AROUND THE COUNTY

ARTHUR BARLEMANN, JR. COUNTY AGENT

The West Texas Fair opens for its week run at Abilene on Monday and closes on Saturday, September 13. This is one of "country fairs" still in existence and draws large crowds with added attractions such as Eddie Arnold, who is one of this year's drawing cards two nights next week.

Abilene has added a coliseum to its facilities at the Fair Grounds. Though not quite finished at this time, it will be used for the fair, according to the manager, Joe Cooley.

Amy and Becky Hodges have entered their registered Ramboulllets in the show there. Becky will compete in the junior division while Amy will compete in the open division—not so much family competition that way.

The pecan weevil made its appearance in Sterling County the early part of this week. John Brock found the first ones in traps over the weekend. The trap was located in his mother's trees; these trees have had a history of weevil damage during the past few years. None had been found in the trap at John's place by the middle of the week.

The weevils spend the majority of their life cycle in the ground, emerging after rains or irrigation in late August and early September. After emerging, the female punctures the nuts and deposits the eggs in the nuts. Here the young hatch and feed inside the nut. When they reach maturity, the creamy white grubs chew a hole in the pecan and drop to the ground where they bury themselves for to twelve inches deep in the soil late in the fall or early in the winter. Some will emerge from the ground the following year, while others will not emerge for two or three years.

If you have trees that have had a history of weevil damage, you might want to consider spraying to stop the damage. The recommended spray is two to three pounds of

RAIN HERE

From one half to nine-tenths rain fell here in town Tuesday night. More fell on ranch land to the south and west.

Coming on the heels of the good rains of the past two weeks, hopes are high for a good cover or grass and weeds this fall and into the winter. Most areas of Sterling now has chalked up more than five inches in the past weeks and the range or pasture lands all are beginning to green up and look good.

Seven per hundred gallons of water. It will be necessary to spray after each rain or irrigation.

Next week, September 8 through 10, all the extension agents in District 7 will be in San Antonio for a meeting of the district with the two South Texas districts. This meeting is held every other year in place of the state conference. Meetings of the same type are held at three other locations in the state. When we met in San Antonio in 1967 hurricane Beulah hit the coast sending heavy rains inland. It could have been measured in feet in San Antonio rather than in inches. If Francella who is now blowing around in the Caribbean off the coast of Honduras headed north, there could be a repeat performance.

An active ingredient having anti-cancer properties has been isolated from a plant extract by U.S. Department of Agriculture scientists. The ingredient has been identified as li-riodene. It has been extracted from the dried wood and bark of the Annona glabra, a relative of custard-apple family of shrubs and trees found in Florida. Experiments conducted by the scientists have shown that the ingredient significantly inhibited the growth of human cancer cell cultures in the laboratory.

Melvin Foster New Deputy Sheriff

Melvin Foster is the deputy sheriff in the office of sheriff Jim Cantrell. Melvin, a son of Mr. and Mrs. Forrest Foster, started this week. Mrs. Marvin (Wanda) Foster had been serving as office deputy but she resigned to teach school here this year.

Recently while the Jack Turners of Dallas were away in Ruidoso for a few days, someone broke into their Dallas home and carted off dishes, clothes, TVs, and also some furniture. The burglars disturbed the next door neighbors—who in turn, by turning on lights—scared the burglars off.

It was announced that the telephone company was planning to move a repair and service man to Sterling right away. The club had asked for a service man to be stationed here.

Finances of the club were discussed and it was decided to have a turkey shoot, a bingo game and an auction sale in the near future. The club has need of new members—in fact—about ten new ones are actually needed to keep going. Any new member will be welcomed.

Social Security News CHILDREN'S BENEFITS

The children of a deceased woman worker now have the same right to social security payments on their mother's account as they do on the account of the father, says Ted F. Moellering, District Manager of the Social Security Administration in San Angelo, Texas.

Some children, who could not qualify for benefits at the time their mother died, may now be paid. These survivors' insurance payments may continue each month to age 22 if the child remains in school and does not get married.

"This change is the result of a new definition of 'dependency' in the Social Security Act," Mr. Moellering explained. "Of course, the deceased mother must have worked on social security jobs long enough to be insured. In some cases, children whose mother died as early as 1947 can now be paid."

"An application for the child's benefits must be filed," he said. "We would like for anyone who believes he may be eligible to receive the payments to get in touch with the social security office without delay."

This applies especially to those whose applications were denied at the time of their mother's death. Detailed information can be secured from the Social Security Administration located at 300 West Harris in San Angelo, Texas, or see the representative when he is in your area.

Civil Service FEDERAL CAREER OPPORTUNITIES

The U.S. Civil Service Commission has issued three nationwide announcements of mid-level Federal career opportunities in professional fields, and a fourth outlining opportunities for Stenographers and Typists in Washington, D. C. and vicinity.

Interested applicants can get the announcements from Federal Job Information Centers in many large cities, from many post offices, except in cities where Federal Job Information Centers are located or from the Interagency Board of U.S. Civil Service Examiners, 1900 E St. N.W., Washington, D.C. 20415.

Behind the 8-Ball

As school opens here this week we are reminded of the past years by a story that was in the San Angelo Evening Standard about a group of Sterling men in 1890 being in Angelo buying a bill of lumber for a school in Sterling County. The item said that a group of about forty men came for the lumber, including Col. Jno Henry Maloney, Bob and Will Foster, Uncle Moses Allen and Andy Jones.

The school house was to be built with a Masonic Hall above it.

Wonder if they could foresee a school building like we have here today?

Social Security

The least understood service under Medicare is home health benefits, according to Ted F. Moellering, social security district manager in San Angelo, Texas. Mr. Moellering explained that these benefits are available to home-confined Medicare beneficiaries in most localities, when ordered by a doctor and when furnished by a participating home health agency. These agencies send skilled people to the home to provide health care, such as part-time nursing; physical, speech and occupational therapy; use of medical appliances; and part-time services of home health aides.

Home health benefits are furnished under both parts of Medicare: Part A, hospital insurance, and Part B, supplemental medical insurance. Part A takes care of all of the costs of up to 100 visits for up to a year after the most recent discharge from a hospital or participating extended care facility, under these conditions:

1. The beneficiary was in a participating, or otherwise qualified, hospital for at least 3 consecutive days;
2. He is confined to his home;
3. A doctor determines the need for home health care and sets up a plan for it within 14 days after discharge from the hospital or participating extended care facility; and
4. The home care is for treatment of the same condition for which he was hospitalized.

There is no requirement of prior hospitalization for these services under Part B. Up to 100 home health visits each year are covered, if:

1. The patient is confined to his home;
2. A doctor determines the need for home health care; and
3. The doctor sets up a home health care plan and reviews it periodically. Part B pays all but the first \$50 and 20 percent of the remainder of the costs of covered medical services in a calendar year.

STERLING COUNTY OIL-GAS ROUNDUP

Sterling County oil and gas wells pumped some \$8.4 million into the county's economy last year, according to a study just released by the Texas Mid-Continent Oil & Gas Association.

Value of production from oil wells was \$7.9 million and from natural-gas wells \$467,000, based on the most recent

figures available to the San Angelo Social Security Office are: "Do social security benefits for children stop at age 18?" "Do student benefits continue during the summer vacation?"

Ted F. Moellering, District Manager said until 1965 a child's benefits were stopped at 18 unless the child was severely disabled.

Since 1965 benefits have been available to a child of a retired, disabled, or deceased worker who is a full-time, unmarried student between the ages of 18 and 22. Mr. Moellering added that this not only applies to high school and college students, but also to those attending approved vocational or trade schools. Examples are barber schools and schools of nursing.

Student benefits continue during the summer vacation if the student meets two additional requirements. The period of non-attendance must not be more than four calendar months, and the student must intend to be a full-time student immediately following this period.

When a child who is receiving benefits reaches age 17½ a notice is sent to the adult who receives the benefits for the child. The notice tells the adult to contact the social security office immediately if the child will be a full-time student at age 18.

Failure to contact the office will cause his checks to stop the month before the child is 18.

Student benefits are terminated when a student marries, dies, is no longer a full-time student or becomes 22

U.S. Bureau of Mines figures compiled by the Association. The county ranked 108th in the state in value of production.

"Output from Sterling County is part of this country's domestic oil supply which is endangered by some of the proposals now before Congress," commented Corbin J. Robertson, Association president. "Attempts to destroy percentage depletion provisions of our income tax laws and to nullify present controls over imported oil could discourage further development of Texas oil resources. Eventually oil markets now shared by the county would be given over to foreign producers."

Last year, the county produced 2.7 million barrels of crude oil and 3.6 billion cubic feet of natural gas.

Of this total, county landowners and others with mineral interests received royalty payments of \$1.1 million.

The state received \$398,000 in production taxes with crude oil accounting for \$365,000 and natural gas \$33,000. A number of school districts in the county lean heavily on oil production for ad valorem tax support, such as Sterling City, 49.2%.

Drilling expenditures were an estimated \$4 million. Of the 51 wells drilled in the county, 21 were completed as oil wells and 1 as a gas well, according to Ira Rinehart's Yearbook. The 29 dry wells or holes cost \$2.2 million. There were 18 wildcats drilled.

The Texas Employment Commission lists 23 workers on oil and gas payrolls, which totaled \$138,000.

In Our Time

INSECTS WERE ON THE SCENE LONG BEFORE MAN... THEIR CAPACITY FOR MULTIPLYING IS INCREDIBLY GREAT...

THE U.S. BUREAU OF ENTOMOLOGY HAS DEMONSTRATED THAT ONE HIBERNATING FEMALE FLY COULD EASILY PROVIDE 5½ TRILLION MORE FLIES FROM APRIL 15 TO THE END OF SEPTEMBER.

FLIES, LIKE MOST INSECTS, ARE BORN EDUCATED. NO ADULT NEEDS TO FEED THEM. WHEN THEIR LIFE PURPOSE HAS BEEN ACCOMPLISHED, THEY DIE.

MAN, AS THE INGENIOUS OBSERVER, RESPECTS THE BEE AS A SOURCE OF FOOD FOR ITS ROLE AS POLLINATOR OF PLANTS. HE ABHORS THE FLY FOR ITS ROLE AS SCAVENGER AND CONSIDERS IT A PEST.

ONE OF THE MOST POPULAR CONTROL DEVICES ON THE MARKET TODAY FOR SMALL FLYING INSECTS IS SHELL'S NO-PEST STRIP INSECTICIDE. ONE HANGING IN AN AVERAGE SIZE ROOM OF 12'X10'X8' WILL KILL FLIES AND MOSQUITOES FOR UP TO A THREE MONTH PERIOD.
