Direct Dialing Here Soon

General Telephone towns in will become the first to have new long distance service alled EDDD, according to R. McCullough, district manager. The facilities which make t possible for approximately 40,000 customers in Sterling City, Big Lake, Bronte, Carlsbad, Christoval, Eden, Eldorado, Mertzon, Miles, Ozona, Robert Lee, Rowena, San Angelo, and Sonora to dial person to person as well as station to station calls will be located in the office at 14 West Twohig, San Angelo.

Cost of the project making the new service available will be over \$1,200,000.

magnitude must be laid well Angelo, Texas. in advance, Mc Cullough stated. During the past three years, new central office buil-dings have been built in Carls-cial security contributions? part of the employer contri-bution under private pension numbers except Sterling City. bers a the time of the EDDD conversion.

Expanded Direct Distance Dialing (EDDD) is different from the conventional Direct Distance Dialing (DDD) in that it allows customers to dial person to person, collect, credit card or special calls as well as station to station calls.

Here's how EDDD works: On September 10, two new numbers --112 and 110-- will become a part of the telephone long distance routine. Dialing one of these two numbers first connects you with equipment which permits you to dial your call. To dial a station to station call, you simply dial the access code--112, then the area code of the town you are calling--then the 7-digit number you are calling. To dial a person to person or special call you dial the access code--110, then the area code of the town you are calling-then the 7digit number you are calling.

McCullough noted that instructions for EDDD service will be in front of the new telephone directory which customers will receive in September. In addition, an EDDD instruction booklet will be mailed to all customers at the time of the conversion outlining how to use this convenient, modern telephone service. The company also has speaking teams to explain this new service which will appear before civic clubs and other groups upon request to McCullough's office.

McCullough indicated that the overall conversion to Expanded Direct Distance Dialing which will involve 14 exchanges and 40,000 telephones between now and the cutover on September 10 is the largest and most complex project ever undertaken in San Angelo. When the project is complete, West Texans served by General Telephone Company will be able to dial to most points throughout the United States and Canada.
