MORE ABOUT PROPOSED HOSPITAL (Continued from last week)

If the Artesia citizens see fit to vote the hospital bonds and the hospital is eventually placed in operation, the plant can be operated trouble as we see it is that some 21, WSW 22, NE 27, ENW, SE 28, as any other successful business institution or it can be operated of our women folks have let the NW, SE, 33, NW 34-18-30. as a charitable organization. If the public is permitted to pay the city slickers talk them into buying Warranty Deedshospital fees as they usually pay their physician, then the business small shoes so long by telling them | E. Birch Harrison, Miers C. men and others interested in the operation of a hospital here may expect to donate each month if the institution is kept open.

Those who favor the erection of a municipal hospital are of the general opinion that the patients entering the hospital should be made to pay at least the hospital fee, except in a few emergency and bunions and then go to a local 17-26. cases and these cases should be anticipated beforehand and a budget set up to provide for them.

Another local physician interviewed by an Advocate representative last week stated if a hospital were operated here it would cost the people from \$300 to \$500 per month. This physician is assuming of course that the public won't be any more responsive to paying a hospital bill than a doctor's bill. He says that in auto accidents, only about ten percent of the victims ever pay their doctor's bill.

In stating his views of the need of a hospital in Artesia, this physician said he would be glad to see the bond issue approved and that he believed, as he had believed for several years, that a hospital was really needed here.

In summing up the benefits as well as the difficulties in the operation of a local hospital, it might be well also to keep in mind that a convenient institution of this kind would be patronized more by local people able to afford hospitalization, whereas now the same people may hesitate to enter the hospital unless forced to do so because of the inconvenience involved.

SALT ROADS

Experiments are expected to be made in the county soon on salt-stabilized roads.

Experimental road construction, using salt as the element for retaining moisture in the stabilized soil mixture, has been undertaken since 1933 in a number of states.

These salt stabilized roads have in most instances been experimental sections jointly by highway departments and salt manu- heaven?" The Hindu shook his head in polite regret. "I do not think," he sterile, two or more varieties of sterile, two or more varieties of

nclusions as to their stability, but in most cases their behavior said, "that heaven can be very has been good.

Stable soil, as used in road rebuilding, consists of a mixture of course aggregate, fine aggregate and binder soils such as clay, so combined as to have strong resistance to lateral flow under load.

Should the salt-stabilized roads prove practical in this county and state, it will give the potash companies here a market for a new product which, under present economic conditions, they cannot handle profitably.-Carlsbad Current-Argus.

TEN MARKS OF AN EDUCATED MAN

He keeps his mind open on every question until the evidence is

He always listens to the man who knows. He never laughs at new ideas.

He cross-examines his daydreams.

He knows his strong point and plays it.

He knows the value of good habits and how to form them. He knows when to think and when to call the expert to think

You can't sell him magic.

He lives the forward-looking, outward-looking life. He cultivates a love of the beautiful.-Exchange.

Two years can make a lot of difference, especially in politics. Now New Mexico republicans are talking about the pink experiments of the democratic administration. Two years ago they were all trying

Health Column

to ride in on the coat tail of Roosevelt.

Conducted by Dr. J. R. Earp, Director, New Mexico Bureau of Public Health.

Challenge To Liberty

Government cannot guarantee to the people life and the pursuit of happiness without restraining libthe confinement of criminals within our goals, in the confinement of the insane in our asylums and in the confinement of those sick with contagious disease either in special hospitals or in their own homes. Yet the restraint of liberty has

not been carried far enough. Our people is too free.

Parents are compelled to send their children to school but are not in the technique of restraint will compelled to protect their health. Have these little citizens who choke to death with whooping cough or 100 PIT TOILETS FOR waste away with diarrhea before they are two years old no claim then to life and the pursuit of

happiness? dren in any remote and inaccessible Monday in the south end of the spot they choose; far from ordered county on concrete slabs, which sanitation; beyond the reach of will be used in construction of sanmedical care; where police protec- itary projects. tion is almost impossible and from which the school authorities must 100 of these toilets have been insend to fetch the children by bus stalled in the northern part of the at great public expense to attend county. Seventy-five will be built the nearest school. Have people on the southern project. the right to live wherever they Average cost of these project preserve the amenities of residen- dollars for the concrete slab, three tial districts; but the wilderness dollars for the materials, and the has not been zoned to preserve the labor given free by the WPA adlife and happiness of our children. ministration.

There are people who are mentally sick but who are not certifiably insane. One may predict with reasonable assurance that they will become involved in crime. But until they have committed a crime they may not be restrained. Their first crime sometimes happens to be murder. At a recent meeting of the British Society for the Study of Inebriety the relationship of one particular mental illness to crime and alcoholism was erty. This fact is recognized in under discussion. It was pointed out that anyone has the right to drink himself paralytic and poverty stricken. One doctor suggested imprisonment as the most practical way of helping those sick people. Another thought some better method of restraint might be used.

A higher standard of living requires that we be less fearful of applying restraint. Improvement help to increase its use.

SELF-STERILE FRUIT TREE MAY BE MADE TO BEAR

Back-yard fruit growers who have only one or two trees for each kind of fruit frequently have trouble getting them to bear, even when they have a good crop of blossoms, say fruit specialists in the United States Department of Agriculture.

Blossoms of certain common fruit varieties do not fertilize pollinated. They are self-sterile, and depend upon pollen-usually brought by bees-from nearby trees of other varieties. A small home orchard should be

good or the British would have Where self-sterile trees already the same tree may be planted. are established, a permanent remedy is to top-work a few of the limbs to varieties that bloom at tree. The best time for top-working fruit trees is just as growth

A temporary measure is to place a limb of a different varietyblooming at the same time as the tree to be pollinated-in the top of the self-sterile tree. Bees will visit am a father and it's Christmas the blossoms of the limb and pollinate the flowers of the tree. Branches cut from one tree and placed in another retain their freshness for several days if the cut ends are placed in water.

Self-sterility in fruit trees common. It occurs in many varieties of apples, and in most varieties of pears, sweet cherries, and Japanese plums. Most of the comthe McClay Furniture Store, who fertile, and so do not need cross mon varieties of peaches are selfpollinating. Two exceptions are the J. H. Hale and June Elberta. County agricultural agents and state colleges of agriculture can supply lists of varieties adapted to any locality.

Big Demand for

Just what the new soil conservation plan will mean to Pecos valley All odd ladder games in the first farmers still is a matter for conjecture, A. M. Vance, assistant court and even number ladder county agent, in charge of the terracing program, said Saturday at

There is a great demand for terracing in the county, Vance said. So many calls have been coming in to the agent's office that it is impossible to keep up with them.

But just how the farmers will profit from benefit payments for soil laying idle in a soil improvement program is yet to be learned. Terracing in the Pecos valley has

vastly different meaning than in other parts of the county, Vance said. In other places, terracing is to protect soil only from water and wind erosion, while in the irrigated valley, it serve further pur-

The terracing must regulate the speed of the water's flow according to the texture of the soil. If the soil is predominantly sandy, the flow must be speeded up in order to conserve the water. If the texture of the soil prevents its absorbing water rapidly, the water must move slowly. These are a few of the many

must be completed scientifically. Vance has just completed an unusually difficult project on a 90acre tract.

reasons that terracing projects

GOLDEN PHANTOMS

Fascinating Tales of Lost Mines BY EDITRA L. WATSON

RABBIT-HOLE TUNNEL

IN STEVENS GULCH, near Strontia Springs, Colo., was a deposit of ore which the Indians knew of MISS MAURINE LEWIS in the very early days. The men mined the ore and the women crushed and washed it, and the church met with Miss Maurine gold was placed in turkey quills white men.

> Some years before the Civil war. managed to get an ox team into the gulch, and this they loaded with very rich ore, which they took home and sold. They made a map of the location, marking on it where they had hidden their tools.

In 1861, they started back to the mine. Near Devils Head peak they were murdered, supposedly by the A relative who had their map

sent it to Henry Jackson, a negro, on the map, but he could not locate the mine.

In 1911 a young man named Johnson found some promising ore in the gulch which, when crushed and panned, showed a rich color. He noticed a rabbit go into a hole of some brush, but at the time he did not pay much attention. Later, when he heard the story of the lost mine. he returned and tried to find the

Stalin Threatens War On Japan

NEW YORK - Russia, under Joseph Stalin, is ready to war with Japan if necessary to preserve at the Cottonwood school Thurs-Outer Mongolia's independence, the day. Soviet Dictator said in an interview given Roy W. Howard, chairman of the board of Scripps-Howard newspapers, and published Monday. yesterday under a world copyright

by the New York World-Telegram. "If Japan ventures to attack the Mongolian peoples' republic and Lewis substituted for her. seeks to destroy its independence, we have to be able to help that republic," Howard quoted Stalin as Douglas O'Bannon, left for Gar- ton, California, who have visited saying in reply to a direct ques- den City, Missouri, on Saturday here for the past two weeks left

The interview was held Stalin's office in the Kremlin, in Moscow, and lasted for three hours, in which the soft-spoken Soviet leader discussed the Far East situation, particularly the war threat, the possibility of war in Central Europe, and Soviet-Amerian relations.

"Neutral military observers believe Japan is seeking to drive a wedge into Outer Mongolia by way of Manchukuo, intended to block off assistance for the Soviet by way of China proper in the event of war," Howard commented.

"With possession of Ulan Bator, the capital of Outer Mongolia, the Japanese air forces would be in an advantageous position to threaten the trans-Siberian line at one of its most vulnerable points."

CARE OF CHICKS

To have success with brooding chicks, sanitation must be observed and proper feeding and heating. All fountains for water must be thoroughly cleaned every day, the feeders should be constructed so the chicks cannot get in them and waste feed. All brooding houses should have straw well spread on the floor and cleaned out at least twice per week and lime sprinkled on the floor. The right temperature should be maintained in the house if the best results are to be obtained, too hot or too cold is message Tuesday morning telling equally as bad for chicks. Overheated or chilled chicks will not make quick and profitable fryers Childress, Texas. Mr. Laningham for the market. Anyone expecting was burned to death when an oil to raise chicks succesfully would stove exploded. do well to ask your state college for bulletins on feeding and care of baby chicks.

BLACK SCOT COMES TO TOWN

The famous vatted Scotch malts of James Black & & Glasgow, Scotland, and bottled in America.

Black Scot is made with malts that are the pick of Scotch distilleries-fully balanced and matured by at least years of ageing. These whiskies are imported in wood blended and bottled in America under the original formula James Black & Son-just as in Scotland. There is a saving almost half the cost of Scotch imported in bottles.

MONTHLY Auction Sale

At Artesia On Wednesday, March 11th, 1936 Beginning At 10:00 A. M.

The services of Col. Tom McKinstry, auctioneer, will be free to the seller at this time.

Bring in your farming implements, livestock, household goods or oil well equipment. There may be many articles around your place that you don't need, but someone else may want to buy them. This is your opportunity, a chance for the buyer and seller to get together.

Remember the date, March 11th, and the place, across the street from the Brainard-Corbin Hardware Co.

Pasture Helps Lake Arthur Items Miss Joyce Alexander, Reporter **Cut Dairy Costs**

There is little question but that a good pasture will materially reduce the cost of producing milk and butterfat in New Mexico, says E. E. Anderson of the New Mexico State College. In a recent study in the plains area it was found that herds that had access to good cultivated pastures produced milk much more cheaply and returned a

area in particular. This should be Spence's illness. planted just as soon as the weather Christ, Scientist, on Sunday, March warms up. Moisture conditions last Wednesday night for Quinton, 8th. The golden text is: "Thou will, of course, have to be taken into consideration in the time of planting. With a favorable year, days. Thy hands have made me and a good pasture will ordinarily be fashioned me." (Psalms 119:63, 73) provided until freezing weather in the fall.

A few dairymen rely upon sudan grass in the irrigated sections of the state. It has not become general in these areas, however, since there is a feeling that the pasture ticular type of grass.

In both the irrigated and dryalong in August, is being used to Moore of Artesia, over the weekgood advantage. It has been found end. the greatest amount of fall and Saturday, going to Albuquerque wheat or barley and a few like oats last Sunday night. especially well. Where either of these last three crops is used, it is with the idea of taking the cows off the pasture early enough in the spring so that the crops can be allowed to mature.

Alfalfa Growers Assn. Demonstrates Soundness of Cooperative Marketing

One Artesia institution enjoys the distinction of pioneering a movement that has since been widely copied; that of supplying cooperative marketing facilities to farmers. First starting out with the idea of getting a market for Pecos valley hay, the Artesia Alfalfa Growers Association has since been able to supply a market to its farmer members for other crops such as cotton, fruit and grains.

Starting from a small organization in 1921, the association has extended its benefits to farmers of the surrounding communities and is not only able to supply the farmers with an outlet for farm produce, but with the principal necessities on the farm, such as farming implements, hardware, fuel oils, gasoline, etc.

Mr. Kennedy of El Paso, with the division of cooperative marketing, United States Department of Agriculture, recently stated on a visit Miss Bessie Waldrip of Cotton- here, the Artesia association was the most efficient one of its kind in

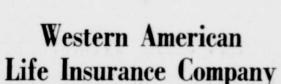

W. R. Hornbaker, the present manager, has completed fourteen years with the association in this capacity. Through prosperous and adverse years, the association has served its membership with the same degree of efficiency. This record speaks for itself and attests to the soundness of the cooperative principle as well as the ability of the manager and the directors to manage the affairs of the organization in such a way as to hold the loyalty of the membership as well as to gain new members.

NEIGHBORS

There is a great deal of satisfaction in doing business with a neighbor. Western American Life Insurance Company stock is owned by your neighbors. Its officers and directors are New Mexicans. In each district it has an Advisory Board composed of men you know. Space will not permit giving the names of our entire Board in Artesia and Carlsbad, but we take pleasure in introducing two of your neighbors on our home office Board.

> C. J. Dexter of Artesia. 1st Vice President and Director

Artesia, N. M.

Plan To Cut PWA 700,000 By July 1

WASHINGTON-New Deal officials plan to thin out PWA rolls by more than 700,000 persons in the next four months.

They count on a spring expansion in private employment and on such government activities as road-building and public works projects to absorb many persons now getting relief through the Works Progress Administration.

Relief Administrator Harry L. Hopkins said yesterday the administration believes 100,000 persons a week would be placed in private or other employment from now until July 1st.

Hopkins' estimate of reemploy ment, if it materializes, would mean return of more than 1,500, 000 to work by July 1. He said WPA would start this month to cut the rolls from the high point of 3,037,440 in February to a minimum of 2,310,000 by June 30.

Burditt-

(Continued from page one)

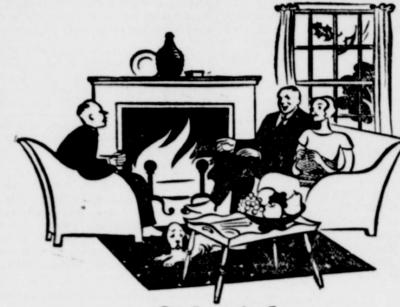

on. Although he said he had seen men shot down at Seven Rivers.

Mr. Burditt had an exceptional faculty of remembering names and at one time could call all the early day residents by their first name as well as every member of the family. In the early days he was known as the best dressed man in "these parts," a fact often called to mind by old-timers.

Funeral services were held here Tuesday morning at the Methodist church with the Rev. A. C. Douglas officiating. All of the children of Mr. and Mrs. Burditt were here to D. Franklin Burditt of Chicago vived by a widow and three other children, Mrs. Elbert L. Young of Pecos, Texas, who with her husban, Mr. Young, was here for the funeral services; Miss Charlse E. lege, Alpine, Texas, and Giles Edward Burditt of Artesia. Mr. Burditt also leaves to mourn his passing, a brother, John Burditt of Austin, Texas, and two sisters, Mrs. Martha Tarleton of Oklahoma City, Oklahoma, and Mrs. Caroline Kugle of Glenrose, Texas.

Mrs. Lewis Story, who has been so critically ill, is much improved however, two trained nurses are still with her and no company is allowed. Nurses expect to prop her up slightly in bed for the first

JUST KIDS—Against Big Odds!

Colorful FRUIT SALADS Provide a "Lift"

RIGHT warm colors do things | cup of canned pineapple syrup. b for us when autumn rolls When cold and ready to set, add around. They buck up our spirits one cup of diced canned peaches for chilly days to come—a pagan and one cup of drained crushed inheritance perhaps. Nature pineapple. Add one-half cup knows about that and weaves out- chopped nuts and one-half cup of-doors a flaming tapestry to chopped dates and mold as deflaunt in the face of October sired. Serve cold on crisp lettuce with mayonnaise. Serves eight. winds. Indoors, we light a log-fire and candles which catch the highdium-size apples having bright lights in our warmer rugs and red skins. Cut a slice from stem draperies. It's a cozy sort of ends and scoop out the centers. Now cut down in wide points to

Friends drop in-for a game, for a chat, or just to be companionable over the knitting needles which are weaving bright, warm winter togs. And what have you? What have you to serve for these pleasant chatty moments, when there's no time to fuss over foods?

We Nominate Salads

If you're a good pagan, you know how to put bright warm colors and delicious exhilarating flavors into fruit salads. Pagans weren't salad fans, so far as we know, but it is recorded that they did worship the harvest goddess. They heaped up red and gold and russet fruits and no doubt mingled them for the sheer glory of bright color and glowing flavor.

Autumn salads, gay with the gold of peaches, the amber of pineapple and the red of tomato, can be quickly made in the morning, put away in your refrigerator all ready to emerge for luncheon, tea-or saved for dinner if there is no call for them to be served sooner. Experiment—play with some of the new colorful salads, and see how much zest they add to your autumn menus.

Jellied Pineapple and Peach tablespoons bottled lime juice, Saiad: Dissolve one package of two tablespoons confectioner's lemon jello in one cup boiling sugar, salt and pepper to taste, a water and add one-half cup of little paprika and a few grains of canned peach syrup and one-half mustard. Shake until emulsified.

New Mexico GOP Landon Endorses

Kansas Man Is Choice of States has produced 15,802,000,000 Convention: Delegates Chosen for Nat'l Meet.

New Mexico republicans, holding the first state GOP convention of the current campaign, unanimously adopted a resolution last Monday at Albuquerque endorsing Gov. Alf M. Landon of Kansas as the party's presidential nominee.

Cyrus McCormick, a friend of the late Senator Bronson M. Cutting, and a wealthy former resident of Chicago, Illinois, was unanimously chosen as the state's nominee for national committeeman.

Mrs. Clark Baker of Roswell was elected national committeewoman nominee. Both she and McCormick will be formally named at the national convention of the party next

Six delegates were chosen by the onvention at a night session which leard acceptance speeches from the ominees for national committeeen and committeewoman.

These were: Delegates: P. L. Rapkoch, Las ruces, former state chairman; L. White, Raton; Lorenzo Delgado, Las Vegas; Mrs. Ruth Hanna Simms, Albuquerque; Jesus Baca, Santa Fe, and Dr. A. L. Willon,

Alternates: J. J. Emmons, Galup; Percy Wilson, Silver City; Dr. J. Amble, Mountainair; J. M. Hervey, Roswell; E. M. Baca, Socorro, and Ernest Evelyn, Albu-

When asked what his position on Landon would be, McCormick, 1934 As a republican, I endorse 100 per cent the action of the state repubican convention and will be governed in all things by the wishes of the republican party of New
