

WEEKLY NEWS ANALYSIS

Seek To Abandon Farm Control;
Gromyko Hits Disarmament Talks;
Open Universal Training Hearings

Released by Western Newspaper Union.
EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.

Secretary of the Interior Julius A. Krug (left), Undersecretary of the Navy John L. Sullivan (center) and Max W. Ball, director of oil and gas division of interior department, meet to probe nation's critical petroleum supply shortage. Experts forecast empty auto gas tanks, closed factories and chilly homes this winter because of tight oil situation.

FARM CONTROLS:
Opposition Grows

American Farm Bureau federation, powerful farm group which sponsored most of the agricultural legislation now in force, is considering recommendations for total abandonment of all farm price and crop controls by the government.

Edward A. O'Neal, president of the federation, said the board is not satisfied with the old AAA, established during President Roosevelt's first term. He revealed that a better agricultural program than the one the farmers now have is being sought. The AAA authorizes payments to farmers for reducing acreages in the basic crops of wheat, corn, cotton, rice, tobacco and peanuts.

O'Neal

Farmers from the North and Northwest have consistently opposed federal subsidies, and sentiment was reported to be growing among the producers for letting farm products seek their own price level as a permanent policy.

In the South, however, cotton and tobacco growers are known to be satisfied with the situation as it stands, favoring tight controls if prices start to slip.

One of the federation's economists predicted at least a 10-year period of good prices for farmers at levels slightly below those prevailing now.

DEFIANCE:
Gromyko Again

In what was possibly his most defiant action since he walked out of the security council a year ago, Andrei Gromyko, Soviet delegate to the United Nations, acidly warned the U. N. disarmament commission that its refusal to include atomic control in the negotiations on general disarmament would bring about a total "collapse" of disarmament efforts.

He said the commission's refusal to link the two aspects of world peace plans was contrary to the wishes of the U. N. general assembly, but delegates of France, Great Britain and Belgium promptly denied the charge.

Ignoring previous Soviet warnings, the commission had voted down a long list of Russian and Polish proposals to tie atomic control with disarmament talks and approved an American-sponsored work plan to keep the two subjects separate.

FRUITED PLAINS:
Apple Outlook Rosy

Despite a late spring and some frost damage in eastern fruit areas, prospects continue generally favorable for this year's crop of apples and other deciduous fruits, a department of agriculture report has disclosed.

The 1947 strawberry crop is estimated to be nearly a fourth larger than the 1946 crop, but still a tenth below average. However, the peach crop in 10 early southern states is expected to set a new record of more than 25 million bushels this year, the third successive large crop from those states.

In California, the sweet cherry crop of 29,000 tons is 15 per cent smaller than last year, but still 16 per cent larger than the 1938-44 average. California's 92,000-ton plum crop is slightly below 1946.

TRAINING:
Hearings Begin

Although congress is scheduled to adjourn July 28, the senate armed services committee has voted to proceed with hearings on universal military training.

But in a formal statement the committee added that if a report cannot be made ready by July 28, it will attempt to have a report prepared for congress when it convenes again.

Decision of the senate group was reached as the Very Rev. Edmund A. Walsh, a member of President Truman's universal military training commission, told a house committee that "the politburo in Moscow is not going to adjourn for the summer as its forces creep across Europe."

Father Walsh said that America is definitely on the Soviet agenda of conquest, and Russia will be ready to start her "shooting war" as soon as her atom bombs are in production.

TAX PLANS:
To Think Over

Congress has been presented with four tax-revision plans to think over until it gets ready to have another go at the income tax problem.

The treasury department has given the house ways and means committee studies of four plans to equalize federal income taxes on married couples in all 48 states.

One of the proposals would save 4,900,000 couples three-quarters of a billion dollars annually by giving those living in 38 states the same "income splitting" rights now enjoyed by couples living in 10 states which have community property laws.

Secretary of the Treasury John Snyder has indicated that the administration considers the proposed plans to be among the "right kind" of changes in the tax setup.

IKE TO STAY:
Denies Report

Gen. Dwight D. Eisenhower will not resign as army chief of staff, at least this year.

Walter Winchell, in a copyright story in the New York Daily Mirror, had reported that General Eisenhower had tendered his resignation as chief of staff and would become president of Columbia university next fall. The story said that Eisenhower's resignation was in the hands of President Truman.

The nation's military leader, however, issued a firm denial: "I have no intentions of resigning as chief of staff during the current year, and in no event would I do so without first getting full approval of the President and the secretary of war."

Price of Warfare

How much does a war cost? Many answers are possible, says a review by the National Industrial Conference board, but the cost of any war cannot be determined definitely until at least a century after the end of hostilities.

For example, it was not until this year (1947) that the last pensioner of the War of 1812 disappeared from the United States budget. As another instance, the military cost of the Spanish-American war was a mere 582 million dollars; however, the continuing costs—interest on war debt, pensions and care of veterans—amounted to 2,400 million dollars during the 48 years ending June 30, 1946.

Changing
WORLD

WALLACE VOICES ANOTHER IDEA . . . Henry A. Wallace, shown here with Sen. Claude Pepper (Dem., Fla.), waves to crowds at Washington Watergate where he spoke on international relations. Recently returned from a two-month cross-country speaking tour, Wallace told his Washington, D. C., listeners that President Truman should invite Soviet Premier Josef Stalin to "peace meeting" in Berlin to settle differences.

ELLIOTT DECORATED BY FRENCH . . . Elliott Roosevelt, son of the late president, is shown after receiving the legion of honor in the rank of chevalier and the croix de guerre with palm for outstanding service in North Africa in 1943. Left to right on lawn of French embassy in Washington are: Mrs. William Breyton, Air Attache Col. William Breyton of the French embassy, Elliott Roosevelt, Fay Emerson Roosevelt, Mme. Bonnet, wife of French ambassador, and Mrs. Eleanor Roosevelt.

SLIGHT FAMILY RESEMBLANCE . . . It's difficult to decide from this picture which of the two is the more proud—David Corn because he looks like his son, William, or little William because he looks so much like Pop.

Ain't It So?

One fellow who is always going around looking for something soft is the man who has lost his false teeth.

A reformer is one who insists on your accepting his conscience as your guide in life.

No woman ever has enough to wear. And no woman would wear enough even if she had it.

Dance band leaders are finding it difficult to obtain crooners. But not difficult enough.

The "man about town" is so often a fool about women.

That Nagging Backache

May Warn of Disordered Kidney Action

Modern life with its hurry and worry, irregular habits, improper eating and drinking—its risk of exposure and infection—throws heavy strain on the work of the kidneys. They are apt to become over-taxed and fall to filter excess acid and other impurities from the life-giving blood.

You may suffer nagging backache, headache, dizziness, getting up nights, leg pains, swelling—feel constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

Try Doan's Pills. Doan's help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!

Install Device in Lightning Study

Bolt-Funneling Device Put Atop Empire State.

NEW YORK.—Inside the conical cap atop the Empire State building General Electric technicians tugged and pushed into position a new device to record the characteristics of lightning bolts.

Previous studies involving the world's tallest "lightning rod" have shown that about 80 per cent of the lightning bolts "hitting" the tower actually originate in the steel frame of the building and soar skyward.

By continuing these war-interrupted studies, General Electric company's engineers hope to learn enough about the characteristics of lightning so that equipment can be designed against interference and damage during storms.

Once the new recording device has been installed, a technician will sit in front of the great box-like phonographic instrument atop the building. The abnormally heavy lightning bolts will funnel through the apparatus in front of him. He will be safe, the technicians say, unless he touches two of the girders simultaneously or sticks his hand out of the trap door at the top of the cone.

The peak of the Empire State building is not the most peaceful place in town during an electric storm. The electrical field of the earth is projected abnormally far into the sky by the tower and the metallic cone on its summit hisses continuously as it pours a stream of static electricity into the air. If one should stick a hand up through the trap door each finger would give off a corona of St. Elmo's fire, engineers say, though no one has ever tried it.

The experiments are suffering momentarily from a housing shortage. The scientists want an office in a building nearby facing the tower, so they can mount a camera in a window to record the bolts as they strike. This would provide information on speed and direction of flow of the bolts.

In the course of the work, begun in 1935 under Dr. Karl B. McEachron and continuing under J. H. Hagenguth, it was found that the tower was struck as many as nine times in 20 minutes.

Widowed Stepmother Is Married by Californian

TUCSON, ARIZ.—Can a man legally marry his father's widow?

Belle D. Hall, Superior court clerk, posed the question. After checking the statutes, County Attorney Odin Dodd said there was nothing to prevent a man from marrying his stepmother.

So Mrs. Hall issued a license to William R. Jeffries Jr., 56, and Mrs. Marguerite C. Jeffries, 49, both of Pasadena, Calif. They were married by Judge Lee Garrett of Superior court.

"If she's half as good to me as she was to my father, I'll be the happiest man in California," said Jeffries.

Necktie Swapping Swamps Inventor, He Screams Uncle

SEATTLE.—Bill Horsley, president of the one-man International Necktie exchange here, is screaming "uncle."

Horsley, founder of the exchange, idly mentioned to a local newspaper reporter that his agency exchanges neckties. His hobby is designed so that men who get tired of their ties can exchange them for the cost of postage.

Horsley's idea got widespread publicity and the former University of Washington cheer leader says he is going crazy with cravats. He has been receiving hundreds daily.

The exchange has been temporarily suspended until tie-mad Horsley catches up with back orders.

Bat Disturbs Composure Of Ohio Senate Chamber

COLUMBUS.—The senate had bats in its chamber.

One bat, that is, which enlivened proceedings by sudden swoops and swishes past ducking senators.

Lt. Gov. Paul M. Herbert said he was undecided to which committee to refer the creature.

That quandry was resolved by Sen. Evert E. Addison, who moved to refer it to the conservation committee.

Before facetious action could be taken, a spectator caught the bat and tossed it out the window.

HIGHEST PEAK ON CONTINENT . . . Mighty Mount McKinley rears its snow-covered head high into the clouds, reaching an altitude of 20,300 feet above sea level. The peak is the major attraction of Mount McKinley National park, one of the two parks located outside the continental limits.

STUDY IN CONTRASTS

Lush Tropics, Frozen Arctic Embraced in Overseas Parks

WNU Features.

Two of the great national parks, which belong to the people of the United States, lie in our territories overseas — Hawaii National park on the islands of Hawaii and Maui in the Hawaiian archipelago and Mount McKinley National park in Alaska. These two parks present a study in contrasts. Hawaii, within the tropics, basks in perpetual spring. Its forests with lush ferns 40 feet high are gay with birds of brilliant plumage. McKinley, on the other hand, enjoys a brief summer season of warmth, and during most of the year sleeps in Arctic silence. Here in winter some of the birds and small animals even don white habits to travel like spectres over the snowy landscape.

Hawaii National park was established by act of congress on August 1, 1916, and was placed under administration of National Park service which also was created in the same month. Main features in the park are two spectacular volcanoes, frequently active, Kilauea and Mauna Loa on the island of Hawaii, and one of the world's largest dormant volcanoes, Haleakala on the island of Maui. The total area within the two sections of the park is about 275 square miles.

Kilauea, probably older than its neighbor, towering Mauna Loa, creates the impression of being a crater in the side of the higher mountain, although it is itself a mountain with an altitude of 4,090 feet. This illusion is the result of a broad depression at its top and of its gentle slopes, caused by lava flows from many lateral vents. Within the depression is a vast pit, Halemaumau or "House of Fire," which often contains a boiling, bubbling mass of molten lava whose surface fluctuates from bottom to rim.

Until 1924 molten lava was usually visible at any time in Halemaumau, but activity since then has been spasmodic. Its risings are accompanied by brilliant fountains and inflows of liquid lava, and its lowerings by tremendous avalanches which send up enormous dust clouds.

To the west of Kilauea rises the vast dome of Mauna Loa whose summit crater, Mokuaweweoe, is included in the national park. Included also is a broad connecting belt between the two volcanoes. Mauna Loa thrusts its great bulk 13,680 feet above the surrounding Pacific. By eruptions in its summit crater and by flank outbreaks it is constantly adding to its mass.

In action Mauna Loa is even more spectacular than Kilauea, and steam vents continually send feathery clouds into the air. Extending northeast and southwest from the summit are volcanic rifts with many deep rents formed by earthquake and eruption as well as many brilliantly colored spatter cones, some 200 feet in height. Twice since 1880 the City of Hilo at the base of the volcano has been threatened by great rivers of lava which have flowed down the sides of the mountain.

HALEAKALA SECTION of Hawaii National park is on the island of Maui. This volcano derives its name, which means "House of the Sun," from a legend about the Polynesian demigod Maui, who climbed to the top of Haleakala, ensnared the rays of the sun, and forced it to travel more slowly in its course so that his mother might have sufficient time to complete her day's work. Haleakala, now rising more than 10,000 feet above sea level, was once a much higher mountain. A collapse of the dome, many years ago, formed a great crater 7½ miles long and 3 miles wide, with walls over 1,000 feet high.

Within these gorgeously colored walls lies a superb volcanic spectacle. Covering the floor are giant red, black and orange cinder cones which, although hundreds of feet high, are dwarfed by the immensity of their surroundings. The crater has a circumference of 21 miles and an area of 19 square miles.

Both sections of the park are reached from Honolulu by island boat or airplane. From Hilo, port of Hawaii island, one may rent an automobile for the trip to Kilauea or take the regular bus.

MOUNT MCKINLEY National park, situated in south-central Alaska, was created by act of congress in 1917. It contains an area of a little more than 3,000 square miles. Principal scenic feature of the park is mighty Mount McKinley, highest peak on the North American continent. This majestic mountain rears its snow-covered head high into the clouds, reaching an altitude of 20,300 feet above sea level, and rises 17,000 above the timber line. On its north and west sides McKinley springs abruptly from a plateau only 2,500 to 3,000 feet high.

For two-thirds of the way down from its summit Mount McKinley is enveloped in snow throughout the year. Denali, "home of the sun," was the name given to this impressive mountain by the early Indians.

Near Mount McKinley are Mount Foraker, with an elevation of 17,000 feet; Mount Hunter, 14,960 feet, and Mount Russell, 11,500 feet. Great glaciers fed by the high snow fields of this mountain range flow many miles both to the north and to the south.

During the park season, which extends from June 10 to September 10, with more than 18 hours of daylight each day, there is a wealth of flowering plants. The park is also the home of many interesting animals and birds.

Prospective visitors to Mount McKinley National park probably will make the trip to Alaska by steamer from Seattle. To use the war constructed Alaska highway through Canada requires a special permit from the Canadian government, and permits are not yet granted to motor tourists. Business men, settlers and bus passengers may apply for permits to L. E. Drummond, Traffic Control Division, Alaska Highway, Edmonton, Alberta.

VAST PIT . . . Halemaumau or "House of Fire" is a vast pit in the crater of Kilauea volcano, Hawaii National park.

MOPSY by GLADYS PARKER

HOME-TOWN ECHOES By G. Kessler

The World at Its Worst By Gluyas Williams

CONCEALMENT

"Doc, if there's anything wrong with me, don't give me a long scientific name. Say it so I can understand it."
"Very well—you're lazy."
"Gee, thanks. Now give me the scientific name. I got to report it to my boss."

SAFE AND SANE

The bartender waited for the two drunks at the bar to give their order, then looked down at their pal who had fallen in the middle of the floor and made no effort to rise.
"What'll he have?" he asked.
"Nothing, Bub," answered one of them, "he's driving."

Gems of Thought

GOD gave us memory that we might have roses every month of the year.

The less attention you pay to attractive parking places on the road to success, the quicker you will reach your destination.

An opportunist is one who goes ahead and does what you always intended to do.

Character is a by-product; it is produced in the great manufacture of daily duty.—Woodrow Wilson.

Where the common people like puns, and make them, the nation is on a high level of culture.—G. C. Lichtenberg.

Dogs I've Known...

by Jimmy Barlow

Frolicky Fritz Eats well, acts well, is well—on a basic diet of Gro-Pup Ribbon. These crisp, toasted ribbons give him every vitamin and mineral dogs are known to need. Economical, too. One box supplies as much food by dry weight as five 1-lb. cans of dog food! Gro-Pup also comes in Meal and in Pel-Etts. For variety, feed all three!

Unlike an old horse, an old engine can be made young again
You can't look an engine in the teeth, but you can look at the exhaust. If it smokes it burns a lot of oil and probably needs new Sealed Power Piston Rings. There's a Sealed Power Ring Set specifically engineered for your car, truck or tractor engine, whatever the make, model, or cylinder wear condition. See your Sealed Power Franchise Dealer. Save oil, save gas, restore power!

Send a postal for illustrated, informative new booklet on 7 ways to save oil. It's free and may save you lots of money. Sealed Power Corp., Dept. W62, Muskegon, Mich.

INDIVIDUALLY ENGINEERED

SEALED POWER PISTON RINGS

HOT FLASHES?

Women in your "40's"! Does this functional "middle-age" period peculiar to women cause you to suffer hot flashes, nervous, highstrung, weak, Pinkham's Vegetable Compound to relieve such symptoms. It's famous for this purpose!
Taken regularly—Pinkham's Compound helps build up resistance against such distress. Thousands have reported benefit! Also a very effective stomachic tonic. Worth trying!
LYDIA E. PINKHAM'S VEGETABLE COMPOUND

From where I sit ... by Joe Marsh

Industry Looks at Our Town

Maybe you read how a group of industrial experts have decided that the small town is the place for industry—not big cities. Reasons they give are better housing, pleasanter living, and more opportunity for wholesome recreation.

Well, looking around our town I'd say that was about right. Most of us own our homes, and keep them looking nice; we enjoy each other's company; and our recreations are mostly simple outdoor sports, and in the evening a mellow glass of beer with pleasant company.

As Doc Walters says, that sort of life just naturally sets you up for work the next day . . . whether it's in office, mill, or field. And Doc should know. He works fourteen hours, but never misses his morning "constitutional" or his evening glass of beer with friends.

From where I sit, any industry could profit from being in a town where wholesome living, temperance, and friendship are the rule.

Joe Marsh

SUNDAY SCHOOL LESSON

Moral Integrity in Our Everyday Lives

LESSON TEXT FOR JULY 6—Job 1:1; 27:1-5; 31:19-23.

MEMORY SELECTION—My righteousness I hold fast, and will not let it go: my heart shall not reproach me so long as I live.—Job 27:6.

EDITOR'S NOTE: Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

By HAROLD L. LUNDQUIST, D. D., Of The Moody Bible Institute, Chicago.

WE LEARN from Job and his experiences that it is possible so to live by the grace of God, that he can be pleased with our lives. That is an encouraging fact. Job was just a man, but he was a man who was

I. Upright and Good (1:1).

HE WAS a man with a large family, with great flocks and herds, and so a man of business, and the husband and father in a growing and active household. But in it all he was upright, and a good, God-fearing man.

Many make excuses for their failure to serve the Lord. They say that their business duties and relationships make it just about impossible. Others say that family situations and responsibilities keep them from service and worship of the Lord.

The experience of Job explodes all such excuses and squarely faces us with the fact that it is possible to live for God in the midst of the very circumstances of modern life.

II. Tried and True (27:1-5).

AFTER Job had lost his property, his children and even his health, three of his friends came to comfort him. But they only added to his sorrow by accusing him of being sinful, and suffering only what he deserved.

Job in these verses is replying to them. We note that in his ignorance of God's purposes, he accused God of being cruel to him (27:2; 30:21). This matter was later to be straightened out with the Lord.

But even now when he did not understand God's dealings, and stood there sick and destitute, he maintained his integrity. He would not turn from the Lord, nor would he be led off into wickedness.

It is possible for a man to be beaten and bruised and bewildered, and still true to the Lord. Let's never forget that!

III. Kind and Fair (31:19-23).

JOB had been a rich man, but had not let his own prosperity dim his eye so that he could not see the need of his poor neighbor. He was not among those who, because they are well fed, can see no point in all the fuss about the hungry people round about.

There is something very fine and worthy of our imitation here. It is so easy to take what we have as a special favor from the Lord, to be retained and used by us, when we ought to recognize it as a matter of stewardship for the Lord.

A vital part of real moral integrity is the right use of possessions. Many a man or woman who has passed all the other tests with flying colors comes to grief at this point.

IV. Spiritual and Faithful (31:24-28).

THERE were plenty of temptations in Job's day, as there are now, to depart from the worship of the true God to other modes of devotion.

The worship of the sun was common, and Jeremiah 44:17 shows that it continued for generations. In fact, what shall we say of the worldwide devotion to astrology in our day.

Then there was the temptation to worship gold. How up-to-date that is, for do we not have millions who worship "the almighty dollar," yes, even if they do not have it.

To all such temptations Job said a resolute "No." He would not even permit his innermost heart to be enticed secretly (v. 27). He stood true for the God he loved and served.

Who will question that one of our greatest needs in the world today is for men and women who, by the grace and blessing of God, will live good and upright lives, true to the Lord, and sacrificial, in real loving-kindness to men. God give us men, yes, that kind of men!

HOUSEHOLD MEMOS... by Lynn Chambers

Creamed Tuna in Potato Nests! (See Recipes Below)

First Aid for Lunch

"If only I had a good list of main dishes and desserts for company luncheons," said a friend of mine recently, "but it always seems I get stuck with things and can't think about something the girls really like."

A good solution for the above problem is to keep a card file of complete menus for such occasions. Be certain to try out the foods before the company date comes along so you will be thoroughly familiar with the preparation, and then everything will run smoothly.

If you don't want to plan the menu completely, then select just the main dish and fill in the salad and vegetable with whatever is in season.

Tuna a la King in Potato Nests. (Serves 6)

- 2 cups milk
- 4 tablespoons flour
- 4 tablespoons butter
- 1/2 teaspoon salt
- 1-16 teaspoon pepper
- 3/4 teaspoon Worcestershire sauce
- 2 cups canned tuna fish
- 3 tablespoons chopped pimiento
- 1/2 cup tiny mushroom caps

Scald milk in double boiler. Make a paste of the melted butter and flour and add to hot milk, stirring until thick and smooth. Add seasonings and cook 15 minutes. Flake tuna fish into large pieces and mix with white sauce. Add pimiento and mushrooms.

Potato Nests: Peel 4 medium-sized potatoes. Cut into tiny strips lengthwise. Heat in a small amount of fat but do not brown. Remove from fat, sprinkle with salt and arrange in nests inside large muffin tins. Press potatoes firmly against sides of pan and bottom. Bake in a hot (450-degree) oven for 15 minutes. Serve hot tuna fish mixture in crisp, hot potato nests.

Lattice Rhubarb Pie. Pastry

- 2 cups cut up rhubarb
- Flour
- 1 cup sugar

Line pie pan with pastry. Wash and peel rhubarb; cut in small pieces. Flour pieces until they are quite white, then add sugar. Mix well and place in pastry-lined tin. Cover with lattice strips of crusts and bake in a 450-degree oven for 10 minutes, then in a 425-degree oven for 30 minutes.

A combination of yellow and green is attractive for working into a luncheon combination, especially when it involves favorites like chicken and lime chiffon pie!

Chicken Loaf With Mushroom Sauce. (Serves 6)

- 2 cups diced, cooked chicken
- 1 cup soft bread crumbs
- 1/4 cup chopped, cooked celery
- 2 tablespoons finely chopped pimiento
- 1 tablespoon minced parsley
- 1/2 teaspoon salt
- 1/4 teaspoon paprika
- 2 eggs, well beaten
- 1 cup milk
- 2 tablespoons butter or chicken fat

Combine ingredients, mixing well

LYNN CHAMBERS' MENU

- *Chicken Loaf with Mushroom Sauce
- Green Peas with Pearl Onions
- Tomato Salad
- Orange-Honey Rolls Beverage
- *Lime Chiffon Pie
- *Recipe given.

and pour into a greased loaf pan. Bake in a moderate (350-degree) oven for 35 minutes or until firm. Unmold carefully on platter and garnish with parsley. Pour mushroom sauce over loaf.

Mushroom Sauce.

- 4 tablespoons butter
- 4 tablespoons flour
- 2 cups milk
- 1/2 teaspoon salt
- 1/4 teaspoon paprika
- 3/4 cup cooked or canned mushrooms

Melt butter and blend with flour and seasonings. Add milk gradually and cook over low heat, stirring constantly, until thick and smooth. Add mushrooms and cook two minutes longer. Serve hot over chicken loaf.

Lime Chiffon Pie.

- 1 1/2 teaspoons plain unflavored gelatin
- 1/4 cup cold water
- 4 eggs, separated
- 1/2 teaspoon salt
- 1 cup sugar
- 4 tablespoons lime juice
- Green coloring
- Crated rind of 1 large lime
- 1 cup whipping cream, whipped
- Baked 9-inch pie shell

Soften gelatin in cold water. Place in top of double boiler, the egg yolks, 1/2 of the sugar, salt, lime juice and rind. Cook over boiling water until thick and smooth, stirring constantly. Remove from heat, stir in gelatin and cool. When slightly thickened, fold in stiffly beaten egg whites to which remaining sugar has been added. Turn mixture into baked pie shell and chill in refrigerator for one hour. Spread or flute whipped cream over top.

A simpler combination than either of the two given thus far is this one of baked tomatoes and banana tarts:

Baked Stuffed Tomatoes. (Serves 6)

- 6 medium sized tomatoes
- 1 1/2 cups shrimp or crab meat, flaked
- 3/4 cup thick cream sauce
- 1/4 teaspoon mustard
- 1 teaspoon salt
- Fine bread crumbs
- Butter
- Paprika

Scoop out tomato centers and mix half the pulp with shrimp or crabmeat, cream sauce and seasonings. Fill tomato shells with mixture. Cover tops with fine bread crumbs, dot with butter and sprinkle with paprika. Bake in a hot (450-degree) oven for 20 minutes.

Banana Cream Tarts. (Serves 6)

- 4 bananas
- 2 tablespoons sugar
- 1/4 teaspoon vanilla extract
- 3/4 cup whipping cream
- 6 baked tart shells
- 6 tablespoons shredded coconut

Fold sugar and vanilla into whipped cream. Slice bananas into tart shells. Cover at once with whipped cream and garnish with coconut.

Released by Western Newspaper Union.

ASK ME ? ANOTHER!

A quiz with answers offering information on various subjects

The Questions

1. How great a distance can a kangaroo hop?
2. When was the Mammoth cave in Kentucky discovered?
3. Who is credited with having invented the compass?
4. How many patents have been granted by the U. S. patent office?
5. How did Peter the Great change the attire of the Russians?
6. Can any fish live out of water for a considerable time?
7. What was the strongest wind recorded in the United States?

The Answers

1. When pursued kangaroos have been known to hop almost forty feet.
2. In 1809.
3. Flavio Gioja, an Italian, 1300.
4. Two and one-half million.
5. He ordered them to wear pants instead of their flowing oriental robes.
6. Yes, a lung fish can live out of water for 3 or 4 years.
7. Two hundred and thirty-one miles an hour, recorded April 12, 1934, on top of Mt. Washington.

Don't Yearn for the Figure You'd Love To Have; By Dieting You Can Be Slim

Eat and Be Slim

WHO said you can't have your cake and eat it, too? You can actually change from the well-padded matron on the left to the slim miss on the right without skipping any meals.

It's all a matter of counting calories. If you want to lose two pounds a week, and you're an average-sized woman, allow yourself between 1200 and 1500 calories a day.

For full details on how to lose weight safely and simply, send for booklet No. 46. Send 25 cents (coin) for "Change Your Weight for Beauty's Sake" to Weekly Newspaper Service, 243 West 17th St., New York 11, N. Y. Print name, address, booklet title and No. 46.

Life-Saving Reel

A new device to save lives in hotel fires is a reel of steel tape permanently mounted on the window frame. The occupant of the room fastens the tape under his arms, steps out into space and is lowered to the ground at elevator speed by the unwinding of the reel.

SNAP! CRACKLE! AND POP! SAY...

P.S. Be sure you get America's favorite rice cereal, the one and only Kellogg's Rice Krispies!

TALK ABOUT TASTE APPEAL!

When bridge-table talk turns to coffee: East may like drip... West prefer Silex... North argue for perk... and South for the pot method—but they can agree on the brand. SOLITAIRE suits them all!

26TH INFANTRY DIVISION

The 26th Infantry, known as the Yankee Division was originally composed of National Guard troops from the New England States and it has made history in both World Wars.

It was among the first to see duty in France in 1918 and on January 21, 1941, it was again called to Federal service with its personnel composed mostly of Massachusetts National Guard.

The Division went overseas in August, 1944, and its components then were the 101st, 104th and 355th infantry regiments and the 101st, 102nd and 108th field artillery battalions. The 26th was rushed to the relief of the beleaguered American forces at Bastogne and it took a prominent part

in spearheading the drive which linked the Third Army, of which it was a part, to the Seventh Army.

The Division first went into action on September 29th, 1944, southeast of Verdun and by October 5 it had received its baptism of fire the hard way. It relieved the 4th armored division near Yancy and by the end of October it was battling the Germans north of the Parroy forest, helping reduce the fortress of Metz.

In March the Division spearheaded the Third Army drive slicing the Saar Palatinate and routing the German defenders. They drove into the heart of the Reich and held a 15-mile front west of Nuremberg and on V-E day had advanced 20 miles north of Litz. The Division then was commanded by Maj. Gen. Willard S. Paul.
