BENEFIT OF SEAT BELTS-To demonstrate what happens to persons with and without seat belts in an automobile collision, a miniature impact sled is operated by a General Motors representative in the "Previews of Progress" science show. Above, left, "dummy" passengers not wearing seat belts are ejected from the sled, while, above, right, "dummies" are held safely in the vehicle by using belts. A full-size impact sled has been used by GM since 1963 to help engineers design safer automobiles and components. The impact sled is one of nine demonstrations in the GM stage show, now appearing in this area. The 40-minute, nontechnical presentation highlights the many career opportunities available in science and engineering to over one million students and adults a year.

General Motors Science Show at School Monday

"Liquid sunshine" powers a portable radio. A small platform slides across the floor on a thin layer of air. And a "misbehaving" suitcase illustrates principles used in modern guidance systems.

Sterling City High students will see these and other interesting demonstrations when the famed General Motors science show, Previews of Progress, appears at the school on Monday, February 20, at 10:00 a.m.

"We seek through Previews to inspire more young people to make science and engineering their career and provide the trained talent America must have to keep pace with the promise of the future," James M. Roche, president of General Motors, declares.

David Gosler of General

A BROOK in the basement of Georgia Tech's civil engineering building is helping researchers study the best way to control water flow. The project, supported by the Department of Agriculture, is to aid a watershed area near Lake Okeechobee in southern Florida.

Motors Public Relations Staff will narrate the 45-minute. non-commercial presentation. He is one of seven units that take the show to more than a million students each year. One of the highlights of the show is a fuel cell, a device that converts chemical energy into electrical power. Potentially one of the most significant scientific developments of the century, the fuel cell manufactures electricity with much greater efficiency than is now obtained from conventional power plants. In the show, a few drops of "liquid sunshine" added to the Governor's \$187 cells provide enough energy to operate a portable radio, An-Million Tax Package The Sterling City FHA met other example of solar energy, Million Tax Package
