MARKETS

N. Y. COTTON

(Furnished by courtesy of Artesia Alfalfa Growers Association).

Table with columns for dates, Open, Close, and values for cotton prices.

For the last several weeks the cotton market has worked within a trading range of fifty points, meeting selling around 11.75 for October contracts and buying around 11.25 to 30.

Recent weather has been entirely favorable and the best growing weather lies ahead. Good crop reports along with poor textile trade reports such as is now coming cannot fail to have a very decidedly bearish effect upon this market.

Export business lags, neither buyer nor seller willing to make trading concessions. The monetary situation plus the desire on the part of foreign buyers to know more about the new crop before making commitments contributes to the present deadlock and stagnation.

Fifteen cent cotton, of course, is the objective of the sponsors of the Bankhead act. If it is capable of doing this, it appears to the writer that the present market should already be reflecting such a price in the distant months, but nothing of the kind is apparent. It is after all the acts of God and not the acts of congress that make a cotton crop, or unmake it, as the case may be, and until we see more of the results of the former in this summer's weather we are loathe to accept the acts of congress as a determining factor.

POPULATION GAIN LOWER

Gain in the population of the United States last year has been estimated at 797,000 in a report of the Scripps Foundation for Research in Population Problems.

The population January 1, 1934, totaled 126,144,000, the report estimated, with the 6 per cent gain lower than any years except two since 1870.

If population growth continued to become smaller as rapidly as in the last decade, the foundation said, it would cease entirely about 1940, when the country would have less than 130 million inhabitants.

The foundation figured births in 1933 at 2,268,000, a total of 110,000 lower than in 1932 and below any years since 1900. Deaths of 1,412,000 were about equal to a 25-year average.

Departures from the United States exceeded arrivals by 41,000 last year.

Mr. and Mrs. J. H. Hudson, who have spent more than a week here on combined business and pleasure, left Wednesday for Albuquerque where they will spend several days before returning to their home at Ponca City, Oklahoma. They were guests of Mr. and Mrs. Charles Morgan while here.

Eddy County Farm News

Some recipes given recently by the county agent called for cottage cheese and American cheese. These cheeses are easily made at home and are quite inexpensive when left-over milk is used.

COTTAGE CHEESE The process of making cottage cheese without rennet, on the basis of 30 pounds or about 3½ gallons of milk which will yield about 5½ pounds of cheese, may be summarized as follows: Obtain clean, fresh skim milk. If starter is not used, warm the milk to 75 degrees F. and hold it at about that temperature until curdled.

If starter is used, add from 1 to 5 percent, or about 1 pint of starter to 30 pounds of milk, stir, and set away at 75 degrees to curdle.

Time for curdling when starter is used, from 12 to 15 hours (usually overnight). When starter is not used the time for curdling will be about 30 hours.

Cut and stir, and then heat to 100 degrees F. and hold for 30 minutes. Stir gently at intervals. Pour upon cheese cloth and drain for 20 or 30 minutes.

Place in pail or pan and salt at rate of 2½ ounces to 10 pounds of curd, or about 2 level tablespoons for the cheese from 30 pounds of milk.

If desired, add sweet or sour cream at the rate of ¼ pint to 10 pounds of curd, or about ¼ pint of cream to the product from 30 pounds of milk.

AMERICAN CHEESE Equipment: A small tub, wash boiler or large dishpan; dairy thermometer; lard or homemade press; and two clean flour sacks.

Materials: 3½ to 5 gallons whole milk, preferably fresh. Night's milk and morning's milk may be mixed; ¼ cheese color tablet (dissolved in one tablespoonful of cold water); ½ rennet tablet dissolved in 1 tablespoonful cold water; 1 tablespoonful salt.

Place milk in clean pan and place on stove. With the thermometer held in left hand, stir until the milk has reached 86 degrees. Remove from stove, add cheese coloring tablet that has been well dissolved; then add the rennet tablet which has been dissolved. Allow to stand covered for thirty to forty minutes. Take a long handled knife and cut the curd into small cubes, backward, forward and crosswise. This causes the whey to rise. Place on stove and heat gradually to 100 degrees. Stir, keeping the curd from settling on bottom of pan. Remove from stove and let stand until you can prepare press.

Around the bucket (1 gallon syrup bucket) with holes in it punched from the inside, place one of the sacks. Place this inside of the outer bucket (8 pound lard bucket) and set on lid which has been perforated. Place this then on the board which has the grooves cut in it. Thru the outer sack pour your curd, allowing the whey to drain from it that will. A separator bowl is very handy for this procedure. While the curd is still in the cloth, add 1 tablespoonful salt and mix well. Place this in your press and pack down as tight as possible. Allow the top of your cloth to come over the cheese, and place a weight on top of this.

The weight may be made by filling a 3-pound coffee can, one that will fit inside the one containing the cheese, with sand or rocks. On top of this place two or three smoothing irons or anything equal in weight, so as to have a 20-pound weight. A regular lard press makes a splendid

cheese press. Leave your cheese in the press all night. In the morning, take it out and roll in warm water or melted fresh butter that has not been salted, to keep it from getting dry and cracking. Keep in a cool place where it will be cool and dry. Let stand ten days or two weeks, then coat with molten paraffin. If coated before this time, it will taste a little sour, all the whey not having time to dry out.

Be sure to turn cheese twice every day, night and morning, for ten days, or until paraffined. This is ready to serve in three weeks, but grows better with age. Six weeks is better unless one has a personal taste for fresh cheese.

Note: If desired, a piece of cheese cloth may be cut to fit and sewed around cheese just before coating with paraffin.

North Star and the Pole. Polaris, or the North star, is almost directly in line with the axis of the earth, and from the North pole would always seem to remain exactly overhead. It is not visible from the South pole.

Ancient Tombstones Erected. Twenty-five tombstones dating from the Middle ages, which were discovered in a subterranean passage under the Jewish cemetery in Worms, have been set up in the cemetery itself.

Everyday Program. 'Of course, I'm worried 'bout finances like everybody else,' said Uncle Eben. 'But I ain't tryin' to make a bluff dat it's any new 'spec'ience wif me.'

Indians Knew Corn Land. The Indians were good judges of corn land, usually choosing fertile river bottoms or rich uplands for their cultivated patches.

Thinkers Have Been Numerous. A philosopher once said that man only thinks when you prevent him from acting.

The Advocate is in receipt of an invitation from John J. Clarke, son of Dr. and Mrs. J. J. Clarke, to attend the 23rd annual commencement exercises of the Loyola University at New Orleans, Louisiana, June 3 and 4, 1934. John is a member of the graduating class.

Box Stationery—ARTESIAN Bond—Advocate.

Refuge, embracing 7200 acres of fenced land on the Silver City watershed was created. All livestock have been excluded from this area, and a lot of erosion control work has been done there during the past year. A number of other refuges were discussed, but owing to the lack of complete data, action was deferred until the next meeting of the game commission.

The commission approved the creation of the Nadine refuge in Lea county for the benefit of prairie chickens and antelope, and also a revision of the boundaries of both the North and South Caprock refuges in Chaves county. These refuges are for the protection of antelope, prairie chickens and the unique sandhill deer occurring in that section.

A quail refuge near Mountainair was created in response to a request made by local sportsmen. A small refuge for quail to be known as the Sunset refuge on the Hondo west of Roswell was also approved. A revision of the Little Dog Canyon refuge in Guadalupe county, eliminating a part of the refuge was agreed upon. The Silver City Game

CHEVROLET In the low-price motor car field there's nothing that even compares with Chevrolet's famous 5-mile ride. The reason is: No other car at Chevrolet's price has any of the vital features pictured below. And without these features, it's impossible to equal Chevrolet's ride! You can't get Knee-Action results with anything less than a genuine Knee-Action car. You can't get six-cylinder economy with more than six—nor can

you get valve-in-head performance with anything inferior to valve-in-head design. And the same thing applies to the Fisher body, the brakes, the steering. Chevrolet offers one feature after another that makes a tremendous difference—in the way the car feels, performs and saves. One feature after another that puts Chevrolet far ahead in value . . . farther ahead every day in sales! CHEVROLET MOTOR CO., DETROIT, MICHIGAN

Drive it only 5 miles and you'll never be satisfied with any other low priced car.

HOPE ITEMS

Frances Johnson, Reporter

The Rev. A. J. Cox who has been ill is improving in health. Allie Lewis of Weed is here this week visiting Dorthea Buckner.

Mr. and Mrs. Dave Bunting attended to business in Roswell Monday.

Earl Miller is in from the Armstrong ranch where he is working.

Mr. and Mrs. Elmer Schrier of Mayhill were visiting in Hope Saturday.

Margaret Williams is spending the week in Carlsbad visiting Miss Mable Vowell.

Mr. and Mrs. Robert Parks and Janet Parks visited in Artesia Monday evening.

Ballard Banty and William Trimble returned from the Armstrong ranch Monday.

Raymond Buckner and Clayborn Buckner visited and attended to business in Atoka Sunday.

Dr. O. E. Puckett, county health officer, and daughter Edna attended to business in Hope Monday.

Anderson Young left Tuesday for Joe Parker's ranch where his shearing crew will work this week.

Clayborn Buckner returned Saturday from Artesia where he has been the past week attending to business.

Mr. and Mrs. C. B. McCormick left Monday for Brownsfield, Texas, where they will visit friends and relatives for several days.

Wallace Johnson returned Monday from Taft, California, where he has been visiting his sister Mrs. H. J. Dunne for the past six weeks.

Mr. and Mrs. John Prude returned to their ranch Tuesday after spending the week in Artesia and Hope visiting friends and attending to business.

Mrs. Ed Payne and little daughter Mary Dee returned from Cottonwood Sunday after spending two weeks with Mrs. Charlie Buck, daughter of Mrs. Payne.

Mr. and Mrs. C. G. Prude returned this week from Alamogordo where they have been visiting. Mr. Prude has been seriously ill at his home here since he returned.

Mr. and Mrs. Robert Cole drove to Cloudcroft Wednesday to meet their daughter Mary Louise who was returning from Las Cruces where she has been attending school.

Mrs. J. P. Parks and daughter returned Monday from San Diego, California, where they have been the past six weeks. Mr. Parks, who accompanied them, did not return but plans to spend the summer in San Diego.

Miss Bettie Richardson, teacher of the Hope schools last year, and Reggie Howard, son of G. R. Howard of Loving, were married at the home of the groom's parents at Loving Saturday. The couple will make their home at Tatum.

Mr. and Mrs. Ed Mullins and family of Crystal City, Texas, arrived Friday to visit two weeks with Mrs. Mullins' parents Mr. and Mrs. E. P. Cox. Mr. Mullins has been conducting several

HEALTH COLUMN

Conducted by Dr. J. R. Earp, Director, New Mexico Bureau of Public Health.

Sanitation Through Federal Aid
From time to time the question is asked why do we not make use of federal aid to promote public health in this state.

During the last eighteen months a large number of "projects" with this end in view have been sponsored by the state bureau of public health. Most of them for one technical reason or another have proved abortive. This is no time to cry over spilt milk. But it may be a good time to review some of the precautions that must be observed by those public health minded people in New Mexico who covet a little of the remaining milk, precautions which must be observed if we are to avoid further spilling.

First we must realize that the federal government is giving its money for the relief of those who are in actual need. "Need" includes food, clothing, shelter and medicine, medical and nursing care when sick. In order to supply food, clothing and shelter work may be given in place of the dole.

Now the people who are eligible for work relief are mostly unskilled. Certainly very few of them are trained in public health. We must therefore unskilled labor, which will employ unskilled labor. Such projects are the digging of drainage ditches for the control of malaria, the repair of privies to make them fly proof, or the digging of a community well where the sole source of water is at present unsafe. There may be difficulties, in fact there will be difficulties, in carrying thru any such projects. But we should not give up hope. Every now and then a project is approved. Remember the importunate widow.

In some counties there are nurses unemployed. They are not, alas, trained in public health but they may be able to help the public health nurse and to do useful work under her supervision.

My advice is to work out your project with your county health department and your county relief agency. The state bureau will be glad to lend counsel to the limit of its ability. See what help you can get and plan the best way to use it.

Your county health nurse may be able to tell you of children who need dental care or surgical care and whose parents cannot afford to pay a dentist or doctor. Try regulations number seven. The more we know about the rules the better our chance of securing federal aid to improve the public health.

TAKES CHARGE OF PARKER ROOMS

Mrs. L. E. Folkner has taken over the Parker Rooms over the First National Bank building and is having the rooms renovated and redecorated. In addition some new furniture and fixtures are being added.

STATE COLLEGE BOARD REFUSES TO REINSTATE TWO

LAS CRUCES—The board of regents of the New Mexico Agricultural College Monday refused to grant a petition from the Dona Ana county farm bureau for the reinstatement of County Agent R. C. Stockdale.

Telegrams urging the reinstatement of A. L. Walker, agricultural agronomist at the college, were received, but the board refused to change its previous action. The telegrams were from farmers organizations of Socorro, Bernalillo and other counties, and several individuals.

The board reappointed W. T. Conway, assistant professor of agronomy for six months, July 1 to December 31, so he could complete research work with crops which he had under way. H. C. Stewart, extension horticulturist, was reinstated for the next fiscal year. No action was taken in the case of D. S. Robbins, professor of physics.
