

IN THE PROBATE COURT OF EDDY COUNTY, STATE OF NEW MEXICO

IN THE MATTER OF THE LAST WILL AND TESTAMENT OF PHOEBE J. PHILLIPS, DECEASED

NO. 806
NOTICE

TO WHOM IT MAY CONCERN: Notice is hereby given that an instrument purporting to be the Last Will and Testament of Phoebe J. Phillips, deceased, has been filed for probate in the Probate Court of Eddy County, New Mexico, and that by order of said court the 14th day of December, 1936, at the hour of 2 o'clock, P. M., at the court room of said court in the city of Carlsbad, Eddy County, New Mexico, is the day, time, and place set for hearing proof of said Last Will and Testament.

Therefore, any person or persons, wishing to object to the probating of said Last Will and Testament, are hereby notified to file their objections in the office of the County Clerk of Eddy County, New Mexico, on or before the time set for said hearing.

Dated at Carlsbad, New Mexico, this 9th day of November, 1936.

R. A. WILCOX, County Clerk.

(SEAL) 46-4t-49

IN THE PROBATE COURT OF EDDY COUNTY, STATE OF NEW MEXICO

IN THE MATTER OF THE ESTATE OF JOHN ANGLIN, DECEASED

No. 801
NOTICE

Notice is hereby given that the undersigned was on the 18th day of September, 1936, appointed Administrator of the estate of John Anglin, deceased, by Honorable P. J. McCall, Probate Judge of Eddy County, New Mexico.

Therefore all persons having claims against said estate are hereby notified to file the same with the County Clerk of Eddy County, New Mexico, within one year from the date of said appointment or the same will be barred.

S. E. FERREE, Administrator.

48-4t-51

NOTICE STATE ENGINEER'S OFFICE

Number of application RA-1445 Santa Fe, N. M., Nov. 17, 1936

Notice is hereby given that on the 12th day of November, 1936, in accordance with Chapter 131 of the Session Laws of 1931, Ira S. Reser of Lake Arthur, County of Eddy, State of New Mexico, made application to the State Engineer of New Mexico for a permit to appropriate the shallow ground waters of the Roswell Artesian Basin to the extent of 246 acre-feet per annum by the drilling of a 12 1/2 inch well approximately 250 feet in depth, located in the SE corner of Lot 11, Sec. 6, T. 16 S., R. 26 E., N. M. P. No. 16, for the purpose of irrigating 82 acres of land in T. 16 S., R. 26 E., and further described as follows:

- 35 acres in Lot 12 of Sec. 5.
 - 15 acres in Lot 9 of Sec. 6.
 - 12 acres in Lot 10 of Sec. 6.
 - 20 acres in Lot 11 of Sec. 6.
- Any person, association or corporation deeming that the granting of the above application will be truly detrimental to their rights in the waters of said underground source may file a complete sworn statement of their objections substantiated by affidavits with the State Engineer and file proof of service of a copy thereof upon the applicant with the State Engineer on or before the 28th day of December, 1936, the date set for the State Engineer to take this application up for final consideration unless protested.

THOMAS M. McCLURE, State Engineer.

Health Column

Conducted by Dr. J. R. Earp, Director, New Mexico Bureau of Public Health.

Lies and Statistics

Said my neighbor at lunch today: "There are three kinds of lies; lies, d---d lies, and statistics." I am so weary of this stupid aphorism that I let it go unchallenged. Now I am wondering whether the other people present let it pass from weariness, from politeness or because, heaven forgive us, they think it may be true. After all, perhaps, duty calls for controversy.

A person who has never learned simple arithmetic is liable to be cheated by the grocer. If he is a grocer himself he is liable, quite unintentionally, to cheat his customers. We therefore abuse arithmetic!

Statistical method is another branch of mathematics slightly more advanced than arithmetic. Unfortunately it is not taught in schools and only rarely in colleges. Because we are aware of the general ignorance of the subject, the Bureau of Public Health tries not to issue statistical tables unaccompanied by a valid interpretation. We are far from perfect and it probably does happen that our figures are sometimes misunderstood either through our fault or that of the reader. But we do not blame "statistics." You might as well denounce the laws of physics every time your fuse burns out. Did I not suffer from a serious impiment of malice, I should have replied: "There are three kinds of fools; fools, d---d fools, and people who blame statistics for their own ignorance."

Red Bluff Power Line Starts Soon

Directors of the Red Bluff Water Power Control District are this week advertising for bids for the construction of approximately 25 miles of transmission lines, two sub-stations and rural connections.

This is the first unit of the power-transmission line that will be constructed from the powerhouse at the dam through all the districts included in the irrigation district.

Included in the proposed project, is a line through districts one and three in Ward county and Reeves county district No. 2. A line has already been constructed through the district in Loving county. It is estimated that approximately \$43,000 will be available for this unit of construction.

The project as planned does not include the three lower districts. However, the directors have given assurance that a line will be built through these districts immediately upon the completion of the proposed project, connecting with this line. It was thought advisable to break the construction of the line up into smaller projects.

No definite date for the beginning of construction has been set. The bids will be opened December 22, and the contract let if a suitable bid is offered. It is thought that the powerhouse will be completed by this date and that the construction of the line can be begun at the powerhouse—Pecos (Texas) Enterprise.

HYBRID CORN WON'T YIELD WELL WITHOUT GOOD SOIL

Seed corn may be too good for the land it is planted in. Or, as A. L. Lang, Illinois Agricultural Experiment Station soils specialist says, "Hybrid corn cannot be expected to take the backache out of hauling limestone nor remove the pain when it is necessary to extract money from the family purse for potash and phosphate."

A corn grower cannot expect to grow 90-bushel or 100-bushel corn on 30-bushel land, and he may be wasting high quality seed if he tries it. On the other hand if he has high quality soil capable of yielding big crops, he is wasteful if he does not buy seed good enough to make full use of the land. Practical tests have shown over and over again that good hybrid seed corn well adapted to the soil and the climate will yield enough more grain to return many times the extra investment in seed.

How the seed should fit the land and the land should fit the seed has been revealed clearly in plantings in Illinois, say agronomists of the United States Department of Agriculture who have been co-operating in this corn work. In comparing yields from the best five varieties of hybrid corn with the yields from the best five open-pollinated varieties, tests were made on fields of varying fertility. On the least fertile fields, the hybrids outyielded the open-pollinated varieties by only 5 bushels to the acre, but on the most fertile fields there was a difference of 24 bushels to the acre in favor of the hybrid corn.

One good feature of corn improvement by hybrid breeding, Lang points out, is that superior hybrids may make it possible to obtain much larger returns from good systems of soil improvement than has been possible in the past. In other words, a farmer need no longer fear that he is getting his land too good for his seed.

DROUTH MEASURE FOR TEN COUNTIES

Ten counties in New Mexico seek federal drowth relief, according to an announcement made at Dalhart, Texas, last Thursday. At the same time it was announced Harding and Union counties, two of the counties applying for aid, had been placed on the emergency drowth list. Other counties recommended for inclusion on the list included: Colfax, Quay, San Miguel, Guadalupe, Mora, Luna, Grant and Hidalgo.

"Ancient and Modern Necromancy, Alias Mesmerism and Hypnotism, Denounced" is the subject of the lesson-sermon which will be read in all Societies and Churches of Christ, Scientist, on Sunday, November 29th.

The golden text is: "It is written, thou shalt worship the Lord thy God, and him only shalt thou serve." (Matt. 4:10)

Among the citations which comprise the lesson-sermon is the following from the Bible:

"Wherefore take upon you the whole armour of God, that ye may be able to withstand in the evil day, and having done all, to stand." (Eph. 6:13)

The lesson-sermon also includes the following passage from the Christian Science text book:

"Let neither fear nor doubt overshadow your clear sense and calm trust, that the recognition of life harmonious—as life eternally is—can destroy any painful sense of, or belief in, that which life is not."

Bulldogs Will Meet Cavemen In Final Game This Evening

Auto Accident Deaths Increase

New Mexico has a rapid mounting death rate from auto accidents. Indications are now the number of deaths over the state will go far beyond the 1935 rate which totaled 108. Up to November 15th, 129 people had met death in New Mexico by an automobile, either thru an accident or from carbon monoxide gas. This percentage gives each of the thirty-one counties in the state slightly over four people killed to the county with the worst month, December, coming up. If the present death rate is maintained 163 people will meet death because of the auto by the close of the year, which will be an increase of fifty per cent and bring New Mexico into first place in the nation in increased deaths over 1935.

Only twenty-two states have shown less deaths than in 1935 and this condition has led county, state and city police to appeal for more careful driving especially during the months of much snow and ice.

Rabbits, both cottontail and the jackrabbit are doing considerable damage to the unguarded crops in Roosevelt county, according to reports.

PWA Has Allocated \$17,844,124 to State

Edward H. Oakley, state director of PWA and other allied federal agencies, has submitted a detailed report showing just what the PWA has meant to New Mexico in dollars and cents. Total allotments are given below and indicate New Mexico has gotten its share of the PWA money. The summary:

279 Federal projects costing-----	\$17,818,728
81 Non-federal project under NIRA costing-----	2,145,344
22 Non-federal project under ERA'35 costing-----	2,900,347
3 Non-federal project under ERA'36 supplemental costing-----	288,957
2 Non-federal projects under FDA'36 costing-----	226,365
337 Projects costing-----	\$23,379,741
Projects Completed or Under Construction:	
244 Projects completed costing-----	\$11,638,899
87 Projects under construction costing-----	11,208,220
Cost of Work Contracted:	
Federal projects-----	\$17,818,728
Non-federal project under NIRA-----	2,145,344
Non-federal projects under ERA'35-----	2,900,347
TOTAL-----	\$22,864,419
Expended to Date:	
For wages-----	\$ 6,130,000
For materials-----	9,929,724
Other expenditures-----	1,784,400
TOTAL-----	\$17,844,124

Employment Provided at Construction Sites:
Average number men employed: 1934, 5,578; 1935, 4,080; 1936, 1,338.
Total man-hours worked to date: 12,260,300.

Hope Items

Miss Frances Johnson, Reporter

Mr. and Mrs. Ed Madson were Roswell visitors Friday.

Joe Plowman recently returned from Las Cruces where he has been since early in the fall.

Miss Maggie Lane of Lake Arthur spent the week-end here with her sister, Miss Alma Lane.

Miss Lucile Morris, principal of the Central school of Artesia, spent the week-end here visiting friends.

Miss Wilhelmina Wilburn of Roswell spent the week-end here visiting her parents, Mr. and Mrs. Buck Wilburn.

Mr. and Mrs. John Prude, Mr. and Mrs. L. P. Glascock and Mr. and Mrs. Robert Cole attended the Shriners convention held at Roswell Saturday.

The quarterly conference of the Methodist church was held here Sunday evening by Presiding Elder Hightower of Roswell. Mrs. Hightower accompanied the Rev. Hightower on his visit here.

The first basketball game of the high school schedule and the first game to be played in the new gym is scheduled for December 4th with the Weed team. Practice was begun last week by Coach Merle Ogle.

Mrs. Newt Teel left Tuesday for Sanderson, Texas, where he plans to spend Thanksgiving with her sister, Mrs. Jim Happle. She also plans to visit her sister, Mrs. Fred Gibson and her mother, Mrs. Naomi Powers at McCamey, Texas.

H. J. Dunne and his mother, Mrs. B. S. Dunne, drove to Hope Tuesday where they visited Mrs. N. L. Johnson and Mrs. H. J. Dunne, who has been visiting her mother here two weeks. Mrs. Dunne returned with them to Odessa, Texas, Wednesday.

Mr. and Mrs. Elmer Schrier and daughter Darlene of Capitan spent the week-end here visiting Mr. Schrier's sister, Mrs. Bill Riley and Mrs. Schrier's mother, Mrs. Ed Payne. Mr. and Mrs. Schrier plan to move this week to Willard where he has been transferred.

Mrs. D. Harper Simms (nee Effie Fite), left Tuesday for her home after spending several days here visiting her parents, Mr. and Mrs. F. E. Fite. Mrs. George Teel has returned from Ajo, Arizona, where she spent several days visiting her daughter, Mrs. Guy Crockett. Mr. and Mrs. Crockett recently became the parents of a baby son.

D. E. Cozart of Abilene left Thursday for Corpus Christi, Texas, after spending two weeks at the Cauhope ranch where he had contracted a steel water system. Several large water tanks were installed on the ranch. The water will be pumped from wells to these tanks. The system is large enough to provide water for the lower Cauhope ranch.

T. P. T. A. carnival which opened the new gym Saturday night was attended by a large crowd coming from the valley, the mountain district, Hope, and its surrounding ranch district. Proceeds of the affair will be used for dental work for school children and for a tonsillectomy clinic which will be held Wednesday at the hotel for school children. The evening closed with a floor show of tap numbers by Maxine Bunting and Margaret Buckner and old-fashioned folk dances by grade children. The children were dressed in old-fashioned clothes.

INCREASE ANNOUNCED FOR SCHOOL BUDGETS

SANTA FE—R. H. Grissom, state school budget auditor, announced Saturday an increase of \$434,636 in the maintenance budget for schools during 1936-1937, the budget going from \$5,782,831 to \$6,217,467. Direct charge budgets were increased \$115,788 for the next fiscal year, going to \$920,221. Grissom said average daily attendance in grade and high schools for 1934-1935 was 88,442, compared with 93,000 for 1935-1936. Per capita cost of the 1935-1936 budget, he said, was \$61.52.

A Mystery Shot Kills An Officer

CLAYTON—A bullet wound received under mysterious circumstances claimed the life of Morrison Rupp, 28-year-old game warden in the hospital at Clayton Saturday.

Rupp, bleeding and faint from a bullet hole in his stomach, drove up to Chief of Police J. L. Pounds on November 15th saying he had been shot.

Examining physicians found traces of powder burns on Rupp's shirt, and Pounds said a revolver with two discharged cartridges was found in the game warden's automobile. The gun, he said, had been fired recently. The car's windshield was pierced apparently by a bullet, and two other bullet marks were found on the machine.

The only statement by Rupp made public by Pounds was that he was fired upon by unidentified persons from the rim of a Mesa near Apache canyon where he had gone to watch some shooting.

Hospital attendants disclosed also that Rupp muttered about an "Ed" during the spells of delirium saying "he didn't suppose he would do him that way."

Pounds related that Rupp told him about noon Sunday that he was going to Apache canyon to watch some shooting. About twenty minutes later, the officer said, Rupp returned wounded.

CONTINENTAL CUTS MELON

PONCA CITY, Oklahoma—Continental Oil Company employees will share with stockholders in a large distribution of earnings on December 15th with payment to employees of a special bonus out of 1936 earnings at the same time stockholders receive a dividend of twenty-five cents per share, it was announced at Ponca City, Oklahoma, by President Dan Moran.

The amount to be received by each employee will be determined by his period of service prior to December 1st. Permanent employees with one year's service or more on December 1st will receive two weeks' wages or a half month's salary, while those with less than one year's service on that date will be given one week's wages or a quarter month's salary, he said.

Local Girl Wins In Essay Contest

WASHINGTON, D. C.—Dorothy Tudor, pupil of Central school, Las Cruces, is announced as winner of first honors for her state in the eleventh national safety essay contest conducted annually by the Highway Education Board.

Her award is a gold medal and a check for fifteen dollars, and her essay will be entered in competition with the best essay from each other state for the national prizes offered by the board. All awards are made possible by the automotive industry.

The contest, which inspires a year-long program of safety education in the schools of the nation, is credited by most observers with being responsible for the record of school children, where accident and fatality rate declined over a period of years, while that for adults and others rose 200 and more per cent.

New Mexico pupils participated widely in the competition, and many prizes are being given by the board in an effort to stimulate state-wide interest in safety education. Minnie Mae Kinkaid, also of El Paso Gap school, El Paso Gap, wrote the essay which ranked second to that of the Las Cruces girl, and she will receive a check for ten dollars and a silver medal.

In addition two third prizes are awarded, and these, represented by a bronze medal and a check for five dollars in each instance, will be presented to Ferne Rowland, Cottonwood school, Artesia, and Margaret E. O'Rourke, Junior high school, Tucumcari.

Simultaneously with the essay contest open to elementary school pupils, a national safety lesson competition is sponsored among the teachers of this group. First honors for New Mexico go to Mrs. Carrie Wright, El Paso Gap school, El Paso Gap, whose lesson teaching children the fundamentals of safeconduct on the streets and highways of New Mexico takes first place in the state. Her paper will be entered in competition with the best lesson from each other state in the union for valuable national awards. The first national prize is a check for \$500 and a trip to Washington, while checks for \$300 and \$200 will be given to those teachers whose lessons are ranked second and third, respectively among the state papers.

Essays were written on the subject "A Definite Program for My Community to Prevent Highway Accidents and to Promote Highway Safety," while teachers were requested to title their lessons: "A Lesson on Highway Safety for Children of My Community." The essay contest is open only to pupils of the fifth, sixth, seventh, and eighth grades, while all teachers of the eighth and lower grades are eligible to compete.

CARBON PAPER—The Advocate.

Beware The Cough That Hangs On

No matter how many medicines you have tried for your cough, chest cold or bronchial irritation, you can get relief now with Creomulsion. Creomulsion not only contains the soothing elements common to many remedies, such as, Syrup of White Pine Compound with Tar, fluid extract of Licorice Root, fluid extract of Wild Cherry and Menthol, but also has fluid extract of Ipecac for its powerful phlegm loosening effect, fluid extract of Cascara for its mild laxative effect and, most important of all, Beechwood Creosote is perfectly blended with all of these to reach the source of the trouble from the inside. Creomulsion can be taken frequently and continuously by adults and children with remarkable results. Thousands of doctors use Creomulsion in their own families as well as in their practice knowing how Creomulsion aids nature to soothe the inflamed membranes and

heal the irritated tissues as the germ-laden phlegm is loosened and expelled. Druggists also know the effectiveness of Beechwood Creosote and they rank Creomulsion top for coughs because you get a real dose of Creosote in Creomulsion, emulsified so that it is palatable, digestible and potent for going to the very seat of the trouble. Creomulsion is guaranteed satisfactory in the treatment of coughs, chest colds and bronchial irritations and especially those stubborn ones that start with a common cold and hang on for dreadful days and nights thereafter. Even if other remedies have failed, your druggist is authorized to guarantee Creomulsion and to refund every cent of your money if you are not satisfied with results from the very first bottle. Don't worry through another sleepless night—phone or go get a bottle of Creomulsion right now. (Adv.)

Do You Own Sheep, Cattle, Dairy Cattle, or Family Milk Cows?

Cottonseed Meal--Cottonseed Cake

Prof. E. S. Savage of Cornell University, writing the regular feed column for the "Dairymen's League News," has the following article in a recent issue of this publication regarding cottonseed meal:

In looking over the current feed prices this week I note that cottonseed meal at \$46.40 a ton retail is priced cheaper than soybean oil meal at \$50.90, or linseed oil meal at \$51.90. Distillers' dried grains at \$43.40 a ton and corn gluten feed at \$46.90 are all cheaper in total digestible nutrients except the linseed, but I feel that cottonseed meal is now one of the cheapest feeds on the market. From the information that I get on possible sources of feed this winter it seems that our old friend, cottonseed meal, is going to be back in the picture and is likely to be one of our best feeds. Due to the scarcity of all ingredients it has already become necessary to use it in fair amounts in dairy feed formulas.

A great many dairymen have a prejudice against cottonseed meal as an ingredient in the concentrate mixture. I do not share in that prejudice. I have always figured that cottonseed meal was one of the best feeds that could be used for dairy cattle in supplying protein. In 1906, when I first began to feed dairy cattle, I well remember the first ration that I used. It was made up of equal parts of wheat bran, cottonseed meal, and corn meal. Of course, this year we cannot use any such mixture as this because of the price of corn, but I always go back to those two years' experience when bran, cottonseed meal, and corn apparently were the cheapest feeds on the market and when in school where I was located at that time we fed all of our cows on this mixture.

We did not have any trouble from garget at that time and I am very positive that cottonseed meal has never caused garget or increased virulency in any herd where cottonseed meal was used.

Another experience that a friend of mine had on cottonseed meal was as follows: He had an Ayrshire cow that he could not get to do very well for him. Consequently, he said that he would find out about cottonseed meal and if it killed his cow it would not do very much harm. Now, the cow was being fed on good clover hay and corn silage and he put this cow on straight cottonseed meal and nothing else as a grain ration. He increased the amount of cottonseed meal that she was getting every day until she was getting 15 pounds a day. This particular Ayrshire cow was fed for a whole lactation on nothing but cottonseed meal, clover hay and corn silage. She produced in this lactation period over 400 pounds of fat. She bred all right and her calf was fine. As soon as she straightened out after calving he put her right on clear cottonseed meal again for the second lactation and she did very well on it. She looked so well and was doing so well that a buyer came along and took the cow off his hands before she had finished the second lactation.

This checks up with evidence that Professor Morrison gives in his book on cottonseed meal as to the amounts that have been fed. Professor Morrison says that in many experiments as high as 9 or 10 pounds of cottonseed meal were fed per cow daily with fairly good roughage and corn silage. Professor Morrison reports that some high producing cows were fed as much as 17 pounds of cottonseed meal a day for several months without any injury. I quote the following from the new edition of "Feeds and Feeding" under the heading "Cottonseed Meal":

"Contrary to the opinion sometimes expressed, such heavy feeding of cottonseed meal did not increase the tendency to mastitis in the cows or make the trouble more severe in the case of cows affected with the disease."

I am putting this all in our columns this week because in the light of what may be coming along in our dairy rations this winter I want to dissipate as far as possible the prejudice of our feeders against the use of cottonseed meal in moderate quantities in the ration because I foresee that it is one of the ingredients that we will want to use.

Contrary to general opinion, experimental work particularly in Michigan and Texas does not indicate that cottonseed meal has very much of a constipating effect. I have always supposed until these experiments came out that cottonseed meal was one of the most constipating of our feeds and should be fed along with less constipating feeds like molasses or linseed, but these careful experiments in Michigan seem to prove differently.

Professor Savage is recognized as one of the outstanding nutritional authorities in the United States. Professor Savage's home state is New York; and it is worth a great deal to have this strong article coming from a great Dairy State interested in cottonseed meal because of its value as a feed.

Over the past ten-year period, experimental work on cottonseed meal in dairy mixtures has proved the fallacy of previous ideas held with regard to the constipating effect of cottonseed meal and its connection with udder troubles. Statements made by Professor Savage demonstrate very clearly this changed attitude regarding the value and importance of cottonseed meal as a source of protein in dairy mixtures.

Of course, it must be borne in mind that Professor Savage's article was written primarily for dairymen in New York state and the prices mentioned are based on quotations in that state. These quotations include freight costs over a considerable distance.

Cattlemen, Sheepmen, Dairymen, and Farmers!

This product added to your home-grown hay, bundle feeds, wheat bran, and shorts, will make your dollars go twice as far, cut your feeding costs half.

MR. COWMAN! MR. SHEEPMAN! That winter grass you have saved for your herds this year will be worth 50 per cent more money to you if you feed cottonseed cake. This feed will build a foundation for heavier calves and lambs next spring as well as build a foundation for a higher percentage calf and lamb crop the following spring.

PROJECTED SOUND PUT TO MEDICAL PURPOSES

CHICAGO—Science has projected sound movies into a new sphere.

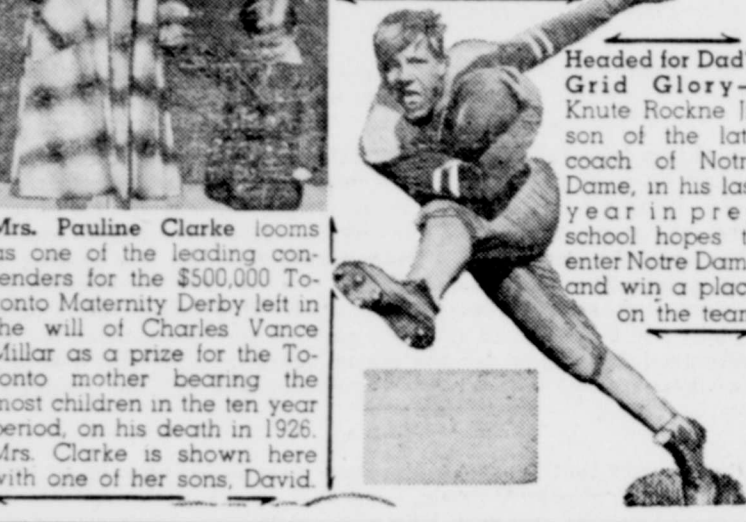

The beat of an unborn babe's heart was heard by 400 doctors and nurses in a "talkie" audience at the Chicago Lying in hospital Friday night.

They witnessed movies of three difficult obstetrical cases. At one point they saw a physician apply a stethoscope to a mother. Over

MUSICAL CAMERAMAN—Josef Cherniavsky, internationally famous conductor, who directs the "1847 Musical Camera" heard on Sundays over the NBC red network. Cherniavsky's program is unique in that it portrays a series of pictures in music.

N. Mex. Exhibits To International

The International Hay and Grain Show will be held in Chicago November 28th to December 5th. During this week, on December 2nd and 3rd, the International Crop Improvement Association will hold its annual meeting. Tom Reid, secretary of the New Mexico Crop Improvement Association, will attend this meeting as the state representative.

New Mexico will be represented at the International Hay and Grain Show with various exhibits, of which the following have already been forwarded to Chicago for entry. There are three entries of Mexican June corn, consisting of ten ears each; one gallon of barley; ten heads of yellow milo. Other exhibits representing various crops are being forwarded from different parts of the state. Most of these exhibits were prepared from New Mexico certified seed, although it is not necessary that exhibits be from this quality seed.

In a few cases the New Mexico entries will be in competition with entries from region 6, which includes New Mexico, Arizona, Colorado, Utah, California, Nebraska and Kansas. Region 6 competition will be on corn, oats and soybeans. Competition on alfalfa seed will be with all states in the western half of the United States, and for all other crops the competition will be general, covering all sections of the United States and Canada.

At the International Hay and Grain Show last year, New Mexico exhibited fourteen entries and received premiums on twelve. It is hoped that the number exhibited this year will be still larger.

Tom Reid, state representative of the New Mexico Crop Improvement Association, at the meeting of the International Crop Improvement Association, will have charge of all exhibits sent in from New Mexico, and will unpack and arrange them upon his arrival in Chicago. Mr. Reid will serve on the committee of grain sorghum judges, and assist with the non-collegiate crop judging contest. This contest is held under the direction of a committee appointed by the International Crop Improvement Association.

UNEMPLOYMENT LAW HELD CONSTITUTIONAL

WASHINGTON—New York unemployment insurance law, which taxes employers to pay benefits to those out of work, was held constitutional Monday by an evenly divided vote of the supreme court.

New York statute is similar to other state laws through which the federal government plans to carry out unemployment insurance.

The vote on constitutionality was four to four with Justice Stone absent because of illness.

Division of voting justices was not announced.

The federal security act itself, however, was not involved in Monday's litigation.

Mr. and Mrs. Arba Green left Saturday for Albuquerque to attend a planning committee meeting of the Cuarto Centennial, which was held in the home of Mrs. Albert Simms.

Forests Improved By CCC Enrollees

ALBUQUERQUE — If project plans for the Forest Service CCC camps are carried to completion during the eighth period, October 1 to March 31, the national forests of New Mexico will see the construction and maintenance of many miles of telephone lines, roads, trails, fences, numerous water developments and many other valuable improvements, was the statement issued recently by Frank C. W. Pooler, regional forester.

Scheduled for this six months period is the construction and maintenance of 211 miles of fences of many different types, 558 miles of construction betterment, and maintenance of forest roads, 165 miles of phone lines to be newly built, improved, or maintained, along with other projects such as rodent control, campground construction and improvement, water development, and erosion control.

Eight camps in all will carry out this winter program. Three will be located on the Lincoln, one each on the Santa Fe, Carson, Gila and Cibola National Forests, and one will be located on the Jornada Experimental Range at Las Cruces.

It was pointed out by forest officials that not only would the road construction aid in the fire suppression program of the Forest Service, but it would also play an important part in offering new and interesting sections of the national forests for visitors next summer. These new roads will give quicker means of access to burning areas, and phone lines will offer quicker means of communication which will undoubtedly result in the saving of many acres of timber and woodlands from forest fires in the years to come.

FEDERAL PENSION SYSTEM

WASHINGTON—Ready for the stupendous job of assigning "account numbers" to 26,000,000 workers, government officials said Monday night business in general and big business in particular was co-operating heartily with arrangements for the federal pension system.

Wednesday morning postmen began delivering applications for the accounts to employees, on the basis of reports their employers were required by law to make by last Saturday night. If an employer reported one or a hundred people in his hire, as many forms will be delivered to his shop with a few to spare. The employees have until December 5th to return their questionnaires.

Chas. Morgan, superintendent of the Continental Refinery here, returned Monday from Denver, Colorado, where he spent the past month observing the operation of a new cracking unit installed there recently by the Continental Refinery.

GIVES THE HISTORY OF THANKSGIVING

The Rev. W. B. McCrory, principal speaker at the luncheon program of the Artesia Rotary club Tuesday, giving a brief history of the observance of Thanksgiving from its inception in 1621 to the present time. The Rev. McCrory

told his hearers that Thanksgiving was not observed as a national holiday until a proclamation by President A. Lincoln in 1863. Previous to this time a definite date had not been set, although two other presidents proclaimed a Thanksgiving season. M. G. Schulze was the only visitor.
