HOME AND FOREIGN INTELLIGENCE.

A Cotton Laden Vessel Burning at Chatham.
The International Commercial Union of Chicago.

THE DEBTS ACROSS THE BRITISH.

Special Dispatch to the Daily Express. GALTBRIDGE, November 13, 1878. The vote of Malaga county gives Hancock 372 and Johnson 218.

INTERNATIONAL COMMERCIAL UNION AT CHICAGO.

Chicago, November 13.—The Commercial Union assembled this morning, and after the preliminary exercises, the majority and minority reports from the committee on resolutions.

THE ELECTION AT JACKSONVILLE.

Jacksonville, November 13.—The Republican has ordered the election of the Supreme Court to be held on the 14th inst. when the petitioners will appear against the county canvassing board.

NEW YORK NEWS.

New York, November 13.—A special messenger has been sent to the South Atlantic coast to investigate the alleged case of a man who was charged with the murder of a woman.

MINISTER NOTES REPLY.

London, November 13.—In a letter to Paris Minister Rousset writes in reply to the public charge by Leverett Ballou of his (Rousset's) conduct in the alleged Florida fraud.

YELLOW FEVER NOTES.

New Orleans, November 13.—Two deaths from yellow fever during the last 24 hours, one a child in the Sixth district, and one a sailor at the Hotel Dieu.

POLITICAL NOTES.

St. Louis, November 13.—A dispatch from Kansas says the majority on joint ballot in the Legislature is eight. It is said over thirty members are expected to vote for Ingalls.

THE FIRE RECORD.

St. Louis, November 13.—The paint shop, No. 127, on Broadway, was destroyed by fire this morning. Loss \$100,000. The property belongs to the Mexican government.

GENERAL FOREIGN INTELLIGENCE.

London, November 13.—Show signs of improvement for this time of year in the cotton market. The price of Egyptian cotton has advanced 1/2 cent.

THE VARIETY OF LITERATURE.

London Specimen.
The productive mind is as much tempted to self-occupation as the stolid intellect to idleness.

STATE NEWS.

Five or six cotton gins have been burned in Falls county this season. The Methodist of Denison will begin the erection of a fine brick church in that place.

SPORTING INTELLIGENCE.

Enfauk, Ark., November 13.—In today's meeting there were three fights. Billy King, Billy King, and Billy King. Billy King was the victor in all three.

TELEGRAPHIC BRIEVITIES.

St. Louis, November 13.—The Alliance of Laborers of the West has elected a new executive committee. The new committee is headed by J. W. Brown.

GENERAL FOREIGN INTELLIGENCE.

London, November 13.—The price of gold has advanced 1/2 cent. The price of silver has advanced 1/4 cent.

THE MANY PROCESSES INVOLVED IN MAKING THEM.

From the Trade Circular.

The first operation in receiving the goods from the importer, is to cleanse them to facilitate this process the cleaner, which comes in lumps, resembling in size and shape a solid cartouch, is introduced into a large circular mill, revolving with great speed and constantly wetted. Then these pieces are cut into small cubes by means of a chopping machine which resembles in its action a common jaw crusher—and afterward the pieces are reduced to minute particles by another machine, which, at the same time, washes out all the dirt and sand. Besides the accidental admixture of foreign substances, the soap and water are in the water, and are washed out and ashes to increase the weight. This soap, unless completely removed from the gum, will show itself in the drying room, and will cause a choppy surface, which will depend upon the care taken at this stage.

The small particles of rubber, all clean, are shoveled into another machine which cleans them together into rough sheets. These sheets are then taken to the drying room, where they remain about three months to admit of the complete evaporation of the moisture. It is an important point throughout to extend the moisture of the gum, for if it is made up into sheets before it is sufficiently dry, the watery particles will expand under the heat of vulcanization and cause the sheets to become brittle and to crack.

After the gum is sufficiently dry, it is carried into the grinding room, and fed into machines called grinders, where, passing between heavy iron rolls, heated with steam, it is softened so as to permit of the admission of the vulcanizing material. The roll for low priced goods is led to a heavy cleaning, by which less expensive material than rubber is added to lessen the cost. Coal tar, lamp-black, and other cheap and bulky articles are used for this purpose.

The gum is then run into long sheets by means of a mangle, the sheets, as delivered from the mangle, are then cut into convenient lengths, are carried to the sheets and cut into upper and lower by means of patterns and sharp wet knives in the hands of skilled workmen. The sheets are then rolled in another cylinder, and are cut into various sizes, many thicknesses at once, with dies in a drop-press, are distributed to those who make up the boots and shoes.

After various strengthening pieces of cloth—stiffening, etc.—the rubber upper is carefully laid out on a table flat, and is smoothed and smoothed by means of a mangle, and then trimmed, the sole is put on and rolled down firmly, so as to adhere closely in every part. The shoes are now collected and carried to the various rooms, where a coat of elastic varnish is quickly applied, and the shoe, now of a greenish brown color, is hung in the heater. This heater is a large iron vessel, in which the shoes are heated, the heat is gradually run up to nearly 300 degrees, under the supervision of expert hands, who remain all night carefully watching the progress of the baking, as indicated by thermometers hung in the room, but visible through small windows in the wall of the heater. Too much heat renders the rubber brittle and hot, and not quite enough heat detains sulphur in the shoe, and causes its appearance afterward when they become what are called "white" goods. These white or sulphurous goods are really better to wear than those completely cured. During vulcanization the gum becomes very soft and runs together into homogeneous mass, and finally, when a higher point is reached, it hardens again. After remaining in the heater a sufficient time—about eight or ten hours in all—the shoes are carried at an early hour in the morning into the packing room, where, after being removed from the lasts, they are laid in long glittering rows on tables. Then comes along the inspector, who examines every pair very closely and passes judgment according to the character of the workmanship.

A Notorious Forger in Texas.

Dallas Commercial.

Information has been received in this city from Kansas that the notorious Fawcett, alias Emmond, the Bank robber, who was accompanied by a handsome woman, has left that State for Texas, and the pair are now no doubt somewhere in this vicinity. Fawcett is a man with dark hair and whiskers, slightly peaked-nose, and the woman about twenty-four years of age, with round face, dark hair, and wearing a very red hair.

Detective Combing, of New Orleans, tracked the couple as far as St. Louis, where they were seen on the 10th inst. Fawcett came to St. Louis, with the red-headed woman and persuaded her to marry him under the idea that he was an English lord. The detective, not knowing the English lord and his wife with Auburn locks skipped out. The hotel registers have been examined, but nothing has been found of them. Fawcett alias Emmond, was arrested in New York about eight weeks ago for committing forgery to the amount of \$20,000. While in jail Emmond's statement was that he had received the notes from a man in a saloon, but the detective concluded that he was simply the agent of a real forger. The detective is a high-toned German criminal, known to have been associated with Budwell and MacDonald in their forgeries upon the Bank of England. The detective also recollected that the chief operator of a New York gang of forgers, who had done some pretty work in New York, Boston, Baltimore and New York. Emmond returned to the Paris Exposition and had recently returned. Then it didn't take a great while to discover that a large number of forged letters of credit on the Union Bank and other banks had been presented and paid in different Canadian cities, in Philadelphia, Boston, Baltimore and New York. Emmond was captured with \$60,000 worth of them on the steamer, but escaped through some technicality. The amount of forged notes in existence issued by this gang was, of course not known, but calculations and a careful comparison of notes soon led to the conclusion that there were considerable sums of \$100,000 worth of them on the market. From the above it can be seen that the authorities are after big game, and the police force of this city should keep a strict look out for the pair.

Five Rules for Young Men.

From the Hawkeye.

Always pick up a hot poker by the cold end.

Never spend your money when you can get things for nothing.

Do not despise a twenty-cent cigar or a \$2 dinner because another man pays for it. Remember that it costs more to do a high-priced dinner than it does to take a back pay in a free church.

Nothing is troublesome to you that other people do for you willingly.

Never buy what you don't want simply because the man says he is just out of it. Do not purchase your own elbow for the lot of another man's neck.

Haystack and the South.

We are losing faith in President Hayes, and if we had even taken him up, we are afraid we would not be obliged to pay him down. He seems to have forgotten all his pledges to the country, and is using, in an indirect way, what power he possesses to bring about a feeling between the races at the South.
