt it.

The recommended insecticides to be used for spraying are, of course, the Sevin for residual effect and the malathion for a quick kill. Use two pounds of Sevin and one and one-fourth pints of malathion per hundred gallons of water. Add two pounds of zinc sulfate to this for the control of rosette, a nutritional disease associated with the high calcium content of the soil here. Broken down into small treat-

Seniors Return from Colorado Trip

The seniors returned Tuesday night from a week-long trip to Colorado Springs. They arrived in Colorado Springs in the afternoon on Wednesday, the 20th.

During the week, the seniors, their sponsors, Mr. and Mrs. Fred McDonald, and parents, Mr. and Mrs. Chesley McDonald, Mrs. Henry Bauer and Mrs. Forrest Foster, visited most of the points of interest around the Colorado Springs area. Among these were Van Briggles Pottery, several ghost towns, Royal Gorge, Ft. Carson Museum, May Tropical Museum, Cheyenne Mountain Zoo, Will Rogers Shrine, Seven Falls, Garden of the Gods, Santa's Workshop, Manitou Incline, Pike's Peak, The Broadmoor Ice Arena, The United States Mint in Denver, the Colorado State Museum in Denver, the Museum of Natural History in Denver, and the Air Force Academy.

Besides being educational, the trip involved much fun. Many practical jokes were played, such as snakes in bed, loaded cigarettes, exploding matches, spiders that jumped, tricks planted in suitcases, candy that was far from candy, and many others. The seniors were the first passengers in a new cog train up Pike's Peak. They "slept" in the planetarium at the Air Force Academy. All participated in a "picnic" that was more like eating dust in a West Texas dust storm. The bus was stopped for turning in the wrong lane. Cecilia and Lee participated in a magic show at Santa's Workshop.

Ice skating was fun, and most of the kids got the hang of it. The parents and sponsor did not participate in all of the activities, claiming that some of the group had to be sane??? The bus was most comfortable for sleeping or playing 42 or just watching the mountains at it stalled in Raton Pass. Much exercise was gotten by all as they climbed the hill to the cottages every day.

But only the fun and the good times will be remembered through the coming years.

The L. B. Hallmarks, Jr. of Mississippi are here visiting the Luther Hallmarks.

Fred McDonald, Explorer Scoutmaster and about twenty boys left Wednesday morning for a five days fishing trip at Camp Sol Mayer on the San Saba River.

ments, the amount of Sevin is two tablespoons per gallon of water, and one tablespoon of malathion emulsion. It the powder form of malathion is used, double the amounts. Use two tablespoons of zinc sulfate also.

Sterling County has not a case of screwworms thus far in 1964—at least a confirmed case in livestock. Five samples have been sent to the laboratory in the past month but all were identified as non-screwworm.

The showers of Tuesday night may help the screwworms as they are usually associated with wet weather, something we have not been blessed with lately. A continual check of livestock and the mailing in of suspected samples of screwworms will help, though.

Last year's first confirmed case occurred on May 1; the first case in 1962 was confirmed on April 20. So you see we are dropping farther back each year before having a confirmed case.

American Legion Barbecue Tonight

Plates To Go For \$1.25
The annual American Legion Barbecue will be held tonight at the Jeff Davis river place. The barbecue will begin at 6:30, said W. R. Brooks, local commander.

The barbecue will be beef and plates will be sold "to go" for \$1.25 each, it was said. They may be picked up and taken home by anyone interested. So—get your barbecue supper tonight at only \$1.25 per plate.

Wimodausis Club Closes Year

The members of the Wimodausis Club held the final meeting of the year on May 27 at the community center with Mrs. Foster Conger and Mrs. Rufus Foster as hostesses.

Topic for study was Our Community Has the Last Word.

Improvements for Our Town was discussed by Mrs. Rufus Foster. Preparing for Dynamic Maturity was Mrs. John Reed's discussion. Words of Wisdom and a Backward Glance of the past two year's accomplishments as president was Mrs. W.N. Reed's topic for discussion.

Mrs. Reed then installed the new officers as follows: Mrs. Fowler McEntire, pres. Mrs. Rufus Foster, vice pres. Mrs. Roy Foster, recording secretary

Mrs. Lester Foster, treas. Mrs. J.C. Reed, cor. secy. Mrs. W.N. Reed, parliamentarian

Mrs. Roy Morgan, federation counselor

Mrs. Harvey Glass, historian

The new president appointed the Loan Scholarship Committees, the standing committees and the finance committee for next year.

Mrs. Morgan presented the past president's pin to Mrs. W.N. Reed.

Summer Homemaking Classes To Begin

The summer phase of the Vocational Homemaking Program begins June 1 at nine o'clock. Any girl who has had a year of homemaking since the completion of the last summer session is eligible to take the course. Interior decoration is the subject for study for the class which is worth one-half credit toward high school graduation.

Driver Education Course Starts Monday

A driver's education course will be taught here at the Sterling City school—beginning Monday at 9 a.m. Any student wanting to take the course is asked to be at the school that morning to sign up for the course, said J. R. Dillard, who will teach the course.

The first phase or the classroom phase will last until June 23 when the students will take the state written test.

The Caperton Chevrolet Co. of Bronte will furnish the car for the course, said Dillard.

Classes will be taught from nine till eleven o'clock each morning, said the instructor.

Saturday Holiday Memorial Day

Saturday, May 30, Memorial Day, is a holiday here in Sterling City. It is one of the usual holidays taken by the merchants.

The other holidays taken by the local businesses include July 4th, Labor Day, Armistice Day, Thanksgiving and, of course, Christmas.

The Sherman Connors were in Belton the first part of the week on business.

Little League Talked at Lions Club

Little Leaguers Are Asked To Meet Monday at 4
All boys interested in playing little league baseball this summer are asked to meet at 4 p.m. next Monday, June 1, at the old ball field just back of the D.C. Durham house. A program will be planned and outlined at that time and the players lined up. The organization of the leagues must be made right away so the season's playing can get underway.

Please Turn in Old Little League Suits, Mothers
All the suits from past years used by Little Leaguers are needed and mothers are asked to go through their boy's old clothes and closets and round up the suits and turn them in at Henry Bauer's Texaco office. The equipment is needed and the suits can be issued to the players.

The club is having the poles moved at the football field to accommodate night playing for the Little Leaguers and Pony Leaguers. The cost of moving the poles will be \$75.

R. P. Brown, a charter member of the club, talked briefly and told the club he was 83 years old on Wednesday. He was born May 27, 1881.

Nelwyn King, the club's new pianist and sweetheart, was recognized for her first meeting. The prize went to Nelwyn.

Guests present were Thomas and Thelbert Asbill and Don Evans.

Baptist VBS Starts Monday

The Vacation Bible School of the First Baptist Church is to be June 1-5, said pastor Sherman Conner this week. The school will be held from 8:30 a.m. to 11:00 each morning. Assembly will be at 8:30 each morning and the various age groups will have morning breaks and refreshments, said Conner.

Conner said he had about fourteen workers lined up to help with the school and all the children of the city were invited.

TWO RECEIVE AWARDS AT LAST LIBRARY CLUB MEETING

The Library Club for 1963-64 met in the home of Mrs. Milligan, sponsor, for the last time on Tuesday afternoon after school. Six members were present. Discussion about the library and its many tasks was enjoyed during the informal meeting and refreshment hour. At the close Perry Currington and Collin Douthit were given awards in the form of pins with appropriate words and letters for the members who had spent most time and effort in doing the work expected of library club members.

All members have helped immeasurably to make the library a better one. Honorable mention should go to the following members: Louise Alexander, in spite of limited time, never lost her interest in library tasks and activities. Lar Blackburn and Bobby Legg never failed to help when asked; they and David Weaver, who was not an active member, assembled the new unit for the card catalog without inflicting a single scratch on any part of it. Cindy Lowery and Ann Lawson did much of the inventory, and so did Drew Durham, who did many library duties cheerfully. Again David Weaver helped with the last-of-school inventory. Frank Balaban was a faithful shelper of books during the entire first semester, and Ricky Hopky Hopkins rendered real service by helping check the books in the last three grades of Grade School. Ricky was headed for an award when he had to forego the library club for a fifth subject in the second semester, but his good work in the first semester will never be forgotten.

All members expressed a greater interest in the library after helping in it and felt the year has been a most worthwhile one.

Showers Dampen Sterling Area

VETERAN TEACHER, JOHN C. HELM, DIES

John Cornelius Helm, 88, teacher and school superintendent at Moran, Mertz and Sterling City for 42 years, died last week in a Stephenville hospital.

He had lived in Comanche since his retirement in 1928. Survivors include his wife and a son, J. C. Helm, Jr., superintendent of the Stephenville Independent School District.

Services were held at 10 a.m. last Wednesday in Comanche Funeral Home.

Named "Girl of the Year"

LAS VEGAS, NEW MEXICO—A pledge pin ceremony, installation of officers, and the naming of the "Girl of the Year," featured the Tuesday evening meeting of Delta Chi Chapter of Epsilon Sigma Alpha, at the home of Mrs. Norman Smith, who was named "Girl of the Year."

Mrs. Smith is the former Rulene Foster of Sterling City.

Installation of officers was conducted by Mrs. E. J. Groseclose, with Mrs. Calvin Baker, Jr., installed as president.

Other officers installed included Mrs. Norman Smith, vice president; Mrs. Leroy Davis, treasurer; Mrs. Herman Smith, recording secretary; and Mrs. Dee Watts, corresponding secretary.

Following the impressive ceremonies with the sorority colors carried out with blue and yellow jonquils, the group went to Irene's Frontier Club for a dinner.

During the dinner the "Girl of the Year" trophy was presented to Mrs. Smith by Mrs. Calvin Baker, Jr. Mrs. Groseclose was presented with her past president's pin.

JOE GREEN GRADUATES

Jodie Green, son of Mr. and Mrs. Bill Green, received his bachelor of arts degree from Arkansas Polytechnic College on May 24 at Russellville, Ark. He majored in political science and history. Joe completed 9 weeks of practice teaching in Russellville Jr. High and he plans to teach this fall.

Showers fell over the county Tuesday afternoon and evening and Wednesday morning before daylight. Here in town from .90 to one inch was recorded. Fowler McEntire said he got a half inch while only a fourth inch was recorded at the northwest end of the county on the Reed ranch.

The drouth here has been quite severe this spring and the ranges are as dry as ever in memory. No appreciable amounts of rain have fallen in this area this year, and no winter seasoning or moisture was in the ground. The few light showers that have fallen this year have not added any real ground moisture.

Much rain is needed yet, and in fact a rainy year is needed—to help the pastures to help the rivers and lakes, and add to the underground water in this area.

As this paper is printed on Thursday late, it is threatening rain shower. It is possible that more rain will fall here.

Elizabeth Cole is home from TCU, along with Gene Broadhead of Grand Prairie. They both plan to attend summer school at TCU, Ft. Worth, this summer.

The Ray Lanes of Sterling and the Jimmy Floyds of Midland attended the graduation exercises of San Angelo High School this week. They attended to see Rebecca Durham, a relative, graduate.

NEW DATE FOR BAKE SALE

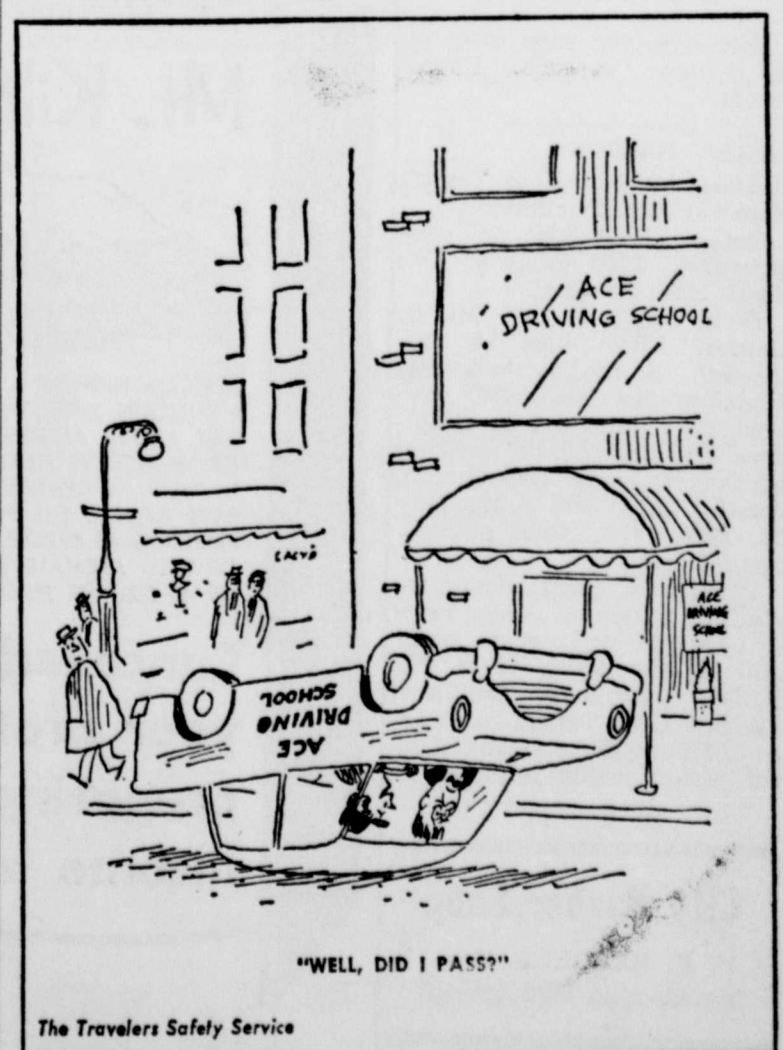

The date for the FHA bake sale has been changed to June 5 because of the Memorial Day holiday. Advance orders may be made by calling Janie Copeland, 8-2631 or Ann Lawson, 8-2161.

LAWN mowing and yard work. \$1.00 per hour—our mower. Jerry and David Currington.

The Jim Cantrells have gone to Oklahoma for a stay of about two weeks.

The word quack, as it is used today, is an abbreviation for the earlier form, quack-salver. Using the cry of the duck to denote ignorant chatter and boasting, the word "salver"—to salve or heal—was added. Thus, quack-salver came to mean one who makes noisy pretensions to a medical skill for profit and prestige.

WHOLESALE

REWARD NOTICE

A reward of \$500.00 will be paid by the Texas Sheep and Goat Raisers Association to any person (other than law enforcement officers) giving information causing the arrest and final conviction of any person or persons found butchering or stealing any sheep or lambs or goats belonging to any Association member in good standing. When two or more persons give information, the above sum will be divided at the discretion of the Board of the Association. When two or more defendants are involved in a single crime, the total reward is limited to \$500.00, but the conviction of one defendant, even though the other defendants are acquitted will entitle the claimant or claimants to said sum of \$500.00. All claims must be submitted within ninety (90) days following conviction. If, upon conviction, a defendant confesses other thefts, no additional reward will be paid. All devisions concerning the payment of such reward and the conditions of payment will be made by the Board of Directors of the Association.

Foam rubber seats.

Sterling County will offer as a trade in a 1949 GMC 3 Ton Truck Identification Number A2-70746900.

The Commissioners Court of Sterling County, Texas reserves the right to refuse any and all bids.

MECHANICAL QUACKERY

In this space age of satellites and rocket ships it is easy to believe that a machine can do anything — if one can find the right machine.

Medicine, like space science, has its miracle machines. The electrocardiograph, the X-ray, and the fluoroscope in the hands of experienced practitioners have saved millions of lives, both in diagnosis and treatment.

But the real miracles of scientific medical instruments have given the charlatan some new ideas for his fake machines, and made it easier for the public to believe in them. Older people with chronic diseases, especially, are victimized by this type of medical swindle. Here are some of the common types of fake medical gadgets:

Diagnostic and Treatment Machines

Fake diagnostic machines often look impressive, with dials, flashing lights, flickering needles, charts, and impressive console cabinets. Sometimes they are deliberately designed to look like an X-ray machine, an electrocardiograph, or some other genuine scientific device.

Be wary of the practitioner who has a machine for diagnosing or treating almost any kind of disease simply by turning dials and applying electrical contacts to the body. Such devices are fakes. Your doctor's good judgement and experience is essential to proper diagnosis and treatment. There is no short cut.

Radiating Devices

Radio waves and other forms of radiation are still a mystery

to most of us. We know just enough about medical X-rays and atomic energy to make us gullible for the swindler with a new form of medical "ray." The important facts are: A home-use gadget giving enough radiation to have any medical effect would be very dangerous. And if it doesn't give off enough to have an effect, it's worthless. Either way the customer loses. Effective radiation can be safely used only by the doctor.

Electricity and Magnetism

Various kinds of fake machines that produce electric shocks or generate magnetic force have been promoted for many years. The horsecollar "electric belt" demonstrated at old-time county fairs was just as "scientific" as some of the more impressive-looking gadgets in use today. One of these was represented to treat all kinds of diseases by means of electric current passed through the body. Such uses of electricity are worthless for any therapeutic purpose.

Light and Sound Machines

One of the most infamous and spectacular fake devices — the Spectrochrome — was essentially a machine for shining lights of various colors onto the body. There was a lot of hocus-pocus and ritual to make the process seem very mysterious. Another — the Sonus Film-O-Sonic — applied the electric current from tape recordings of popular music to the surface of the body through moistened pads. "Smoke Gets in Your Eyes" was claimed to cure cancer; "Holiday for Strings" to cure arthritis. They were equally worthless.

"Air Purifiers" and Negative-Ion Generators

Promotion of so-called "air purifiers" for preventing or treating respiratory infections and other types of diseases is one of today's most prevalent health swindles. Equipment for effective air purification is available, but is far more expensive than the cost of the small units commonly sold in retail stores. These small units do not have sufficient capacity for removing the dust and pollen which may aggravate allergic conditions such as hay fever. No air purifier can truthfully be promoted for treating viral or bacterial diseases such as colds, influenza, pneumonia, tuberculosis, etc.

Vibrating Devices

These come in all sizes, shapes, and forms such as hand units, pillows, rolling pins chairs, and even mattresses. The vibration is usually produced by an off-center drive shaft geared to an electric motor. Some have a heating element.

False claims have been made for the effectiveness of vibrators in treating a wide variety of ailments, for reducing weight, for "recontouring" the figure, or "spot reducing." Nor can vibration cure arthritis, rheumatism, circulatory ailments, or nervous condi-

Devices for "Erasing" Father Time's Tracks

Many of these have been taken off the market as cruel hoaxes. One example is the facial stimulator which uses an electrical current to produce muscle contractions. These models claimed to improve face and neck by "erasing" wrinkles, sagging muscles, and bags under the eyes. No machine can turn back the calendar.

FOR SALE—7 20 foot lots, (trailer court deal), duplex house 28x40. Make me an offer. T. H. Murrell, ph. 8-4221.

Foods sold for use in the management of disease or for certain conditions especially for infants, the aged, the obese, or the pregnant, must comply with the special dietary labeling requirements of the Federal Food Drug, and Cosmetic Act, to furnish the information needed by the user.

There are no drugs or treatments which can cure baldness, make the hair grow, or "feed" the hair roots or scalp.

GULFPORT, MISS.

DID YOU KNOW?

If Marie Antoinette soiled her clothes at a banquet, she would pour salt or lemon juice on the stain right in front of her guests! The next day she instructed her maids to put the dress in the sun to bleach out the stain.

Today, a new fluorine-based chemical compound developed by Du Pont clings to each fiber in a fabric forming an invisible shield which will not let moisture or stains penetrate. Fabrics protected by this chemical carry tags or labels saying they were treated with "Zepel" fabric fluoridizer, a protection which lasts through repeated washings and dry cleanings.

Social Security

Floyd B. Ellington, district manager of social security in San Angelo, issued a reminder today to all persons who are receiving social security benefits that they must notify the Social Security Administration whenever something happens that might affect the payment of their benefits. Some of the events which must be reported are:

1. Earnings from all types of work if the beneficiary is under age 72 and expects to earn more than \$1200 during the year.
2. Death of a beneficiary.
3. Change in marital status—unless the beneficiary is receiving payments as a retired worker.
4. Change of custody of a child or other person for whom you are receiving benefits.
5. Change in address.

"Social security beneficiaries received a list of these and other events that must be reported with this check earlier this year," Ellington said. "If they do not have this list, they may pick up another at the social security office."

"In fact, anyone who has a question about social security should get in touch with us to get correct information."

The address of the social security office is 204 Continental Building, San Angelo, Texas. Telephone is 653-6861.

"Area residents should file their social security claims before they retire in order to insure prompt payment of benefits," Floyd B. Ellington, social security district manager in San Angelo, said today.

Many people of retirement age do not get their first so-

cial security checks as early as they might, simply because they waited too long to apply for their benefits, Ellington pointed out.

Applications may be filed any time within three months of when a person wants benefits to start. Since the average processing time of a claim is 4 weeks, Ellington advised people to take advantage of this early filing and submit their applications as soon as possible.

Many claims are delayed because the applicants do not have the necessary information or papers to establish their eligibility for benefits, he said. These delays could be avoided if people would get in touch with social security office ahead of time to find out what they should bring with them when they apply for benefits.

WHOLESALE

REWARD NOTICE

A reward of \$500.00 will be paid by the Texas Sheep and Goat Raisers Association to any person (other than law enforcement officers) giving information causing the arrest and final conviction of any person or persons found butchering or stealing any sheep or lambs or goats belonging to any Association member in good standing. When two or more persons give information, the above sum will be divided at the discretion of the Board of the Association. When two or more defendants are involved in a single crime, the total reward is limited to \$500.00, but the conviction of one defendant, even though the other defendants are acquitted will entitle the claimant or claimants to said sum of \$500.00. All claims must be submitted within ninety (90) days following conviction. If, upon conviction, a defendant confesses other thefts, no additional reward will be paid. All devisions concerning the payment of such reward and the conditions of payment will be made by the Board of Directors of the Association.

The Commissioners Court of Sterling County, Texas reserves the right to refuse any and all bids.

MECHANICAL QUACKERY

In this space age of satellites and rocket ships it is easy to believe that a machine can do anything — if one can find the right machine.

Medicine, like space science, has its miracle machines. The electrocardiograph, the X-ray, and the fluoroscope in the hands of experienced practitioners have saved millions of lives, both in diagnosis and treatment.

But the real miracles of scientific medical instruments have given the charlatan some new ideas for his fake machines, and made it easier for the public to believe in them. Older people with chronic diseases, especially, are victimized by this type of medical swindle. Here are some of the common types of fake medical gadgets:

Diagnostic and Treatment Machines

Fake diagnostic machines often look impressive, with dials, flashing lights, flickering needles, charts, and impressive console cabinets. Sometimes they are deliberately designed to look like an X-ray machine or electrocardiograph, or some other genuine scientific device.

Be wary of the practitioner who has a machine for diagnosing or treating almost any kind of disease simply by turning dials and applying electrical contacts to the body. Such devices are fakes. Your doctor's good judgement and experience is essential to proper diagnosis and treatment. There is no short cut.

Radiating Devices

Radio waves and other forms of radiation are still a mystery

to most of us. We know just enough about medical X-rays and atomic energy to make us gullible for the swindler with a new form of medical "ray." The important facts are: A home-use gadget giving enough radiation to have any medical effect would be very dangerous. And if it doesn't give off enough to have an effect, it's worthless. Either way the customer loses. Effective radiation can be safely used only by the doctor.

Electricity and Magnetism

Various kinds of fake machines that produce electric shocks or generate magnetic force have been promoted for many years. The horsecollar "electric belt" demonstrated at old-time county fairs was just as "scientific" as some of the more impressive-looking gadgets in use today. One of these was represented to treat all kinds of diseases by means of electric current passed through the body. Such uses of electricity are worthless for any therapeutic purpose.

Light and Sound Machines

One of the most infamous and spectacular fake devices — the Spectrochrome — was essentially a machine for shining lights of various colors onto the body. There was a lot of hocus-pocus and ritual to make the process seem very mysterious. Another — the Sonus Film-O-Sonic — applied the electric current from tape recordings of popular music to the surface of the body through moistened pads. "Smoke Gets in Your Eyes" was claimed to cure cancer; "Holiday for Strings" to cure arthritis. They were equally worthless.

"Air Purifiers" and Negative-Ion Generators

Promotion of so-called "air purifiers" for preventing or treating respiratory infections and other types of diseases is one of today's most prevalent health swindles. Equipment for effective air purification is available, but is far more expensive than the cost of the small units commonly sold in retail stores. These small units do not have sufficient capacity for removing the dust and pollen which may aggravate allergic conditions such as hay fever. No air purifier can truthfully be promoted for treating viral or bacterial diseases such as colds, influenza, pneumonia, tuberculosis, etc.

Vibrating Devices

These come in all sizes, shapes, and forms such as hand units, pillows, rolling pins chairs, and even mattresses. The vibration is usually produced by an off-center drive shaft geared to an electric motor. Some have a heating element.

False claims have been made for the effectiveness of vibrators in treating a wide variety of ailments, for reducing weight, for "recontouring" the figure, or "spot reducing." Nor can vibration cure arthritis, rheumatism, circulatory ailments, or nervous condi-

Devices for "Erasing" Father Time's Tracks

Many of these have been taken off the market as cruel hoaxes. One example is the facial stimulator which uses an electrical current to produce muscle contractions. These models claimed to improve face and neck by "erasing" wrinkles, sagging muscles, and bags under the eyes. No machine can turn back the calendar.

FOR SALE—7 20 foot lots, (trailer court deal), duplex house 28x40. Make me an offer. T. H. Murrell, ph. 8-4221.

OPEN YEAR 'ROUND

HOTEL

GULFPORT, MISS.

DID YOU KNOW?

If Marie Antoinette soiled her clothes at a banquet, she would pour salt or lemon juice on the stain right in front of her guests! The next day she instructed her maids to put the dress in the sun to bleach out the stain.

During his famous production of "Hamlet" in 1924, the great actor, John Barrymore, told his valet to "dip" the shirts he wore each night in goat's milk — to take out grease and heavy make-up stains!

Today, a new fluorine-based chemical compound developed by Du Pont clings to each fiber in a fabric forming an invisible shield which will not let moisture or stains penetrate. Fabrics protected by this chemical carry tags or labels saying they were treated with "Zepel" fabric fluoridizer, a protection which lasts through repeated washings and dry cleanings.

Social Security

Floyd B. Ellington, district manager of social security in San Angelo, issued a reminder today to all persons who are receiving social security benefits that they must notify the Social Security Administration whenever something happens that might affect the payment of their benefits. Some of the events which must be reported are:

1. Earnings from all types of work if the beneficiary is under age 72 and expects to earn more than \$1200 during the year.
2. Death of a beneficiary.
3. Change in marital status—unless the beneficiary is receiving payments as a retired worker.
4. Change of custody of a child or other person for whom you are receiving benefits.
5. Change in address.

"Social security beneficiaries received a list of these and other events that must be reported with this check earlier this year," Ellington said. "If they do not have this list, they may pick up another at the social security office."

"In fact, anyone who has a question about social security should get in touch with us to get correct information." The address of the social security office is 204 Continental Building, San Angelo, Texas. Telephone is 653-6861.

"Area residents should file their social security claims before they retire in order to insure prompt payment of benefits," Floyd B. Ellington, social security district manager in San Angelo, said today. Many people of retirement age do not get their first so-

cial security checks as early as they might, simply because they waited too long to apply for their benefits, Ellington pointed out.

Applications may be filed any time within three months of when a person wants benefits to start. Since the average processing time of a claim is 4 weeks, Ellington advised people to take advantage of this early filing and submit their applications as soon as possible.

Many claims are delayed because the applicants do not have the necessary information or papers to establish their eligibility for benefits, he said. These delays could be avoided if people would get in touch with social security office ahead of time to find out what they should bring with them when they apply for benefits.

 Write for new TRAVEL GUIDE listing fine motels from coast to coast, inspected and approved by Congress of Motor Hotels.

A booby trap in the anti-poverty program was disclosed last week when Sargent Shriver, the Administration's Commander-in-Chief, addressed the National Advisory Committee on Farm Labor. Shriver, decrying a "farm labor system that is based on poverty and destitution", took the cover off his plan to have all farm labor paid a minimum of \$1.25 per hour, plus time and a half for all hours over 40 during any one week.

Using the old scare-crow expression "corporate farms", the anti-poverty czar said they pay "substandard wages", and he said this sets a bad standard. He did not bother to identify the farms he was talking about, nor did he announce what those "substandard" wages amount to. Nor did he explain where the family farmer, who he said should be forced to pay higher wages, is to get the money to pay for this increase in cost of production. Most of them are losing money now.

The civil rights bill got a jolt last week when two Negroes broke a window and entered the Capitol Hill apartment of Miss Mari Ellen Christerson, who works for Senator Carl Curtis of Nebraska. At 2:30 a.m. she was awakened by a man who choked and beat her fiercely. In the struggle she suffered a compound arm fracture, a broken nose and eyesocket, and other injuries. The two Negroes escaped after taking \$30.

This is one but of a long series of similar attacks by Negroes on Congressional Secretaries. A year ago a Secretary was slashed by a Negro who followed her into a Capitol Hill Catholic Church at noon. Alone and kneeling in prayer, she was stabbed 10 times by the knife wielder. About the same time three other secretaries, while each walked alone to their rooms, within two blocks of the Capitol, were attacked by Negroes. Many other similar incidents have been reported.

While the Negro is not to blame for these individual acts, there are those who fear that so many similar crimes having been committed by Negroes, to grant special rights and privileges to that race, as is proposed in the Civil Rights bill, would tend to encourage more criminal acts by Negro criminals by making them feel they are in a preferred class.

Another jolt to the Civil Rights legislation was dealt by the results of the Maryland Presidential preference primary. Although the outright anti-civil rights vote (for Wallace) was only 43% of the total, an analysis revealed that a clear majority of the white people of Maryland were opposed to the bill, and voted for Wallace.

Accent on Health

Suppose you had \$25,000 to invest. . .where would you turn for advise? You have two choices — an amateur or a professional advisor.

The same goes for your health, whether you realize it or not. Good health, the experts say is worthy of a \$25,000 price tag.

Where will you turn for advice about your health investment. . .your neighbor, a health quack or a physician?

Undoubtedly, your neighbor is both interested and concerned about your health and welfare. But beware words such as "I know someone who had just the same thing you and she. . ."

Stop listening right there. Only your doctor can diagnose your case, or Mrs. Jones's. Different cases may have similar symptoms.

Whatever the source, always question a cure-all or sure-fire remedy. Carrot juice will not cure varicose veins or gout. Yeast flakes will not rehabilitate weary and worn body cells. And wheat germ oil will not cure arthritis, gallstones, cirrhosis of the liver or epilepsy.

Above all, beware the health quack. This self-designated health authority is a fake. He is intensely interested in you. . .not your welfare, but your money.

The old-time show pitchman has given way to a much more suave and impressive scientific operator. Today the bogus health expert usually dribbles impressive scientific language into his spoken and written come-ons.

The quack may be selling copper bracelets to cure arthritis or a serum to cure cancer. The cancer quack imposes a two-fold problem. Not only is he wasting the money of the hopeful patient, but he is wasting time. And time, spent on a false cancer cure, may cost the person his life.

Pay no attention to oral promises or a friend's advise about health products or devices. Read the product's label before you buy. False claims on labels are subject to prosecution; they therefore tend to be much more subdued than unpoliceable sales talk.

In any case, remember, your good health is worth \$25,000. Be wise use only your physician's advice on your investment.

CARD OF THANKS

I want to express my thanks and appreciation to all for their cards gifts, good wishes and prayers while I was hospitalized.

Mrs. Rebecca Alexander

The Kefauver — Harris Amendments to the Federal Food, Drug, and Cosmetic Act, passed by Congress in 1962, requires that the sponsor of a new drug prove it is effective as well as safe before he can distribute it commercially.

The Nation's foods, drugs, medical devices and cosmetics are safeguarded by the Federal Food, Drug, and Cosmetic Act, enforced by the Food and Drug Administration.

It is a violation of Federal law (the Federal Food, Drug, and Cosmetic Act) to distribute falsely represented, worthless, or dangerous cures and medical devices.

State Bar Column

CHILDREN IN CAMP

It's a good idea to give written consent for necessary medical care if your child leaves home for a visit or a camping trip, or if you plan to be away for any length of time.

For example, a summer camp nurse may bring a boy into a hospital with an acute case of appendicitis. But the doctor may well hesitate to go ahead and operate without the parents' consent.

Is the doctor arbitrary, and is such permission just a legal technicality? No, he is well within his rights, though he may give first aid—but only for emergency treatment where a child's health or life may be at stake. He is likely to put off follow-up care until he can reach the child's parents. A relative or baby sitter generally cannot grant consent for a child's treatment.

Even an adult must request treatment and grant consent to medical care on his own before a doctor can give it to him. Children cannot do this.

By going to your doctor you show your willingness and consent to accept this treatment. Your consent is assumed also when you ask for a house call by the doctor, or if as a result of an accident you come to a hospital for emergency treatment. If you are unconscious, the doctor may well give you emergency care, yet later he should get your consent to further treatment.

Minors cannot consent to medical treatment, and except in dire emergencies their parents or guardians must give

for them.

The consent should not be broadly or loosely phrased, but should be as specific as circumstances permit.

The principal reason for having the consent in writing is to avoid later misunderstandings. It is a protection both to the patient and physician.

(This newsfeature, prepared by the State Bar of Texas, is written to inform—not to advise. No person should ever apply or interpret any law without the aid of an attorney who is fully advised concerning the facts involved, because a slight variance in facts may change the application of the law.)

**NOW...
GREAT NEW
ENCO EXTRA!**

PUT A TIGER IN YOUR TANK!

New Power-formula Enco Extra gasoline boosts power three ways... preserves the power of new engines... restores lost power to many older engines:

- 1. Cleaning Power!** Dirt can clog even a new carburetor in a few months of normal operation—causing hard starting and rough idling. Your very first tankful of New Enco Extra will start to clear away these deposits to improve power and mileage.
- 2. Firing Power!** Spark plug and cylinder de-

posits can cause misfiring, pre-ignition and hot spots. New Enco Extra neutralizes these harmful deposits to help your engine fire smoothly and efficiently.

3. Octane Power! Octane requirements for new cars are up again this year. New Enco Extra has the high octane that most cars now need for full performance, smooth acceleration and passing power without knocking.

You'll get something extra for your money with New Power-formula Enco Extra—it's like putting a tiger in your tank! *Happy Motoring!*

HUMBLE OIL & REFINING COMPANY... AMERICA'S LEADING ENERGY COMPANY... MAKERS OF ENCO PRODUCTS

We care for your car!

Giving your car the care it deserves is our business. It means more than keeping it supplied with gasoline and oil. It means expert over-all service—service that can make your car stay young—and full of pep. As part of the progressive oil industry, it's our job to give you that kind of service. So drive in today!
