The address of the ancillary executors is: Homer Vestal Hastings and Joseph Wesley Hastings, c/o Chas. H. Dean, Attorney at Law, Skaggs Building, Plainview, Texas. Homer Vestal Hastings, Joseph Wesley Hastings, 8/10-17-24-31

NOTICE STATE ENGINEER'S OFFICE
Number of Application RA-1524, Santa Fe, N. M., August 10, 1954. Notice is hereby given that on the 9th day of August, 1954 in accordance with Chapter 131 of the Session Laws of 1931, Donald E. Fanning of Artesia, County of Eddy, State of New Mexico, made application to the State Engineer of New Mexico for a permit to change location of shallow well and place of use of 114.48 acre of shallow ground water per annum by abandoning the use of Well No. RA-1524, located at a point in the SW 1/4 NW 1/4 SE 1/4 of Section 4, Township 17 South, Range 26 East, N.M.P.M., for the irrigation of 38.16 acres of land described as follows:

Subdivision Part N 1/2 SE 1/4, Section 4, Township 17 S., Range 26 E., Acres 28.4

and drilling a shallow well 16 inches in diameter and approximately 101 feet in depth, located at a point in the NE 1/4 NW 1/4 NW 1/4 of Section 25, Township 18 South, Range 26 East, N.M.P.M., for the irrigation of 38.16 acres of land described as follows:

Subdivision Part NW 1/4 NW 1/4 and North part of SW 1/4 NW 1/4, Section 25, Township 18 S., Range 26 E., Acres 38.16.

No additional rights over those set forth in License No. RA-1524 are contemplated under this application.

Appropriation of water from all sources combined not to exceed a total of 3 acre feet per acre per annum.

Old well to be retained for domestic use.

The 38.16 acres to be moved from to be drier up to further irrigation from shallow ground water.

Any person, firm, association, corporation, the State of New Mexico or the United States of America, deeming that the granting of the above application will be truly detrimental to their rights in the waters of said underground source, may protest in writing to the State Engineer's granting approval of said application. The protest shall set forth all protestant's reasons why the application should not be approved and shall be accompanied by supporting affidavits and by proof that a copy of the protest has been served upon the applicant. Said protest and proof of service must be filed with the State Engineer within ten (10) days after the date of the last publication of this notice. Unless protested, the application will be taken up for consideration by the State Engineer on that date, being on or about the 13th day of September, 1954.

JOHN R. ERICKSON, State Engineer. 8/17-24-31

Appropriation of water from all sources combined not to exceed a total of 3 acre feet per acre per annum.

Mrs. Sidney Stone of Portales was her over the week-end staying with her grandchildren, Janette.

Local Doctor Discusses Causes Of Nerve Tension

The word tension denotes tautness. A muscle is said to be tense when it is not relaxed. When speaking of nerve tension, we cannot think of nerves being taut in a physical sense, but we can think of "jumpy" nerves. People with nerve tension cannot seem to take it easy and are always in a hurry. Even in sleep there is not complete relaxation and the patient will wake up and start the day tired.

We often find this nerve tension is due to an irritation of the nerves caused by misaligned or subluxated vertebrae pressing on the spinal cord and spinal nerves, thereby interfering with their normal carrying capacity, and irritating the nerve fibers to the extent the patient is unable to relax.

The correction of subluxations would then be the way to remove the CAUSE of nerve tension. This is the basis of all Chiropractic care. Then if you are suffering from nerve tension, remember: It is not true to say "we have done everything possible" until Chiropractic is included.

For further information about Chiropractic, you are invited to consult Dr. Kathryn Behnke Rains, Palmer Graduate Chiropractor, 408 W. Richardson, phone 861. Office hours daily except Saturday afternoon.

Palace Drug Monthly News
A message from Fred and Jim, 'Your Pharmacists'

PHARMACY IS PROGRESSING so rapidly that we can no longer depend on the knowledge we gained when we studied in our College of Pharmacy. More than 75% of the medicines we dispense in your prescriptions were unknown 10 years ago.

EVERY DAY NEW DISCOVERIES are released, for prescription use, and we immediately stock them. We must know their actions and their dosage, for it is not unusual for Physicians to request information from us about the availability of the newer medicines.

IN ORDER TO BE ABLE to be properly informed we carefully read our Association Journals and other drug publications. We also receive reports from Pharmaceutical Manufacturers, and carefully file them for ready reference.

WE ARE continuously striving to be worthy of the confidence you have in our ability to compound your prescriptions.

MAJOR LEAGUE ROUNDUP

Phils Do Giants Favor By Dumping Brooklyn, Move Across River to Ebbets Field Tuesday

By BEN PHLEGAR Associated Press Sports Writer Philadelphia Phils, last night the New York area to National league pennant, get tonight to show whether playing favorites in the chase.

resume the pleasant pastime of winning after losing seven of the last eight to other clubs. Manager Leo Durocher has picked Johnny Antonelli (17-3) to attempt to halt the skid.

The Dodgers had won 12 out of 18 from the Phils up to last night, but they couldn't keep up the pressure. Brooklyn was ahead only once and didn't have a real chance after the fifth. The pitching staff fell apart. Rookie Bob Darnell, making his first start, couldn't get anybody out in the third. Clem Labine and Preacher Roe got roughed up in the fifth when the Phils put it out of reach on six hits and an error which produced five runs.

Artesia Sports Scene Proposed Change in North, South Lines Little Help

By ED BOYKIN ward wall in an elephantine sort of way. Then there's the famous Doak Walker, Jim Martin, Lew Carpenter, and, Friday night, Jim Dubinski.

We got the impression Dublin-ski played the quarterback post strictly because Buddy Parker didn't want his great Bobby Layne to take a chance on getting hurt before the pro-race start.

Ed Delehanty, playing first base and the outfield for the Philadelphia Nationals in 1896, hit four home runs in a single game.

Goodell Gets Seventeenth Win of Year

The league-leading Artesia NuMexers blasted Midland 11-1 here Monday night in a game turned into a comedy of errors—nine of them.

Midland scored its one and only run—in the first inning—Bud Hull was walked and came home on an Artesia error and Tom Barton's single.

From then on it was Artesia, which scored heavily in two big innings—five in the fourth, four in the fifth.

Midland was charged with five errors, Artesia four. While all the NuMexer runs were of the earned variety, errors helped out the league leaders between the bases.

Rookie Wayne Goodell took credit for the win, netting out four hits to the Indians, while the Indian's McMillan sustained the loss, his second against no wins.

Artesia moves on today for a two-game series at Sweetwater. Last night's win showed Goodell's record to 17-5, giving the 19-year-old a highly respectable .773 average.

Artesia scored one run in the second when John Goodell doubled and brother Wayne singled. In the five run fourth Bob Herron, John Goodell, Mickey Diaz and Reuben Smartt hit consecutive singles. Frank Gallardo winding up the field day with a double to home a pair of runs.

In the four-run fifth Herron again led off with a single. John Goodell was hit by a pitched ball, and Wayne Goodell sacrificed. Mickey Diaz was safe on a fielder's choice, later homing on an error. Smartt singled, advanced on an error, and homed on a wild pitch.

In the eighth Herron doubled, made it home on a play which put Wayne Goodell out at first on a throw from shortstop.

Teenagers Chase 72 on University Course in Jaycee

ALBUQUERQUE, (AP)—Par 72 on the University of New Mexico's tough tournament course was the goal of 190 teen-aged youngsters today as they teed off in the second round of the 362-hole qualifying test for the Jaycee junior golf tournament.

The 7,250-yard course, with its sand traps, hills and tricky fairways, proved too much for all but two of the crack young golfers as qualifying play began yesterday.

The two who beat the course were Davis Adams of Macon, Ga., home state of two of the previous eight winners, and Gerald Goring of Honolulu, Hawaii. Each had a one-under-par 71.

Three golfers were tied at 73. They were Frank Boynton of Orlando, Fla.; Eddie Ross of Baton Rouge, La., and Phil Rogers of San Diego, Calif.

The low finishers, with only a couple of exceptions, were among early finishers. They had the advantage of the cool morning temperatures and missed completely a brisk wind that developed late in the afternoon.

Some scientists think the planet Venus may be completely covered by water.

Roswell Shades Odessa 5-4 In Gruelling Three Hours

ODESSA, (AP)—Roswell choked off the tying run at third base in the ninth inning to take a 5-4 victory over Odessa and salvage the final of a three-game series to-night.

Highlighting the battle that lasted almost three hours were four Rocket double plays and Joe Bauman's 56th home run of the year. It was the leadoff blow in the Roswell sixth.

Roswell built up a 3-0 lead off Bob Feller as Tom Sawyer blanked Odessa through five innings.

A single by Chuck Balculis and triple by Ossie Alvarez brought one in the third. Stubby Greer's single and two Oilers errors netted another in the fourth, and Bauman made it 3-0 in the sixth.

Leaders Losses Fails to Change Texas Standings

Shreveport and Houston are still comfortably entrenched in first and second place in the Texas league lead in spite of Monday defeats.

Shreveport lost to Oklahoma City 7-5, San Antonio beat Dallas 8-5, and Tulsa whipped Beaumont 7-3.

Arroyo's defeat was his first on the road and second since joining Houston. He lasted only six innings and was trailing 6-2 when he departed. Bob Boyd homered for Houston.

Shreveport 79 59 572 Houston 74 65 532 5 1/2 Oklahoma City 71 65 522 7 San Antonio 72 66 522 7 Tulsa 66 70 485 12 Fort Worth 66 71 482 12 1/2 Beaumont 64 75 460 15 1/2 Dallas 58 79 423 20 1/2

Trainers of harness horses find that one of their major headaches on the days when their horses are to race is that nags like too much to eat.

Heavy Demand for 1517 Cotton Crop Seen, Officer Declares

Demands for the 1954-crop of 1517 cotton will be extremely heavy, J. T. Stovall, secretary of the 1517 Cotton Assn. at State College, predicted today.

Several factors are responsible for the bright marketing prospects, the association official explained. Chief among these is the popularity of the high-quality 1517 lint with millers and spinners who manufacture some of the finer cotton materials—materials which are used not only for clothing but also for items for every room in the home.

The National Cotton Council's slogan "Bring Cotton Out of the Kitchen and Into the Parlor" has become a reality, Stovall said. Hand in hand with the slogan has been the outstanding job which Miss Beverly Pack of El Paso, Maid of Cotton, has done in demonstrating to the world that cotton is a really high society fabric.

For many years 1517 lint has had the reputation of being the best spinning cotton produced in commercial quantity in the United States. And, several factors make it apparent that the 1954 crop will be of exceptionally high-quality, the 1517 official explained.

The growing season has been ideal, the crop is from two to three weeks earlier than normal, and early season control of insects has permitted the set of a heavy crop

New Mexico Wool Production Drops Under 1953 Level

The amount of wool shorn in New Mexico in 1954 is estimated at 10,875,000 lbs. according to the Crop Recording Board. This is slightly less than the 11,349,000 pounds produced in 1953.

The number of sheep shorn in the state this year was 1,228,000 compared to 1,256,000 in 1953. The average weight per fleece dropped from 9.0 in 1953 to 8.9 this year.

Shorn wool production this year in the 13 western sheep states (11 Western States, South Dakota and Texas) is estimated at 162,111,000 pounds. This is only slightly below a year ago but 17 per cent below average.

The number of sheep shorn and to be shorn in the Western states was estimated at 18,057,000 head, 4 per cent less than last year and 23 per cent less than average.

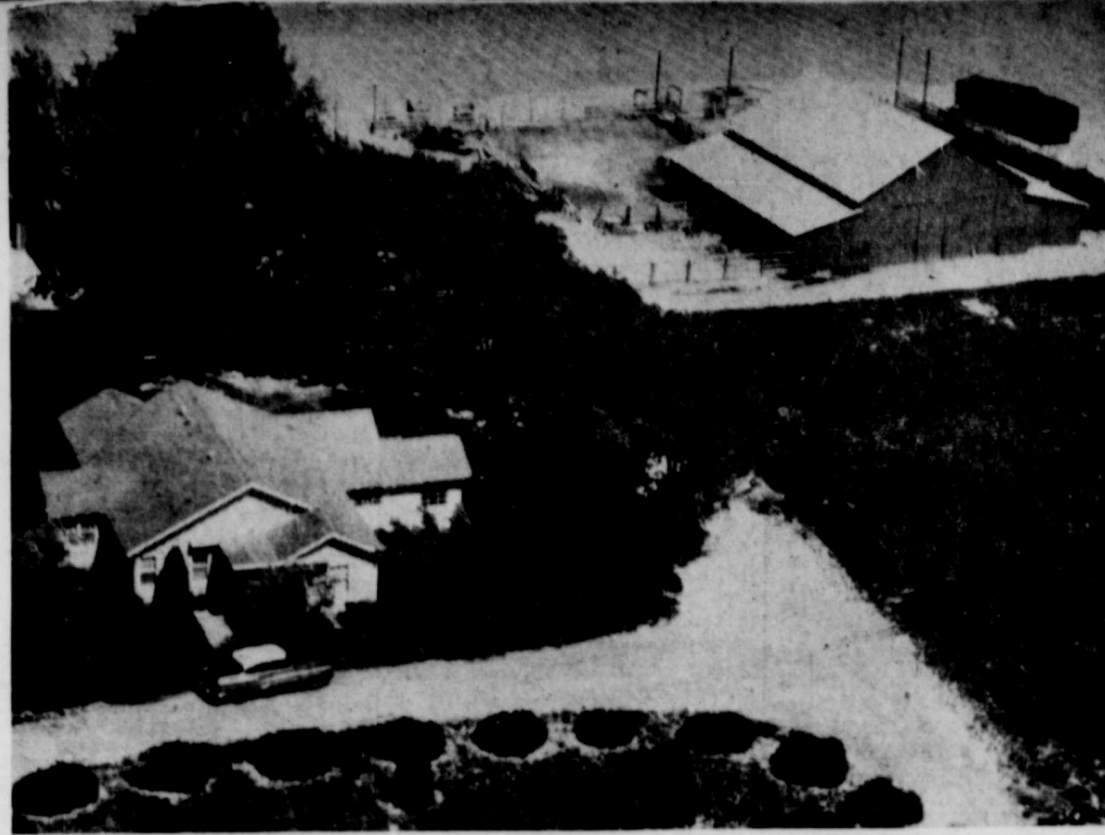

The average weight per fleece at 8.98 pounds, compares with an average of 8.64 in 1953 and 8.34 for the 10-year average.

Production of shorn wool was greater than last year in South Dakota, Texas, Idaho, Arizona, Oregon and California, and smaller in the other Western states.

Texas, the leading sheep state, had an average of 8.5 pounds per fleece compared with 7.8 pounds a year ago. The increase in weight per fleece more than offset the decline in number of sheep shorn, and the state had a net increase of 2 per cent in shorn wool production over 1953.

Estimates for Texas and California include an allowance for wool to be shorn from sheep and lambs this fall. The allowance for Texas is 4,555,000 pounds compared with 5,243,000 pounds shorn last fall. The allowance for California is 2,396,000 pounds compared with 2,645,000 pounds last fall.

The estimates of shorn wool production are collected in cooperation with the post office department through the rural mail carriers. For the western sheep states, reports are obtained directly from owners of both range and farm flocks.

ADOLPH ZELENY FARM, SOUTH OF ARTESIA

Extensive SCS Projects Aid Area Farmers

A mass of water and soil conservation work on farms in the Artesia area has been announced by the Central Valley soil conservation district.

Work recently completed or now in progress includes:

- Installation of 1,345 feet of concrete ditch on the J. E. Taylor farm.
- Installation of 2,400 feet of concrete pipe on the Ross Sears farm, south of Artesia.
- Seventy acres of leveling on the Bill Bogle farm, northwest of Lake Arthur.
- Forty-five acres of leveling on the Ross Sears farm, south of Artesia.
- Twenty-five acres of leveling on the Jack Rogers farm, Atoka.
- Twenty acres of leveling on the Paul Robinson farm, Lake Arthur.
- Eighteen acres of leveling on the J. L. Taylor farm, Cottonwood.
- Fifty-nine acres of leveling on the Moutray Bros. farm, Lakewood.

Adolph Zelenys Live on Area Farm for Three Generations

The Adolph Zelenys, whose farm was pictured recently in the Artesia Advocate series of North Eddy county mystery farms, have lived on their farm 31 years.

The farm is located 3 1/4 miles south of Artesia, and has seen three generations of Zelenys.

Previously owned by C. J. Shorett and George Brinton, the farm was purchased by the Zelenys in 1923. Since then it has been steadily improved.

The house in which the Zelenys live today was built in 1945, replacing an old, two story building, torn down to make room for the new one.

On 118 acres Zeleny has 47 acres in cotton and 71 acres in grain.

Zeleny and the former Hattie Parham were married in 1935. They have three children. They are Dwayne, 17, who graduated from Artesia Senior high school in the class of 1954; Zella, who will be a freshman this coming school year.

Alfalfa Seed In State Cut 50 Per Cent

Preliminary inspections indicate that production of certified alfalfa seed in New Mexico this year will be about 50 per cent of normal, according to J. T. Stovall, an administrative officer of the Crop Improvement Assn. at State College.

Stovall gives three reasons for the shortage both in acreage and yield.

ment, was 205,000 acres. This year's estimated production, except for 1950 when 187,000 were produced, is the smallest since 1947.

The estimated production for other Southwestern states is as follows:

- Arizona, 750,000 bales; Texas, 3,400,000 bales; California, 1,350,000 bales and Oklahoma, 280,000 bales.

The agricultural marketing service forecasts a crop of 12,680,000 bales for the United States. This is 3,785,000 bales or about 23 per cent less than last year's production and 232,000 bales more than the average of the 10 years 1943-52.

First and most damaging was the aphid infestation in the hay this spring. This insect made it necessary to cut for hay the second crop, which under normal circumstances would have been left for seed production.

Secondly, the serious shortage of water for irrigation limited plantings and reduced the yield on existing acreages. Many of the fields which have been inspected have shown a definite shortage of water which has resulted in many light spots.

Finally, Stovall says, the surplus of alfalfa seed over the past two to three years, coupled with the steady to strong hay market has discouraged heavier plantings.

Seed production, at best, is somewhat of a gamble and farmers have taken their profits while hay prices were high.

Farmers who are planning to harvest and this year will realize more profits from their crop if they clean up their fields before harvesting, the crop improvement official says. Seeds of noxious weeds such as Dodder, Whitehorse Nettle, Bindweed, and others are not permitted in seeds offered for sale for planting purposes.

It is cheaper to clean fields before harvest than it is to clean the seed afterwards. Removal of noxious weeds after harvest oftentimes results in a loss of large quantities of a high-quality alfalfa seed.

In fact, many lots of seeds are reduced as much as 25 per cent in the cleaning process. Eliminating the weeds before harvest will spare the farmer not only the expense of cleaning, but also unnecessary losses of good alfalfa in the cleaning process.

Cotton Production In New Mexico Down 28 Per Cent

The New Mexico cotton production is estimated as of Aug. 1, to be 235,000 bales, which is 92,000 bales or about 28 per cent less than the production in 1953 of 327,000 bales. The acreage in cultivation as of July 1, less 10-year abandon-

GMC HYDRA-MATIC TRUCKS

TOUGH HAULING Goes Easy on a GMC!

Dile on the heaviest loads. Run it long hours, day after day. Keep running it years after an ordinary truck would wear out. Mister, you won't stop this extra-rugged GMC Stake!

Its new 125-horsepower engine packs more "go" than any other in its class... by plenty. And that's yoked up with a bigger-than-ever cargo area... riding on tough, extra-duty springs. Its brassy chassis is more than equal to its job.

What's more, it offers Truck Hydra-Matic Drive* to spare your engine and drive line wear and tear. It eliminates all clutch repairs. You get better gasoline mileage.

And remember... quick and easy removal of the Stake Rack converts this GMC to a Platform model for double-duty work. Either way, you get the kind of low-cost reliable service for which GMC is famous. Come on in and look 'em over!

*HYDRA-MATIC DRIVE. Standard on some models, optional at extra cost on others.

Get a MODERN truck!
