Bob Barley Wins Medal

Bobby Barley has been declared a county winner in the 4-H Club activities and has been awarded a bronze medal in the National Safety contest. He was also a runner-up in the state contest and will receive a \$25 war bond. He was a state winner in the dairy contest in 1943 and was given a trip to the National 4-H meeting in Chicago. His award this year was in recognition of removing fire hazards and making many improvements on his parents' farm. Congratulations to Bobby Barley. We think he is planning on going to the State College at Las Cruces next year.

AVIS NEWS

Mrs. Frances Smith and Mr. Cecil Smith motored to Artesia last week. Those who were Thanksgiving dinner guests of Mrs. Cecil Munson were Mr. and Mrs. Pat Riley and Marian, Mrs. Katie Harbert, Mr. and Mrs. Glenn Tarrant, Mrs. Daisy Smith and children, Mr. Clarence West, Mr. Jim Godley, Mrs. Vena Newman and Thelma Coor.

Mrs. Sadie Munson and Katie Harbert went to El Paso Monday to have some dental work done. Thelma Coor is staying with the children.

Miss Roberta Smith spent the most of last week visiting in the J. A. Miller home.

Mr. Lenard Munson and Frank Devine were in this community this week. Mr. Munson has purchased the Avis school building.

Mr. and Mrs. Cecil Munson and family and Jim Godley were guests of Mrs. Charley Smith Saturday night.

PINON NEWS

We are very sorry to hear of the death of John Fleming who died in Alamogordo Saturday and was buried in Mayhill Monday afternoon. All three children were present at the funeral. We extend our sincere sympathy to his family.

from our community attended the big barbecue in Alamogordo Friday given for the Otero county prisoners. It was estimated that the crowd was over 4000.

Mrs. Dan Smith spent the week end with her daughter Mrs. W. B. McGuire and family.

Mr. and Mrs. Don Merritt and family were Roswell visitors Friday.

Mr. and Mrs. Herman Dean and family visited in the Dave Lewis home over the holidays.

There was a quilting in the home of Mrs. Glenn Stevenson Saturday.

Mr. and Mrs. Ira Tidwell and son were calling in the Glenn Stevenson home Friday.

There was a Thanksgiving dinner in the home of Mr. and Mrs. Dan Smith. All the children were present.

DUNKEN NEWS

Mr. and Mrs. Lelan Miller spent Thanksgiving with Mr. and Mrs. Bill Watts.

Mrs. Peasley spent the Thanksgiving holidays at her home in Roswell.

Mrs. Vernon Helms and baby son returned home from the hospital Wednesday.

Mr. and Mrs. E. C. George and Mr. and Mrs. Penn Trimble and boys spent Thanksgiving with Mr. and Mrs. Delbert Ivans. Harold Ivans returned home with them and spent the week end.

Mr. and Mrs. W. B. McGuire and family, Edward McGuire and boys and Mrs. Spangler spent Thanksgiving at Pinon.

Miss Edwina McGuire spent the Thanksgiving holidays with her parents.

ents, Mr. and Mrs. W. B. McGuire. Mrs. Helms visited her daughter and family at Dexter Saturday night.

Editorial Comment

We think that President Truman should do something about these labor walkouts all over the country. It is getting contagious even the hens are going on a strike.

The state prison board held a meeting this week and decided that prison trustees will not be allowed to work out in private families unless accompanied by a guard. It seems to us that this is a case of locking the barn door after the horse is stolen.

Frank Young, head of the state police, has resigned. He was going to anyway the first of the year to run for sheriff of Chavez county. His chances to be elected sheriff are getting pretty slim after what happened in Santa Fe last week.

The situation in Palestine is getting no better rapidly. And the outlook is not encouraging. No matter what is done either the Jews or the Arabs will be dissatisfied. If nothing is done both will continue to be dissatisfied.

Britain's Prime Minister Clement Atlee urges the view that the world can survive only through the acceptance and practice of the Christian principle of brotherhood. The real need is that there be less talk about world brotherhood and more concrete action toward it.

In Harpers Weekly a member of the fair sex suggests that women be permitted to take over the management of world affairs as the only means of preventing the world from going to the dogs. We are going to start along that line in Hope next spring when the election of town officials takes place.

The United States has just received its final kick in the pants from the Japanese. They are so sorry, but it looks as if they will be unable to pay any reparations. The Nips are broke and may have nothing left over after occupation costs are paid. America is entitled to more than 75 per cent of the total Allied reparations—which may prove to be 75 per cent on nothing.

It seems most fitting that patient, persevering Cordell Hull should be honored with the Nobel Peace Prize for 1945. Few men in American history have worked as untingly on behalf of peace and a better understanding between nations as this elderly statesman from Tennessee. There was little, if anything about Mr. Hull's work that was spectacular, his outstanding ability lay rather in sound statesmanship.

On our first peacetime Thanksgiving in four years we not only expressed our gratitude to God for our abundant harvests and the ample supply of material things but we gave thanks to Him that our prayers for the complete and final success of our war effort had been answered. Millions of our fighting men who last year at this time were struggling through cold and rain in Germany or through the heat and mud of the Philippines are home again. Millions more will be here as soon as ships can bring them. A year ago they faced the uncertainties of war. Today they have the opportunities of peace. For this we are thankful.

It has been said that home is where you hang your hat. But many Americans, especially returning war veterans and their families, are having great difficulty in finding enough living space to accommodate even a hat. The housing shortage which has plagued the nation for the past 3 or 4 years is now getting worse, not better. It is not sufficient that we feel sorry for families or individuals who lack an adequate place to live. We must do all we can to help them. Making all extra living space available to them seems to be the only immediate answer.

PINON NEWS

Mr. and Mrs. Don Merritt and family were calling in the Glenn Stevenson home Friday.

Dorothy Prather spent the week end with Billie Jean Stevenson.

Preston Means was visiting his mother, Mrs. Nona Means, Sunday.

There was a party given in the school house Friday night. Everyone reported a good time.

Mark Fisher, Lee Brantley and J. L. Dean moved a house to Hope Saturday and Sunday. The Fisher family will live in it until they can rebuild.

Elizabeth Tidwell spent the week end with her parents, Mr. and Mrs. Warren Tidwell.

Herman Dean delivered lambs last week.

HOPE SCHOOL NEWS

Edwin and Darrell Duncan, brothers, enrolled in the Hope school last week. They came from Weed. Edwin is in the 8th grade and Darrell a Junir in high school.

Betty Joe Allen enrolled in the 7th grade this week. She came from Weed.

The Dexter Demons will play basketball here Friday night. The first game will start at 7:00 o'clock. Hope and Dexter should be pretty evenly matched as Lake Arthur has defeated both teams. Hope has won 2 games and lost 2 games.

Grade cards came out this week and from all indications a number of students will have to work harder the next six weeks.

Movies for Dec. 5 Crashing Through — The Screen Test Jungle Fool. Show starts 7 p. m.

LOCALS

Mr. and Mrs. Paul Coffin and family from Las Vegas were here for Thanksgiving visiting the Coffin families.

Ballard Banta arrived home last Thursday. He has been in the service nearly four years and went through the bloody battles of Guadalcanal, Gilbert and the Solomon Island campaigns. We are all glad to see him back alive and well.

Mrs. Jim Banta went to Roswell last week to spend Thanksgiving with her son, Frank, and his family. Bernard Schneider had the misfortune to wreck his car one day last week while returning from Hobbs.

Clayton Menefee was home on a furlough for a few days last week. He is sure glad to get home and get a taste of his mother's cooking once in a while.

Walter Coates sold his calves to Hagerman parties last week. He delivered about 6 truck loads and the price was 12c.

Mrs. Marble and Mrs. Fowler and Bob and Betty were shopping in Roswell last Friday.

Mrs. John Bush and children went to Carlsbad Monday on business.

Pete Blakeney, Mr. and Mrs. Orland Parker and family and Tiny Wood were doing their Christmas shopping in Artesia Monday.

A party was given in the gym Thursday night for Curtis Harrison who is home from the navy on furlough.

For Sale—a bumper jack for \$2.00 at the News office at Hope.

Anderson Young was in Artesia Monday looking for feed for his dairy cows.

Dick Terry was in Artesia Monday looking for a ride home.

The Town of Hope had irrigating water Tuesday.

Mrs. John Davis and party from Roswell and Mrs. Longbotham from Artesia were involved in a wreck Sunday morning on the Hope highway while on their way to visit Mr. and Mrs. Ben Miller. There were five persons in the car and they were all injured. They were taken to Artesia for hospitalization. The car overturned on the first turn west of Artesia.

Geo. and Mark Fisher have purchased the Penasco Garage and took possession Monday. They are both expert mechanics. They will also handle feed.

For Sale—Circulating heater for coal or wood. Excellent condition. Mrs. Anna Coffin, Hope.

Robert Hart from Grandfield, Okla., is here visiting his sister, Mrs. Anna Coffin. This is the first visit they have had for 17 years.

Mr. Musgrave and daughter went to Roswell Tuesday. Mrs. Ernestine Cogburn who has been in the hospital returned home with them.

Wm. Forister has purchased the residence occupied by Ben Babers. His father and mother will move in.

to town about the first of the year or perhaps sooner. Mr. Forrister has not been well the past year and we are glad to see them move to town where their friends can call on them frequently.

Frank Melton has accepted a position as cook for the state highway department. He left Monday for Maljamar.

Mr. and Mrs. Harve Evarts were guests of Mrs. Jim Banta Monday night. They have recently purchased a new Dodge pickup. Mrs. Evarts carries a dust cloth in the car and wipes the dust off regularly.

J. W. Mellard, scoutmaster, and 8 scouts from Hope attended a meeting in Artesia Monday night. Mr. Mellard and the scouts are planning to build a swimming pool this coming summer. Mr. Mellard should be commended for taking over the duties of Scoutmaster and we should all help as much as we can.

R. W. West an old timer from Avis and Pinon but now living in Alamogordo visited Mr. and Mrs. E. C. Gerge and family this week.

Mr. and Mrs. Delbert Ivans of Pinon were successful in getting two deer, both 8 pointers. Mrs. Ivans gave hers to Mr. and Mrs. E. C. George of Hope. Needless to say that Mr. and Mrs. George appreciated the gift.

Mr. and Mrs. Burl Fisher from Texas have purchased the M. C. Newsom place. Mr. Newsom has not decided where he will go as yet.

Capt. Richard Cooney returned from the Pacific Saturday. His wife, Marjorie, and daughter, Patricia, met him in Roswell. He has been in the air service 5 years, quite a bit of that time being spent in the Pacific campaigning against the Japs. They are now over in Hobbs visiting Mr. and Mrs. H. J. Dunne.

Alvin Kincaid loaded out two truck loads of calves Thursday of last week, bound for Littlefield, Tex.

Mr. and Mrs. Dick Atteberry have moved to Hobbs where they have purchased a home. Mr. Atteberry will be manager of the Ford Motor Co.

For Sale Jersey milk cow and heifers. Heavy springs. J. P. Menefee, Hope.

Arrangements are being made for a big celebration in Hope on Saturday, Dec. 5, for the soldier boys. It will be the biggest celebration ever held in Hope.

IN THE DISTRICT COURT OF EDDY COUNTY, STATE OF NEW MEXICO

MARY SHAFER, Plaintiff

—vs—

D. E. SHAFER, Defendant

No. 9200

NOTICE OF PENDING SUIT

THE STATE OF NEW MEXICO TO D. E. SHAFER, GREETING:

You will take notice that there has been filed in the District Court of Eddy County, New Mexico, a civil action numbered 9200 on the docket of said Court wherein Mary Shafer, Plaintiff and you, D. E. Shafer, are Defendant; and that the purpose of said suit is to obtain a divorce from you and obtain custody of minor child, and unless you appear, answer or defend herein on or before the 21st day of January, 1946, the Plaintiff will apply to the Court for the relief prayed for in her Complaint filed herein and judgment will be rendered against you in said cause.

The address of Plaintiff is Carlsbad, New Mexico, and J. S. McCall of Carlsbad, New Mexico, is attorney for Plaintiff.

IN WITNESS WHEREOF, I have hereunto placed my hand and affixed the seal of the Court this 27th day of November, 1945.

Inn Where Gen. Putnam Eluded Foe In 1779 Now A Connecticut Museum

ON the morning of February 26, 1779, General Israel Putnam, in his quarters at Knapp's Tavern in Greenwich, Conn., shaved at a mirror that commanded a view of the main approach to the village. One

side of the General's face was freshly scraped, and lather still clung to the other, as a large detachment of British troops came into his mirrored view.

His continental troops being outnumbered ten

to one, he ordered their retreat while he mounted his horse to ride to Stamford for reinforcements. By this time, all avenues of escape

except the steep stone stairway outside the tavern were surrounded by the enemy. With British horsemen just a length behind, General Putnam galloped down the steep steps. His pursuers failed to follow.

Putnam's daring ride to Stamford and freedom has been commemorated by artists and in a plaque near the historic tavern.

Knapp's Tavern, built in 1729, is now known as

Putnam's Cottage and is maintained as a museum, also as headquarters of Putnam Hill Chapter of Daughters of American Revolution.

WEEKLY NEWS ANALYSIS

U. S. Code Interceptions Bared Jap War Plans; Attlee Outlines Labor Party Economic Program

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

As joint U. S.-British commission studies Palestine problem, Jewish youth parade in Jerusalem in protest against restriction of immigration into Holy Land.

PEARL HARBOR: Code Secrets

As the Pearl Harbor investigation got underway at Washington, D. C., before a joint 10-man congressional committee, intercepted messages placed in the records disclosed that U. S. intelligence officers had cracked the secret Japanese code a year before the start of the war.

While the early intercepted messages dealt with ship movements, chief interest centered in the diplomatic documents dating from July 2, 1941, when Tokyo told Berlin that Japan would work for its "greater East Asia co-prosperity sphere" regardless of the world situation.

On November 22, Tokyo advised Nomura and Kurusu, Jap envoys negotiating in Washington with Secretary of State Hull, that it had been decided to set November 29 as the final date for effecting an agreement, after which things would "automatically . . . happen" in case of failure. Then on November 26, Nomura told Tokyo of Hull's ultimatum and the improbability of reaching a settlement.

On November 30, Tokyo informed Berlin of the imminence of war with the U. S. and later relayed the same message to Rome. Meanwhile, Tokyo warned its consulates on December 3 to be on guard for the "winds" messages in short wave radio broadcasts indicating rupture of relations with the Allies. The "east wind, rain" message (meaning war with the U. S.) then came through on December 5.

Among the last messages decoded were Tokyo's reply to Hull's ultimatum on December 6, with final instructions for presentation to the U. S. at 1 p. m. the following day coming in on the morning of December 7. Dated December 7, a Jap message from Budapest, Hungary, to Tokyo stated that the American minister to that country had presented its government with a communique from the British that a state of war would break out on the seventh.

BIG TALK: Reassures U. S.

In the nation's capital to discuss disposition of the horrific atom bomb and touchy international questions, British Prime Minister Attlee also found time to address congress and outline the democratic objectives of his labor party just as negotiations for a multi-billion dollar loan from the U. S. were materializing.

Aimed at helping Britain get its export-import trade functioning again and lighten the load of six billion dollars of debts to wartime creditors, the projected multi-billion dollar advance was attacked in some circles as an aid to the labor party in socializing the United Kingdom. In addressing congress, Attlee declared that British businesses were only to be nationalized when they had grown into monopolies detrimental to the economy.

No radical in speech or appearance, the short, mild-mannered, mustached British leader described the labor party as a representative cross-section of liberal English society, with professional and business men, and even aristocrats, joining with the working classes in its membership.

In determining to retain the secret of the know-how of harnessing the atom, President Truman and Attlee declared that until effective safeguards were set up against its de-

structive use, no advantage would come from sharing its use. To work out such safeguards permitting exchange of vital information on atomic energy for industrial purposes, the Big Two recommended the creation of a United Nations commission.

As revealed by Foreign Minister Bevin in the house of commons recently, Britain has expressed deep concern over Russian demands for trusteeship of Eritrea and Tripolitania in the Near East, and establishment of a naval base in the Dodecanese islands, inasmuch as these territories lie athwart the famed "life-line" of the empire through the Mediterranean and Suez canal.

Coincident with Attlee's visit to Washington was the U. S. and British announcement that a joint commission of the two countries would undertake a study of the ticklish Jewish immigration question with a view toward easing the plight of European refugees.

Pressing importance of the issue was emphasized by continued Arab and Jewish riots in the Near East, with scores killed and wounded in widespread demonstrations over the question of making Palestine a national homeland for the Hebrews.

Because they have been banded into a league 33 million strong spread over the entire Near East, with control over rich oil deposits cherished by U. S. and British concerns, the Arabs have greatly complicated settlement of the Palestine issue in view of their stubborn opposition to large-scale Jewish immigration.

Taking the Arab objections into consideration, the joint U. S. and British commission will look into the question of whether heavy immigration would upset the Arabs' political and economic position in Palestine. Consideration also was to be given to providing remedial action in Europe itself and allowing immigration to other countries.

JAPAN: Seek Trade

As the question of reconstituting the Japanese economy arose, Nipponese officials drew a pattern for the nation's future trade relations with the world by recommending a barter system to facilitate immediate imports of needed foodstuffs and raw materials. Under terms of surrender, Japan will not be permitted to produce some of the items formerly exported.

Under the Japanese proposal for the resumption of trade, Nippon would receive substantial amounts of food, salt, cotton, copra, coal, iron ore and non-ferrous metals, in exchange for gold, diamonds, silk, cotton goods, chemical products, medical supplies, machinery, hardware, and tin.

The problem of recreating the Japanese economy was pointed up by revelation that the country had been the sixth biggest prewar exporter, shipping out almost a billion dollars worth of goods each year. Of the total amount, China obtained the largest part, with the U. S. and India following.

Of the total amount, China obtained 27.2 per cent; the U. S., 18.2 per cent; India, 6.2 per cent; Great Britain, 3.7 per cent; Latin America, 3 per cent; Australia, 2 per cent, and Germany 0.7 per cent. Other European and Asiatic countries took 2.1 and 3.1 per cent of the remainder of exports respectively.

Washington Digest

Attitude Against Postwar Service Sways Congress

Public Joins Influential Organizations in Objections to Training; Need for Interim Security Force Argued.

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N.W. Washington, D. C.

In the days that followed President Truman's message to congress urging universal military training we, in Washington, waited to see if there would be an echo to the President's words spoken so earnestly but with so little effect on the audience before him. There was an echo all right but it was an emphatic rumble of negation.

I wasn't surprised — I read my listeners' letters.

It was interesting to see the way the members of congress reacted to the President's message as he delivered it. I watched them with one eye on the text of his speech as I stood squeezed into the crowd in the gallery of the house.

Varied Reaction To Proposal

Here are some of the sentences which I checked as bringing response:

" . . . above all else, we are strong because of the courage and vigor and skill of a liberty-loving people who are determined that this nation shall remain forever free." (Applause). Well, that was a general, non-compromising sentiment. Nothing to do with the subject in hand.

There was the statement that we didn't lack faith in the United Nations organization, "on the contrary with all we have, we intend to back our obligations and commitments under the United Nations charter." (Mild applause, this time.)

Then came the response to the first direct appeal for the measure in hand. The President said: "The surest way to guarantee that no nation will attack us is to remain strong in the only kind of strength an aggressor can understand—military power." Applause again but I had the feeling it was for the sentiment and not the suggested means of implementing it.

When he said that "the basic reason for military training" is to guarantee safety and freedom from an aggressor, there was another demonstration, but not quite as energetic and many members, I noted, refrained from any applause at all.

The last note is the most emphatic. "Good applause" followed the President's affirmation that "until we are assured that our peace machinery is functioning adequately, we must relentlessly preserve our superiority on land and sea and in the air." But that is just what the congress is not willing to do because it believes the country is not sure to have them do it. I am sure of that because I know they have been receiving, as I have, far more letters against military training than in favor of it.

Must Sell Public Program

Today, a man who keeps his fingers on the pulse of congress assures me that there will never be a universal military training act until a great deal more "selling" has been done by those who believe in it, than has been attempted so far.

This man, like the writer, is a convert to the cause, so his expression was the reverse of wishful thinking. Both of us, though members of the American Legion, never favored their program for universal service urged upon congress, beginning shortly after the last war.

"There is too much organized opposition," my friend said, "such powerful influences as the federal council of churches, some influential members of the Catholic church, virtually all of labor so far (and this includes the CIO and the AFL which often nullify each other's efforts) the colleges and the unorganized group which might be called simply 'the mothers.'"

Where do the returned veterans stand? It is too early to say. If they follow in their fathers' footsteps they will eventually vote for preparedness. It is the tendency of men who have seen service to place a high value on thorough preliminary training. But they will not become vocal until they join the ranks of the World War I veteran organizations or build others of their own.

There is, however, another force which may change the picture — a change in the international set-up which will inject the element of

fear into the people's attitude and since fear starts the adrenalin flowing that usually means action.

Meanwhile, there are those who feel that complete preparedness not only is essential in the interim, even though a future world security organization is moving swiftly to fruition, but that it will also act as a stimulus toward such a goal.

The argument runs, briefly: We must prepare to enforce peace, or prepare to fight a war. Many members of congress realize this and would undoubtedly support the President's program if they felt they could do so without flying in the face of the majority opinion of their constituents. I do not intend to use this column as a platform upon which to debate the issue now but I would like to present a viewpoint expressed by a medical man which made considerable impression on the comparatively few Washingtonians who heard him address a recent meeting in the capitol. The speaker was Dr. G. B. Chisholm, one of the world's foremost psychiatrists, who served as chief medical officer of the Canadian army and is now deputy health minister of Canada.

'Maturity' Needed For Peace

His thesis is that "this is a sick world, with an old, chronic but evermore extensive and serious sickness. Its sickness has recently become acutely dangerous and the future is uncertain indeed."

It is a sickness which has made us "the kind of people" who fight major wars every 15 or 20 years. The cure is education. Just as individuals become neurotic because they are not mature, and thus are unable to cope with the situations they must meet, so the world has developed a behaviour pattern which produces something which nobody wants: war.

We must have enough people who can show tolerance, be patient, and above all have the ability to compromise. These are qualities of maturity, Dr. Chisholm points out, and people, mature in this sense, would not want to start wars and would prevent other people from starting them.

But the doctor realizes that education will not produce such maturity in one generation. But such a state must be realized or we face one of two alternatives. Either we must become a race of trained killers, or a race of slaves.

Until we can achieve education sufficient to avoid such horrible fates, "for so long as it may take to change the bringing up of children enough in this world, our close watch on each and everyone in the world should not be relaxed for a moment." The first step in eradicating war is an attainable stopgap, Dr. Chisholm believes. Security must be achieved and the valid fear of aggression eliminated. This means legislation backed by immediately available combined force prepared to suppress ruthlessly any appeal to force by any peoples of the world. The administration of such a force is a delicate problem but it can be devised if and when the great power really wants it.

The second step would be to provide the opportunity for all peoples to live on economic levels which do not vary too widely, either geographically or by groups within a population. This means a redistribution of material. This is possible since there are enough resources in the world to go around.

It is impossible in this space to do justice to Dr. Chisholm's views but the main points are these: he feels that man has developed one consistent pattern of behaviour which causes him to indulge in a major war at frequent intervals; that going to war represents immaturity; that immaturity can only be cured by education beginning at childhood with an accent on the "sciences of living"; that until we achieve maturity we must unite ruthlessly to suppress the effort on the part of any nation or anyone in any nation to start a war.

Psychiatrists may not solve the problem of world peace but it is safe to say that immature laymen won't either. Meanwhile, what congress must decide is how dry the country wants to keep our powder.

Some Things Are Not What They Seem to Be

Cork legs are not made of cork. They are made of wood, metal, leather, or strong canvas; they were invented by Dr. Cork. Hackney coaches are not so called because they were first made in Hackney, London. The word comes from the French "Ha-queuee," meaning an ambling horse.

A laughing jackass is not an animal; it is a bird. Cinderella did not wear a glass slipper. She wore a fur slipper, but the original French words were "Pantoufle en vair," and the sound was mistaken for "Pantoufle en verre"; thus "fur" was changed to "glass."

Kidneys Must Work Well

For You To Feel Well
24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood.
If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly.
Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at night, swelling.
Why not try Doan's Pills? You will be using a medicine recommended the country over. Doan's stimulate the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get Doan's today. Use with confidence. At all drug stores.

DOAN'S PILLS

It Pays to Properly Candle and Pack Eggs

Protect Quality Eggs And Increase Profits

Farmers will profit at least three cents a dozen for candling eggs. The War Food administration set support prices of 27 cents for candled eggs and 24 cents for uncandled eggs. But properly candled eggs will result in even greater profits by developing a quality market and increasing consumer demand.

After the eggs have been properly candled, the final value depends upon how they are handled when sent to market. They are largely judged by the action of the yolk. If eggs are packed sharp end up, there is a tendency for the yolk to rise through the white and to appear prominent, thus lowering the market value.

When eggs are packed with sharp end down they maintain their quality better.

When an egg is fresh and in good condition, it has a normally thick white and the yolk stays fairly well in the center when the egg is twirled in front of the candle.

A quality egg will show little, a poor egg will show a large air space, dark yolk and moving yolk.

Mounting for Grindstone.

Saw a fellow of an old wagon wheel in two. Brace with sturdy board to keep right distance apart and to hold rigid.

Malaria-Like Disease

Found in So. Illinois

The presence of anaplasmosis, a malaria-like disease of cattle, has been found in southern Illinois by veterinary specialists of the Illinois university. Fear that it may spread to other states seems to be well founded.

A serious disease of cattle and sheep, anaplasmosis, commonly observed in the South, has seldom been encountered in northern states. It is spread by biting or blood-sucking insects. Prominent symptoms include loss of appetite, weakness, rapid pulse and breathing and pale or yellowish skin and mucous membranes. Laboratory tests should be taken when the presence of anaplasmosis is believed to exist.

Dehydrator

During the winter months, when the home dehydrator is no longer required for fruits or vegetables, it may be used as a clothes drier, room heater or food warmer.

With some types of home dehydrators, the heating elements may be removed and used as room heaters and the cabinet utilized for storage

4-H Boys Study Forestry and Learn How to Make the Farm Woodlot Pay

Week's Course Covers Proper Management Of Timber Crop.

Learning forestry from the ground up, from boyhood up, is the feature of a new venture in the forest areas of Georgia. Teen-age boys learn the fundamentals of forest management right out in the woods, away from the classroom and away from books. The move was inaugurated with a special forestry camp, attended last summer by 60 boys of varying ages, at the Laura S. Walker State park near Waycross, Ga. It is planned to give the same course every summer hereafter.

These 60 boys, members of 4-H clubs who have performed outstanding work in club forestry projects during the past year, combined study and play in a comprehensive week's program. They went home benefited by a vacation in the woods, but also stuffed with knowledge about trees and tree growth.

Knowledge for Future.

Teaching boys the principles of forestry made good sense to the sponsors of the experiment, which included the Georgia agricultural extension service, the Union Bag and Paper corporation, and the Brunswick Pulp and Paper company with the Georgia department of forestry co-operating. These forestry-minded supporters reasoned that not only could the boys turn such knowledge into their own profit in later years, but likewise can carry home, to their busy farm-fathers, the message of

how they can make their woodlots, as well as their other crops, pay dividends.

The boys covered the forest ground thoroughly in their week's sojourn, which was sandwiched here and there with a game of horseshoes, swimming or hiking. But it was no course in nature; it was silviculture in its best, if short, form.

Income From Wood.

They learned how to control forest fires. They collected pine cones, extracted their seed and set out the seeds to grow the seedlings that will be transplanted on idle and wornout farm land. They learned how to estimate the value of a timber crop; how to measure the board feet in a tree, and then cut it down to see if they had measured right. By actual training, they learned how to select and judge trees which should be cut for pulpwood, sawlogs, fuelwood, ties, veneer blocks, poles and piling, all of which types might be found in a given stand of timber. But more importantly, they learned how to manage a timber crop on a farm to the best advantage for a continuous income.

The teaching staff, provided by the extension service, also held brief blackboard sessions, at which the boys were taught the importance of wood to southern agriculture. They learned, as well, that only with scientific management of her forests was the South able to continue to produce one-half of the total timber removed each year in the United States, and that pulpwood was the backbone of one of the South's major industries, pulp and paper production.

Members of the "harvesting and processing" class investigate a semi-portable sawmill, and learn a good deal about economical and practical methods of cutting lumber. The group first measured amount of wood in a log, then compared it with actual yield of boards.

Sherlock Holmes of the Library

One of the most unusual detectives outside the pages of fiction is G. William Bergquist, who trails books instead of bodies, which makes him a Philo Vance of the volumes. Mr. Bergquist is the sleuthing genius and chief investigator of the office of the special investigator of the New York Public library. The duties of this literary dick are not confined to checking the depredations of book snatchers. He not only recovers stolen volumes, but uncovers the thieves, accomplices and "fences" who buy stolen books. He detects

forgeries, not only of documents and signatures, but of entire volumes. He also tracks down offenders who deface and mutilate books. So beware, you "o-fillers" and mustache drawers!

The library appointed Bergquist in 1929 to safeguard its priceless collection of books and documents, but he soon extended his services to the book world at large. He investigates about 50 cases a year for other libraries, private collectors and dealers, with a high percentage of success. He detected faked documents bearing the signatures of Benjamin Franklin, Lincoln and Washington, and exposed the forger. The culprit, by the way, turned out to be an interesting character. He continues to visit Mr. Bergquist, his nemesis.

The unique relationship between the literary sleuth and the underworld and bibliophiles has been very helpful in ferreting out thefts and

With a low power magnifying glass Bergquist examines the binding of a suspected volume. Fake first editions are among his most intriguing cases.

Nazi Inventors Came Close to Winning War —Investigators Find

Research in German laboratories, and the use of that knowledge in making armaments, were coming ahead so fast at the end of the war that the Allies' margin of superiority was rapidly decreasing.

Extensive research was being conducted by German scientists on infra-red detection. It was used to great effect, in tank warfare at night, when opposing tank units had difficulty spotting one another and closing in for the kill. The Germans developed infra-red filters for their searchlights and shot them toward areas where they believed Allied tanks were lurking. Since infra-red rays are invisible, the Allied tankmen did not know they were being illuminated.

The infra-red rays from the filtered searchlight beams hit the Allied tanks, bounced back to devices known as "bildwandlers," or "image changers," mounted on German tank guns. The bildwandlers transformed the infra-red rays into an image of the opposing tank, and the gunners opened fire.

German aircraft designs were coming ahead at a fast pace. An error of major proportions was made, however, in emphasizing the Messerschmitt 163, equipped with rocket engines, instead of the Messerschmitt 262, a jet-propelled fighter.

Antiaircraft defenses of such vital industrial centers as Schweinfurt, Merseburg, and Hamburg, consisted of massed concentrations of AA guns. A captured German general explained that lack of efficient remote-control electric equipment to operate the guns and fire-control instruments alone prevented the batteries from doubling their kills.

By NANCY PEPPER
SCHOOL DAZE

We've been wandering around the corridors of high schools lately, just watching and wondering. Maybe you've seen us. We're that character in the middle there—the one with the cauliflower ear and the Bob Hope nose. Here are some gems from our note book.

Required Reading—We've seen so many girls huddled together lately over an I.D. bracelet that one of them was wearing that we started asking questions about it. Seems it's the fad for your OAO to have something sentimental engraved in side your bracelet disc and, of course, his tender words make good reading for your competitors. Lots of boys express their sentiments in letters, rather than words. For instance, "A.M.L." means "All My Love." Soft music there, professor!

Sweater Clubs—When we've asked why so many girls wear the same reindeer sweaters on certain days, we're told that they're members of a Reindeer club and the sweater is their symbol.

Painted Paws—Would you believe it—we've seen girl cheer leaders wearing green nail polish to match their green and white costumes. Doesn't it pucker you?

Penny Pairs—We asked why some girls wore two pennies in each moc shoe. The answer is that two pennies mean you're going steady. One penny means you're still looking.

MOVIE MADNESS

Recently we asked our soda fountain FBI to do some sleuthing about the Van Johnson fad. Our official report confirms the fact that he's Number One in your affections and you told us why, too. Seems he reminds you of the boy next door. Well, here in your very own words, are reasons why you're drooling for some of the other Hollywood heroes.

John Hodiak—"Because he's dark, good looking, masculine and muscular; because he has a devastating smile and because of the way he talks." (That's telling us.)

Paul Henreid—"Because he's very handsome, suave and intelligent and something about him makes me swoon." (What COULD it be?)

Robert Walker—"Because he's sorta the all-American boy—not too handsome, not too homely. Because he reminds me of the boys I go to school with." (Let's change schools.)

Lon McAllister—"Because he's so much like a boy you COULD know, but just don't. That is, it seems possible that he could live around the corner." (What's your address?)

Sonny Tufts—"Because more girls like Van, so I should have a slightly better chance with Sonny." (Afraid of competition, huh?)

Tom Drake—"Because it's so easy to imagine he's your latest heartbeat." (A girl can dream, can't she?)

TRIXIE TEEN SAYS—

Now that there's no further need for invasion precautions, why hold your parties in a Blackout? Why give the Lights-Out signal as soon as the gang is gathered for a good time around the phonograph? If you're the gal who goes in for smooching (and I hope you're not), you don't need a party to carry on your subversive activities. If you're the gal who likes to talk and dance (and I know you are), wouldn't you rather see what you're doing and whom you're talking to? Your parents applaud economy, but they never told you to save on electricity. Hey, Junior—the Blackout's over! It's time you were beginning to see the light.

Minute Make-Ups

By GABRIELLE

1. Every woman must have her own comb and brush. Cleanse both frequently with warm water and borax. Sun well. 2. Combs should have fairly blunt teeth. No steel or wire combs should ever be used. 3. Brushes must have firm bristles, no metal "bristles," ever. Softer bristle brushes are excellent for "polishing" the hair. 4. Brushing stimulates circulation and cleanses the hair. Ledger Syndicate.—WNU Features.

Gems of Thought

MY SHARE of work in the world may be limited, but the fact that it is work makes it precious.—Helen Keller.

The test of a man or woman's breeding is how he behaves in a quarrel.—George Bernard Shaw.

Failure is only a spur to the one who received it right.—Edmund Vance Cook.

For however often a man may receive an obligation from you, if you refuse a request all former favors are effaced by this one denial.—Pliny.

A new broom sweeps clean, but the old brush knows the corners.—Irish Proverb.

Embroidered Cases For Christmas Gifts

HERE is a de luxe wedding or Christmas gift idea. Crochet four of the gossamer-like 5 1/2-inch butterflies in white thread—embroider the shaded pansies in soft blue, yellows, a touch of brown, then add a suggestion of pale pink to the bouquets. You've transformed a plain pair of pillowcases into an exquisite present!

Mix This Cough Syrup at Home. Quick Relief

Easily Mixed. Needs No Cooking.
Here's an old home mixture your parents probably used. But, once tried, you'll always use it, because it gives such quick, pleasing relief for coughs due to colds.

And it's so easily mixed. Make a syrup by stirring 2 cups of granulated sugar and one cup of water a few moments, until dissolved. No cooking is needed. Or you can use corn syrup or liquid honey, if desired.

Now put 2 1/2 ounces of Pinex (obtained from any druggist) into a pint bottle, and fill up with your syrup. This makes a full pint of truly splendid cough medicine, and gives you about four times as much for your money. It keeps perfectly, tastes fine, and lasts a long time.

You can feel this simple home mixture take right hold of a cough. It loosens the phlegm, soothes irritation, and helps clear the air passages. Eases the soreness, makes breathing easier, and lets you get restful sleep.

Pinex is a special compound of proven ingredients, in concentrated form, well known for its quick action on throat and bronchial irritations. Money refunded if it doesn't please you in every way.—Adv.

HOUSEHOLD MEMOS

Let Leftovers Play a Starring Role (See Recipes Below)

Glamorize Leftovers

There is no problem which so consistently faces the homemaker as that of leftovers. Even with rationing, there were always some bits of food that had to be utilized and made into palatable meals.

Leftovers seem particularly prominent after a big holiday dinner. It is then we must bring all ingenuity to bear and bring out well seasoned, attractive casseroles from the kitchen.

It is not essential to disguise a food so thoroughly that it will mystify the family. If chicken or turkey is cut up in a savory white sauce and flecked with bits of green peas and pimiento, then topped with a flaky biscuit crust, no one will object to its being a leftover from the roast bird itself.

So it is with other leftovers. Vegetables can be tossed together with tangy dressing and placed on crisp lettuce leaves. Mashed potatoes can be turned out into golden, crisply fried cakes, etc.

Why not try this the next time you have leftover turkey or chicken? It's a scalloped casserole dish well flavored with cheese and tomatoes:

Scalloped Spaghetti.

- (Serves 8)
1/4 cup chicken fat or shortening
1/4 cup chopped onion
Salt and pepper
1 cup grated cheese
1 cup canned tomatoes
2 cups diced chicken or turkey
1/4 cup flour
2 cups chicken stock
1 8-ounce package of spaghetti
1/2 cup buttered bread crumbs

Melt fat, cook onions slowly for 10 minutes. Add flour and stir well. Add stock, stirring constantly until thickened. Mix in salt and pepper to taste. Add cheese and stir until melted. Next blend in chicken or turkey and tomatoes. Place chicken or turkey mixture and

LYNN SAYS

Palate-tempting Hints: If you want an icing that is sugar-easy, beat three egg whites until light and fold in slowly one cup of bright colored jelly. Yes, spread it on cake.

You've never heard of cottage cheese griddle cakes? Beat three whole eggs until fluffy, add one cup cottage cheese, salt and pepper, 1/4 cup flour and two tablespoons melted fat. Bake on a griddle and serve with maple syrup or jelly and powdered sugar.

Next time you have chicken a la king, serve it on tiny toast points, garnished with green pepper rings, sauteed in oil.

A quick, delicious dessert is made of waffles to which chocolate has been added. Serve with sweetened whipped cream.

Leftover cereal should be molded and chilled, then sliced and fried until golden brown. Serve with syrup or jelly.

Use mushroom soup for creamed chicken or ham. Serve on warmed rusks for a tasty treat.

LYNN CHAMBERS MENUS

- *Veal Chops Baked in Sour Cream Squash Stuffed with Onions Parsleyed Potatoes Gingerale Fruit Salad Orange Bread Beverage Peach Brown Betty
- *See recipe below.

spaghetti, alternately in a greased casserole and cover with bread crumbs. Bake for 25 minutes in a moderate (375-degree) oven.

Potatoes leftover? Here's a delicious, mouth-watering way to take care of them:

Hashed Browned Potatoes.

- (Serves 6)
3 cups diced, cooked potatoes
3 tablespoons shortening
Salt and pepper to taste
About 1/4 cup milk

Use a medium sized skillet. Heat shortening, add diced potatoes, seasoning and sufficient milk to moisten. Cover and cook slowly, stirring only until milk is absorbed. Turn once and let other side brown slightly. Serve.

Meat Pie.

- (Serves 6)
1/2 cup diced celery
1/2 cup diced onion
1/2 cup diced green pepper
2 cups cubed leftover roast
1 cup cubed leftover potatoes
1 cup peas (may be leftover)
1 cup gravy
4 slices dried bread, cubed

Brown celery, onions and green pepper in hot fat. Add combined meat, potatoes and peas. Add gravy and season to taste. Pour into a casserole and top with bread cubes browned in butter. Bake in a moderate (375-degree) oven for 30 minutes.

Apple Brown Betty.

- (Serves 4 to 5)
1 cup buttered bread crumbs
3 1/2 cups chopped apples or other fruit
1/2 cup honey
1 cup water

Mix all but 1/4 cup buttered crumbs with apples and place in a deep, buttered dish. Bring the honey and water to a boil and boil 2 minutes. Pour over fruit and bread mixture. Sprinkle remaining crumbs over the top and bake 30 minutes in a moderate (370-degree) oven.

If there's a bit of sour cream left, then use to advantage in the following recipe:

***Veal Chops With Sour Cream Gravy.**

- (Serves 6)
6 veal chops
1 egg, beaten
1 tablespoon water
Salt, pepper
3/4 cup cornflake crumbs
2 tablespoons flour
1 cup sour cream

Wipe the chops. Dip first in beaten egg to which one teaspoon salt and one tablespoon of water has been added. Then roll in cornflake crumbs. Saute slowly in a heavy frying pan until browned. Cover and cook slowly for 20 minutes, turning occasionally. Prepare gravy by blending flour with 1/4 cup meat drippings from bottom of pan and adding the sour cream. Season with salt and pepper to taste. Serve with veal chops and sauteed mushrooms.

AROUND THE HOUSE

Make it a habit to disconnect all electric cords of kitchen appliances when called away from your task suddenly.

Equal parts of ammonia and water will remove varnish from furniture.

To assure longer life for household linens and clothing, check them regularly for thin spots, raveled seams, small rips, loose thread ends that need mending, and dangling buttons, snaps, fasteners, hooks and eyes.

To keep the safety valve on a pressure cooker clean, soak it in vinegar or kerosene to remove food or rust spots.

A partition in the clothes hamper lightens the work on wash day. The partition may be made of plywood, cut to fit snugly inside the hamper. One side may be used for soiled white garments, the other for colored clothes.

Frosting will stick better if a little flour is dusted over the cake's surface before it is put on.

Doll House With Toy Shelves Below Makes a Wonderful Christmas Gift

By Ruth Wyeth Spears

The house shown here has a number of special features that mothers as well as small girls will appreciate. It fits in a 28 1/2-inch space against the wall and has convenient shelves underneath for other toys and books; and for the doll family's clothes. When the front of the house is removed, there are two spacious bedrooms, a large living room and a dining room with realistic views into the kitchen and bath pasted on the back wall.

NOTE—This Doll House Pattern No. 273 is 15 cents postpaid. Send request direct to:

FIVE-TUBE RADIO transmitter and receiver, in the fuse of the shell, is the brain of the secret weapon. In flight, the transmitter broadcasts a continuous radio wave. Reflected back from the target, this wave explodes the shell at exactly the right moment!

THE SHELL WITH A "RADIO BRAIN"

NOT EVEN the Atomic Bomb was more "hush-hush" than the "Variable Time Radio Proximity Fuse"—a fuse mechanism that decides for itself when to explode; requires no advance setting.

Transmitter, receiver, and detonating mechanism all draw power from a tiny "Eveready" "Mini-Max" battery: a "power-house" rugged enough to withstand the shock of the gun's discharge: a force 20,000 times that of gravity!

The registered trade-marks "Eveready" and "Mini-Max" distinguish products of National Carbon Company, Inc.

IGNORANCE and lack of interest are the greatest causes of juvenile delinquency. Just published:

"Heaven to Hell in Twenty-four Hours"

Juvenile delinquency is every parent's trouble. Children cannot be taught the facts of life unless you read "Heaven to Hell in Twenty-four Hours." The need to read this book was never greater, a book so powerful that it will shock you. It bares the truth. By reading the book, it will enable you to have a heart-to-heart talk with your sons and daughters. If, in all your life you have never taken the time nor patience to read a book, then to read this book is the least you can do. All Americans over fifteen years of age are urged to read this book. Any boy or girl who reads "Heaven to Hell in Twenty-four Hours," and takes the "wrong road to life, does it because they want to. There is no Christmas present of any greater value, nor one from which a boy or girl will derive more benefit than from reading "Heaven to Hell in Twenty-four Hours." Send two dollars. Book will be mailed postpaid.

SNAPPY FACTS about RUBBER

A new rubber cement called "Plastilock" for binding metals, woods, plastics, has been developed by B. F. Goodrich.

Latex foam made of synthetic rubber can now be used in the manufacture of mattresses and other cushioning materials.

The goal of the rubber industry a few decades ago was a tire that would run 3,500 miles. Now it's not unusual for a passenger tire to run ten times that far.

Some of the first synthetic tires built in early war days lasted only fifty miles. Mileage of present synthetic tires compares favorably with natural rubber tires.

Don't Messy

A Bell for Adano

By John Hersey

THE STORY THUS FAR: The American troops arrived in Adano, with Major Joppolo, the Amgot officer in charge. Sergeant Borth was in charge of security. The Major was determined to hold the confidence of the people and to replace their bell stolen by the Nazis. Despite orders issued by General Marvin, barring carts from the city, Joppolo recalled the orders, to permit food and water to enter the city. The Major found out that the American generosity was responsible for a troublesome black market. To stop this condition he placed a ceiling on all prices. Mayor Nasta was placed in the prisoner of war cage. He swore that he would get even and that the Americans would suffer.

CHAPTER XVIII

Life in the p.w. cage was not very pleasant for Mayor Nasta. None of the men had blankets, and the nights were pretty cold, so they slept in close rows, keeping each other warm with their bodies. But no one would sleep next to the Fascist Pig. They said he had a peculiar smell. As a matter of fact, he did have a peculiar smell for several hours each morning; it came from being a mistake.

At last Mayor Nasta found a man who would talk with him. This was a German who spoke Italian.

Mayor Nasta told him that he was still Mayor of Adano, that he had been treacherously arrested by the Americans, that he was trying to do all he could to help the Germans win and that, in short, he was a pretty important person who ought to be helped. The Italian-speaking German told his friends all about Mayor Nasta, and they decided they ought to help him escape.

For a couple of days Mayor Nasta moved over and lived with the Germans. They made plans for the escape. There was nothing elaborate about the plans. They just decided to lift the Mayor up over the wall. They asked him if he had the courage to sit on barbed wire for a few minutes. He said yes, anything to escape. They asked him if he had the courage to jump down twelve feet on the other side. He said yes.

So in the middle of a dark, clouded night, the Germans made a pyramid of their bodies and let Mayor Nasta climb up it to the top of the wall. He sat on the barbed wire on top of the wall, quiet as a cat, until he was sure that the sentry outside had marched to the other end of his beat. Then he turned facing the wall, let himself down as far as he could, and let go. He hurt one knee a little; it hit the wall as he landed on the ground. But he was able to get up and run off silently.

The Top Sergeant at the p.w. cage called up Sergeant Borth at eighty-thirty the next morning and told him that Nasta had escaped.

Sergeant Borth borrowed Corporal Chuck Schultz and a jeep from the M.P.'s and went hunting. By this time Sergeant Borth had so many voluntary informers and informers-on-informers that the job of tracing Mayor Nasta was not too hard.

Sergeant Borth picked him up three miles short of Vicinamare, at about ten-thirty.

Jeeps had been passing Mayor Nasta all morning, so that he was not particularly alarmed when Sergeant Borth's jeep drove up alongside him, and even when it stopped, he waved crudely and shouted: "Good day, good day," in what he thought was a thick peasant accent.

Sergeant Borth mimicked the accent: "Good day, good day, farmer."

Mayor Nasta, who still did not recognize Borth, shouted again: "Good day."

Borth shouted: "Good day. You are the first farmer I have ever seen with pince-nez glasses on."

Then Mayor Nasta knew Borth. Mayor Nasta's spirit, which had been strained by the arrest and by the days in the cage and by the escape, suddenly broke. He turned and ran out across the fields, squealing crazily, just like a soldier who had broken under shellfire.

Sergeant Borth got out of the jeep and went out onto the fields. He did not hurry, because Mayor Nasta was running in circles, wishing to run away from himself more than anything else. By the time Sergeant Borth caught him, he was exhausted and limp, and his eyes were milky with fear.

As Borth half walked, half carried him to the jeep, Mayor Nasta jabbered and mouthed his fear. "If you are going to shoot me, tell me first. Don't shoot me in the back. Tell me if you are going to kill me. I want to know, I want to know..."

Sergeant Borth slapped him sharply in the face, and for a few seconds he was silent.

But when he was seated in the jeep, and the jeep began to move,

Mayor Nasta began again. "Don't shoot me in the back. I will do anything to be shot from the front, where I can see the gun. I will tell you everything I know. I can give you names. Don't do it from behind."

Borth said: "How can I shoot you from behind when I am in the front seat and you are in the back seat?"

Since it was the noon hour, scores of people had drifted to the Doppo Lavoro clubs along the street near the Albergo dei Pescatori to listen to the radio and wait for lunch. When they saw Borth's jeep, with a man tied up in the back seat, they clustered around, and called for their friends. And when they saw that Borth's cargo was Mayor Nasta, and that after all these years the

He let himself down as far as he could and let go.

Mayor had a gag in his mouth, they cheered and laughed at the man.

These noises increased Mayor Nasta's terrors, and he kept twisting and trying to look behind him.

Borth went into the restaurant and found Major Joppolo and brought him out.

Major Joppolo held up his hand to silence the crowd. "I want to speak to Nasta," he said to Borth. "Can he hear me with that thing on his face?"

"Yeah," Borth said; "you've got the rare pleasure of being able to speak to Nasta and he can't talk back."

Major Joppolo said: "Nasta, you are a disgrace to your people. There is goodness in your people, but not in you, not a bit. The world has had enough of your kind of selfishness."

It was one of Major Joppolo's greatest attributes in his job that he could speak pompous sentences with a sincerity and passion so real that his Italian listeners were always moved by what he said. Now all the listeners except Nasta were moved by his words to shout: "Kill him! Kill him! Kill him!"

Here was one time when Major Joppolo's sincerity and passion bounced back on him, because the people's shouts frightened Mayor Nasta so badly that he fainted, and Major Joppolo was the first to see the ridiculousness of trying to spellbind an unconscious man.

There was nothing left to say except one sentence to Borth: "We'll have to send him to Africa."

And to the music of Adano's delighted cheers, Borth and his limp companion drove down the street.

There was no better index to the state of mind of Adano than the activities of the painter Lojacono. If one had made a graph of the spirits of the town and then put beside it a graph of the number of commissions Lojacono received, the two would have exactly corresponded. Whenever the town was optimistic, Lojacono worked. When the town was blue, Lojacono was idle.

The same morning that the crowd stood around Borth's jeep in front of the Albergo dei Pescatori, another, smaller crowd stood on the Molo Ponente in the harbor and watched Lojacono work. He was painting new names and little figures on the bow surfaces of the fishing boats, and the crowd consisted of fishermen and their families.

Except for Lojacono's work, the boats were all ready to go. Their seams were calked, and they were tight as wine-bottles. The barnacles and the whiskers were off, and the bottoms had been given a little lead paint. The rigging was smart, for Major Joppolo had persuaded the Navy to give the fishermen some bright cable and some unsoaked hemp rope.

The fishermen were impatient to have Lojacono finish.

Lojacono stopped working and looked at the fishermen standing there. He pointed at his work and said angrily: "Have you ever seen a porpoise less messy than that one?"

Agnello said: "The porpoise is not bad, but he will die of loneliness unless you hurry and give him some company. Porpoises like company, you know that, Lojacono. Have you ever seen a porpoise play alone?"

"He will have company," Lojacono said impatiently. "The Mister Major is going to be riding on his back. If you would be silent, I could get on with my work."

Merendino said: "Work then, old man, do not be so slow."

The old man went back to his work. Tomasino, sitting with his head in his hands on the afterdeck of his boat, which was moored next to Agnello's, said gloomily: "I cannot see the point of all this painting. It is frivolous. My boat has been named Tina since the girl was born. It will remain Tina. The leaves and the fruit which dangle from the name are good enough for me, even if they are not new."

Agnello shouted to Tomasino: "What is the matter with you, sour one, this morning? Cheer up, we are going fishing again."

"In the next century," said Tomasino glumly, "after all this painting is finished."

Lojacono stuck his head up over the side of Agnello's boat and shouted: "Be quiet, Tomasino, you know that the only reason you are so impatient is that you like what I did twenty years ago and you have no desire for anything new."

Tomasino said: "If I have to wait another day for the slow painter I will blot out the name Tina and the leaves and fruit with some lead paint I have, and I will go fishing alone in a nameless boat."

Lojacono started painting the Mister Major, and the little crowd came in closer to see the details. He resolved a difficult point by making the Major's hat rather big and by tilting it so that it covered most of his face. At least the hat was definitely American.

"His leg is too short. The leg of the Mister Major is longer," Agnello said.

"I was about to say that the leg is too long," Merendino said.

"In other words," Lojacono said, "the leg is precisely right."

"He does not have a hunch-back like that," said Sconzo, another of Agnello's helpers.

"He is bending forward because of the speed of the porpoise," Lojacono said.

"The color of his skin is too white," said the wife of Agnello. "His skin is more Italian-colored."

"You are dull," Lojacono said, "you do not see the symbolism of the white skin."

This is what the criticism was always like. And this shows the purpose of the criticism: it was not so much that the people did not like what Lojacono was doing, as they wanted to know exactly what was in his mind. In future, showing off his boat, Agnello would be able to say: "You can see how fast the porpoise is going by the way the Mister Major is leaning forward. And do you see how white his skin is? That is because of the symbolism in the Mister Major's skin."

In due course Lojacono finished his work, and everyone pronounced it quite good, although, one said, it would be hard for a porpoise to jump that high out of the water with a man on his back, and, another said, should not the name of the boat, which was now Americano, be a little lower? Lojacono attributed the former highness to good spirits and the latter highness to the way the name American had been raised in everyone's esteem by the Mister Major; and everyone went away satisfied.

The next morning the boats went out. Major Joppolo went down to the harbor to see them off, and the people in town were all excited at the prospect of eating fish.

The catch that day was excellent. When the boats were all in and the fish all weighed, it was estimated by Agnello that a total of three thousand two hundred pounds had been taken in. Better than that, the fish were mostly of good grades.

How To Relieve Bronchitis

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

CREOMULSION
for Coughs, Chest Colds, Bronchitis

WELDER'S OVERALLS COME CLEAN QUICK

HUNTSVILLE, ALABAMA. — Mrs. Claude Buchanan wrote a letter to Faultless Starch that should interest every woman who has overalls in her wash. Here is what she said:

"My husband is a welder and wears overalls. He gets them so dirty and greasy. They come clean quick and iron so much better when I use Faultless Starch."

Now there is a way to save a lot of hard work scrubbing and scouring dirt and grease out of overalls. Give them a light starch with Faultless Starch! They iron up beautifully. They wash clean in a jiffy — and — they feel so smooth and comfortable to wear. Not rough and scratchy — no chafing!

SO EASY TO DO

It certainly is no hard job to give overalls that light starch-finish. Just use a very light starch solution. Dip in the overalls and run through the wringer. It's that easy! And once you try it and see how easy those dirty clothes wash clean you'll starch wash shirts, pants, children's play clothes — and everything that gets real dirty.

By giving these clothes light starch with Faultless Starch you do a lot to keep the dirt out. You see, Faultless Starch is made a special way to make it PENETRATE the fabric. It gets inside — and helps by keeping the dirt outside. When you wash, the starch dissoles instantly — and out comes the dirt!

So try it, this week. You'll be delighted with the hard scrubbing work it saves . . . and you'll like the way it saves the wear and tear on clothes, too. Be sure to ask your grocer for Faultless Starch! — Adv.

PAZO for PILES

Simple
Relieves pain and soreness

PAZO IN TUBES!
Millions of people suffering from simple Piles, have found prompt relief with PAZO ointment. Here's why: First, PAZO ointment soothes inflamed areas—relieves pain and itching. Second, PAZO ointment lubricates hardened, dried parts—helps prevent cracking and soreness. Third, PAZO ointment tends to reduce swelling and check minor bleeding. Fourth, it's easy to use. PAZO ointment's perforated Pile Pipe makes application simple, thorough. Your doctor can tell you about PAZO ointment.

SUPPOSITORIES TOO!
Some persons, and many doctors, prefer to use suppositories, so PAZO comes in handy suppositories also. The same soothing relief that PAZO always gives.

Get PAZO Today! At Drugstores!

FAMOUS U. S. ARMY DIVISIONS

101st AIRBORNE DIVISION

Screaming Eagle

THE SCREAMING EAGLE—that's the nickname of the 101st Airborne Division—holds the Distinguished Unit citation for the epic defense of Bastogne in the Belgian bulge operation against a vastly superior foe. It was the first time in the history of the American Army that a unit larger than a regiment received the award. Paradoxically the airborne troops traveled, not by plane, parachute and glider, but by Army trucks, in rushing to the front for their most historic battle. Although completely surrounded, the Division held firm against the fiercest Nazi attacks and refused to surrender. It was credited with being one of the greatest single factors which blunted the enemy's drive.

The Division was activated in August, 1942, and sailed in September, 1943, its component units at that time being the 321st and 507th Glider Field Artillery Battalions; 502d, 508th Parachute Infantry Regiments; 377th Parachute Field Artillery Battalion, and 401st and 427th Glider Infantry Regiments. It trained in England until the opening of the European campaign, June 6, 1944.

On D-Day the 101st made its airborne landing in France and began its march across Normandy. Strong resistance was met near Ste Marie du Mont but the Division fought through to Carantan and on D-Day plus six liberated the French city. It went into action again in December, this time to write a memorable chapter in American military history. Its assignment was to hold against the mighty winter effort of General Von Hunsdtedt in the enemy push designed to shove the Allied forces back and roll into France once again. In a short time the Division was cut off from other units, ammunition and blood plasma had to be dropped from the air and the enemy asked it to surrender. Maj. Gen. (the Brig. Gen.) Anthony C. McAuliffe, who commanded the 101st at Bastogne, gave the classic answer, "Nuts!" The Germans renewed their attacks but the Division held steadfast and was reached by the 4th Armored, causing the enemy to recoil.

In February, 1945, the 101st was placed in the Seventh Army in action near Strasbourg and by March had plunged into vital areas of the Reich. In April it speeded toward Hitler's Berchtesgaden retreat and in towns near there captured high ranking Nazi officials. By the war's end the Division had reached Berchtesgaden itself. Maj. Gen. Maxwell D. Taylor commanded the Division in the European theater.

The shoulder patch is a black badge with a black arc streaming above. On the badge is a white screaming eagle. Appearing on the arc in white is "Airborne."

Frenchman's Procedure Really Quite Simple

Waiting for supplies to catch up with them, one of General Patton's armored units had rested a few days in a small French village. The citizens told the Americans that the most interesting thing in the town was a man one hundred years old with not an enemy in the world. An American officer thought this an unusual and beautiful thing.

"It is nothing of the sort," the interpreter contradicted him.

"But a man that old with no enemies, surely that is a feat," insisted the American.

"It is no feat," the Frenchman insisted. "He merely outlived all of them."

SORE THROAT

due to colds

Let a little Vicks VapoRub melt on the tongue. Works fine, to soothe sore throat due to colds and helps relieve irritation in upper breathing passages.

To Ease Spasms of Coughing: Put a good spoonful of VapoRub in a bowl of boiling water. Wonderful relief comes as you breathe in the steaming medicinal vapors that penetrate to cold-congested upper breathing passages... soothes the irritation, quiets fits of coughing, helps clear head.

For Added Relief, rub VapoRub on throat, chest, back. Let its famous double-action keep on working for hours as you sleep.

Star Dust
STAGE SCREEN RADIO

By VIRGINIA VALE

ARTHUR GODFREY'S one of the most popular men on the air, also one of the most dangerous—anyone who tries to follow the procedure that boosted him to success is headed for trouble. Godfrey made his radio debut 17 years ago, but tiring of monotonous routine, he tried to get fired by smashing records he didn't like, in-

ARTHUR GODFREY

stead of just setting them going, as he was hired to do. He kidded his sponsor and the product, telling everybody they were insane for tuning in. Listeners loved it, the sponsor was swamped by a rush of customers, and today Godfrey has 80 sponsors! He ad libs most of his programs—makes notes on matchbook covers, then loses them.

Seems as if "Confidential Agent" should have been titled "Cruelty to Lauren Bacall." She's badly miscast, as the daughter of an English coal baron, and she's up against such expert actors as Charles Boyer, Katina Paxinou, Peter Lorre and George Coulouris. Maybe she can win back her public in "Stallion Road"; in that one she'll have Humphrey Bogart opposite her again.

Joan Lorring, Warner Bros. actress who'll be seen soon in "The Verdict," with Sydney Greenstreet and Peter Lorre, has been informed that her father, Fred Ellis, has been released from the Japanese prison camp where he has been interned for four years.

Alan Ladd and Gail Russell were set to do a long scene, showing their first meeting in Paramount's "Calcutta." So the crew made up a pool on the number of "takes" each man thought the scene would require. Each put up a dollar; the guesses ran from 10 to 20, since the scene was five times the length of the average one. Ladd and Russell did it in one "take."

Nick Castle, directing the ice ballets in "Glamour Girl," in which Monogram stars Belita, fell down so often that finally he invented some non-skid boots—golf shoes whose soles are equipped with rubber plugs. He offered to lend a pair to a newspaper photographer who wanted to photograph Belita in action—but the smart guy just donned his own ice skates.

Johnny Sands, 18-year-old Texan, makes his screen debut in "The Dream of Home"; he'll play the teen-age sweetheart of Jean Porter. He's under contract to David O. Selznick, who's had him taking lessons in acting by way of breaking him in.

Parkyakarkus has been asked by a Chicago philologist to send him a recording of that Greek dialect heard on "Meet Me at Parky's"; the record's to be added to those in a collection of foreign accents. Parky, who majored in English at college, will oblige.

"The Sparrow and the Hawk," CBS aviation serial, draws hundreds of letters from flying enthusiasts—and they're not all from amateurs, by any means. Some of the top men in the aviation industry have congratulated the program's makers.

Ralph Edwards should be remembered as the only performer in this country who, for the entire duration of the war, voluntarily contributed the services of himself and his cast for the purpose of selling war bonds. He teed off the Eighth Victory loan drive with his appearance in Wichita, Kan. Two and one-half million dollars' worth of bonds were sold as the direct result of that "Truth or Consequences" effort.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D. Of The Moody Bible Institute of Chicago. Released by Western Newspaper Union.

Lesson for December 2

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

THE CHRISTIAN AND HIS ECONOMIC RELATIONS

LESSON TEXT: Deut. 8:17, 18; Luke 12:13-21.
GOLDEN TEXT: A man's life consisteth not in the abundance of the things which he possesseth.—Luke 12:15.

Peace and the postwar period find America, and in fact the entire world, plunged into tremendous economic problems far too deep for any man or group of men to solve. We honor those who are laboring day and night to meet the threat of unemployment, the question of reconversion and readjustment to civilian production, of feeding a hungry world, etc. But we say again, they cannot find the answers in the wisdom of men; they must have the wisdom of God.

There is need, first of all, of a fundamental philosophy concerning possessions which will make man deal properly with them. The first section of our lesson says to us:

I. Think Right About Wealth (Deut. 8:17, 18).

How trenchant and altogether fitting are the words of Scripture! Nothing could describe our times more succinctly and accurately than verse 17. Men are glorying in their ability to do things.

Man has even gone so far as to develop a weapon of warfare, the atomic bomb, so powerful that he fears it might be used to wipe out all civilization. Even secular leaders are now saying that we must have a spiritual rebirth if we are to use such things for good and not for evil. Man needs God now more than ever.

We honor those who by skillful hand and brilliant brain produce excellent and thrilling results. But our question is, How many are there who say, God has done this thing; He gave the strength and the skill; His is the honor? Some there are who thus recognize Him, but they are few indeed. Their name is Legion who say in their heart, "My power and the might of mine hand hath gotten me this wealth" (v. 17).

II. Act Right About Wealth (Luke 12:13-21).

Most of us think of money as something we want to get hold of and use for ourselves, but if it belongs to God, and we are only his stewards, we must put away that impulse. "Take heed," said Jesus, "and beware of covetousness" (v. 15). It is a deadly and deadening sin, all too common even among Christian people.

The teaching of this whole passage of Scripture is so directly opposite to all ideas regarding such matters accepted by the world at large, that it may be a total surprise to some readers and attendants at Bible school.

The yardstick of success in the world for an individual, an organization, or a nation, yes, even for many a church, is the possession of wealth, or property, or other "things." Write it in large letters on the hearts and minds of our boys and girls, "A man's life consisteth not in the abundance of the things which he possesseth" (v. 15).

The one who was known to his friends (and to himself) as "a rich man" (v. 16), but whom God knew as a "fool" (v. 20), had more than he could use for himself. He had to build new and bigger barns, and could not see the "barns" that were already prepared, for, as Ambrose says, "Thou hast barns—the bosoms of the needy, the houses of widows, the mouths of orphans and infants."

He was a fool who loved money for itself and for himself. One wonders what he had to say for himself when that very night he was called into the presence of God to give an account of his stewardship (v. 20). If you are similarly situated and have the same attitude, what will you say in that day?

There is an important point which we must note. Jesus expressly repudiated the connecting of His name with the so-called "social gospel" in His reply (v. 14) to the question of the covetous fellow who regarded his inheritance as of more importance than brotherly love.

Those who are ignoring the gospel of redemption and claiming Jesus as a social reformer, or the "judge and divider" of some new economic solution for the world's ills, need to read and ponder this verse.

Every Christian is interested deeply in social problems, but knows that the first concern of Christ and His followers is the souls of men.

ASK ME ? ANOTHER ?

A quiz with answers offering information on various subjects

The Questions

1. How many members does the Constitution of the United States say the President's cabinet may contain?
2. Why is a bloodhound so called?
3. What country first adopted daylight saving time?
4. Can one correctly say of an airplane, it "zoomed down"?
5. What is considered America's greatest cash crop?
6. In nautical language to sail

zigzag against the direction of the wind is to what?

The Answers

1. It is not mentioned.
2. The term bloodhounds indicates that they are pure-bred.
3. England, in 1916.
4. No. Zoom means upward flight.
5. Cotton. It has been grown on 25 per cent of our farms and has averaged over \$1,200,000,000 during each of the past three years.
6. Tack.
