## Jim Butlers Observe Golden Wedding

The children of Mr. and Mrs. Jim Butler honored their parents on their 50th wedding anniversary with an open house party at the community center last Sunday afternoon.

Mr. and Mrs. Butler were married in Fredonia, Texas 50 years ago by a Methodist minister, named Robertson, in his home. They lived in Junction for many years, and have lived here the past 24 years. Jim was the Texas Highway Department Maintenance Foreman until he retired a couple of years ago.

In the receiving line at the door with the honored couple were four of their children—Mrs. Jack Gamble of Ballinger, Jim Butler, Jr. of Fort Worth, Leroy Butler of Lubbock and Elroy Butler of Bronte. Mrs. Jim Butler, Jr. registered the guests. Serving the refreshments were Patricia Gamble, Mrs. Leroy Butler, and Mrs. Elroy Butler. Assisting were Cheryl and Vicki Butler.

Two sons and their families were unable to be present—being the Norman Butlers of Houston and the Delmon Butlers of Corpus Christi. About 100 guests called during the observance.

## 1968-69 School Census Underway

The school census for the year beginning September 1, 1968 is now being taken. All children who will be six years old by September 1, 1968 are to be registered by the end of January, 1968. If you know of a child who has not been registered call the school at once. Any child who will be less than 18 before September 1, 1968—they should also be registered.

Also any person who will not be over 18 by August 31, 1968 and not in school, must be registered. This may be a young married man or woman or some person working in the community. Please let the school officials know this at once. If you know someone that might be overlooked.

Most of the school children enrolled have been registered, but the next years six year olds and the out of school youths are the ones usually overlooked. Each child registered means about \$85.00 to the school for the 1968-1969 school year, so it is very important that no child be missed.

## Change in Driver's License Laws

AUSTIN — Col. Homer Garrison Jr., director of the Texas Department of Public Safety reminded Texans today that a color photograph becomes a standard part of all drivers' license issued after January 1, 1968.

"The change makes it necessary for all drivers to renew licenses in person at one of our Department offices," Garrison said, "and we have been working toward setting up a procedure that will not cause excessive delay when a person comes to us to renew a license."

Garrison explained that the change in license was incorporated into law by the legislature.

"Renewal notices will be mailed to each driver, just as always," Garrison said. "However, under the new procedure, each driver must take the renewal notice to the nearest DPS office. There he will be given a standard vision test, sign the renewal notice and step in front of our camera. The picture will be snapped and a receipt will be issued to enable the person to drive until he receives his new license in the mail."

Garrison explained that about 250 full-time license offices would be in operation over the state to service license renewals. Issuance of new licenses will also be conducted in many of these new offices as well as at offices already established.

There are currently over 5,800,000 licensed drivers in Texas and about 2,500,000 licenses are renewed annually. To facilitate the process all licenses after January 1 will be renewed to expire on the birthdate of the licensee. If the person holds a license ending in an even number, it will be renewed for a four year term if the license ends in an odd number, it will be renewed for two years the first time, then for four years each time thereafter. The cost to the driver remains the same per year.

The new license will be ap-

San Angelo — The Texas Highway Department announced that work has begun on U.S. Highway 87, between 0.4 miles south of Farm-to-Market road 2105 to 2 miles north of Sanatorium. Allan Construction Company of San Antonio, contractor on the project, began work November 13, 1967, and it is estimated that work on the project will be completed by January, 1969.

C. C. Stroud, Supervising Resident Engineer, in charge of the project for the Texas Highway Department, stated that traffic would be routed through construction where necessary, and warned that although adequate barricades and warning signs will be placed, motorists should use extreme caution while driving through the construction area as it will be heavily traveled by large construction equipment.

## Alien Information Confidential

Information furnished by an alien in making his annual address report to the Government is confidential.

According to Mr. John W. Holland, District Director of the San Antonio District Immigration and Naturalization Service office, the information furnished by alien in reporting their addresses has been declared confidential by statute.

These reports must be submitted during January each year by all aliens in the United States, with few exceptions. Forms on which to submit the reports are available at any Post Office or office of the Immigration and Naturalization Service. Persons who are unable to pick up a form because of illness, or other reasons, may have a relative or friend obtain a card for them.

The card should be returned to one of these offices.

Parents or guardians or aliens under fourteen years of age submit reports for such children.

The Sterling County Commissioners Court last week called for a \$200,000 bond issue election on February 17. The issue is for an extended nursing care home to be used in conjunction with the Sterling County Hospital. The facility would be built to the east and south of the hospital.

The commissioners hope to get a Hill-Burton grant to pay for half the home, and if that proves out, only half of the bonds will ever be issued.

The commissioners had indicated last month that they would call an election for the project, and the actual date was set Monday of last week.

Architect John Chiles Allen of Austin has drawn up sets of plans for the project, so that everything complies with the state and federal rules about such facilities, and also in a manner calculated to get the Hill-Burton grant.

The commissioners took the most of the day working on the plans for the "home", but in the course of the day, they raised the salaries or wages of county employees and office holders ten per cent, said County Judge Jake Martin.

The usual voting boxes over the county will be used as such a county-wide bond election must be held all over the county by law, it was said.

In elections such as a bond election, or in precinct races, voting boxes have to be in all precincts, states the law.

## School Making Survey Here

The Sterling City schools are making an occupational survey of all business firms and ranches under the direction of superintendent O. T. Jones.

Miss Algerne Tomlinson and Mrs. W. Fincher are making the contacts of all firms. This is necessary to increase the local vocational agricultural and home economics allotments. It is hoped all firms and ranchers will help in this survey.

### RUSSIA THREATENS U.S. LEAD IN MAKING FRIENDS ABROAD

The seas around us are recognized as a major source of food for hungry populations of the world—who look to any world power who offers to feed them.

Although America is engaged in a battle for world leadership, she has let herself slip from second place to fifth place in world commercial fishing. The Soviets passed us with sickles flying in 1960, and Red China is another nation which has sailed by the U.S. in fish production.

How did it happen? According to Joseph Curran, president of the National Maritime Union, part of America's problem began after World War II when American fishermen found themselves competing with every fishing nation of the world. The development of new types of freezing equipment now allowed foreign fishermen to export raw frozen blocks of fish, relatively free of duty. Then they could process them in the U.S. and undersell the American producer.

Also, while Russia concentrated on developing superior fishing vessels with advanced equipment, the U.S. largely ignored its own fishermen—most of the U.S. money spent on fishing development was used to help foreign nations with their fishing industries to compete with ours!

Even today, in spite of Russia's tremendous gains, the most ambitious proposal to date for the U.S. calls for a fleet of 2,000-ton Stern Trawlers. This trawler will be al-

most three times the size of the largest U.S. fishermen now in operation—but it is still smaller than the wide-ranging trawlers, that are accompanied by a 44,000-ton Vostok Class "mother ship." The Vostok vessels are literally floating fish factories, capable of processing, freezing and storing thousands of tons of fish caught by its brood of trawlers.

What can we do to "catch up on the catch" with half of the world begging for food?

One answer is the long-range program proposed by the National Maritime Union, to create a U.S. fishing industry capable of competing with the Soviets.

The program would (1) level restrictions on imports of fish and fish products (2) increase subsidies for fishing vessels (3) develop fish protein concentrates for use in foreign aid (4) give long term low interest loans for building and rehabilitating fishing vessels (5) develop new shipyards specializing in fishing vessels; and finally (6) develop ocean fish farms off the coast of mainland U.S., Alaska, Hawaii and Puerto Rico.

Senator Warren G. Magnuson, Chairman of the Senate Commerce Committee has said, "What greater challenge, what more satisfying reward than the production of food from the sea, that the cause of peace may be better served?"

And it is time the U.S. started "fishing for compliments" at home in its efforts to make friends abroad!
