

WILLIAM MACLEOD RAINE'S

To Ride the River With

COPYRIGHT WILLIAM MACLEOD RAINE—WNU SERVICE

CHAPTER IX—Continued

What has Lou got to do with it? ... He pushed the bottle to ...

more than you do." Howard cut back sharply. "And I won't have you saying I do, Dan. There's one thing more I'll say. My boy Lou isn't in this. If you—or Lee—or any of his riders—do that boy any harm, I'll never quit till I've cleaned up the whole Chiswick nest. You can put that in your pipe and smoke it."

and cold. "One of them stayed here." He pointed at the still body. A pulse of excitement hammered in the scrawny throat of the line- rider. "Begorry, you're right. There has been a fight, and one of them got killed."

lifting its crest into a sky of violet haze. Behind a crotch of the hills the sun was setting. Already dusk had softened the vivid tints of orange and scarlet to a faint pink glow. Night soon would sift down upon the highlands.

The younger man differed. "Not a fight, but a murder. For some reason Norris made up his mind to get rid of Kansas. He did so, and then lit out. I'm going down."

The pursuers dropped down into the basin, came to a little stream tumbling down through the rocks. Sorley pulled up his horse.

"Look out. I'm going down." "Don't think it's that. Two of the horses have gone."

"No use going any farther," he said. "Got to wait till we can see. All we'd do is get lost if we kept traveling."

Mile High said to Howard angrily. "Is it your idea to throw down on Morg?"

Gray read the despondency in the old line-rider's voice. He understood it because his own heart was sick. What Pat said was true. They might as well throw off and make camp.

"All I'm saying is that you'd better find Miss Ruth and get her home," Brand replied, frowning at him.

"There's one thing," he said. "If they came here, Norris would camp on a creek. Maybe on this one, since it's the first he would come to in the basin. You fix up something to eat while I drift up along the bank for a ways."

The foreman turned and strode out of the room.

"Sure," Pat answered hopelessly. "Won't do any harm."

Mile High said to Howard angrily. "Is it your idea to throw down on Morg?"

The younger man swung from the saddle and turned his horse over to Sorley. "Reckon I'll make better time on foot," he decided.

The lifeless eyes of Howard slid round to meet those of the other. "Don't always be a lunkhead. Mile High. What has this fellow done but throw down on you and me and all of us? You know this country won't stand for such stuff as he has, just pulled off. He'd know it, too, if he wasn't crazy. We've got to play our hands to save ourselves. When Morg Norris took this girl with him against her will, he signed his death-warrant. Don't you go signing yours. We're going after

He pushed through the brush for half a mile.

He pushed through the brush for half a mile.

Morg to get him. You had better get you a horse and trail along with one of the posses. You'll find it's doggoned good insurance against a few years in the pen at Yuma."

Jeff Gray had to fight down an impulse to hurry. It would be folly to wear out the horses getting to the Walsh cabin, only to find out that Kansas had sent them on a wild-goose chase. After all, the man was one of the gang. What more likely than that, under instruction of Norris, he had been trying to direct the pursuit in the wrong direction when he freed Nelly?

"Wild Horse basin." "It's meant for us," Gray said. "Either the girl wrote it—or Norris did. It's signed with her initial, but that doesn't mean a thing. The scoundrel may have left it to fool us. The letters are done kinda shaky, as if she had made them in a hurry, or the sly." His eyes were back again on the writing.

That's right," agreed the line-rider. "If Norris had done it, he would have fixed the letters deeper, so we wouldn't miss seeing them. I'd say Miss Ruth wrote it."

Swifly, with as little rustling as possible, he moved toward the camp. It was in an open place, close to the bank of the stream. On the edge of the clearing, a horse drew near, he made out the vague shadow of horses. Two figures were seated by the fire. He heard the murmur of a voice.

Gray crept forward with more care. There was no immediate hurry. Norris sat cross-legged at his ease. He had no faintest suspicion that there was any friend of Ruth Chiswick within a score of miles.

"Where is Wild Horse basin?" Sorley pointed to the north. "Up in the high hills, back thataway. Say, how would the girl know where he was heading for?"

"She might have heard him say—or Kansas may have told her before he was killed. Likely Kansas made some move to help her. Morg wouldn't have shot him if he hadn't figured the other fellow was turning against him. Let's get going."

"For Wild Horse basin?" "Yes. I have a hunch the girl did that writing. Morg never would have thought of it."

Sorley looked down at the dead man. "I hate not to bury him before we go, even if he was a scalcawag. But we've got to jump. It will be night soon."

They carried the body into the cabin and covered it with two gunny sacks.

The riders followed the trail left by Norris and his prisoner. Once out of the park, Sorley waited only to make sure of the direction taken by those in front of them. He struck into the hills, dipping across gulches and winding round the shoulders of elephant humps. The country grew wilder and more rugged. Sometimes they were in a region of stunted pines. More often the hills were dry and scarred with rock outcroppings. From the summits they could see a saw-toothed range

CHAPTER X

With a heavy heart Jeff admitted to himself that this was very likely a job that could not be done in a hurry. He might have to sleep on Norris' trail for a week. The fellow knew every pocket in these hills. If Kansas were false-carding, they might not find the outlaws at all.

"(TO BE CONTINUED)

The two men traveled steadily, Sorley in the lead. The little Irishman was a good guide. He had an instinct for short cuts, and he held his horse to the fastest gait that would not sap its strength. They fung the miles behind them, moving always deeper and deeper into the hills.

"Much farther?" Gray asked once, his mouth set to a grim straight slit.

"Not so far," Sorley answered. "That's Crowfoot over to the left. We're swingin' round it now."

They circled back of the mountain, dropped into a gulch, and clambered up its stony bed. Near the top of the canyon Sorley stopped his horse.

"The cabin is in a little park just over the ridge," he said. "What do we do? Bust right down on them? Or wait till it's dark?"

"Better have a look first from the ridge," Gray suggested.

They left their horses just below the lip of the park, climbed up to the ledge, and looked down. No smoke rose from the house. There were no horses in the corral, but one saddled bronco was grazing near the spring.

"They sure have been here," Sorley said. "But they have done gone, and in some hurry. Looks like. Didn't even take time to unsaddle. Why-for did they leave one of the horses here?"

Gray was looking down at something sprawled out in front of the cabin. "They didn't need but two horses," he said, his voice harsh

Secrets of Ancients Survive Attacks of Modern Science

With television soon to become a serious rival to the movies, and giant airplanes and "press-the-button" warships things which raise little comment from the average man, it is surprising that there are many secrets known to the ancients which have survived the attacks of modern science, says a writer in London Answers.

The Greeks could not weave linen or wool on anything like the scale we weave them today. But they wove them into the plemna, a form of cuirass which could not be penetrated by the sharpest dart or arrow. The secret has been lost—perhaps forever.

Must Books Be Read?

The collector of books need not fear the challenge that is sure to be made, sooner or later, by his skeptical acquaintances: "Have you read them all?" The first idea he ought to get out of his head is that he must only buy books for immediate reading.

Bennett confessed that he had hundreds of books he had never opened, and which, perhaps, he never would open. But he would not part with them. He knew they were good, and as he gazed on them, he said to them, "Some day, if chance favors, your turn will come. Be patient!"—Liverpool Post.

The Romans sank wells for water to great depths. Exactly how they did the boring we do not know. They also made glass which would bend yet not break. This would be quite useful today.

That secret, along with many others, passed away with the destruction of the famous library at Alexandria in the fifth century. The loss of the knowledge contained in that library was a blow to civilization.

Best Thoughts
Try to care about something in this vast world besides the gratification of small selfish desires. Try to care for what is best in thought and action—something that is good apart from the accidents of your own lot. Look on other lives besides your own. See what their troubles are, and how they are borne.—George Eliot.

Reading and Thinking

Reading furnishes the mind only with materials of knowledge; it is thinking makes what we read ours. So far as we apprehend and see the connection of ideas, so far it is ours; without that it is so much loose matter floating in our brains.—Locke.

The beautiful purple dye, known of old, has eluded the dye-makers of today. And modern builders can make nothing of the strong and durable cement used by the Greeks and the Romans in their

Geologist Sees Third Ice Age in Next Two Thousand Years' Period

A new ice age, the third, in geological history, is being indicated by measured risings of parts of the eastern hemisphere, according to Prof. F. X. Schaffer of the University of Vienna, writes a Berkeley, Calif., United Press correspondent. Dr. Schaffer, who is an internationally known geologist, said that exhaustive measurements taken at Stockholm show that in the last 50 years Sweden has risen about eight inches, while similar measurements in Finland show that that country has risen 10 inches in 34 years.

oncoming ice until he reached Africa, where he was secure. "A study of the deposits left by glaciers in Sweden shows that the flow started northward some 2,000 years ago. In other words, it took the ice 5,000 years to recede to its present limits in the polar areas, where it has remained for 7,000 years." "At last, however, signs indicate that it is again getting ready to move southward, and unless those signs should fail it should start within the next 2,000 years."

First Color of French Flag

While it is not usual to associate red with the French monarchy, it was really the first color of the king's flag, called the oriflamme. It is only because red was also adopted by the English king that the French gave it up for blue. It was under the blue flag that Huguenots came to America first as loyal subjects of the king of France. However, the red flag was preserved on the galleys of the Mediterranean fleet where terrible suffering was endured by the unhappy men who could not understand the injustice of the king.

BRISCOE COUNTY NEWS

"Official City and County News"

ROY W. HAHN

Editor and Publisher

Cranberry' Allred, Sports Editor

Entered as second-class mail matter at the post office at Silvertown, Texas in accordance with an act of Congress on March 3, 1879.

Let the counsel of thine own heart stand, for there is no man more faithful unto thee than it. For a man's mind is sometimes wont to tell him more than seven watchmen that sit above in a high tower.

I HEREBY RESOLVE—that this line shall remain in the Briscoe County News until our city managers start a little constructive work toward surfacing our streets, or at least until the death of Yours True-ly. Dated this 9th day of June, 1938. (I've been wanting to know for a long time, how long a linotype slug will last.)

Announcing - - -

I have opened a Pop Stand at the Plains Mill and Elevator, and will sell Mrs. B. P. Harrison COLD DRINKS, CANDY, SANDWICHES, HAMBURGERS, during the harvest rush. I will appreciate your trade. - - - Kelton Newman

IF YOU WANT TO get the low down on California, talk to Jack Brown or Horace Lightsey, who came back from that state about the first of the month. Jack says that in any one block, in an hour, there is more meanness going on than has happened in Silvertown since the town was laid out.

THE FINEST DRESSED man you meet on the street, he says, may be the lowest type of human trash. The foreign element are mainly a very low type morally, and there are sections of the city where a "white" man is taking his life in his hands, when he enters therein.

A NATIVE SON DOES not like a Texan, and vice versa—nevertheless, a Texas boy doesn't have much trouble getting and holding a job, because of their reputation for honesty and general manly make-up.

THE BOYS ARE GOING back soon, as both of them have jobs there. They like the climate, and find that there are many things to offset the bad points—but they are still Texans, and proud of it. The place, they say, is truly the melting pot of the world. Jack attended a night school and out of 23 in the class, 18 state were represented, as well as five foreign countries.

KELTON NEWMAN is Silvertown's newest business man, and is running a pop stand at the Plains Mill and Elevator. And some of you older heads could take a lesson from him—for he has an ad in this week's paper and intends to carry a small one all the time.

THE REAL HERO of the kid hunt Sunday night must have been Mrs. Ben O. King. During the night she drove 157 miles in their car, carrying searchers and notifying relatives.

MR. PORTER FINALLY found a paper he has been looking for. It is the first copy off the press, of Volume 1, Number 1, of the Silvertown Light, published October 2, 1891. There's not much left of it but we have it framed and fairly readable. Drop in and see it.

UNLESS OUR KID improves a lot in the next twenty years, he's going to be a detriment to the community. He hasn't any more respect for the rights of others than an outlaw. Also, he has an eye for the women, just plays up to any of them. He uses some of the awfulest sounding language you ever heard. He should make a good politician, for he won't declare himself on the liquor question—sometimes I think he is dry—but usually he's wet. I hope I can keep him out of jail.

SAID COLLIN HAD his first birthday celebration Wednesday. What a year it's been. I hope the next one is a year old when he gets here.

ATTENTION, HEAR YE, and "Hey, you!"—The summer bargain rate is on on this great family weekly, the ladies home companion of hundreds of homes - - the paper that brings you all the home news, features, and foreign news as well. The paper that has no favorites—we tell the facts as we see them (and hope that we live to print another issue.)

NOT ONLY DOES this paper make darn good reading, but it can be used to shoe flies, repaper shelves, and many other common family uses.

YES SIR, she's a bargain if I ever saw one—ONE BUCK for a year—anywhere in the world except Japan, and I won't send it there. The Japs have enough foolish ideas about "community up-building" without reading this paper.

WAVE AT ME sometime when you see me—if you haven't a clean handkerchief, use a dollar bill—I can take a hint!

Dr. O.T. Bundy
—PHYSICIAN—
Silvertown, Texas

WHO PAYS?
A recent survey reveals the rather astounding fact that if everyone had to turn over to the government all income in excess of \$5,000 a year, the sum collected would pay only about one-fifth the annual cost of the government, federal, state and local. It points out that the great bulk of the tax bill must be paid by the small wage earner. He pays it in the form of "hidden taxes" without knowing it in most cases. Hidden taxes are part of the cost of virtually everything that everybody buys—food, clothing, shelter—necessities as well as luxuries. For example, even the simplest item of everyday fare, a loaf of bread, is taxed 57 times, the survey shows. The loaf of bread for which Mrs. American housewife pays eight cents, could be bought for six cents if these hidden taxes were eliminated.

Mr. and Mrs. Ashel Cross and family left Sunday for H. Springs, New Mexico, where they expect to stay for about three weeks. Mr. Cross will take the baths while there.

Miss Joni Bundy was in Oklahoma City Saturday and drove a new Packard home for Kiker Motor Company of Plainview.

HALF OF MONEY RAISED FOR GOODNIGHT FUND

Their work nearly half done, members of the Goodnight Memorial Fund Committee are doubling their efforts toward a speedy realization of their \$1,000 goal. Stevenson, member of the

committee for Silverton said today. The money is being raised to erect a monument at the grave of Col. Charles Goodnight, "father of the Panhandle Cattle business". The Goodnight grave, in the little cemetery at Goodnight, has been unmarked since his death in 1929.

Members of the committee plan to erect a monument identical to that of Mrs. Mary Ann Goodnight who is buried beside her husband. Then, a bronze plaque will be placed between the two graves and the burial plot will be enclosed with an iron fence.

Mr. Stevenson urged those who have contributions to make to the fund to send them soon, either to himself, or to Mrs. Harold Bugbee, Clarendon, treasurer of the fund.

"Contributions in any amount will be appreciated," he said. "The most popular amounts have been \$1 and \$2. As a matter of fact, the committee would be greatly pleased if the balance of the fund could be raised entirely by small donations—in order that more Panhandle people might feel that they played a part in paying this honor to the great Plainsman."

Local Happenings

Jane Finley of Decatur is visiting Lou Ann Williamson.

Frank Hardwick of Decatur is visiting at the home of his aunt, Mrs. Homer Williamson.

Mrs. Homer Sanders visited several days in Quitaque the first of the week.

Mrs. R. E. Douglas was in Canyon and Amarillo Tuesday.

Mrs. Maurice Foust took her mother, Mrs. Sarah Baird to Childress Monday.

Mrs. Walter Lee Bain, Martha Lee, and John Ed have been in Hamilton for the past week visiting at the home of Mrs. C. B. James. Mrs. James brought them home Monday and will remain for some time.

Mrs. C. B. James of Hamilton, and Mr. and Mrs. J. A. Bain visited the latter part of the week with Mr. and Mrs. Bruce Burleson at Greenville, New Mexico.

Mr. and Mrs. Walter Lee Bain are moving to Borger from Claude this week where Walter Lee is a P. W. A. project supervisor.

Mrs. C. C. Biggs had a near-serious accident in Amarillo Saturday. While fitting her with shoes, a clerk tore some tape from her foot and tore so deeply into her foot that it touched a small artery. Mrs. Biggs lost a great deal of blood and fainted several times before they could get her to a doctor.

Visits in Bomarton

Mr. and Mrs. Frank Havran and family visited in Bomarton Sunday. Miss Evelyn Pavlicek, who has been visiting here the past two weeks, returned with them.

Mrs. Pearl Strange returned Thursday after a two months vacation trip.

Circle No. 1

Circle No. 1 met with Mrs. Alvin Redin on Thursday. Miss Sadie Sumemrs reviewed two chapters of the book "What is This Moselum World". The next and last meeting for the summer will be Thursday, June 23, with Mrs. Warner Reid.

Those enjoying the afternoon were: Mesdames M. C. Tull, T. T. Crass, Maurice Foust, Barney Wilson, Tom Allday, Jack Goodwin, Dutch Tidwell, A. A. Peacock, and Roy Hahn, Misses Anna Lee Anderson, and Sadie Summers.

Mrs. Etta Patton is here at the home of her son, Mr. James Patton.

Miss Joni Bundy is home from school at Lubbock.

Mr. and Mrs. Jinks Patton visited Mrs. Patton's mother in Ft. Worth from Friday until Monday. Mrs. Patton's daughter stayed for a longer visit.

Juanita Edwards spent several days this week at the Northcutt Ranch.

Mr. and Mrs. John Lee Francis and children were in Amarillo Saturday.

Antelope Flat

Miss Edith Waldrop left for Amarillo for an indefinite visit with relatives.

Mr. and Mrs. Virgil Sanders of Brice announce the arrival of an eleven and one half pound son on June 7. Mrs. Elmer Sanders is spending the week with her grand-

son, James Robert Sanders, and his parents.

W. N. Bullock spent Wednesday and Thursday with his son, Mr. and Mrs. Walter Bullock of Amarillo. His grandsons, Jack, Glen, and Billy accompanied him home and will spend the summer here.

Mr. and Mrs. R. Sanderson and son, Lewis Ray, spent several days with his daughters, Mrs. John Minork and Miss Shirley Sanderson of Vernon. Jack Minork who has been visiting here returned home.

Dan Dean and Elmer Sanders were in Silvertown on business Wednesday.

Mr. and Mrs. D. W. Evans and son Ernest Dean, and daughter Marion were in Memphis Wednesday.

W. N. Bullock, Mrs. J. C. Bullock and daughter Mary Jo were in Silvertown Saturday.

Mr. and Mrs. C. C. Brown and children, Mr. and Mrs. C. S. Graves and children and Mr. and Mrs. Dan Dean and sons were in Memphis Saturday.

Mr. and Mrs. S. A. James and children, Mr. and Mrs. L. L. Waldrop and son Roy were in Memphis Sunday where Roy received medical treatment.

Mr. and Mrs. Wilsey Barclay and daughter Nancy and Loyce Gibson spent Sunday in the Loyd Bullock home at Vigo Park.

W. M. Bullock spent Monday with Mr. and Mrs. Oscar Bullock of Lakeview.

Horace Lightsey is operating a combine on the Dan Montague place. He came in from California about the first of the month. Conditions there, he says are only fair, and he himself, is laid off temporarily until after the "summer slump". He will return to work for the California Walnut Growers Ass'n about the first of August.

Rev. A. A. Peacock was in Amarillo Monday.

Scientists Measure And Control Vitamins For Modern Chickens

Gray Summit, Mo.—Few things are conspicuous by their absence. But vitamins are among the few that are, since a great deal of vitamin knowledge has been brought about by showing what happens when vitamins are not present. Here at the Purina Experimental Farm thousands of tests have been run on poultry of all ages. Sometimes an abundance of vitamins has been included. Other times feeds lacking in vitamins have been fed. These experiments have disclosed some interesting nutritional facts. Weak legs, poor feathering, retarded growth, bronchial troubles, poor pigmentation, lowered production, disease and infection have all been accounted for by lack of the proper vitamins in poultry feed.

Poultry Need Vitamins
The most important vitamins in poultry feeding are Vitamins A, D, and G. They are most important because they are most likely not to be present in sufficient amounts to promote growth and health.

The process of counting or measuring vitamins is a tedious and expensive one, and only feed manufacturers equipped with complete biological laboratories, trained scientists, and plenty of animals to experiment with can make commercial use of the present-day knowledge of vitamins.

Vitamin Control New
Vitamin control in poultry feeds is relatively new. Vitamins were discovered about 22 years ago, but most of the usable knowledge about them has come to the front since 1920. In 1935 Purina scientists were able to announce that a new Vita-

Vitamin A can now be measured through a machine called the "spectrophotometer."

Vitamin A concentrate had been discovered and could be efficiently and economically added to poultry feeds to improve livability, growth, pigmentation, and laying. Purina laying mashers were stepped up 2 1/4 times in Vitamin A content by the addition of Puratene, which contains Carotene, the vegetable form of Vitamin A.

Vitamin A Essential
Vitamin A is needed by baby chicks, growing pullets, and layers. Especially do laying hens need plenty of Vitamin A to keep up production through winter months. Abundance of Vitamin A in the laying mash prevents breakdown among birds and cuts mortality among the flock. Pullets that have been grown out on a feed containing sufficient amounts of Vitamin A go into the laying house with strong, well-developed bodies and are able to keep up heavy production without breakdown and turn in extra profits for their owner.

Vitamin D, the sunshine vitamin is absolutely necessary if hens are kept indoors. For baby chicks as much as 30 units of Vitamin D per every 100 grams of feed must be given for proper bone development and growth. The best known source of Vitamin D for poultry feeds is cod liver oil, the same source recommended for humans. The finest

Potency of cod liver oil is measured through assay tests on live animals.

grade of cod liver oil the world produces is used in Purina poultry mashers. Each shipment is tested through assay tests on both white rats and chicks before it is put into feeds going into the checkerboard bag.

Vitamin G Now Added
Most recent of the vitamin discoveries is Vitamin G which plays an important part in hatchability. Purina laying and breeding mashers contain a sufficient amount of Vitamin G to cut down losses from eggs that don't hatch. Vitamin G is measured in the Purina Laboratories by use of a new instrument, the Flavometer. This instrument was developed by two Purina scientists and is used to determine the Vitamin G content in feed.

Miss Edythe Davis visited her parents in Post Sunday.

LIBRARY NOTES

"Star Wagon"
By Maxwell Anderson

The "Star Wagon" does not fit easily into any of the ordinary categories. It has been spoken of as a prose comedy of modern American life, but this does not describe it. It is, it is true written in the form of plain everyday speech, but it has a poet's approach. It has, except in a few scenes, only the gayest material, and yet the idea behind it is serious. Although it begins and ends in the 1930's the long stretch of the scenes between goes back over thirty years. The "Star Wagon" is a poet-playwright's attempt to do again an old thing that was worth doing, to say once more dramatically, how few of us there are who would change the current of our lives, even if we could go back to that one moment from which different paths diverge.

The Star-wagon is a time machine, which projects one back into any chosen epoch. Stephen Minch (Meredith) its inventor, middle-aged, poor because he has always been cheated out of the profits of his invention, is told by his harassed wife, Martha (Lillian Gish) that their marriage was a mistake, each should have married someone else back in 1902 and been rich and happy.

Later, Stephen works his star wagon and returns to this date. Stephen and Martha choose different mates this time, but the result is misery. The good old star wagon sets all right, however, by returning them to the present.

Though not one of Mr. Anderson's best efforts, the play has humor and charm.

Vacation Reading

The Library can supply many of the books needed by the children out of school, to supplement school work. For the intermediate and Junior High School grades there are: "Pilgrims Progress", by Bunyon; "Two Years Before the Mast", Dana; "The Honor of Denmark", Daniel; "David Copperfield", Dickens; "Spainards Mark", Dwight; "Five Girls Who Dared", Ferris; "Vicar of Wakefield", Goldsmith; "Here to Yonder Girl", Hall;

"Kidnapped", Stevenson; "Treasurer Island", Stevenson; "Gullivers Travels", Swift; "Tod of the Fens", Whitney; "An Old Fashioned Girl", Alcott; "Just Patty", Webster; "Jerenny", Hugh Walpole.

According to reports benefit paying states, the head of most of them promptness of benefits. After an unemployed workers for the first week able for benefits, it is days before he receives

LOCALS

Bomar returned from New Mexico Sunday after Oklahoma Monday afternoon and children. Colleen accompanied him.

Mrs. Thero Crass were Monday on business.

Bert Hill and Mrs. Maurer motored to Childress.

Mrs. Ernest Fisher from visited C. C. Garrison J. B. Garrison.

Mrs. Roland DeFee and Mrs. Carl P. Hopkins of spent the week end with Mrs. Raymond Bomar.

B. P. Harrison, R. E. and Jim Bomar attended on Study Institute at Monday.

Don Perry has returned visits visit with her sister Worth.

Mrs. Homer Sanders visited in Quitaque

Dean and Martha Jo Griffith returned from Lockney Saturday where they have been visiting their grandparents.

Several people from Silverton attended the candidate rally at San Jacinto Friday night.

Dean Griffith left Monday for the Episcopal encampment at Ceta Canyon.

Rev. and Mrs. Thorns from Hereford are visiting with his parents for a few days.

Mrs. Joe Mercer and children and the Peacock children were in Tulla Sunday.

Mrs. Clyde Hutsell is staying with her aunt who is ill in Lockney.

Jim Brooks underwent an operation for appendicitis in the Turkey Hospital Sunday.

Mr. and Mrs. H. C. King purchased a new Leonard refrigerator from Charles Cowart.

Jewell Hodges visited with her

parents over the week end.

Mr. and Mrs. R. E. Douglas and Rex, and Mr. and Mrs. T. R. White-side spent Sunday in Lubbock.

Mr. and Mrs. Homer Williamson attended the funeral of a friend at O'Donnel Thursday.

Mrs. P. M. Jackson of Ft. Worth is visiting with her son, Rev. W. H. Jackson.

Mesdames F. R. White, Opal Dickerson, Mattie Perry, Lee D. Bomar, and W. H. Jackson attended the Mission Study Institute at Crosbyton Monday.

Mr. and Mrs. Dick Higgins were in Lubbock Sunday.

Mrs. W. T. Diviney was in Kress Monday on business. She also visited relatives.

Mr. and Mrs. Jake Spencer moved into the house owned by Will Newman.

Mr. and Mrs. Hollis Neese and family from Clarendon spent Sunday with his parents.

Mrs. G. M. Aires of Plainview, Mr. and Mrs. Orin Stark of Quitaque, and Mr. and Mrs. W. T. Diviney and family spent Sunday with Mr. and Mrs. Watson Douglas.

Mr. and Mrs. Roy Heckman and daughter visited in Antelope Flat Sunday.

Homer Thompson, who is assistant County Agent of Lubbock County, with a party of six 4-H Club Boys spent the day in Silverton selecting club calves.

The county agent staff was in Lubbock for an all day meeting Wednesday.

Mr. and Mrs. Covenington of Floydada visited with Mr. and Mrs. Looe Miller Monday.

Mr. J. Len Mauk, AAA Field Supervisor, was in town Friday.

Mr. and Mrs. W. A. Kirk and family were in town Sunday.

Ben Bingham underwent an operation for appendicitis Friday in the Quanah Hospital.

Mrs. Boswell, who is teaching in the Gasoline School, is in the Lubbock Sanitarium.

Those spending Sunday with Mr. and Mrs. H. Roy Brown were Mrs. D. E. Fuller and family, Mr. H. C. Bristow and grandson, Roaring Spring; Mrs. Dillard and family, Floydada; and Mr. and Mrs. Monroe of Ceta Hill.

Mr. and Mrs. Joe Mercer were in Amarillo on business Monday.

Mr. H. Roy Brown motored to Floydada Tuesday on business.

Mr. J. B. Bechtol, Laneta, Roy and Glenda Jo Stoneham, came after Hubert Bechtol, who has been visiting with Fred Royce Garrison. The Bechtols are living in Lubbock.

Mr. and Mrs. Noel Landers were in Floydada Sunday. They took Edward and Barbara Jean home. The children have been here attending Vacation Bible School.

Designed and built for you... and your needs. That was the aim of Westinghouse to give you everything you've wanted in a refrigerator. As a result, the Meat-Keeper, the Humi-Drawer, the Super Capacity Froster, and the Temperature Control are features to be found only in the Kitchen-Proved Westinghouse Refrigerators. We will be glad to tell you more about Westinghouse—the refrigerator that was designed and built for you.

VEAL FEEDING PLAN WILL NOT DEVELOP PROFITABLE HEIFERS

Dry Feed Builds Big Frames and Strong Bones for Milkers.

"Three days is not a very long time. Yet it is on the third day after a heifer calf is dropped that the dairyman must decide whether she is to be vealed or grown out as a milker," says W. R. Arends, head of the Calf Department of Purina Mills. "The reason dairymen must make such a quick decision is that the feeding plan for growing out a fine veal is not satisfactory for growing out a high producing heifer. In growing out veal calves the object of feeding is to make the animal retain its baby fat and add to it all the milk fat possible." Arends says. "Fleshy quick growth and fat are wanted in veals. Beef tendencies are encouraged. In raising veals milk or rich fattening feeds are best. Little emphasis need be put on bone, muscle, and frame development."

Heifers Need Special Feed
But when heifer calves are to be grown out as milkers an entirely different system of feeding must be followed. Growth, not fat, is the primary objective. Beef tendencies must be eliminated. Big husky frames with lots of capacity are most important. At every stage of growth the calf should resemble a miniature cow. The only time any fattiness should appear is 90 days before freshening. Extra flesh is needed then to prevent a sharp loss in weight after calving.

Calves intended for milkers should be taken off milk as soon as possible and given dry feed that contains all the essential ingredients for building husky frames and strong bodies," Arends recommends. "A plan to entirely eliminate milk from the ration of heifer calves after the first thirty days has been worked out at the Purina Experimental Farm, where hundreds of calves have been grown out to become part of the Purina milking herd.

Milk First Three Days
"At the Farm calves are left with their mothers the first three days. During that time they get the colostrum milk from their dams. After three days they are taken from their dams and taught to drink water and eat dry calf startena and hay. Milk is fed in limited amounts. On the plan used at the Purina Experimental Farm calves are given two quarts of milk per day for the first week along with starting feed and hay."

At the beginning of the second week the amount of milk is increased to four quarts, with free access to calf startena, hay, water, and a little salt. Milk is increased to five quarts per day the beginning of the third week, but on the twenty-first day is cut down to three quarts, and after the fourth week no milk at all is fed. After the first thirty days, calf startena, hay, a little salt, and plenty of water is the entire ration.

Baby Fat Disappears
Between the fifth and sixth weeks the success of the feeding program begins to show itself. The future milker is seen in miniature. Baby fat begins to disappear and the angular, straight-backed frame of the heavy milker comes into evidence. By removing milk from the ration tendencies toward beefiness are eliminated.

Heifers raised on this feeding program have clean-cut throats, sharp withers, and large capacity—all signs of a good milker in the making.

HEADLINES FROM THE LIVES OF PEOPLE LIKE YOURSELF!

"Death Headed North"

By FLOYD GIBBONS
Famous Headline Hunter

HELLO EVERYBODY:
Now this is the story of an adventure that almost any one of us might have got into. Anyone who has ever ridden on a railroad train has taken a chance on finding himself in just such a terrifying situation. As luck would have it, it happened to Fenton Barrett of Shaker Hollow, South Salem, N. Y. And, boys and girls, I wish it to be distinctly understood that I am very glad it happened to Fent Barrett, and not to me.

Fent Barrett is an actor. He had just finished a run in a successful musical show on Broadway not long before he starred in the thriller he is going to tell us about now. When the show closed, he went south for a vacation, but he hadn't been there long when he got a wire telling him to come back to New York and start rehearsals in a new production.

Fent left that night for Washington, and in Washington he got aboard the train for New York—the train that was to carry him smack into the most thrilling moment of his life.

Fire Started in the Wash Room.

It was a hot day, the first of August, 1928. Fent decided to ride in the smoker where he could take his coat off and be comfortable. Usually the smoker is up front, next to the baggage car, but in this case it was the last car on the train.

The train bowled along over the countryside, without any interruption, and without any hint of the drama that was to come. It was getting near the Big City, and the train porter came in and began cleaning up the car. Fent was sitting in the third seat from the front, and was watching the porter idly as he moved about. The train was coming into

The Whole Wash Room Was Roaring With Flame.

Elizabeth, N. J., and the porter, with a large bundle of old newspapers, had just gone into the men's wash room.

"That porter," says Fent, "had been in the wash room only a few seconds when suddenly he came leaping out into the aisle. As he did, I saw the reflection of flames on the highly polished door. The porter made a desperate attempt to close the door, but by this time the whole wash room was roaring with flame, and he was beaten back."

Fent jumped to his feet. He was one of seven men in the car including the conductor and porter. Before he could get out of his seat, the flames were almost on him, and he had barely time to grab his coat and brief case and dash to the rear of the car.

Couldn't Stop the Blazing Train.

Meanwhile, with all the windows open, the blaze spread through the car like wild fire. As Fent reached the rear of the car he looked back, just in time to see the conductor reach for the signal rope to stop the train. The rope was blazing, even as he grabbed for it. As he pulled on it, it snapped in two. Their only way of communicating with the engineer—the only means of stopping that speeding train—was gone.

"We all crowded back to the rear platform," says Fent, "and divided three on each side. The porter had climbed over the iron gate and was hanging to the back end of the train for dear life. By this time half the car was on fire, and with us in the last car and the train doing sixty-five miles an hour, it certainly looked bad."

"One of the passengers became hysterical and the conductor had a hard time trying to keep him from jumping off the back end of the train. We were all choking and almost overcome by smoke and the fumes of burning paint and varnish. I felt myself getting panicky and dropped to my knees and put my nose to the floor, trying to get a good breath of air."

The fire was all through the car by this time—streaming right down the aisle and shooting out the door onto the rear platform. Fent felt something move beneath him. It was that iron lid which covers the steps. The porter had loosened it and was motioning the three men who were standing on it to step back so he could swing it open. They aimed around until they could get it up, and then they crowded on onto the steps.

All Jumped at 30-Mile Speed.

The porter screamed to them not to jump. The flames crowded them harder now, and Fent was kept busy dodging broken glass and tongues of fire that licked back at him through the rear windows. The heat was so terrific that he made up his mind to jump soon, rather than be burned to death.

And then—the brakes went on. The train started to jerk and slow down. It slowed from sixty-five—to fifty—to forty. When it was going about thirty, Fent jumped, and the rest of them followed.

"I was thrown up against the bank," Fent says, "but I wasn't badly hurt. A few scratches and bruises—but I was too glad to be off that burning car to pay any attention to a little thing like that. The train went on for half a mile before it came to a stop, and we ran and caught up with it. By that time, the car we had been in was just a red-hot steel frame. Not a window or a seat left. And they were having quite a time trying to disconnect it from the rest of the train because the steel was so hot the brakeman couldn't touch the couplings. We got into another car, I fell into the seat exhausted, for it was then that I first realized what I had been through."

Florida Gardens
The Ravine gardens of Palatka, Fla., are located in a natural amphitheater covering about 85 acres. The gorge extends for five miles, festooned in tropical shrubbery and azaleas of many distinct varieties. Along the slopes of the ravine, which rise to a height of 120 feet, are thousands of palms interspersed with native trees. A spring-fed brook, with flower-decked islets, winds along the floor of the gorge.

Tung Oil Long in Use
For centuries the Chinese have used tung oil (or Chinawood oil) in mixtures to paint and calk their ships and boats. It gradually spread into world commerce. Portuguese spice traders introduced it into Europe in the Sixteenth century. The oil began coming to the United States in the late 1860's. When its quick drying and waterproofing qualities were discovered, demand for it increased.

France's Famous Caverns
The Grotte de Dargilan, one of the underground caverns of Millau, in south central France, has a cavern, 400 feet long, 200 feet wide and 100 feet high, contains a mosque, a church and a belfry that is 75 feet high.

Have Odd Grain Bin
Indians of southern Mexico have a unique bin for storing shelled corn against weather and the depredations of the harvester ant. It is built in the shape of a cup and saucer, with a thatched roof, and the saucer part is filled with water.

Elephant Would Rather Wallow
Months of patient training is needed to teach circus elephants to push circus wagons out of mud, for the elephant would much rather wallow in it.

Name Austin of Latin Origin
The name Austin is of Latin origin. It may be a contraction of Augustine, which has about the same meaning, but is considered a separate name.

SEEN and HEARD around the NATIONAL CAPITAL

By Carter Field

Washington.—There is no discounting the jubilation in New Deal circles over the present status of the TVA investigation by a special congressional committee. It is true that a very loyal supporter of President Roosevelt, Sen. George L. Berry of Tennessee, has been more or less thrown to the wolves. That is regarded as too bad, of course, for, as is evident in several other Southern states, notably Georgia, South Carolina and Texas, it is not as simple as picking daisies to replace stubborn independent Southern senators with men who see eye to eye with the President on economic issues.

But so far that is the only loss the New Deal has sustained, whereas the effect of the first few days of the investigation has been to offset, to at least a small degree, the unfavorable public reaction which came when the President "fired" Dr. Arthur E. Morgan, chairman of the TVA.

No one familiar with the TVA situation has actually changed his views as a result of anything so far disclosed or likely to be brought out prior to exhaustive inquiry. The people who thought Arthur Morgan right still think he was right. The people who disapproved of David E. Lillenthal's proceedings still disapprove of them.

But the important thing that has happened is that the first salvos of the two sides have been fired, and, from a publicity standpoint, the Lillenthal side came out with less damage. General feeling in Washington is that the public, and the newspaper editors, were disappointed at the lack of fire in Arthur Morgan's attack, at his unwillingness to call names and use epithets which would make good headlines.

Morgan's carefully prepared case, the general impression here is, is not calculated to fire the man in the street with a desire to take a club to Lillenthal. It is not even calculated to make the "milkman in Omaha" read through it. Quite the contrary. If any candidate for the Presidency could be assured of the votes of every man and woman who did not wade through Dr. Morgan's attack, he would not even lose Maine and Vermont.

Morgan Is Mild
This might be true in any event, no matter what Dr. Morgan had said in his first appearance before the committee. But far more important was that he did not use any language which would make a real fighting headline, which the man in the street would read. There is a general feeling, even among Dr. Morgan's warmest supporters in congress, that he has fired most of his ammunition, that what is to come is detail, and that the newspapers would not have printed as much of his first statement as they did had it not been for the marvelous advance notices, notably in the sensational refusal of Arthur Morgan to present his full case to the President.

The general impression, also, is that Lillenthal is so much cleverer than Morgan at this business of presenting his case, either to an investigating committee or to the public, that there is little expectancy that in the general fighting to come Arthur Morgan will have much chance.

The one episode that was expected to inflame the public was the attempt of Senator Berry to collect a few millions from the government on his marble claims. This is now bogged down to a contest as to whether Arthur Morgan or Lillenthal showed better judgment in his plans to protect the government. Lillenthal, it is thought, deliberately abandoned any thought of protecting Berry's reputation, despite the fact that the Tennessee senator is now engaged in a primary fight. Best opinion on that is that the President agreed with Lillenthal the sacrifice was necessary.

Stiffer Taxes Coming
Much stiffer taxes next year are a certainty. This is true despite some very misleading inferences made recently because budget predictions were shown to be not very far wrong. What was omitted, and what made these stories misleading, was that the budget forecasts were that the deficit would be large. They happened to be right.

But not even the most enthusiastic New Dealer denies that taxes must be increased by congress in the next session. The New Dealers will give varying explanations, most important of which is an attack on congress for too drastically modifying the tax on undistributed corporation earnings and the capital gains tax.

Actually two factors are both far more important than this one. One is that the corporation and personal income tax returns to be made next March will be tremendously next of those which were made last March. The Treasury is fully aware of this situation. Nothing that could conceivably happen between now

and the end of the present calendar year could change this result.

The point is that 1937 earnings of corporations, and 1937 private incomes, were excellent for the first nine months of the year, that is, excellent compared with anything since 1929. But in the last three months of 1937 the falling off became sharply manifest. Despite this obvious fact, there is a certain momentum attached to any such movement which delays its full effect for a time. As for instance, the fact that many corporations, badly hit in the 1929 situation, continued to pay dividends through 1930 and some of them into 1931, though eventually they were forced to discontinue.

Incomes Reduced

Reduction of dividend and bond coupon payments at the present time hits the income tax returns to follow much harder than was the case in 1929 and through to 1933. At that time the Treasury did not tax normal individual income rates on dividends. It was assumed, up until a later tax bill, that the British system, holding that the corporation income tax had covered the "normal" individual income tax on dividends, was fair.

There is another important point to be remembered in estimating tax receipts. If a rich man's stock fails to pay \$100,000 of expected dividends, because the corporation in question did not earn the money, then the Treasury loses more than three-quarters of the money. The government fails to collect the corporation income tax, which was 15 per cent, and is now, under the new bill, 18 per cent.

But then the whole amount is subject to the top bracket of that rich man's income. So when a corporation's income declines, as far as the Treasury is concerned the depression skims off the cream, leaving only skimmed milk.

The other factor in the certainty that taxes must be increased is that virtually everything that is waiting for action by the federal government contemplates greater spending, not smaller. This is true of the navy, of the army, of the merchant marine, of trust busting plans, and of social security.

Even the attempt at ear marking the relief appropriation was not an economy move, but merely one to prevent the administration from withholding pork from individuals in the house and senate that it wished to punish.

F. D. R. Still Strong

Planned economy of business, with close government supervision of production and competition on much the same pattern as Secretary Henry A. Wallace is now regulating agriculture, will be pressed strongly by left wingers as the next step toward "recovery." President Roosevelt is disposed to go along with them, though questioning the political expediency of such a move on the eve of the congressional elections.

Right wing advisers hope that victory for the wage-hour bill may dissuade him, but more economic planning is the prospect at the tag end of a session in which the President was turned down on government reorganization and his favorite tax theories, with an indication of more independence in congress and more turning-to-the-right by the government in spite of Roosevelt's personal views. It is the prospect because of utter failure of pump-priming and credit inflation to give business and employment the lift that the left wingers predicted. It is the prospect also because, despite the failure of the Roosevelt recovery measure and despite the desire for independence on Capitol Hill, various tests show that Roosevelt still stands strong with the voters—that he has the power to defeat, if not the power to elect.

Conservative independents on Capitol Hill are distinctly worried by numerous developments, hence are not only afraid themselves but are gaining few recruits. Florida nominated a New Dealer and a Townsend plan advocate over an independent conservative. Florida in a run-off election proceeds to nominate a Townsendite and a New Dealer for the seat in the house which that independent conservative now occupies. Oregon Democrats beat a sitting governor for renomination largely because he had insisted on preserving order in labor disputes.

Faces Bad Situation

Washington faces the unprecedented situation of a bad depression and increasing unemployment actually helping the administration in power, instead of crushing it as has invariably been the case in this country's political history. Congress construes the various votes and polls as a mandate to the President to proceed with economic experimentation. The only question is whether the President will "press his luck" and go forward with plans he has long contemplated and approved. These include plans to avoid increasing capacity to the point where profits are turned into "additions to plant which are now standing stark and idle" as he said in his 1932 acceptance speech. Also plans to prevent unfair competition, monopolistic methods in business, collusion to produce identical bids on contracts, movements of plant to reach cheaper labor for exploitation.

In short, plans to attain the ideal of planned economy with no depression, no booms, no underprivileged, no speculative profits of any kind, and very small profits for all business units.

Carefree Cotton Fashions

THESE two designs are particularly good inspirations for summer daytimes—they're cool, simple, becoming and easy to make. More than that, they are styles that adapt themselves to all seasons and many different materials, so that you can use them over and over again. The

skirt and puff sleeves, is the most becoming fashion in the world for girls between six and eighteen. For the jumper, choose shantung, pique, gingham or linen. For the blouse, frilly, sheer things like dimity, organdy, mull or dotted Swiss.

The Patterns.

1533 is designed for sizes 34, 36, 38, 40, 42, 44, 46, 48 and 50. Size 36 requires 4 1/2 yards of 35-inch material. 1 1/2 yards ricrac braid to trim.

1520 is designed for sizes 6, 8, 10, 12 and 14 years. Size 8 requires 1 1/2 yards of 35-inch material for the blouse; 2 yards of 35-inch material for the jumper.

Spring-Summer Pattern Book. Send 15 cents for the Barbara Bell Spring and Summer Pattern Book which is now ready. It contains 109 attractive, practical and becoming designs. The Barbara Bell patterns are well planned, accurately cut and easy to follow. Each pattern includes a sew-chart which enables even a beginner to cut and make her own clothes.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

Strange Facts

Movies Catch Fire-Rain

A RAIN of fire, thousands of degrees in temperature, fell upon the surface of the sun. Sprays of flaming atoms shot up 150,000 miles from the sun's surface. A terrific explosion took place in which part of the sun's atmosphere was lifted 600,000 miles above the sun's surface. On the earth there were clear skies and cloudy skies, sunshine and rain. Even the most sensitive radio waves were not disturbed. Yet one instrument, made by man, recorded this rain of fire.

The spectroheliograph is the instrument invented by scientists which has made possible these amazing photographs of fire-rain. This instrument is essentially a spectroscope with a slit which transmits only one line of the spectrum. A photographic plate is moved across the slit at a rate equal to the sun's apparent rate of passage, the sun's light entering the slit through the object glass or mirror of a telescope. On September 17, 1937, the eye of the solar camera received and recorded celestial fireworks in motion pictures.

These solar pictures were shown for the first time in Philadelphia at the recent annual meeting of the American Philosophical society. They are the work of Dr. Robert R. McMath. The rain of hot fire falling upon the sun, revealed for the first time by improved solar photography, presents the greatest mystery. No one knows why it rains fire on the sun, or where the fire-rain comes from. Yet pictures have been taken of it, falling in great curving spirals. It is as mysterious to modern scientists as rain water was to our primitive ancestors.

ASK ME ANOTHER ?

A Quiz With Answers Offering Information on Various Subjects

1. What continent is known as "the land astride the equator"?
2. How did the United States acquire Minnesota?
3. What ball player pitched the first perfect game?
4. "Minnesota" means what?
5. How many planes are there on the U. S. aircraft carriers?
6. Is hari-kiri practiced by the Japanese in battle?

The Answers

1. Africa.
2. Part of it by the Revolution, and the remainder by the Louisiana Purchase.
3. Under the modern rules, Cy Young on May 5, 1904, pitched the first perfect game—no runs, no hits, and nobody reaching first base.
4. "Land of the Sky Blue Water."
5. The Navy department says that there are about 80 planes on each of the United States navy aircraft carriers.

The Test that Says... No Acid Here

Stop where you see this sign

Even the most super-sensitive test can't find a trace of acid in Quaker State Motor Oil. Quaker State is made only of the finest Pennsylvania crude oil... scientifically freed of all impurities in four great, modern refineries. The common ailments of sludge, carbon and corrosion are wholly overcome by Acid-Free Quaker State. Your car will run better, last longer. Retail price, 35¢ a quart. Quaker State Oil Refining Corporation, Oil City, Pa.

"IT'S THE TOP IN MILD, TASTY SMOKIN'"

Burns Harrelson's getting a paperful of that mellow, easy-rolling "makin's" tobacco from Ed Landen

"YOU'RE GOIN' to roll a smoother, fatter, and cool-drawin' 'makin's' smoke with that Prince Albert," says Ed Landen (left), handing his tin to Burns Harrelson. "Say," comes back Burns, "I've been smoking Prince Albert for years. It's sure a mellow, rich-tastin' smoke. And 'most everybody's a speed-king roller with Prince Albert in the paper."

ED TUCKS HIS handy tin away. "On top of Prince Albert's other good points, that big 2-ounce tin holds around 70 grand 'makin's' smokes," he says. "With the best 'makin's' tobacco costing so little, I won't bother with anything else." (Pipe-smokers feel the same—P.A. is America's favorite pipe tobacco.)

MAKE THIS MONEY-BACK OFFER YOUR INTRODUCTION TO P. A.'s SMOKING JOY

Roll yourself 30 swell cigarettes from Prince Albert. If you don't find them the finest, tastiest roll-your-own cigarettes you ever smoked, return the pocket tin with the rest of the tobacco in it to us at any time within a month from this date, and we will refund full purchase price, plus postage. (Signed) R. J. Reynolds Tobacco Company, Winston-Salem, N. C.

Quitaque News

Mary Charlotte and Eloise Tunnell are visiting with their grandmother, Mrs. Fred Swift, of Memphis, this week.

F. M. Saxeche, a student of Tech College spent the week end with relatives and friends.

Mesdames W. Coffee, Jr., John Thorns and Della Griffith of Silverton were visitors of Quitaque Friday.

Ben O. King of Silverton was a business visitor of Quitaque, Tuesday.

Bernice and Edward Grundy, who have been attending school at Tech returned home to spend the summer vacation.

Miss Rena Persons of Amarillo is visiting with home folks this week.

Mrs. Ruby Hardwick and Mrs. Jim Gilmore of Turkey were visitors of Quitaque Friday.

Mrs. Mildred Smyers of Childress was a business visitor Friday.

Gordon Smithce, a student of Tech College spent the week end with his parents, Rev. and Mrs. Taylor Smithce.

Phillip Hamilton was a business visitor of Plainview Saturday.

Mrs. Homer Sanders, and Miss Aurelia Sanders were visitors of Quitaque Tuesday.

Johney Womack, who has been attending school at CIA, Denton,

returned home to spend the summer.

The wedding of Miss Lucille Persons to Winston Savage took place at the home of the bride at 10 o'clock Wednesday morning.

Jack Hutchenson and Miss Dorothy Nell Lyles of Turkey were married at Silverton Saturday night.

San Jacinto News

The candidate rally was well attended. The P. T. A. received around twenty-five dollars for ice cream and cake sold.

Mr. W. C. Hulseley is recovering from a recent heart attack.

Mr. and Mrs. Lawernee Hutson visited in the Mart Hyatt home last week.

Mr. Chester Burnett was appointed trustee Friday at the meeting of the school board at Silverton to fill the place of Mr. Wright May.

Garland Preston is home after working on the JA Ranch the past year.

Brother Butterfield of Iowa Park Texas visited in the Jim Derr home Monday and Tuesday. Bro. Butterfield was pastor here some 25 years ago.

Bud Jones is employed by Chester Burnett.

Misses Maple May, Maruell Cox, Mr. Fred Cox and Gene Brown went to the Canyons Monday.

Mr. and Mrs. Woodrow Bice and son visited relatives at Kress Sunday.

Mrs. Jim Derr is suffering with a bruised arm.

Mr. and Mrs. Wright May and Barbara were shopping and visiting in Plainview Monday.

Mr. and Mrs. Warren Cope and children visited in the Frank Folly

home at Flomot, Sunday week.

Wallace Locals

Mrs. Mary Edwards visited her father and mother, Mr. and Mrs. Will Autry of near Kress, Sunday.

Mr. and Mrs. Jake Spencer, Zona Gale and Jerry Lynn moved to Silverton last week.

Newell Harper visited Edward Edwards Saturday evening.

Uncle Buddie Edwards spent Sunday with Mr. and Mrs. M. M. Edwards.

Mr. and Mrs. George Jones and son Billie visited with Uncle Buddie Edwards and Mrs. Mary Edwards Thursday evening.

Mr. W. R. Watley bought a new combine.

Mr. Henry Myers visited Mr. and Mrs. John Kitchens Tuesday morning.

HEALTH OFFICER ADVISES VACCINATION FOR TYPHOID

No matter how busy you are now planning your vacation, looking up road maps, camping sites and equipment stored since last summer, Dr. Geo. W. Cox, State Health Officer, advises all Texans to add one extra item to their list of things to be done before vacation starts.

The advice: "If you have not been vaccinated against typhoid fever within the last year or two, go to your family physician and have him give you the three 'shots' that will protect you against the disease. It takes several weeks for the protective treatment to establish itself throughout the system, so it is an undue risk to wait until just before starting your vacation to attend to typhoid vaccination. Begin the treatment without further delay," Dr. Cox admonished.

"Typhoid fever is much less of a menace than it was a number of years ago. But it still is the cause of much unnecessary sickness. Typhoid fever is contracted through the mouth. You either eat or drink the germs. Typhoid is transmittable through the use of water, milk or other foods that are contaminated

by typhoid germs passes on by someone ill with the disease or someone who has had the disease.

"Vigilant protection of public and private water supplies from pollution, pasteurization of milk, protection of food supplies from contamination and such sanitary precautions have reduced greatly the incidence of typhoid fever in Texas.

"But there are certain other sources of danger that cannot be reached by public precautionary measures. Certain persons who have had typhoid fever continue to pass the germs that cause the disease long after they have recovered from the illness—these persons are called typhoid 'carriers.' When they are careless in their personal habits they are likely to leave typhoid germs on any food they touch. In recent years some of the more serious outbreaks of typhoid over the state have been due to careless carriers.

"There are other sources of typhoid: a stream of water along the highway may be clear and sparkling but that is no guarantee the water is free from contamination. Milk may be a source of danger. If unsure of the safety of your milk or water supply, it is a good health practice to always boil them before using. The Texas State Department of Health can warn you against sources of infection—but vaccination is the only sure way against contraction.

Mr. and Mrs. Curtis King were called to East Texas today by the death of Mr. King's brother.

Jack Brown returned from California the first of the month and has been visiting relatives and friends and working a "little" at the Magnolia Service Station. He will return to his California job the 20th of June.

IF YOU want to save 25% on tires, stop in and see the new Firestone Convoy Tire — the value sensation of 1938. You will find it has everything you want — safety, mileage, blowout protection, new design, new smart appearance — all at a remarkably new low price. And when you see it you will agree that Firestone has again set a new all time high in tire value with these outstanding features.

New High Quality — First choice rubber and cotton selected that conforms to Firestone's high standards and rigid specifications.

Long Mileage — Safe, silent tread design made of tough, slow wearing rubber that assures long mileage. Sturdy bars and rugged notches give protection against skidding.

Blowout Protection — Nine extra pounds of rubber are added to every 100 pounds of cord by the Firestone Patented Gum-Dipping process. Every cord in every ply is saturated with liquid rubber which counteracts internal friction and heat that ordinarily cause blowouts.

PUNCTURE PROTECTION — Firestone's patented construction of two extra layers of Gum-dipped cords under the tread protects against punctures.

NEW LOW PRICES — because Firestone saves money by controlling rubber and cotton at the source, and by more efficient methods of manufacturing and distribution. These savings make possible the extra values at these new low prices!

DON'T MISS THIS opportunity to save money. Let us put a set of the new large size, rugged, long wearing Firestone Convoy Tires on your car today, then your car will be ready for trouble-free summer driving!

Listen to the Voice of Firestone featuring Richard Crooks and Margaret Speaks, Monday evenings on Nationwide N.B.C.
