Vol. 17, No. 7

Hope, N. M. Friday, Apr. 6, 1945

### A Letter to the Soldier Boys

Here is another letter to the boys and girls in the service. Wallace Johnson has purchased Mode Stevenson's dairy herd a new fence is being built around the Methodist parsonage—Mrs. Jennie Schwalbe from Ozona, Texas, is visiting Mr. and Mrs. Chester Schwalbe—Mrs. N. L. Johnson and daughters, Marjorie and Francis, were shopping in Artesia Saturday—Rush Coates and Ervin Miller visited Walter Coates Sunday afternoon—Mr. and Mrs. Fred Chambers of Cottonwood were visiting in the Cecil Coates home Sunday Mr. and Mrs. Chas. Cole were in Artesia Monday—Quite a few from here attended the horse racing in Artesia Sunday afternoon Floyd Cole's hay barn will be ready for the first cutting of hay—Mr. Guthrie is building a new dairy barn—D. W. Carson pointed his house, then built a brooder house, then painted his barn and now his garage looks so bad in comparison that he has to repair and paint that, just one darn thing after the other Sgt. Herschell Bragg has been visiting around the past two weeks. He is looking as fit as a fiddle—Sunrise Easter services were held at the Methodist Church Sunday morning—An Easter egg hunt was given the young people of this community at the Wallard

home Sunday morning—The Artesia Advocate has been sold to a man from Louisiana. The price paid is said to be around \$60,000. That's lots of money. If we had that much we wouldn't be here or anywhere else—It is reported that Buzz Essex has sold his 80 acre farm for \$100 per acre—It begins to look as if the Penasco valley is to have a fruit crop—Glenn Menefee is in the signal corps with General Patton's third army—Clayton Menefee is still on a hospital ship in the South Pacific—The school board will hold an important meeting next Monday night—Mr. E. C. George has rebuilt his brooder house and has ordered more baby chicks That's all for this time. See you in this column next week maybe.

### Entertain With Birthday Dinner

Mr. and Mrs. James Ray honored their mother, Mrs. Buck Willburn, with a birthday dinner at their ranch west of Hope March 31. The occasion also honored the birthdays of Mr. R. H. Shafer and James Ray. A turkey dinner and beautiful birthday cake with yellow candles was served at one o'clock to the following guests: Mr. and Mrs. Buck Willburn, Zane Ray, Janice, and Alfred Dee, Mr. and Mrs. R. H. Shafer and Mary Lou, Miss Lois Culbertson of Artesia and Mr. and Mrs. James Ray.

Job printing for sale at the News office.

Hope gets irrigating water Sunday noon.

Hay for Sale. Bryant Williams, Hope

Typewriter paper 8 1-2 x 11, \$1.50 for 500 sheets at the News office.

Cash for your eggs. Will be in Hope, Thurs., Apr. 12th Bring your eggs and poultry to the Essex & Briscoe Service Station. W. J. Brown, Carlsbad.

Mr. R. H. Shafer had the misfortune of breaking a rib while helping shear last week.

W. H. Neel went to Carrizozo Monday to take his physical and to report to the draft board.

The freeze Tuesday night killed nearly all if not all the fruit around Hope for this year.

B. Bradford has commenced on Jess Musgrave's residence to be built east of Hope. Mr. Bradford built Emmitt Potter's residence and also the Methodist parsonage and did a mighty good job on both

Congratulations to Mrs. Buck Willburn and Ben Miller who celebrated their birthdays last Saturday. We did not find out how young Mrs. Willburn was but Ben Miller was 74 years young. Also to Mrs. R. H. Shafer and Jamer Ray.

### ...THOUGHTS...

In order to arrive at any place it is necessary to get in the way that leads there. Therefore, in order to get to heaven it is necessary to get in the way that leads to heaven. Where is that way? Jesus said, "I am the way, and the truth, and the life: no man cometh unto the Father, but by me." John. 14:6.

But, how get into Christ? Paul answers that when speaking of himself and the Roman Christians. He said, "Or are ye ignorant that all we who were baptized INTO Christ Jesus were baptized into his death." Getting into the way, however, does not insure a safe arrival. One must remain in the way. So with Christ. One must continue in Him, follow His example, in order to finally reach heaven.

CHURCH OF CHRIST  
Hope, New Mexico  
Robert A. Waller, Evangelist  
Box 83, Artesia, New Mexico

### Drive For Clothing Apr. 21st

The National Drive for clothing for foreign relief takes place Saturday, Apr. 21. Committees from each of the churches in Hope and from the Eastern Star will be appointed. Anything that is clean and warm is acceptable. Also bedding of every description. Do not bring high heeled or open toed shoes.

### DUNKEN NEWS

The children enjoyed an Easter egg hunt at the school house Friday.

Several from this community attended church at Pinon Sunday.

Miss Edwina McGuire of Carlsbad spent the week end with her parents, Mr. and Mrs. W. B. McGuire.

Delbert Ivans was an Alamogordo visitor Tuesday.

Mr. and Mrs. Bill Watts and children and Mr. and Mrs. Ed Watts attended the races at Artesia Sunday.

Mrs. A. D. Hill was visiting in Artesia Sunday and Monday.

Mr. and Mrs. Orland Parker have a new baby daughter.

### PINON NEWS

Lessie Smith and Carrie Munson were home from Portales to spend Easter vacation.

A large crowd attended Church of Christ services Sunday.

Hazel Harbert and daughter, Wanda, Eli Rose Robertson and Quata Winters spent Sunday in Pinon

Mrs. Nona Means spent the week end in Artesia.

Edwina McGuire spent Easter vacation with her parents, Mr. and Mrs. W. B. McGuire.

Mrs. Dare Mclean, Jr. and children are visiting Mr. Mclean's parents.

Glenn Stevenson and Don Merritt were Artesia visitors Saturday.

Mr. and Mrs. Fred Gentry spent Monday in Alamogordo.

Mr. and Mrs. W. H. Wade were in our community again Sunday. Mr. Wade is our new county agent having replaced Wallace Johnson.

### LOCALS

WATER NEXT SUNDAY.

J. C. Buckner went to Roswell Wednesday.

Mr. and Mrs. Bill Watts were visitors here Tuesday.

Mr. Newt Teel has been on the sick list the past week.

Mrs. J. C. Buckner spent the week end in Carlsbad visiting her daughter and family.

Miss Fowler's class at school and some of their parents went through the Carlsbad Caverns today [Friday].

Mrs. Jess Musgrave went to the hospital at Roswell Tuesday and was operated on for appendicitis. Last reports are that she is getting along nicely. Alta is staying with her.

### WEED ITEMS

Easter Sunday was quite a time for Weed. People spent the day in different places other than home, some at Ruidosa, White Sands, Pinon, Sacramento etc.

Mrs. Felix Sanders of Carlsbad has been a visitor in the Mark Fisher home the past week.

The infant daughter of Mrs. Babe Chandler has been kept in Artesia lately where it has been under medical care.

Mr. R. C. Waltrip and family and Mr. C. H. Winters and family spent the week end in El Paso.

Miss Ona Ree and Clyde Smith were Sunday visitors in the Tidwell home at Pinon.

### AVIS NEWS

Mildred and Dalton Bell and Ernest Miller were guests in the Charley Smith home Sunday and Monday night.

Emilee Estes and Mrs. Daisy Smith and children spent Thursday night with Mrs. Frances Smith.

Misses Dorothy Cridebring and Mildred Bell were in Artesia on business last week.

Carrie Lois Munson spent the Easter vacation with her family here. She returned to college at Portales Tuesday.

**MORE MEAT FOR THE AMATEUR FISHERMAN!**

The recent battle of deep sea fishermen for more ration points for meat found wide public sympathy. Nothing makes a man hungrier than fishing.

And that goes for ordinary fishermen, too. Which prompted Elmer Twitchell, the famous river, inlet and lake angler, to come out strongly today in favor of more grub for the amateur and semi-pro boys.

"Have you seen those lunches that are being put up these days for the individual small-time fisherman?" demanded Mr. Twitchell. "Not a calory in a carload!"

"It's reached a point where it's almost impossible for a fisherman to get his bait into the water. It's snapped up in midair, not by a fish but by fellow fishermen!" he added.

"Late last autumn," Elmer continued, "the box lunches provided anglers was so lacking in nourishment that some fishermen would leap out of a boat and take any bait a fish would take. In fact, when the season ended they were taking artificial lures."

"I was on a fairly crowded lake casting for bass in October. I was using a big wooden plug with a red head and white stripes. On my first cast two fishermen dove for it!"

Elmer insisted that in another instance he was using a metal spinner, and as it went by the end of a dock a fellow angler made two strikes at it.

"Amateur anglers, arise!" demanded Mr. Twitchell. "The professional fisherman ain't getting a much tougher break than we are. What does the wife put in her husband's lunch when he goes fishing these days? A jelly sandwich, six animal crackers, a stale doughnut and a little cold coffee!"

"You can't fish an hour anywhere without getting hungry enough to eat a horse. That's why farmers never pasture a horse near a trout stream or bass lake."

"In normal times a man setting out for a day's fishing toted along enough grub to sustain life in a normal adult for six weeks. Boy, what sandwiches! Roast beef, lamb, corned beef, pork and what have you! That's what made fishing enjoyable. The average fisherman didn't care half as much for fishing as he did for enjoying a heavy meal or two without bothering about table manners."

Elmer began getting up a petition to OPA at once. "Spring is here, and the amateur angler is in a bad way," he said. "Unless he gets a little substantial food in that lunch-box he will be grabbing feather lures!"

**PRIVATE PURKEY WANTS A G.I. AT THE PEACE TABLE**

Dear Harriet:  
Like I told you some time ago I am working with my pals on a sort of League of G.I. Peace Kibitzers and the thing is getting into shape fast. Of course Roosevelt, Churchill and Stalin is handling things okay now at places like Yalta, but is all just expressing intentions and ideas. When the war ends and the peace delegates begin to huddle the real fighting will start and nothing will help to make them stick to their objectives like maybe some G.I.s at the peace tables.

I don't see why there should be any opposition to G.I. representation in the peace. If there had been a free for all battle with gangsters in your street and you had to put up a tough fight would anybody tell you to scam under the bed and keep your big mouth shut while the whole question of further trouble was handled by a group of well-dressed strangers who had cleaner collars and better table manners?

So when a war ends what is about insisting that the G.I.s who has been getting their noggins knocked off all through it just drop everything, put a gag in their mouths and never speak above a whisper while the whole question whether they will have to do it over again is decided by professional peacemakers who never slept in a hole full of ice-water, et their meals in a snowdrift or swum every river in Africa and Europe?

## American Life Insurance Celebrates Its 100th Anniversary by Adopting a New Actuarial Table Which Reflects Longer Life of Modern Citizen

By ELMO SCOTT WATSON  
Released by Western Newspaper Union.

NINETEEN forty-five finds American life insurance observing its 100th anniversary and by way of celebration it's beginning to operate under a set of actuarial tables. Until this year insurance companies have been "booking" life and death chances on the same basis as they were figured when the first American "life" policies were written away back in 1845. But this year they are discarding the old "odds table" and putting into effect a new one and that's a matter of prime importance to more than 70,000,000 Americans who own more than 125 billion dollars worth of life insurance.

As a matter of fact, the adoption of the new actuarial tables in American life insurance's centennial year is accidental and coincidental, rather than purposely planned. Nine years ago state insurance commissioners and mathematical wizards of the insurance companies recognized the fact that the tremendous improvements in medical science had made the old "odds table" obsolete. In the light of modern methods of prolonging human existence, a new set of life expectancy standards was needed.

But figuring out these standards and fitting them to rates—or fitting rates to them—wasn't a simple matter. For instance, they knew that you—if you are 30 years old—have a far better chance of living beyond that age than you did two decades ago. It was only a few decades ago that eight out of every thousand people died at that age. Today, thanks to more public enlightenment on medical matters and improvements in diet (including more knowledge of vitamin requirements) only two or three persons per thousand are dead at the age of 30.

**Rates About the Same.**  
But even though the improvement in our life chances seemed to indicate much reduced rates, this was offset over the years by the deterioration of our interest rates and the increased cost of doing business.

The problem of adjustment was threefold: (1) rates according to improved life probability; (2) company income according to lowered return on investments; and (3) company expenses as compared to "the good old days" when breakfast cost a nickel and the company president drew a salary of \$30 per week.

The insurance commissioners had a major mathematical problem before them. For the latter two points—lowered earnings on invested funds and sharply rising costs of doing business—more than covered the slight break they showed on their books because the doctors were keeping us alive longer.

Nevertheless they went ahead. Alfred N. Guertin of New Jersey, was made chairman of a commission group to recommend the new "life" tables. Five other state commissioners sat with him. John S. Thompson, mathematician and vice president of the Mutual Benefit Life Insurance company of Newark, N.J. was a committee member representing the Actuarial Society of America.

Sixteen states enacted the so-called "Guertin law," which means that the insurance companies doing business in those states can in 1945 adopt the recommendation of the Guertin committee into their future policies. The law became effective January 1 of this year on an optional basis but it becomes mandatory after three years, in December, 1948.

**How It All Began.**  
Centuries before Messrs. Guertin and associates took on their herculean job, a Roman named Ulpianus devised an "odds table" for a few of his friends. Ulpianus was a lawyer with a flair for figures. As a matter of fact, his life expectancy charts were so good that they remained unchallenged from 220 A. D. for almost 15 centuries. Even as late as 1814, the Tuscan government used his figures.

Not content with Lawyer Ulpianus' findings, however, Edmund Halley, known as the English astronomer who discovered the famous Halley's comet, undertook the job of computing "modern" mortality tables in 1693. His method was the basis for present-day computations; namely that of using accurate vital statistics. Halley selected the city of Breslau (you've been reading about it in the war news from Silesia) for his guinea pig from 1687-92—observing

A view on Broad street in front of the Stock Exchange and Sub-Treasury (then the Customs House) in New York City in 1845 when life insurance had its beginnings.

births and deaths for a five-year period.

His tables were the precursor for many others—such as the English tables of 1762. But all such improved tables over the last two centuries failed to keep pace with medical science.

Our first actuarial brainchild was called the American Experience table, which was brought into usage right after the Civil war. With minor changes it has continued to be the accepted base for computing life and death chances up the present time.

Meanwhile the M. D.s were busily engaged in making our American Experience figures look sick. Their success in keeping the lower age groups alive longer is directly responsible for this major effort to re-frame the basic structure of all life insurance in the United States. Just by way of proving the point, in 1900 the U. S. average age was 49.24. A couple of years ago it stood at 64.82.

When it all began back in 1845, this was a husky young nation. But many of its huskiest young citizens fell victims to one disease or another, diphtheria and tuberculosis being the most active.

**Many Hazards.**  
Even as late as 1900, more than 40 out of every 100,000 people succumbed to diphtheria. Today it's only one per 100,000. Europe's black plague of the early 17th century wasn't much worse a scourge than the horrors of pulmonary tuberculosis over the last century. Statistics for 1900 show that this killer took 173 out of every 100,000. Today less than 40 per 100,000 die of the disease each year.

For these reasons, coupled with all the other hazards of living a century ago, the old boys scratched their heads twice before insuring their fellow men promiscuously.

When Ben Miller bought the first life policy issued by Mutual Benefit Life Insurance in Newark in 1845, there were many "don'ts" tied to the policy. Ben bought \$1,500 worth of insurance on his life at a premium of \$51 a year with the provision that: (1) He didn't die on the seas; (2) he didn't leave the country; (3) he didn't go south in the summertime; (4) he didn't (without consent) join the army; (5) he didn't cut his own throat to improve his wife's finances; (6) he didn't expose his insured and valuable carcass by duelling; (7) he religiously avoided the gallows or guillotine. . . . and so on for quite some distance in slightly more technical verbiage.

Ben, it might be remarked, was one of the hardier sort, for he lived to collect his own insurance at the age of 96!

While the early directors of insurance companies had no worries about clients being killed in an automobile or airplane, the 1845 citizens of Pres. James Polk's nation of 27 states were liable to find themselves without a scalp if they took the "covered-wagon" trail west.

Life insurance companies also could discount the probability of the "insured" dying from heart failure because of the then modest 15 million dollar public debt. Perhaps it is worth noting that over the years the increase in heart disease (and it has increased considerably) is in ratio to the government's debt to the people—now at the quite immodest figure of almost 300 billion, a very large hunk of which is held by the same insurance companies.

If as you read this, you've been hoping to find that now insurance rates will be lower because the doc-

## Star Dust

STAGE-SCREEN-RADIO  
Released by Western Newspaper Union.

By VIRGINIA VALE

PRESTON FOSTER has 20th Century-Fox over a barrel regarding his motorcycle. A clause in his contract says he mustn't ride it while he's working in a picture—but from the first days of "Thunderhead—Son of Flicka" he rode it into the studio and nobody said a word. He hadn't enough gas to drive his car from Newhall every day, so the ban on the motorcycle was lifted. He took Rita Johnson on a death-defying ride around the studio to celebrate—Rita's one of the leads in the picture—and afterward she commented "No wonder the studio doesn't want him to ride that thing. With him a motorcycle isn't a means of transportation—it's a lethal weapon."

John Conte, who's back at his post as master of ceremonies of the Frank Morgan radio program, accomplished a lot during his six-months absence. He had his first

JOHN CONTE

featured role in a picture—"Lost in a Harem," with Abbott and Costello—in which he played opposite a handsome gal named Marilyn Maxwell; and they were married a short time after the picture was finished.

Barbara Brown gave up the role of Robert Hutton's mother in Warner's "To Young to Know" because of illness; when she recovered they cast her in the same picture, this time as the woman who adopts Hutton's baby.

A wedding performed on September 26, 1922, was reenacted down to the last detail for "Captain Eddie." On the screen it duplicates the news pictures of the original ceremony almost exactly. Even the signs on the back of the car the bride and groom drive away in are the same. Fred MacMurray and Lynn Bari are the actors; the original participants were Adelaide Frost and Capt. Eddie Rickenbacker.

Like a lot of us, Frank Ross is tired of those Hollywood searches for "unknowns" that end with a Hollywood personality getting the role. He's really searching for an unknown beauty for the role of "Salome" in "The Robe"; he gets mail by the ton, but looks at every photograph himself. Attractive girls between the ages of 16 and 25 still have a chance.

Audiences gasp and laugh at a scene in "It's a Pleasure" in which Sonja Henie goes up to Michael O'Shea's apartment in an elevator, because the elevator operator looks so much like Frank Sinatra. His name is Dave Willock, and he says he's lost a good many movie parts because of his resemblance to "The Voice"; resemblances like that have wrecked more than one Hollywood career.

Florence Lake, who has practically made a career of playing Edgar Kennedy's wife in his RKO comedies, has been cast for a comedy role in "George White's Scandals of 1945." Just for a change, this time she plays a mother—not Kennedy's either.

Ingrid Bergman has a "gismo"—marine lingo for an "oscar." The bronze statuette of a marine was awarded to her by Leatherneck, the official publication of the corps, as the top actress of 1944, and it's a trophy to be proud of.

Dick Long, Hollywood high school student, not only landed the role of Claudette Colbert's son in "Tomorrow is Forever," but his screen test was so good that he was given a term contract with International Pictures, instead of a one-picture contract.

Hedda Hopper: Looking at HOLLYWOOD

NOT so long ago some famous Hollywood stars pushed the war news off the front pages with accounts of their unsavory romances and knife-and-bottle parties...

This is not why I'm telling you some things about Fred MacMurray today. I'm writing about Fred because I think this pleasant, self-effacing young American actor, who stands as high in the good opinion of his employers...

Fred MacMurray

Fred MacMurray is the very core of everything that is simple, straightforward, and American. He's as down-to-earth as applesauce or the boy next door...

A record of 40 top pictures since 1935, when Fred came into motion pictures from the New York stage, is proof to doubters that you can be all these things and roll up bigger box office than the glamour playboys any day...

Aims to Please

On the heels of this singing part, Fred, with typical MacMurray versatility, embarked on the role he is now shooting, "Captain Eddie," the story of the famous racing driver, Eddie Rickenbacker...

He is deeply concerned with the "customers" when it comes to making a picture. Other stars refer to the public as "my audience" or "my fans..."

His temperament, his art, and his income never stand between him and humanity. The very names that build the framework of his biography are down to earth and all-American: Kankakee, Ill., where he was born...

No Silver Platter

Like most successful men, Fred helped earn that education. He won the American Legion award for the highest scholastic and athletic record at college...

"I dread interviewers, Hedda," he told me, "because I'm bad copy. I'm just a plain guy. My wife and I and the Ray Millands have lots of fun together just doing the things all the millions of other taxpayers are doing around these United States..."

Fred and Lillian have two children—Susan, four, and Robert, one year, both adopted. They want four more and recently bought the Leland Haywood home in Brentwood to make room for the kids...

Down to Earth

"I don't like to hold forth about my notion of things. Why should my opinions of life, love, death, and taxes be any more interesting than those of any man in the street?"

But there's plenty going on in that head of his. He's a solid investor. Believes in property, in the land. Owns a ranch near Santa Rosa with purebred stock...

Droplets Make Oil Last Longer

Chemicals Are Introduced Producing Results That Rival Magic.

CHICAGO. — An annual \$20,000,000 worth of chemicals which nature does not put in petroleum are being added to oil at the rate of a droplet a gallon or a cupful per tank car...

The droplets — chemical cocktails — impart new properties to lubricating oils. Sometimes they increase the life of an oil, or of the machine parts, by tremendous percentages.

Six kinds of droplets are described in a report to the directors of the Socony-Vacuum Oil company. Raises Pressure Limit.

One of these enables an oil to stand higher pressures without rubbing bare and permitting the welding of overheated metal. The droplet raises this pressure limit from 5,000 pounds to more than 30,000 pounds a square inch.

The new additive still allows the wax to solitify, but in particles small and separated, so that they cannot link up to make the oil solid. For oils and greases at colder than 25 below zero, the wax still is filtered off.

Another droplet is a soap soluble in oil, which keeps pistons and springs free from lacquers and carbonaceous deposits.

Two Kinds Are Used.

Two droplets are used to counteract the deteriorating effect of oxygen which forms acids and sludges. Some of the metals in machines speed this oxygen deterioration by acting as catalysts.

A fifth additive increases the oiliness of oil. Oiliness means slipperiness. When an oil film becomes extremely thin, it begins to lose slip.

The sixth additive to protect metal parts from rust moisture is able to get through even oil films on metal. A few tenths of a per cent of the rustless additive fixes the lubricating film so tightly that moisture is unable to get through.

Altogether these droplets are the most important lubrication improvement in a decade.

Napping Nazis Captured; Plus a Good, Hot Dinner

WITH 83RD DIVISION, WESTERN FRONT.—Doughboys who took Honvelez in a night attack caught the entire Nazi garrison asleep—and got a free hot meal to boot.

Soon after they captured the village, a German volkswagen was seen speeding in from Bovigny, half a mile to the north.

The Yanks hid and let it roll right into town and draw up to a building which a few hours before had been a German command post.

"Hande hoch (hands high)" said a Yank infantryman, covering the driver.

When the Americans checked up they found the volkswagen was loaded with chow for the Nazi garrison. So they pitched in and ate steaming hot meatballs and soup—the first hot meal they had had in 24 hours.

Judge Finds Truthful Fellow and Is Lenient

NEW YORK. — Charged with drunkenness, Gustave Jens, 49, a seaman, was asked by Magistrate Morris Rothenberg if he'd ever been drunk before.

"I've been drunk in every country in the world," was the reply.

"What would you do if I suspended sentence?" "Probably head for the nearest saloon."

"You," said Rothenberg, "are the most truthful fellow I ever met. Sentence suspended."

Farm Topics

Homemade Electric Pig Brooder of Value

Simple to Construct And Easy to Operate

THE electric pig brooder is fast becoming popular and profitable on farms where pigs are farrowed in late winter or early spring. The brooder prevents chilling and keeps sows from lying on pigs—the common causes of losses.

Death losses of early spring pigs were reduced from 34.3 to 16.9 per cent by the use of electric brooders in Indiana tests.

ELECTRIC BROODER SAVES PIGS

Electric brooders saved an average of 1 1/2 more pigs per litter. An electric pig brooder is inexpensive and easy to make.

On many a farm there are enough pieces of lumber to make one or more brooders. The sketch shows how to make an electric brooder to put in one corner of the farrowing pen.

For the first few days use a 150-watt lamp if the weather is extremely cold. At the end of a week, a 60-watt bulb may supply enough heat. When pigs are 10 days or two weeks old, heat can be discontinued.

It is important to use a rubber-covered shop extension cord complete with rubber-covered socket. Standard brass shell sockets are not suited to this type of use.

Spray Cattle to Kill Destructive Grubs

Cattle grubs which are responsible for \$100,000,000 annual loss in meat, milk and leather in the U. S., can be controlled by spraying cattle backs with insecticide under pressure.

Power Spray Used.

When the insecticide is sprayed into the grub holes, the grubs fall out and are killed by the insecticide before they can fall off and reproduce heel flies which in turn attack cattle, laying eggs which turn into grubs.

U. S. Farm Leaders

ARBOR DAY FATHER

J. Sterling Morton, while governor of Nebraska, due to his passion for tree planting, founded Arbor day.

When Cleveland returned to the presidency in 1892, he appointed Morton secretary of agriculture.

J. Sterling Morton was born in New York and enjoyed the distinction of having been expelled from the University of Michigan for his independence. He had located in Nebraska City, where he entered politics and became editor of the Nebraska City News.

While secretary of agriculture, he reorganized the division of statistics and set up the division of agronomy to study forage plants. He established the division of publications, the office of road inquiry and organized a dairy division.

Arbor day is held in Nebraska on April 22, the birthday of J. Sterling Morton, "the Father of Arbor Day."

J. S. Morton

Arbor day is held in Nebraska on April 22, the birthday of J. Sterling Morton, "the Father of Arbor Day."

AROUND THE HOUSE

Let the gelatin congeal a bit before adding the fruit. This will keep the fruit from going to the bottom of the mold.

To find your door key in your handbag, fasten a piece of ribbon onto the key. Sew a snap on the other end of the ribbon and snap it to the bag.

To protect the ends of a large linoleum rug that has to be stored for a time, place galvanized pails on the ends. Tie the pails together to keep them on.

Make sure that all of your soap dishes have drainage holes at the bottom. This will permit your soap to dry when not in use and the soap will last longer.

Always use a shoe horn when putting on your shoes. Ease the foot into your shoe and you won't break the back or strain the seams. They'll look well longer. Put shoe trees into the shoes the minute you take them off. Wrinkles are ironed out then, while the shoe is still moist and warm, and they thus retain their shape.

That Explains It

The visitor was walking through a village when he came upon a crowd watching two men fighting.

"What's the fight about?" he asked.

One of the onlookers, who was urging on the two men, answered him, just as the combatants broke apart for a breather.

"On my right," he announced, "is Jim Jones, who married Widow Stubbs, and on my left is Bill Hinks, who introduced them."

His Choice

Dennis was taken to his first harvest festival. Among the offerings of fruit and flowers, the bunches of purple grapes on the pulpit took his fancy.

When the offertory box came round he put in a quarter and said, confidently, "Grapes, please."

An Exchange

Jasper—My laundry sends back my shirts with different buttons on them.

Jerry—You don't know when you're well off. My laundry sends back my buttons with different shirts sewed on them.

SNAPPY FACTS ABOUT RUBBER

One government synthetic rubber plant, operated by The B. F. Goodrich Co., in 14 months produced in synthetic rubber the equivalent to the rubber yield of approximately 14 million rubber trees during the same period.

Four lumber companies subscribed to the cost of building a 50-mile private road for hauling logs from an Oregon forest. The road is entirely on private ground and free from all state and local regulations, and trucks can be operated thereon license-free.

Shoes made with new non-marking synthetic rubber soles are among the new items in the rubber footwear field.

Kellogg's Corn Flakes bring you nearly all the protective food elements of the whole grain declared essential to human nutrition.

Kellogg's CORN FLAKES

HINTS FOR HOME BAKERS

Easy Raised Muffins a Welcome Change

Make them with Fleischmann's yellow-label Yeast—the only fresh yeast with more EXTRA vitamins.

RAISED CORN MUFFINS

- 1 1/2 cups corn meal 4 tablespoons melted butter or margarine
1 1/2 cups milk, scalded 1 cake Fleischmann's Yeast
2 teaspoons salt 1/2 cup lukewarm water
3 tablespoons brown sugar 2 eggs, well beaten
3 cups sifted flour

Stir the corn meal very slowly into the scalded milk. Mix in salt, brown sugar and melted butter or margarine. Cool to lukewarm. Dissolve Fleischmann's Yeast in lukewarm water and add to lukewarm corn-meal mixture. Add eggs and flour; beat well. Fill well-greased muffin pans half full. Cover and let rise in warm place, free from draft, until light, about 1 hour. Bake in moderate oven at 375° F. about 30 minutes. Makes 20.

**BIRTH OF INDUSTRIAL SOVIET RUSSIA**

THE SURRENDER of Lord Cornwallis and his British army at Yorktown, Va., on October 19, 1781, marked the real beginning of the United States as a nation. We were then 13 thinly populated states occupying a narrow strip along the Atlantic seaboard.

Back of that strip, to the west of the Allegheny mountains, lay the forests and prairies of the great central continental valley. Beyond that the mountains and then the shores of the Pacific, a distance from Philadelphia of some 3,000 miles. It was a territory sparsely populated by many different tribes, speaking several languages, living under the nominal, but unrecognized sovereignty of France, Spain, England, Russia and the new United States. Out of such a territory, working against such conditions, the people of the United States, through voluntary effort, have built the most prosperous and powerful nation the world has ever known. We have worked at that job for 163 years.

Our development was through a procession of volunteer farm families marching ever westward, seeking new land on which to build new homes and find new opportunities. As market and social centers they established villages. Many of these grew into cities in which centered industry to meet the needs created by the farms. It was the pioneering farmers and their families that built our America.

Somewhat as a counterpart there is occurring now an advance eastward from Russia, through Siberia, to the shores of the Pacific, an enforced industrial migration. It is not composed of volunteers, but of men, women and families told to move, directed by a dictator whose purpose is the building of a great industrial nation.

In a vast land that has known largely only the crude log houses of political exiles, the villages that were penal colonies, great modern cities are being built as centers of industry to utilize the products of the mines and the forests.

By dictatorial methods, without regard to the heartaches or wishes of the people involved, Stalin, within a quarter of a century, has built an industrial giant.

When the war ends the industrial nations of the world, including the United States, will find a new competitor facing them in world markets.

What the answer, in the not too distant future, will be can be anyone's guess. Siberia will burst upon us as a new and complete industrial giant.

**ELECTORAL VOTING AND POPULAR COUNCIL**

THIS NATION IS A REPUBLIC, a federation of sovereign states. In the selection of a government for the federation each state has a voice in proportion to its population. A part of that system is our electoral college method of electing a President and vice president. Election of a direct popular vote of all states would mean a centralization of vote getting efforts in large population centers. Wyoming, Nevada, Arizona and other states of wide open spaces would be neglected and miss all the fun of a campaign. They would be but the poor relations of the great metropolitan sections. To be sure a near miss in the total popular vote looks better for the loser than a wide miss in the electoral vote, but the result is the same in practically all cases.

**AVIATION NOW AND 25 YEARS AGO**

TWENTY-FIVE YEARS IS NOT a long time, and it was just about 25 years ago that I was one of a group of his fellow club members who welcomed to Chicago Sir Arthur Whitten Brown, an English aviator. Captain Brown had returned to America following his flight, the first one ever made, from Newfoundland to Ireland. That flight was a notable event that indicated the future of aviation. It was not believed it could be made, but it was. Today, 25 years later, dozens of planes are crossing the Atlantic every day. Commercial air companies are contending for the right to expend vast sums in providing air transportation over both the Atlantic and Pacific. That flight of Captain Brown, and his American navigator, was considered daredevilry. Today it is but commonplace that even the President of the United States has accomplished without considering it an unusual risk.

**High Pressure Spray Forces Out, Kills Cattle Grubs**

**New Treatment Promises To Conquer Ranching Industry's Worst Pest**

Cattle grubs, those ugly parasites that cause a loss of leather, meat and milk valued at 100 million dollars annually, can now be controlled by spraying. The insecticide, mixed with water, is blown into the hair on the backs of the infested animals. At a pressure of between 250 and 400 pounds the solution penetrates the holes that the grubs have burrowed in the skin. The grubs come out and die soon afterwards.

A portable pumping unit provides the pressure for spraying the insecticide. At a recent demonstration on a ranch near Fresno, Calif., a group of agricultural experts and farm journal editors watched while a herd of Hereford cattle was treated with the spray. The animals were driven into a chute, and as each one passed the operator, he played the nozzle over its back, washing off dirt, grease and scabs as well as killing the grubs.

The cattle grub and heel fly are different forms of the same insect. Starting in the spring, when it is in the fly form, the heel fly lays eggs on the heel and belly hairs of the animals. These eggs hatch into maggots which work their way through the hide and enter the muscle tissues. During the next nine months these maggots migrate through the internal organs of the cattle and come out along the back.

Cysts are formed and the maggots then turn into grubs about an inch long. In the spring they work their way out of the holes in the hide and fall to the ground. Within a few weeks they turn into heel flies and the yearly cycle repeats itself.

The U. S. department of agriculture arrives at its \$100,000,000 loss in meat, milk and leather in the following ways:

(1) Every hide with five or more grub holes is classed as No. 2 grade, at a discount of one cent a pound. Hides with very many grub holes must be used for by-products, as they are not worth tanning. It is estimated that enough leather was lost this way during 1941 to provide shoes for a million marching men for an entire year.

(2) Millions of pounds of the best beef are trimmed away from grubby carcasses every year by packers, and this loss is reflected in the price paid for cattle on the hoof and meat in the retail markets.

(3) Milk production has been shown to suffer as much as 25 per cent from the presence of grubs in a cow. Heel fly attacks can cause an equal loss in production.

(4) The migration of cattle grubs in cattle makes them sluggish and unthrifty. They lose weight or do not put on weight. They require more feed, and in some cases infection resulting in death has occurred from a crushed cattle grub in an animal's back.

(5) The attacks of the heel fly cause running, stampeding, and

When sprayed with insecticide that penetrates their burrows, grubs crawl out and die. High pressure is necessary to do the job thoroughly.

loitering in the shade and water, when they should be grazing. The results are poor feeding and loss of weight as well as injury and miring down.

Ridding the cattle of grubs, however, is only one use for the power sprayer. It has many other uses, such as whitewashing, painting and disinfecting, for fly and mosquito control, killing weeds, and spraying fruits and vegetables. One of the most important and newest uses is for spraying dry grass or hay with molasses to make a food palatable for cattle. The machine also will serve as a fire engine in emergencies.

Because of their war uses, however, only a few of the sprayers will be available to farmers for a while.

The rancher leads a busy life and usually does not have time to devote several days to painting a barn by hand. As a consequence the buildings suffer from the ravages of weather. With the paint gun attachment, he can easily paint a barn of ordinary size in a few hours.

Even the farmer's wife can use the machine, it is so simple, and she can rid the ranch of many of the flies, lice and ticks that invade her chicken house, and the grounds surrounding her home. She thus protects the health of her family and of her flock.

The same machine can be used

Salt grass, coated with a thin mixture of molasses and water, becomes quite attractive to cattle that scorned it before. The sweetened grass proved quite nourishing in tests. Old hay, treated with molasses, also was eaten with relish.

**Capture of Cologne Revives Interest in Famed City's Past**

The great Rhineland city, Cologne, captured by American forces in early March, has been famous for 2,000 years. Its aluminum and synthetic rubber factories have made it the target for devastating bomber raids in this war. Power plants and bridges have also been blasted, but the beautiful and immense cathedral has suffered little damage.

Situated on the Rhine, about 70 air miles upstream from the Netherlands frontier, Cologne sprawls over both banks of the river, the old town lying on the left, says the National Geographic society. On the right bank are the annexed suburbs of Deutz, Mulheim, Kalk, and Vingst, the fair grounds, and several amusement parks. The countryside is low and flat.

A boom period in the 19th century expanded the city. Fortifications were pulled down to make way for new streets and housing. Blocks of modern dwellings soon spread in a thick, crescent growth west of the so-called "ring streets"—boulevards paved on the curving line of the ancient ramparts. In some places the "rings" expand into spaces laid out with flower beds and edged with trees. Ancient city gates were made into museums. Fragments of Roman ruins remind citizens of their civic origin.

In the heyday of the Hanse towns, Cologne had a brisk trade in silk, spices and other products of eastern lands, goods transported over Alpine passes from the Mediterranean and floated down the Rhine to be distributed throughout western Europe. Wines from up the river were transhipped at Cologne to seagoing vessels. So large was the export trade that Cologne merchants had their own docks in London. Weights and measures standard in Cologne were used in almost every town of the Rhine area, Westphalia and the Netherlands. Its Easter fair drew visitors from far places in Europe and from abroad.

Like other Hanse towns, Cologne rapidly lost commercial leadership after the 16th century. New trade routes had opened; strong rivals sprang up. When the French took over the old free city in 1794 they found only 40,000 inhabitants, most of them destitute. Development of the Ruhr valley, steamships and railroads revived commerce, made Cologne once more a thriving export center.

Cologne's name dates from A. D. 50 when the Roman Emperor Claudius established a colony for war veterans, and called it Colonia Agrippina in honor of his wife. Her name was eventually dropped, the town's name becoming Cologne in French, Koln in German.

From the end of the fifth century the city belonged to the kingdom of the Franks, and was raised by Charlemagne to the rank of an archbishopric. Citizens contested the power of the churchmen, guilds resisted nobles, noble families fought

**"GAY GADGETS"**

Associated Newspapers—WNU Features.

By NANCY PEPPER

**Jitterbug Joolery**

Definitely, there's a new trend in jewelry, not so many gadgets—but more silver stuff than you have arm space for. It's traditional to wear your silver on your left arm and your I.D. (Identification) bracelets on your right arm. It's practically compulsory to wear short strings of graduated pearls with everything.

Lend Us Your Ears—We want to put those metal or plastic hoop earrings on them. And—how about the drop style earrings? It's a radical change from the button types that have been weighing you down.

Sentimental Skunk—His name is "Stinky" and he's made out of fur. He holds a little flower in his paws and a fur tail curls up his back. You see him on sweaters and lapels everywhere, too. He's a fad!

Stone Studded Stunners — The newest in hair barrettes are leather bars, studded with colored stones to match your belts you've gone berserk about. Look for them at your favorite high school shop.

Fob-Fad—Ask dad for his old watch fob; mount it on a piece of ribbon or on a chain and wear it at your waistline. It's the newest joolery foolery.

Coin Collectors—Girls are collecting foreign coins from their Fellows on a Furlough and are having them strung together into necklaces and bracelets. It's the newest form of jingle-jangle.

**FOLLOW THE FAD-SHIONS**

It's not always what you wear that counts, it's how you wear it. For instance, last year everybody was buttoning cardigans down the back. This year it's sharper to wear your cardigans open down the front over a blouse with only the top button fastened. Would you like to hear more? Read on, MacDuff.

Streaming Scarfs — Much newer than velvet ribbon bands for your hair are printed scarfs, folded into wide crushed bands and tied around your hair with the ends hanging down at one side. You look like a gypsy sweetheart.

Slick Suspenders — The way to make a plain blouse and skirt look like a real ensemble is to add a pair of suspenders. The fad is for felt suspenders with your name embroidered on 'em.

Hot Feet—Lots of girls are dyeing those heavy white sweat socks in bright colors to go with their sweaters. Also—lots of girls are wearing boys' argyle plaid socks—the brighter the better.

**Minute Make-Ups**  
By GABRIELLE

The oldest game in the world is the one played by women—the Game of Make Believe! They are never too young or too old for that. And why not make believe that you are as lovely as you would like to be? Help along the Make Believe by believing in the useful art of Makeup! Ledger Syndicate.—WNU Features.

among themselves. Torn with conflict and dissension, Cologne presented a paradox of prosperity. By the end of the 15th century it had become one of Germany's richest cities. After Waterloo it was under Prussian rule.

Fifth largest city in the Reich, Cologne was normally credited with a population of 768,426. During the present war, it has become a center for production of plane and U-boat engines, textiles and leather. Well-developed transportation has assured a flow of the city's industrial lifeblood—coal and coke from the near-by Ruhr valley, iron from Lorraine. Railways and roads fan out in all directions. The Rhine in peacetime bore 15,000,000 tons of shipping a year, with the city's share about 2,000,000 tons.

**Gems of Thought**

A THOUGHTFUL mind, when it sees a nation's flag, sees not the flag only, but the nation itself; and whatever may be its symbols, its insignia, he reads chiefly in the flag the government, the principles, the truths, the history which belong to the nation that sets it forth.—H. W. Beecher.

A man may build himself a throne of bayonets, but he cannot sit on it.—Dr. W. R. Inge.

The only way to have a friend is to be one.—Ralph Waldo Emerson.

All who joy would win Must share it—happiness was born a twin.—Byron.

**Cheery Potholders Nice Shower Gifts**

5844

THESE cheery potholders are almost too pretty to use! They're 6½ inches, have two bluebirds swaying on a cherry tree bough with two cherry blossoms in shaded pink. A pair of these will make a most welcome gift.

To obtain complete crocheting instructions for the two bluebird potholders (Pattern No. 5844) and color chart for embroidery, send 16 cents in coin, your name, address and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

**Kidneys Must Work Well-**

**For You To Feel Well**

24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood. If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at night, swelling. Why not try Doan's Pills? You will be using a medicine recommended the country over. Doan's stimulate the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get Doan's today. Use with confidence. At all drug stores.

**DOAN'S PILLS**

**HOUSEHOLD MEMOS... by Lynn Chambers**

Morale Builder... Juicy, Colorful Pie (See Recipes Below)

**Dessert Appeal**

There are some foods that just naturally make for a good, homey feeling. There's the pie for one. The family likes to see the preparation and then smell the good and finally, taste the juicy sweetness of berries or fruit nestling against a tender, flaky crust.

Fondness for pie goes back a long way and has not abated even during rationing and shortages of sugar and fruit. It's a good dessert with which to top off the meal which has been light or a little shy of appetite appeal.

Then, too, there are cakes that fill the need for sweetness and cater a bit to the appetite. Fortunately there have been developed recipes which are low in sugar and easy to make.

A good pie or cake, baked once a week, will give the family a sense of well being and hominess that is so important in these days of rush and activity. Select one of the following recipes especially designed for wartime eating:

**\*Cherry-Rhubarb Pie.**

1 package frozen red tart cherries or 1 cup canned  
1 package frozen rhubarb or 2 cups canned or fresh  
1 cup juice  
1 cup sugar  
3 tablespoons quick-cooking tapioca

Combine all ingredients and place in an unbaked pie shell. Top with full crust, crisscross or cutout crust. Bake at 400 degrees F. for 15 minutes, then reduce heat to moderate (350 degrees) and bake 30 to 40 minutes. Meringue topping may be used on the pie if desired. It should be piled on after the pie has baked, then baked for 15 minutes longer in a moderate oven.

**Chiffon Pie.**

1¼ cups sugar  
½ cup flour  
½ teaspoon salt  
1¼ cups boiling water  
1 lemon  
1 orange  
3 eggs  
1 unbaked pie shell

Mix the flour and sugar together in a saucepan. Stir in boiling water and cook, stirring constantly until thickened. Add slightly beaten egg yolks, the juice and grated rinds of both lemon and orange. Cook until thick, then cool. Pour filling into the crust and pile high with meringue made by beating the egg whites with ½ cup granulated sugar and 1 teaspoon lemon juice. Bake in a slow oven for 15 minutes.

A pie that is becoming increasingly popular is this cottage cheese pie because it uses inexpensive ingredi-

**Lynn Chambers' Point-Saving Menus.**

- Baked Trout with Tomato Sauce

- Waldorf Salad
- Toasted English Muffins
- \*Cherry-Rhubarb Pie
- \*Recipe given.

**Lynn Says:**

**Sugar-Easy Sweets:** When you want a good icing for a cake, sprinkle chocolate bits over top of warm cake and allow to melt in broiler and run over the sides. Beat two egg whites until stiff and fluffy and whip in 1 cup of jelly. Colorful icing.

Powdered sugar can't be beat for angel food or sponge cakes. Sift it on the cake through a cut-out doily to get a pretty pattern.

Beat egg whites stiff and add honey gradually to them. One-half cup of honey for 1 egg white is the correct proportion.

For plain yellow cakes there's little better than creaming 2 tablespoons of butter with 6 tablespoons of brown sugar and ½ cup of chopped nuts. Spread on warm cake and broil for 5 minutes.

ents for both crust and filling. The spicy, lemony flavor is delicious and the texture of the cheese filling is light and fine-grained.

**Cheese Pie.**

**Crust:**  
12 to 15 vanilla wafers, rolled fine  
¼ cup sugar  
3 tablespoons butter or substitute

**Filling:**  
1 cup cottage cheese, sieved  
1 tablespoon butter  
1 tablespoon cornstarch  
¾ cup milk  
2 eggs  
½ cup sugar  
Rind of ½ lemon  
1 tablespoon lemon juice  
½ teaspoon salt  
Cinnamon

Press the cheese dry and put through a sieve. Add the melted butter to it. Dissolve cornstarch in milk. Beat eggs, add sugar. Combine the mixtures, then add rind and juice, salt and dash of cinnamon. To make crust mix crumbs, butter and sugar. Press on bottom and sides of pie plate or spring form, keeping ½ cup mixture for the top. Bake the pie in a moderate oven for 35 to 40 minutes.

**Honey Nut Cake.**

½ cup butter or substitute  
¾ cup sugar  
¾ cup honey  
¾ cup water  
2¼ cups sifted cake flour  
4 teaspoons baking powder  
¼ teaspoon salt  
1 cup chopped nuts  
4 egg whites

Cream butter, sugar, honey. Add alternately the sifted dry ingredients and water. Fold in stiffly beaten egg whites last. Bake in two nine-inch layer pans in a moderate oven for 30 to 35 minutes.

The nicest kind of icing for this cake combines the texture of creamed sugar and butter (or substitute) and the flavor of mocha.

**Mocha Icing.**

6 tablespoons butter or substitute  
1 egg yolk  
2 cups powdered sugar  
2 tablespoons left over coffee  
1½ tablespoons cocoa  
1 teaspoon vanilla

Cream butter thoroughly, add egg yolk. Sift sugar and cocoa together and add alternately with coffee. Spread between layers and on top of cake.

Don't wait longer. Let electric power from the free wind—the world's cheapest and most abundant motive power—take over those drudgerous farm tasks, giving you a new ease—a more satisfactory way of farm living.

**INVESTIGATE NOW!**

Remember, you too can have electricity. Find out about it. Now is the time to investigate what you can gain from the outstanding economies of Electricity from the Free Wind. Just send in this coupon—No obligation, of course.

Mail This Coupon for complete information about the economies of Electricity from FREE WIND!
