PRICE FIVE CENTS

Critical Condition

OF PRESIDENT GARFIELD.

He had another fit yesterday and more are expected—great apprehension prevails among the most hopeful.

MORNING BULLETIN.

ELBERON, N. J., September 17.—The morning examination and dressing the president's temperature was 98°, pulse 108, respiration 21. The fluctuations of pulse during the night varied from 116 to 140, the temperature during this time not deviating much above 100°. The patient is well, having nourished himself on a proper diet. His cough was not troublesome and expectoration moderate. The discharge from the wound is more healthy and the color of granulation slightly improved.

BETTER THAN YESTERDAY.

ELBERON, N. J., September 17.—The doctor's report this morning shows the president's condition this morning better than they yesterday. They do not consider him any the improved, however, except that the wound looks better.

The cabinet is expected to arrive today.

Deliberate blood has been administered to the president by one who does not know his name. Arrangements have been made to have fresh blood brought here daily. The patient has taken a few drops of whisky he employed Messrs. Holden & Hendrick of this city, to bring action against the manufacturer.

There are good results expected from this treatment.

NOON.

ELBERON, N. J., September 17.—The president's condition this morning is better than yesterday. The pulse ran up to 137, and at this hour, 12:35 p.m., is 108. The temperature does not show any change. The arrangements have been made to have fresh blood brought here daily. The patient has taken a few drops of whisky he employed Messrs. Holden & Hendrick of this city, to bring action against the manufacturer.

There are good results expected from this treatment.

DEADERICK CRITICAL.

ELBERON, N. J., September 17.—The president's condition this morning is better than yesterday. The pulse ran up to 137, and at this hour, 12:35 p.m., is 108. The temperature does not show any change. The arrangements have been made to have fresh blood brought here daily. The patient has taken a few drops of whisky he employed Messrs. Holden & Hendrick of this city, to bring action against the manufacturer.

There are good results expected from this treatment.

FROM W. C.

Death of R. Laird—Live Alligator Street Fight.

WACO, September 17.—Robert A. Laird, the son of Laird & Morarity, prominent contractors on the line of the Texas & St. Louis railway, died yesterday morning at his residence in Waco. He was in ordinary health up to Wednesday. The physicians called and pronounced the malady black jaundice, an aggravated type. He was not married, but had, for several years in Indian previous to coming to Texas. He was held in high estimation by his friends and fellow contractors as a competent, trusty man.

W. M. Miller, commonly known as O. A. Miller, who has been in Waco, now doing business in Hamilton, Tex., arrived to-day, bringing with him a large alligator which he had captured about twenty minutes, during which time the pulse ran up to 137, and at this hour, 12:35 p.m., is 108. The president vomited considerably. His pulse at this hour does not show any change. The alligator is in a better condition. The cough is less annoying and expectoration not excessive. The patient is expected to improve.

The pulse now is 108.

Report Corrected—The International Coal Contract to be let for Extension of the Iron Mountain.

Special Telegram.

PALSTINE, September 17.—The telegram to the Houston Post from Palestine saying that Texas Assistant general manager of the Texas Pacific had appointed him to the position on the International, is not true. No such appointment has been made.

Engines returned from the front yesterday. The president's condition has improved, though still with pain in the stomach. Dr. Boynton, in answer to a question, said he had no doubt the president vomited considerably.

His pulse at this hour does not show any change. The alligator is in a better condition. The cough is less annoying and expectoration not excessive. The patient is expected to improve.

The pulse now is 108.

Report Corrected—The International Coal Contract to be let for Extension of the Iron Mountain.

Special Telegram.

LONG BRANCH, September 17.—After the rigor passed, the patient commenced perspiring quite freely. During the rigor the patient was delirious. The convulsions were rigorously attended to be evidence of acute pneumonia. Dr. Boyton says the rigor will result in an abscess on the right lung.

SOME BETTER.

OFFICIAL BULLETIN. 6 P. M.—The examination of the president at the time of his admission to the hospital at 1:30 p.m. he had a severe chill, lasting several hours, followed by perspiration, and when the chill had been made there was a gradual fall of temperature with diminished frequency of respiration. At 8:30 p.m. at the examination the temperature was 98°, pulse 102, respiration 21. He has slept well since the rigor passed. The rigor at the time of his admission to the hospital was 108°, pulse 21, respiration 18. He has slept well since the rigor passed. He has taken his nourishment at proper intervals, and the cough has less frequency and usual sign. Signed by Dr. Agnew and Bliss.

NOTICE.

Extension of Texas and St. Louis Narrow Gauge Required—Emergency Vote.

Special Telegram.

DALLAS, September 17.—It has been determined to extend the Texas and St. Louis narrow gauge railroad immediately from Mount Pleasant towards Dallas for a distance of forty miles. The construction of the line will be completed in four months, and will be pushed to completion at once. It is stated on reliable authority that the cost of the work will be placed, signed, sealed and forwarded to the state of Texas, and the amount will be paid to the contractor.

Between Lampasas and Belton—Part in Pursuit—Right of Way—Northern Rte.

Special Telegram.

LAMPASAS, September 17.—The bond for the right-of-way for the G. C. & S. R. railway through this county has been made out and forwarded, and now before the court the iron horse will start into Lampasas.

The norther which blew up Tuesday evening still continues, and a cold winter is predicted.

Cotton is still coming in lively, and fair prices are being paid for the feeders.

The stage between this place and Belton will be pushed to completion at once.

Mr. J. D. Kinnebrew's cotton and flouring mills are constantly busy.

W. H. Gandy returned to-day from a trip to Washington.

He had 21cences last night and three ounces this morning.

There has been any indication of child bed fever.

There were indications of an approach of a child bed, but it was observed.

Do you anticipate that any more will occur?

It is quite possible and within the range of possibilities, and would not be surprising.

He is not strong now.

He had a cold when the rigor occurred in Washington.

INTERVIEW WITH DR. BOYNTON.

LONG BRANCH, September 17.—How much blood do you administer Dr. Boynton?

He had 21cences last night and three ounces this morning.

There has been any indication of child bed fever.

There were indications of an approach of a child bed, but it was observed.

TEXAS PRINTING COMPANY.

John W. Garrett denies the report that Jay Gould has bought control of the Baltimore and Ohio railroad.

Texas' Lincoln Logs figures with ease, grace and rapidity, and makes a strong defense of his official conduct in connection with the redemption of bonds.

Today Mr. J. W. Simpson retires from the position of general agent of the New York associated press after fifteen years' service in that capacity. He will be succeeded by Mr. J. C. Huston.

JAMES now claims a saving of \$1,000,000 by reductions in the mail service, and hopes to bring it up to \$2,000,000 by the January 1st. He says he is sure that if it is not hard enough, he might disintegrate a dozen or so of the mail daily sent out from New York and Philadelphia.

The New York Tribune says that cotton seed oil will prove to be an excellent substitute for oil. New Orleans has improved on that, for two of her inventive geniuses have manufactured a cotton seed butter that throws oleomargarine completely in the shade. So says the Democrat.

Ex-Gov. DIXON of Maine has been elected to congress as successor to Frey from the second district. The democratic candidate withdrew from the campaign, and it was thought the democrats would vote for the greenback candidate, but they didn't, and the republicans cut another notch on their stick.

Inspectors have been up at San Fran's Indian agency, and the result is a recommendation is made that the agent be requested to resign. It seems that in breeding cattle, Tiffany, in a large number of instances, by mistake got hold of his own branding iron instead of that of the U. S. The Howgate plan of book-keeping has been introduced, and there was evidence to show that Tiffany was making a fat thing in divers and sundry ways.

A special says the French government does not accept many practical contributions from the United States. There is no reason whatever to suppose that it has any meaning hostile to France. Whatever Prince Bismarck's policy may be, it will certainly not be modified by a few political speeches, and there is no evidence whatever that he intends to abandon the Austrian alliance for one with Russia, or do anything calculated to lead to an interruption of the present friendly relations with France and Germany.

The republicans carried the recent election at San Fran over the democrats, who were consolidated with Kalloch and his followers. And the rebels to the democracy for attacking such disgraceful barnacles to their cause was proper and just. It was thought, by the short sighted, that it was a great strike to secure Kalloch and his gang to the support of the democratic ticket; they did not know that Kalloch lost to them probably hundreds of good men and their following.

A W. S. says the civil authorities are displaying great reluctance in proceeding against Mason, and the general impression seems to be that there "take no steps, but will leave the case to be dealt with by the military authorities. If Gen. Sherman's sentiments are shared by other officers of the army, it would appear that Mason would be safe. The military law, however, is very strict, and the punishment applicable to his case under the military law, in some of the departments subscription papers are in circulation to raise a fund for the would-be assassin, while the postoffice department, the employees go so far as signing a petition asking for his promotion in the army, as was recognized by his services, which was a rare honor for a standing at a distance and shooting at a helpless, unarmed prisoner in a cell.

This appears to be considerable solicitation and meanness about the counting of the vote on the university question. The agitated ones might as well keep cool. What the returns are all in, if they ever all get in, the old scold will refill and light his pipe and count the votes as he declared he would—until the people cast for Austin for the university, with the medical exception. It is preposterous to claim to believe a half-dozen men in the state who voted for Austin for the university entire would not have voted for it without the medical department, if they had known it was to be separated. The medical department, however, did not vote for Austin for the university, it would appear that Mason would be safe. The military law, however, is very strict, and the punishment applicable to his case under the military law, in some of the departments subscription papers are in circulation to raise a fund for the would-be assassin, while the postoffice department, the employees go so far as signing a petition asking for his promotion in the army, as was recognized by his services, which was a rare honor for a

Testimony of Suggets.

We have a large stock of sugar for
years, and regard it superior to anything known

for dinner, it is recommended to cure

the sugar, and we have a large stock of Green
& Co., Forsyth, Ga.; Pemberton, Barnes &
Brewer, Atlanta, Ga.

Atlanta, Ga., July 1, 1871.

Mr. Suggets, who has given us a good
opportunity to show our quality, said he:

"There's nothing Irish about me."

He was very anxious to know if it had
come from a well-known establishment.

"It was his calm rejoinder.

His expression was like that of a man

who has just won a battle.

He is a man of great energy and

confidence, and I am sure he will do

well in his new field.

It is a man of great energy and

confidence, and I am sure he will do

well in his new field.
