

He Never Will Learn

HOPE ITEMS

Frances Johnson, Reporter

Over an inch of moisture fell during the snow Saturday and Sunday here it has been estimated.

Bryant Williams went to Kansas City last Friday with a shipment of eight hundred fat lambs from his feeding pens on his farm here.

Mrs. Mollie Hodges, Mrs. Robert Parks and Mrs. George Teel motored to Amarillo Saturday where they will visit Mrs. Hodges' daughter Mrs. Leon Goforth.

Alma Lane, Clabern Buckner and Raymond Buckner motored to Artesia Sunday morning, Alma Lane and Clabern Buckner going from there to Lake Arthur to attend the funeral of R. F. Beasley.

Mrs. W. S. Medcalf and Mrs. R. L. Means returned from Albuquerque the first of the week where they attended the annual session of the grand chapter meeting of the Order of the Eastern Star of New Mexico.

Mrs. Irvin P. Murphy received word here Saturday night that Mr. Murphy, superintendent of Hope schools, was injured in a car wreck near Roswell Saturday. Mrs. Murphy left here immediately with Pat Riley of Carlsbad for Roswell.

The Civic League of Hope sponsored their third benefit dance at the Woodman hall Friday night with a good attendance. Among the candidates present from Carlsbad were: Cis Stewart, Howell Gage, Mrs. Ethel Highsmith and George Spencer.

Mr. and Mrs. C. J. Ferrell of Artesia have purchased the Rightway Hotel in Carlsbad and will take charge April 1st. Mrs. Ferrell has had charge of the music club of Hope the past several years and Mr. Ferrell has been employed at the Artesia hotel.

Hilary White, Jr., and Howell Hamill motored to Carlsbad Sunday where they met Mrs. Sam Zumwalt, Mrs. R. J. Murrah and Miss Olive Blanche White, who arrived on the bus from El Paso and came on to Hope to be at the bedside of their grandmother, Mrs. Sallie White, who is ill at the home of her son Hilary White, Sr.

MISS PALMATEER CALLED TO AMARILLO THURSDAY

Miss Elsie Palmateer was called to Amarillo last Thursday on account of the terrible accident in the family of her brother M. A. Palmateer.

The three children of Mr. and Mrs. Palmateer were sitting on a curb and were struck by an automobile which swerved and climbed the curb, killing Shirley Pauline, age three, instantly. Elma Roberta, age five, is not expected to recover, while George Henry, age two, is reported out of danger.

The automobile was driven by Joe V. Moore, an Amarillo attorney. He is charged with murder without malice and drunken driving. Miss Palmateer, who is a teacher in the public schools, returned Sunday.

LIVE GAME MAY BE SOLD IF PURPOSE OF PROPAGATION

SANTA FE—There seems to have arisen considerable misunderstanding among sportsmen and others relative to the game farm application of A. A. Carlton of Deming, New Mexico. In order that the public may be advised of the facts, the following resume of the case is given:

The recently amended regulation governing game breeder's permits provides that game animals and game birds may be raised for sale alive for propagating purposes, or for food purposes when processed, preserved or canned. Game birds and game animals so offered for sale must be raised in a preserve wholly enclosed in such a manner as to prohibit any ingress or egress of the kind of birds or animals involved. It is under this regulation that Mr. Carlton intends to operate, and he has already procured a tract of land near Deming, built pens and made preparations to establish a large industry which will be a real asset to the state, and furnish employment to a large number of people.

In view of present expensive methods of trapping and transplanting quail, the game department is anxious to further all game breeding experiments especially on a large scale which will be of value in the determination of economical methods of quail production for stocking purposes. Therefore, in order to provide some quail for brood stock to enable him to start the operation, a permit was issued by order of the State Game Commission, authorizing Mr. Carlton to trap at his own expense, 250 quail from Otero and Dona Ana counties, and 250 quail from Hidalgo county, from such areas within these counties as quail are found in great abundance. Sportsmen in Dona Ana county reported sometime ago that the removal of a large number of quail from the range east of the Organ mountains would be distinctly advantageous.

The permit issued to Mr. Carlton specifically provides that the quail secured shall be used for brood stock, and that an equal number shall be returned to the Department of Game and Fish in 1935. These 500 birds will, when returned to the department, be released on such areas as are in need of restocking.

No quail have been sold or given away for commercial, or other purposes. The birds covered by the Carlton permit have been loaned to him during a year when there was an abundance of quail. Next year there may be a scarcity, and the return of these birds will then save expensive trapping by the department for transplanting purposes.

When the Ligon game farm at Carlsbad was established some years ago on a commercial basis, various kinds of game birds were loaned to Mr. Ligon by the department, including quail, prairie chickens, turkeys, etc. All such loans have now been returned to the department, and no loss whatever was sustained by the department or the sportsmen.

Mr. Carlton expects to secure through purchase outside of the state, additional quail for brood stock.

Sportsmen need have no fear that the quail loaned to Mr. Carlton will not be returned, as the department will see to it that they are returned at the proper time.

600 TO 800 ACRES OF ALFALFA

Six to eight hundred acres of new land has been seeded to alfalfa in this district, according to recent estimates. Most of the planting has already been done.

Seek business associates who are of superior ability if you would improve your own ability.

Some have expressed fear that quail will be illegally trapped for commercial purposes in connection with this operation. There is no likelihood of this occurring, as such procedure on the part of any game breeder would subject his permit to cancellation.

The raising of game in a wholly enclosed preserve for commercial purposes is comparable to the raising of trout in private licensed lakes for sale and is a legitimate industry to be encouraged rather than discouraged.

BIRTHS

A daughter was born to Mr. and Mrs. J. L. Williams of Lake Arthur Sunday. Mr. and Mrs. J. L. Moots, also of Lake Arthur, report the birth of a son Friday. A daughter was born to Mr. and Mrs. James A. Mayden Sunday.

TO CREDIT MEETING

C. W. Beeman of Loving, president, and W. D. Bales of Otis, inspector, of the Roswell Production Credit Corporation, left Sunday for Albuquerque to attend a meeting of all state production credit corporations.

MONTHS OF EXTRA MILES FREE IN THIS TIRE!

And—
BLOW-OUT PROTECTION
at no extra cost!

Amazing Golden Ply Prevents Great, Unseen Cause of Blow-outs

SOMETHING had to be done to make tires safer. Every year thousands are killed or injured when blow-outs throw cars out of control. Goodrich engineers met the challenge with the Life-Saver Golden Ply. This amazing invention resists the terrific heat inside the tire. Rubber and fabric don't separate. Thus blisters don't form. The great cause of blow-outs is eliminated before it begins. No wonder thousands are changing to this tire proved 3-times-safer—gives months of extra mileage, too! Come in today and see it.

*Prices subject to change without notice and to any governmental tax or levy.

WHAT EMERGENCY ALPHABETS MEAN

Following is an alphabetical explanation of emergency agencies of the federal government, as given by the United States News March 12, 1934:

- AAA—Agricultural adjustment administration.
- CAB—Consumers advisory board.
- CC—Consumers' counsel.
- CCC—Commodity credit corporation.
- CCC—Civilian conservation corps.
- CBS—Central statistical board.
- CWA—Civil works administration.
- DLB—Deposit liquidation board.
- ECW—Emergency conservation work (official name of civilian conservation corps).
- EHC—Emergency housing corporation.
- EHFA—Electric home and farm authority.
- FACA—Federal alcohol control administration.
- FCA—Farm credit administration.
- FCT—Federal coordinator of transportation.
- FDIC—Federal deposit insurance corporation.
- FERA—Federal emergency relief administration.
- FFMC—Federal farm mortgage corporation.
- FSHC—Federal subsistence homesteads corporation.
- FSLA—Federal savings and loan association.
- FSRC—Federal surplus relief corporation.
- HOLC—Home owners loan corporation.
- IAB—Industrial advisory board.
- LAB—Labor advisory board.
- NCB—National compliance board.
- NEC—National emergency council.
- NLB—National labor board.
- NPB—National planning board.
- NRA—National recovery administration.
- NRRB—National recovery review board.
- PAB—Petroleum administration board.
- PSAC—Non-member preferred stock advisory committee.
- PWA—Public works administration.
- SAB—Science advisory board.
- SES—Soil erosion service.
- TEC—The executive council.
- TVA—Tennessee valley authority.
- TVAC—Tennessee valley associated cooperatives.
- USES—U. S. employment service.

PLAN FORD EXHIBIT 1934 WORLD'S FAIR

Plans for a giant Ford exposition at the 1934 Chicago World's Fair were disclosed at Dearborn, Michigan, by Henry Ford to Rufus C. Dawes, president of A Century of Progress International Exposition.

The Ford exposition, which will be housed in a magnificent building in the heart of the fair grounds, will portray to the millions of exposition visitors the contributions which the industries, arts and sciences make to the motor car industry. The Ford exposition building will be 860 feet long and will be located in an 11-acre plot fronting on Lake Michigan and bisected by Leif Erikson drive, the main fair boulevard. Construction is to begin March 1.

"The scope of the Ford plans for the exposition is magnificent," said Mr. Dawes. "I am very enthusiastic over the project and am confident that it will mean a major contribution to the success of the 1934 fair."

We want our exposition to be just as instructive as it is possible to make it," Mr. Ford told Mr. Dawes in explaining plans for the Ford exposition. "Wherever possible each exhibit will be in action, producing something. We want the exposition to be a moving demonstration of the contribution made by the various industries, arts and crafts to the modern automobile.

"We are particularly interested in showing the contribution the farms make to the motor car industry. We even will have a field of soy beans outside the exposition building and on the inside we will show how the soy bean oil is extracted for use in manufacture of enamel body finishes and the residue is utilized in making various car parts."

The dominant section of the exposition building will be a great circular structure 210 feet in diameter rising in receding terraces to a height of 110 feet. It will house Mr. Ford's historic "Drama of Transportation" depicting the development of passenger vehicles from the early chariots of the Egyptian kings and the horse drawn vehicles of later centuries to the first automobiles of the "nineties" and finally the modern automobiles of today. It will include every model of Ford car which has been built since 1903.

South of the main structure will be a smaller rectangular building 100 x 80 feet, where will be displayed some of the principal historic exhibits from the Edison Institute, including a reproduction, complete with the original tools, of the little one-story brick workshop in Detroit where Mr. Ford more than 40 years ago fashioned with his own hands his first motor car. The car itself will be displayed inside the shop.

HIWAY PROGRESSING NICELY IN NEW MEX.

Progress in highway construction in New Mexico under the \$400,000,000 appropriation by congress for public works roads is well above the average for the whole country according to the Bureau of Public Roads, U. S. Department of Agriculture, which is supervising the work of the state highway departments actually engaged in carrying out the program. On March 3, 75.3 per cent of the total \$400,000,000 federal highway appropriation had been allotted to work in progress. On the same date, 85.1 per cent of New Mexico's \$5,792,935 appropriation of the total fund had been put to work.
In New Mexico, a total of 92 projects, estimated to cost \$5,064,000, had been advertised for contract, including regular federal and state funds; 83 projects had been awarded to contractors or started by day labor; and 59 projects, employing 2,672 men, were under construction. The public works funds involved in the advertised projects amounted to \$4,927,000, other federal and state funds making up the balance of the total estimated cost of \$5,064,000.
The National Industrial Recovery Act, which created the Public Works Administration, and carried the \$400,000,000 appropriation for highways to be built by the state highway departments supervised by the Bureau of Public Roads, modified to some extent the older federal aid procedure. Federal grants under this act do not have to be matched with state funds. Apportionment of the new appropriation are available for building roads on the federal aid highway system (not more than 50 per cent of the funds), for extension of federal aid system roads through municipalities (not less than 25 per cent of the funds), and for the construction of secondary or feeder roads (generally not more than 25 per cent of the funds). State apportionments are made seven-eighths in accordance with the federal highway act of 1921 and one-eighth according to population. Apportioned funds may be used to match regular federal aid appropriations, and are available until expended. Maintenance of public works highways included in the federal aid system is an obligation of the states; in the case of municipal extensions of the system and secondary or feeder roads, the maintenance responsibility by agreement may be transferred to appropriate municipal or county authority.
Public works highways authorized under the act must be built in such a way as to relieve unemployment as much as possible. In general, a 30-hour week is required, minimum wages are prescribed in all contracts, and labor is obtained through agencies designated by the United States Employment Service.
To get projects under way as quickly as possible, with due regard to safety of public funds and economical work, the Bureau of Public Roads has modified its requirements by shortening the time of advertisement for bids on work to two weeks, permitted the approval of projects in the field, allowed abbreviated plans in certain cases, and provided other expenditures to hasten construction. Funds are advanced to states that experience difficulty in paying the cost of work done pending reimbursement by the federal government.

SCOUT NEWS

About a month ago there was held a meeting of the executive committee of the Eastern New Mexico Area Council in the Chamber of Commerce office for the purpose of completing the local committees.
It is the plan of the executive committee to have a local committee chairman in each community to look after the different phases of Scout activity. Ultimately there will be committee chairmen for unit organization, civic service, camping, court of honor, health and safety, cubbing, sea scouts (which doesn't mean what it sounds like, but is an organization for advanced Scouts who have outgrown scouting, 17 years and up), reading, leadership training, rural scouting, publicity and finance.
Each committee has a specific duty to perform and each coordinates with the other. The chairmen of these various committees, together with the district commissioner and a representative of each troop committee, form the local Scout council which will meet regularly to make reports of the previous month's work and to plan for the coming month. Each local troop has a troop committee who have oversight of their own troop affairs. The Eastern New Mexico area territory reaches from Tucumcari to Hobbs, including Alamogordo and Tularosa. E. B. Bullock is president of this area. You can readily see how impossible it is for one president who receives no pay and one Scout executive who is the only person who does receive pay for his services, to look after such a large area without local help. Hence these committees.
P. V. Thorson, the Scout executive, spent last week at Carlsbad and promises to give Artesia a week soon. Mr. Thorson will give us technical help which our local committees are not able to perform but he can't do the whole job. The Roswell men who were here a short time ago are giving their time to visiting the larger places in the interest of putting on this full program. We are sure that Artesia men will respond to the call. We have most of us put up our money to promote this program, now let's get the most out of it. These various local committees have not all been selected yet but will be soon and when they are we will publish the entire list of officers and committees.
Scout Reporter.

LINCOLN FOREST ATTRACTS A LARGE NUMBER OF VISITORS

A large number of visitors and campers used the National Forests of the southwestern region in 1933, according to a report of national forest visitors, campers, and transient parties passing through the forests, just completed for the fiscal year 1933, for Arizona and New Mexico.
The number of visitors shows a slight decrease over the previous year, according to Assistant Regional Forester M. M. Cheney, in charge of recreation. As between states, continues Mr. Cheney, Arizona leads with over 1,600,000. New Mexico had 870,000. As to the visitors, such as summer home residents, campers and picnickers, as distinguished from transients passing through, Arizona had 293,000 and New Mexico 139,000. It would naturally be expected that picnickers would be, by far, the most numerous class. In fact, these include almost one-half of the entire number of visitors. Campers come second, resort guests third, and summer home residents fourth. Of the more permanent group of visitors in Arizona the Coronado Forest ranks first, Tonto second, Crook third, Tusayan fourth and Coconino fifth. In New Mexico the Lincoln runs an easy first, Cibola second, Santa Fe third and Gila fourth. The total number of visitors for Arizona and New Mexico, including transients passing through was 2,497,000, according to the best estimates received.

HEALTH COLUMN

Conducted by Dr. J. R. Earp, Director, New Mexico Bureau of Public Health.

Menstruation
That the "monthly" period comes usually every 28 days is regarded by some authorities as showing a remaining influence of the tides upon the function of our mysterious bodies. It is supposed that this influence dates from the far, far distant past when life was translated from water to land and our remote biological ancestors lived a tidal life upon the shore.

If this is true it is rather remarkable that menstruation only occurs in the female of the human species and of a few man-like monkeys. For menstruation is not to be confused with the period of "heat" in other mammals. That is something quite different and occurs at a different state in the reproductive cycle.

Menstruation is a consequence of the very special preparations that are made in the human uterus for the care and nourishment of the fertilized human egg. Every month these preparations are made anew and discarded whenever they are not needed.

Many primitive races hold superstitious beliefs thinking that the menstrual blood is derived from a wound inflicted by some supernatural creature or that it indicates possession by an evil spirit.

The belief that a menstruating woman is unclean so frankly expressed in Mosaic law is common to many people. When we reflect on the fear and taboos associated with this normal function in the minds of savages it is easy to understand how even the young American, unprepared for the event, may receive a serious shock. No girl should be allowed to reach puberty without understanding that menstruation is to be expected and that it is normal and that it usually makes no

Nurse: "Bobby, I have a surprise for you."

NEW POINT RAISED IN TAX QUESTION

SANTA FE—A new point was raised Saturday as the result of an opinion by Assistant Attorney General Frank Patton holding that compensation of state and county elective officials was exempt from the income tax.

It was the question whether the pay reductions made by the state board of finance, the legislature and the counties would have to be made up to those employees who were cut.

The same question applied to schools where teachers had been employed under contract, and their pay cut. The constitution expressly provides contracts shall remain as signed.

No one could estimate anywhere near what figure would be involved if the several pay cuts had to be restored.

FINISHES BIG ARTESIAN WELL

Pearson Brothers of the Cottonwood the first of the week completed a big artesian well on the Oscar Pearson farm, just west of his residence. The well is estimated to be making 3,500 gallons per minute and is flowing 24 inches over a T. It was drilled to a depth of 910 feet.

THE OLIVE BRANCH GIVEN PROGRESSIVES IN THE G. O. P. MEET

ALBUQUERQUE—The olive branch of peace, together with an offer to permit 80 progressives to gain seats in the republican state central committee provided progressives disband their organization, was extended late Saturday by the republican state central committee to the state progressive central committee chairman.

Overruling by a vote of 86 to 52 the action of Ed Safford, state chairman, in declaring a resolution embodying the offer to be out of order, the proponents of the reconciliation won their point to bring the two parties together.

The final vote on the resolution, which was introduced by Reed Holloman, Santa Fe, as a substitute for one by former senator Bursum, which invited all believers in party principles to join the republicans in the next campaign, was made by a standing vote after Bursum lost a move to have the Holloman resolution amended to cut the number of progressives allowed to 40, instead of 80.

The committee meeting was marked by much oratory on the grounds it was illegal because the committee had no power to increase the number of committee members, that the action was directly contrary to principles, that it would hold the party up to ridicule in case the progressives did not accept the offer.

Under a resolution new members will be appointed by the progressive state chairman and will meet with the republican committee in Albuquerque not later than 20 days after the special session of the legislature is over.

William Dooley of Artesia, J. U. Falke and R. L. Halley of Carlsbad and Mr. Harroun of Malaga returned Sunday from the republican state meeting at Santa Fe.

MARKETS

N. Y. COTTON

(Furnished by courtesy of Artesia Alfalfa Growers Association.)

	May Option	Open	Close
March 22	11.87	11.90	
March 23	11.94	11.88	
March 24	11.94	12.00	
March 26	12.13	11.99	
March 27	11.93	11.86	
March 28	11.83	11.78	

The Bankhead bill was revised again in the senate yesterday and a tax of 75% of values was put into it on that excess of the allotted bales to each grower, and the original feature as proposed by Senator Bankhead to collect the tax when the cotton is ginned was returned to the bill. In this form it went back to the lower house and is expected to receive action this week.

Having already apparently been fully discounted or even more than discounted, the market has eased off each time anything was done with this legislation. In addition to this, also, is the stock market control bill which has administration support and which is causing general weakness in all markets.

We anticipate a gradually sinking market for some time until the actual results of control measures are tested both in the cotton fields and at court. Should the Bankhead bill actually be found unconstitutional some time this summer, it would be very bearish on the market, but if upheld, there would likely be a gradual upturn to a price level not yet seen this season.

BALLARD ELECTED CAPTAIN

Joe Ballard of Artesia, a student in the University of Texas at Austin, has been elected captain of the freshman track team, according to word received here by his parents, Mr. and Mrs. W. H. Ballard. A clipping from an Austin, Texas, paper says that Ballard is expected to lead a strong team. He is a sprint star and a capable performer on the quarter mile. His best event is the 220 yard dash.

This is Joe's first year in the university. He graduated from the high school here last year.

J. H. Bridgman, Hope merchant, was transacting business here Tuesday.

SENATE OVERRIDES PRESIDENT'S VETO IN VET LEGISLATION

WASHINGTON—Overriding the objections of President Roosevelt, the senate joined the house late yesterday in voting to enact more liberal veterans and federal pay legislation than the chief executive was willing to accept.

By 63 to 27, just a little more than the two-thirds margin necessary to overthrow the recommendations of the president, the senate wound up a long day of debate, by putting the legislation on the statute books. The house vote yesterday was 310 to 72.

The two votes marked the first major defiance by congress of the president.

The roll call found 33 republicans and 29 democrats and one farmer-labor member voting to override the veto.

All those voting to sustain the president were democrats. A roar of cheering and applause rose from the galleries as Vice-President Garner announced the bill had passed over the veto.

"Sixty-three to twenty-seven, the bill is passed," Garner said.

EFFIE FITE PICKED AS STATE COLLEGE MAY QUEEN

Miss Effie Fite of Hope was elected May queen of the New Mexico State College in a student body election at State College Friday.

Miss Fite will be crowned during the Kollege Kactus Karnival held on the campus May 5.

SNOW GIVES OVER INCH MOISTURE IN NUMBER OF PLACES

Winter made another stand over the Pecos valley and eastern New Mexico Saturday and Sunday and left approximately three quarters of an inch of moisture by melting snow fall. Snow started falling here around 8:00 o'clock Saturday morning and continued intermittently throughout the day. Sunday snow fell practically all day. Much of the snow melted rapidly and estimates placed the resulting moisture at an inch, however, measurements at the weather station revealed that the moisture was less. The precipitation Saturday amounted to .5 inches and Sunday .64 inches.

The benefits of the moisture to the range and to the farmers will be very material. The moisture is expected to supply green grass and weeds for cattle and for the shepherd now starting the lambing season. While early reports are not very accurate, some sheepmen starting the lambing season on the 25th may experience light losses.

Reports from Hope and the mountain section say the snowfall was heavier. At Hope the fall was two or three inches heavier than here and there was about an inch or more moisture.

Hope Gets Inch Moisture
 The Hope section received 1.15 inches of moisture from the snow which fell over the week end. Reports vary as to the amount of moisture which fell in the mountain section, but it is said the Upper Mayhill sections received a twenty inch snow.

Mrs. M. P. Harvey who has been a house guest of Mrs. J. Hise Myers for the past four weeks went to El Paso Sunday where she will visit in the home of her sister Mrs. Edward Hodge. Mr. and Mrs. Hodge drove over for her Saturday and were guests at the Myers home.

LEE THANKS VOTERS
 I certainly appreciate the big vote given me in this district. Your support and confidence in me has created a responsibility that I shall endeavor to meet in every respect. Again I thank you.
 DWIGHT LEE.

Farm Commodities—

have been worked out for use of the land in some regions, Davis continued, readjustments are "complicated" by the human problem, especially as to hired laborers and tenants. Retirement of sub-marginal land, he said, will bring more difficult problems.

Estimated expenditures on existing programs for rental payments and surplus removal during 1933, 1934 and 1935 total \$847,176,000, with probable collections placed at \$872,595,805. Administrative and other expenses are expected to absorb the excess, Davis said, and the farm administration's budget reckons a deficit of \$2,293,966 in November, 1935, when programs now approved will be concluded.

Primary Upsets—

meeting at Carlsbad Saturday.

Many Illegal Votes
 Early reports indicated that there were no more irregularities than usual in a primary, but later information says there was, illegal voting by the wholesale in the Carlsbad precinct. One source says that 600 or more illegal votes were cast at Carlsbad. Estimates place the number of illegal votes cast here at 100, which if true, would total 700 votes in the two boxes alone or approximately one-seventh of the total vote polled.

Party leaders in discussing this situation pointed out that results of the primary here showed a definite and an urgent need for the adoption of a state-wide primary law.

Election officials were inclined to discount the number of illegal votes saying the number had been magnified. Without a state primary law, it is next to impossible to bar all irregularities, despite a fair and impartial set of regulations.

In addition to voting one person on two or three different occasions, it would be interesting to know how many of the disinterested people made a mistake and voted for the wrong candidate. The results in at least one race might have been different if the voters had had a better knowledge of marking their ballots.

GUY CHEVROLET CO. MAKES GOOD RECORD

FLINT, Mich.—The Buick Motor Company announced today that The Guy Chevrolet Co. is one of 68 Buick dealers in as many cities throughout the country who sold more cars in the first 40 days of 1934 than they did the entire year of 1933.

These progressive dealers have been commended personally by Harlow H. Curtice, president of Buick, who expressed an optimistic view of the outlook for the automobile business for the remainder of the current year.

"The record of Buick dealers in 68 cities in the United States is significant," he said. "Most of them serve rural areas and the fact that they have sold more Buicks thus far this year than they did in all of 1933 indicates a return of confidence and purchasing power in those areas. That is 'good news' for all lines of business."

Acid Treatment—
