

# Snow Boosts Wheat Prospects

ODELL WALLS, who will be the local manager for the Hale Theatre here. He hails from Hale Center, Texas.

## AGGIE BRIEFS

By Ray S. McEntire  
Secretary Briscoe Co. Committee

### Final Date For Signing New Worksheets

The final date for signing works covering farms not previously covered by worksheets has been set at March 1, 1941.

There is reference only to sod farms. Please notify the county if you are placing a new sod farm in the program.

### Final Date For Reconstituted Farms

March 31, 1941 is the final date for requesting reconstituted farms. Your farm is to be either larger or smaller—by addition or subtraction of acreage for 1941, you have not notified the office by returning Form SR-505, as to do so at once.

### AAA On The Air

Starting Wednesday, March 5th Agricultural Adjustment Administration will have a portion of the radio program over the Farm and Home Hour, Quality Network, at 6:15 P. M. every Wednesday.

For the month of March the schedule of programs will be: March 5, Supplementary Cotton Program, Lester Young.

March 12, Food Storage Program, Fred Rennels.

March 19, Outlook for Wheat, by C. Colgin.

March 26, Cotton Stamps and the Business Man, by B. F. Vance.

1941 Supplementary Cotton Program

The number of requests for in-plantation relative to the supplementary cotton program that has been made to this office would indicate wide-spread interest in the program.

Those eligible to receive cotton stamp payments, notice of application to make adjustment in 1941 cotton acreage must be filed with the county committee as prescribed by the order of the farm prior to June 1, 1941.

The farm payment of cotton over-planting will be computed as far as possible after performance is determined and can not exceed payment computed on the in-plantation diverted acreage.

Producers qualifying for a cotton over-planting payment will also be eligible for a special food and production payment to be made under the 1941 Agricultural Conservation Program.

Additional information concerning the program will appear in Aggie Briefs as soon as received by the County Office.

### CARD OF THANKS

We want to thank our friends for their kindness and help given during our recent sorrow; and the beautiful floral offerings of Mr. Baird. Words cannot express our true appreciation for many friends.

Mr. and Mrs. Robert Rhea, Mr. and Mrs. Buck Baird, Mr. and Mrs. F. M. Arnold, Mr. and Mrs. Jim Baird, Mr. and Mrs. Jard Hollingsworth, Mr. and Mrs. Winfred Baird, Mr. and Mrs. John D. Baird, and Mrs. Lemo Baird.

### SENIOR SILVERTON STUDENT BEST OF COLLEGE SORORITY

Jack Wafford, formerly of Silverton, a sophomore at West Texas State College, was a guest of the Kappa Tau Phi, social sorority recently. The occasion was a Valentine coffee in the home of Miss E. E. Hudspeth, head of the department of foreign languages.

After the coffee, the guests and members of Kappa Tau Phi attended church together at the First Christian Church.

## MRS. B. F. STEPHENS CLAIMED BY DEATH

Mrs. B. F. Stephens a resident of Briscoe County for the past 46 years passed on to her promised reward February 22, 1941, having attained the age of 77 years and 4 months. Mr. Stephens preceded her in death 17 years.

She was born October 23, 1864 in Cartersville, Georgia, and came to Texas at an early age. She was united in marriage to Mr. B. F. Stephens of Comanche in 1887, at the age of 23 years.

She was united with the Church of Christ at an early age and lived a true Christian life, and was loved by everyone that knew her.

She was the mother of 11 children, 2 of whom preceded her in death, she was also mother to 3 step children. All of these children were present at the funeral.

Her only brother, Mr. R. E. Burford of Cadet, Missouri was also present at the funeral. Funeral services were held at the Church of Christ at Downing, conducted by Brother Ollie Cantrell of Blanket. Interment was made in the Downing Cemetery.

She was visiting in the home of her daughter, Mrs. John C. McGinnis at the time of her death.

She leaves to mourn her passing her children:

Mr. Amon Stephens  
Mr. Paul Stephens  
Mr. Claude Stephens  
Mr. Olen Stephens  
Mr. Barney Stephens  
Mr. Elmer Stephens  
Mrs. R. C. McGinnis  
Mrs. John C. McGinnis  
Mrs. C. L. Whitehead  
and three step children:

Mr. Sam Stephens  
Mr. B. J. Stephens  
Mrs. J. C. Gunn

## FFA BANQUET A BIG SUCCESS

More than eighty persons attended the Future Farmers annual Father and Son Banquet which was given in the high school gym last Friday night. The program was opened with the regular opening ceremony.

Bobbie McDaniel gave the welcome to the fathers and Mr. W. W. Martin gave the response. Grady Martin introduced Francis Simmons the FFA sweetheart for 1941.

Charles Quillen then introduced Pauline Steele, the FFA sweetheart last year. J. D. Nance gave the list of activities that the FFA Chapter has performed this year and the activities to be accomplished for the rest of the year.

Alvy Gardner gave a report on his trip to Kansas City which was presented to him as a prize for his work in the Chapter Improvement Contest last year. Billie Jack Lawson introduced Mr. Homer Sanders, and Paul S. Rogers, as the Honorary Members of the Chapter this year. He also, introduced the special guests Mr. Lem Weaver, and Mrs. Victor L. Harmon.

Music for the program was furnished by Datis and George Martin.

Through the cooperation of all of the FFA Chapters in Texas a special radio program was arranged and presented to them on the night of the banquet. Speakers on the program were Mr. Paul V. McNutt, Mr. W. A. Ross, national FFA executive secretary; Mr. J. A. Linke, national FFA advisor; Mr. R. A. Manire, state vocational agriculture director; and G. G. Scruggs, the state FFA President.

The Home Making girls served the meal consisting of chicken, chicken dressing, creamed potatoes, green beans, pickles, hot rolls and butter. The dessert was peaches and cream with cake.

## Bogan Won One—Lost One

Barney Bogan, Quitaque's best battler, went to the state Golden Gloves tournament last week. He won his first fight, and lost the second from a mix-up on the count. According to the Quitaque Post, Barney has never been knocked out, and was the first time he has been knocked down.

Betty Hill was on the sick list the later part of the week, but is much improved at his time.

## FOUR BRISCOE COUNTY BOYS LEAVE FOR ARMY

Four more Briscoe County boys will leave for army training service in the county's next two selective service calls, March 4 and March 11, according to R. E. Brookshier, clerk of the draft board.

Leonard Perkins and Jim Cline of Silverton, and Ernest Martin of Rock Creek community, will leave for the induction station March 11th.

All Briscoe County men who have been selected so far seem to think that the army life isn't so bad after all. Word this week from Virgil Chitty, says that he has been attached to an armored division and has been stationed at Fort Knox, Kentucky for training.

## NARROW ESCAPE BY LOCAL MEN

Leon Martin and Alan Dickerson had a freak accident Sunday night on Highway 86 west of Silverton, when their car skidded. They were coming from Amarillo in Martin's V-8 and as they came off the end of the slab to the slick road, their car turned around in the road and headed in the same way—in fact it was a complete about face. The car was headed east and after the skid it was headed east again. Nothing was injured, although Leon claims that Alan's nerves were slightly ruffled.

## MARCH OF TIME STUDY CLUB MET THURSDAY

The March of Time Study Club met Thursday with Mrs. Theron Crass. The program was on Negroes. Roll call was answered by a negro superstition. Papers were given by Mesdames: True Burson, Beth Joiner, and Miss Anna Lee Anderson. A negro spiritual was sung by Mesdames, Hahn and Crass, accompanied by Miss Fern Murphy.

Next meeting is March 6 with Mrs. Bob Hill.

## LEM WEAVER TELLS OF R.E.A. PROSPECTS

All forms are available for you to sign up for R.E.A. at the office. Several people have signed up but the survey must be complete before they are submitted to the officials. The following men are in charge of their territory. Go to these men and they will explain the program in detail and furnish you the application blank.

Francis Community—J. Lee Francis and Edwin Crass.  
Rock Creek Community—Wade Steele.

Lakeview Community—W. W. Douglas.

Haylake and Vicinity—J. W. Monroe and Robert London.

Silverton and Vicinity—County Agent's Office.

The minimum charge is \$2.45 and must equal \$8.00 per mile if the line goes through. You agree to use this for 12 months.

One-half horse power motor will pump water when the wind fails to work for you. One day of pumping might pay.

Dairy cattle do well on cold days if they have warm water—some farmers have put heaters under their tanks—why wouldn't water pumps with well temperature pay? One day of pumping on the garden would also help.

We should study this before we act.

## CARD OF THANKS

We wish to take this means to tell you all that we are very grateful for your kind help and words of sympathy during the loss of our wife and mother. The beautiful floral offerings made our grief easier to bear. Words cannot express our feelings toward our friends at this time. May God bless you and keep sorrow from your door.

Mr. W. F. Brittain  
Mr. and Mrs. W. F. Brittain, Jr.  
Mr. and Mrs. Bill Clutter  
Mr. and Mrs. Glenn Downs and daughter

Kelton Newman left for the Q S Stevens Ranch near Kerrville to visit his aunt and uncle, Mr. and Mrs. Q. S. Stevens for an extended visit.

## TIME TO BUY NEW TAGS FOR MOTOR VEHICLES

"Between March 1st and April 1st, you must equip that car, pickup or truck with a new tag if you are to keep on driving it", says Jake Honea, Briscoe County Tax Collector. There have been a few care tags sold already but they are not to be placed on the cars until Saturday of this week.

The new car tags are orange figures on a black background, while farm tags and commercial tags are black figures on orange.

Car tags for this county will start with 141-101. Farm tags start 112-101. Both of these numbers have been purchased by Louie Kitchens.

The commercial license plates start with 323-401, and the first of these was bought by J. T. Luke.

Jake and his office force will appreciate very much if you arrange to buy your tag as early in the month as possible, and an early purchase will avoid the delay and inconvenience caused by the usual last minute rush.

## REV. C. N. WYLIE GIVES PROGRAM WITH PICTURES

On Monday evening members of the Presbyterian Church were asked to come to a "covered dish" supper and social honoring Rev. and Mrs. C. N. Wylie of Canyon at the home of Judge and Mrs. Clyde Wright. Rev. Wylie came to give a lecture illustrated with lantern slides at the church, but because of snow and bad roads the crowd was small and the program was given at the house, after the social hour and delicious repast.

The pictures showed many beautiful scenes in Alaska and the talk was very interesting to the group of fourteen, who felt well repaid for their effort in "braving the weather" for the pleasant occasion.

## Floydada Gets Plane

The Floydada Aero Club have purchased a new Piper Club aeroplane, according to the Floyd County Hesperian. The Club is composed of seven Floydada men who went in "cahoots" and purchased the plane, which cost \$1400.

## Government Gauge Registers A Total of 75 Hundredths

Briscoe County and the north Panhandle Counties of Texas were blanketed the first of the week with a wet, clinging snow that netted .58 inches of moisture. The snow fell quietly and much of it melted as it fell. At no time during the week, did the snow blow.

According to Raymond Bomar, weather observer for Silverton, the fog and drizzle last week amounted to .17 inches, and then the snow came and brought the total to .75.

Business was practically at a standstill here this week. Not from extreme cold, nor impassible roads, but from sheer excitement over the timely moisture. Farmers are naming their yields till it sounds like the bidding at a lively auction. Beth Joiner can't see anything but 30 bushels. H. Roy Brown had the floor Tuesday with a 45 bushel yield till Roy Teeter walked in and raised him to 54 bushels. As far as we know, that bid still stands.

Joking aside, prospects here right now are the tops. Wheat is rooting down and, barring a late freeze, green bugs, hot winds, hail, smut and rust this section is assured of a bumper crop.

## SILVERTON OUTLAWS TO ESTELLINE TOURNAMENT

There will be a has been basketball tournament at Estelline next week end and it has been decided by the Silverton has been decided that because there has been an invitation sent to the has been here from the has been there, that the has been here will be there with about twenty teams of other has been. They will compete for the honor of telling each other how good they have been.

Silverton has been working, out and have been making good showings for a bunch of has been. The Silverton has been has been composed of the following has been:

"One Quarter" King  
"Twilight Sleep" Weaver  
"Just Is" Martin  
"Deep Breath" Mercer  
"Free Shot" Brown,  
"Formerly" Lee

Several other "Forget-me-nots" will make the trip. Why? Who knows the inner working parts of the mind of an "Ex-?"

## HARD LUCK FORCES OWLS OUT OF DISTRICT MEET

The Silverton Owls were the "tops" in West Texas basketball competition this year—until they were forced out of the District play by the Quail High School last week at Childress. The Owls went to the tournament with two of the regular players practically out of the running.

Jack Burleson received a bad foot injury the Monday night before the tournament and was unable to play more than a few minutes of the district game, and was unable to do more than walk across the court then. Jack was the best "hustler" on the squad and his absence demoralized the rest of the team. Nine plays out of ten Jack was the boy who ramrodded the offense, who sized up the defense and made the "break" to a teammate that so often resulted in a score this season.

Rex Douglas, who has missed several games the past few weeks, was able to play a few minutes. Rex is tall and playing under the basket, has rung up a lot of baskets this year.

No, it isn't an alibi—but had the Owl squad been there 100%, they would this day be district champions—maybe I guess that Quail had a plenty good team.

## NOTICE

The Band Concert has been postponed until Thursday, March 6th. Bad weather has made it impossible to have it any sooner. So you are invited out Tuesday night for a real Concert by the Silverton High School.

WEEKLY NEWS ANALYSIS By Edward C. Wayne

Britain Mines Singapore Sea Lanes As Tension Is Increased in Far East; Turkey-Bulgaria Nonaggression Pact Adds to Puzzling Line-Up in Balkans

(EDITOR'S NOTE—When opinions are expressed in these columns, they are those of the news analyst and not necessarily of this newspaper.) (Released by Western Newspaper Union.)

This map shows where the lightning is expected to strike in the Far East. All indications point to an early attempt by Japan to extend her "New Order" in Asia to the south.

FAR EAST: Pressure

Japan, under terrific pressure from the Axis, moved her fleet down toward the South Pacific and made strong demands for privileges of exploitation of territory on the Dutch East Indies.

Four powers, Australia, Britain, The Netherlands and the United States, simultaneously put the pressure on Japan, and there was little indication which way the "cat would jump" whether Japan would be propelled into open war on the Axis side, or would back down precipitately.

Britain warned Japan that her moves against the Dutch East Indies would be considered in the light of a warlike act.

Australia echoed this, and held a special secret cabinet meeting to discuss defensive action against Japan.

The Netherlands government, in London, ordered all ships in East Indian waters or neighborhoods to put at once into neutral ports, a usual prelude to warfare.

The United States issued to all Americans in China and Japan a third and peremptory warning to leave immediately.

Quick was the response from Japan, but once again the response showed the nation is divided, and there were reports that there were so many Axis agents in positions of power in Tokyo that the Japanese government was in reality little more than a puppet.

The first evidence that the pressure from the four powers was taking effect came from official Japanese sources, in the form of a statement that the fleet movements had only been to keep order in Thailand-Indo-Chinese territory, and that no warlike measures against the South Pacific were intended.

But the very next day, after President Roosevelt had had a long, personal and serious talk with Ambassador Nomura, the only announcement from which was that he had stressed the necessity of friendly relations, one Japanese newspaper printed an editorial comment that Nomura was "confronted with an impossible task."

On this front the Italian and German papers heaped oil, one Rome dispatch saying that American activities in the Pacific were definitely threatening to Japan and could only result in war.

The "activities" referred to were contracts awarded for the fortification of Pacific bases, more than \$4,700,000 alone to be spent at Guam, a base at which the Japanese have been looking sideways for a long time. But if these "activities" were threatening, the Axis powers had something new to get excited about when Great Britain announced that she had mined the sea lanes in the vicinity of Singapore, her important oriental naval base.

While the brief government notice to mariners giving the boundaries of the mined areas gave no explanation as to why the move was made, it was generally believed that the British feared a Japanese thrust in Asia so timed as to create diversion while Italy and Germany harassed Great Britain with some new activity elsewhere.

HEADLINES . . . in the news

Rome—All newspaper men representing foreign papers are now forbidden to leave Rome.

St. John's, N. F.—Old Glory now flies over the soil of Newfoundland for the first time in history. The flag has been raised at Argentinia, on the defense base leased to the U. S. while the garrison stood at salute.

WAR:

Balkan Crisis

Moving of 400,000 to 600,000 Nazi troops into Rumania and according to unconfirmed reports, many thousands into Bulgaria brought matters in the Balkans to a terrific pressure crisis.

Little Bulgaria was merely a pawn in the war game, not one authority believing for a moment that she could or would make any substantial effort to halt what looked like an obvious move on the part of Germany to send an overpowering blow against Greece.

That the British success in Africa and the Greek success in Albania was to receive an answer from Hitler seemed certain. That answer began not only to take form but to assume critical proportions.

Britons Move Out

First definite action was the removal of all British diplomats from Rumania. This was closely followed by a statement from official British quarters that Rumanian trade would be barred.

This seemed a last forerunner to a bombing of Rumanian oil fields and Germany's troops and communications, in other words, to the entry into the war terrain of Rumanian lands, although the country and government were technically out.

The next definite steps were taken by Russia and Turkey. The Soviet, which had been viewing askance the movements by the Nazi hordes into Rumania and toward the mouth of the Danube, moved its fleet into waters from which action in that quarter might be taken, either as an ally or an enemy of Turkey.

Turkey Takes Stand

Meanwhile the Turks took their stand, concentrating what military power they had as near the Bulgarian frontier as possible. In the same movement they announced their intention not to sit "passively by" and let Germany move troops into Bulgaria and thence against Salonika.

But then came an announcement that a Bulgarian-Turkish non-aggression pact had been signed which would indicate that the Turks were avoiding any chance of breaking the peace with the Axis powers.

The Greeks were holding the Italians either at a standstill or were moving them backward steadily as this series of startling and critical events took place.

The British at the same time were not idle, but boldly sailed their naval vessels into action in the Mediterranean and Adriatic seas, shelled northwestern Italian ports, and dropped parachutists (the first they had used in the war) into southern Italy for the purpose of cutting water supplies and communications.

With regard to the success or failure of this effort, only the conflicting reports coming from Italy could tell, as the British were silent. The first Italian report was that all the parachutists had been captured before they could do serious damage.

Later, however, an unexplained dispatch stated that Italy had halted all rail traffic to and from the affected area. This was taken in some quarters to mean that some of the British air soldiers had succeeded in cutting the railway lines.

Treated as Soldiers

Italian sources said that as the British parachute-men were clad in regular uniforms, they would be treated as prisoners of war and not as spies.

British sources, though they admitted the raid had been made, declined any details. Speculative dispatches from London, however, recalled that Germany and Soviet Russia had pioneered in this type of attack, and hinted that the British airmen sought to break the 152-mile long Apulian aqueduct.

Here Come the Marines—Out of the Sky!

Uncle Sam believes that parachute troops may come in handy some day. These pictures, taken at the U. S. naval air station at Lakehurst, N. J., show how U. S. marine parachutists are being trained to meet the threat from abroad.

Army Engineers 'Jacks of All Trades'

These photos, taken at Fort Belvoir, Va., one of the largest engineer corps training posts in the country, show army engineers in their diversified occupations.

Baby 'Missing' at Own Birth in Snowdrift

Farm Product Research Brightens Rural Picture

Government Chemurgic Laboratories Seek New Outlets for Raw Materials Of U. S. Agriculture.

By BAUKHAGE

National Farm and Home Hour Commentator.

WNU Service, 1395 National Press Bldg., Washington, D. C.

From four strategic points in the United States members of the department of agriculture are looking into the future and slowly and carefully planning the way toward new uses of the product of field and farm. They are the men directing the work in the new laboratories of the bureau of chemistry and engineering.

The layman who takes a quick look over the shoulders of these men may get a little dizzy. As I sat in the office of one of them taking notes with a pencil he had just handed me, labeled "U. S. Dept. Agr. Soybean-Phenolic Plastic" I had difficulty keeping down to earth. I saw the cornfields of my native state suddenly producing the fuel of tomorrow, I saw husks and cobs running farm and factory machinery and automobiles, and cornstalks turning into paper.

Plants and vegetables from the farms of the nation became all sorts of gadgets from airplane parts to ash trays, a gallon of milk turned into a lady's dress, a pumpkin into a limousine.

At this point I was taken by the hand and led gently back to earth. I was reminded that "chemurgic," which is what the modern Aladdins call their art, is still in the list of "new words" in the dictionary. I looked it up. Chemurgic, I found, means "that branch of applied chemistry devoted to industrial utilization of raw materials, especially farm products, as use of soybean oil in paints and varnishes, and of southern pine for paper pulp."

Attack Surplus Problem. That definition by no means gives the true picture of what the four laboratories of the department of agriculture are doing. In the first place it is necessary to point out that the government chemists are confining their research efforts to farm surpluses and to what is now waste. They are bending their efforts to discover new uses for farm products rather than trying to develop products to compete with present markets.

The objective, reduced to purely material terms, is more cash for what the farmer raises.

The decision of the congress of the United States in 1938 to vote \$4,000,000 for these four laboratories to carry on this research was not a sudden thing. It was the gradual realization that in this changing world, new conditions have proved that making two blades of grass grow where only one grew before, will not solve the farm problem. International trade restrictions, wars and rumors of wars, revolutions both economic and political, have conspired to create great surpluses of farm products. The job today is to find new markets for those products. It is a long-range job.

Dr. Henry Knight, chief of the bureau of agricultural chemistry and engineering, describes the function of his new organization as a combination of three kinds of research. One is finding new facts about the substances he is dealing with. That is the kind of thing that goes on in the laboratory of the professor of physics. Another is improving and controlling the quality of a product and lowering the cost of its manufacture. That is the kind of research a manufacturing concern carries on.

Then there is the third type of experimentation which an industry developing new products follows, the attempt to discover and develop methods for processing or combining various raw materials to produce useful products.

Wider Markets Sought. "These are the three basic types of research," says Dr. Knight, "which will be employed in the four regional laboratories to find new and wider markets for the farm commodities assigned to them."

These four laboratories are located in four areas in which four different types of farm products dominate. In the western laboratory in Albany on San Francisco bay, fruits and vegetables and alfalfa are the chief concern. The eastern laboratory is in Philadelphia. Here tobacco and milk products are studied. The northern laboratory is at Peoria, Ill., where corn and wheat are the chief commodities dealt

with. In the South, at New Orleans cotton and peanuts are the main interest.

Perhaps the best way to know what is being done right now is to quote the men in charge of the different laboratories:

"Cotton overcoats for sheep was the first thing mentioned," D. F. M. Lynch, director of southern laboratory.

"We're co-operating with the agricultural experiment station of University of Wyoming," said Lynch, "Sheepmen in that state some of these cotton covering sheep last year—and found that wool grew better—and it was cleaner at shearing time. This—we sent them 500 coats. The being put on the sheep just now—to be left on until weather. If coats were put on our sheep it would result in a net for 100,000 bales of cotton year."

Pacific Lab Objectives.

Mr. T. L. Swenson from the cifer coast says: "We're to alfalfa, apples and other fruits, potatoes, poultry and poultry products, vegetables and wheat."

And he is co-operating with frozen-pack laboratory, located Seattle. "One thing we did recently, Mr. Swenson told us, was prepare an entire dinner of frozen pack foods—including chicken stuffed with frozen dressing."

In the Philadelphia laboratory, Dr. P. A. Wells is in charge. "One of the things we are working on," he reports, "better methods of making apple juice for the market."

And tobacco—new nicotine compounds to kill insects and prevent plant diseases. Milk is another in the East—making better products. Casein is used now in paper sizing. Lard is studied, too, and like soybeans, other products, it is valuable making plastics.

In the Peoria laboratory, corn-stalks, corn cobs, are of interest. Their cellulose content is being studied. They have real possibilities for making synthetic fiber for example, says Director E. May. And motor fuel, too.

"That's one of the big jobs we're going to tackle. One of the important aspects of this problem is making alcohol or other fermentable products from corn or wheat, using the alcohol as a motor fuel, perhaps alcohol alone, or perhaps blended with gasoline. We're setting up a pilot plant—that is, a small alcohol-making plant on a scale—so we can study methods of making alcohol and try to improve them and cut down the cost."

Washington's Foresight

A Boon to Nation's Capital. This year, as usual, at the end of his birthday, George Washington was lauded throughout the land for his many gifts to the nation. He realized the role he played in creating the capital city which is named after him.

It seems today as if he actually possessed the ability to see into the future when he accepted the plan of Pierre Charles L'Enfant, a young Frenchman who had followed Lafayette to this country and distinguished himself as an engineer in the Revolution. For to most of the people of that day L'Enfant's scheme was a madman's dream. The Frenchman was eccentric, he paid for his eccentricity with death in poverty although his plan lived. Thirty-two years ago he was buried with honor in the Arlington National cemetery.

When the landowners of the area that were to comprise the capital heard about streets of 100 to 150 feet wide and an avenue 400 feet wide and a mile long, they said L'Enfant was crazy to waste the land that might be sold as building lots.

Today many Washingtonians are protesting with streets with a line of trees on both sides of the sidewalks are widened between curbs to allow for the congested automobile traffic. But if it had not been for L'Enfant's planning of wide streets and the active support which he received from President Washington, this widening of the streets today would have been impossible. Now, at least, one line of trees can be preserved.

BITS . . . By Baukhage

The department of commerce, which for some eight years has been feeling a little peaked, is picking up considerably. Friends of six-foot, white-haired Jesse Jones, who succeeded Harry Hopkins as secretary, give the tall Texan the credit for the department's new lease on life.

It's a long lane that has no parking.

If your cow chews bones it needs phosphorus. But even your pup steals matches, it doesn't.

The office of education is administering over a thousand courses in the Middle West alone in distance training for rural out-of-school youth, who are now back in school training themselves for defense industry jobs.

# The Lamp in the Valley

ARTHUR STRINGER

W. N. U. Service

### THE STORY SO FAR

Lander rescued Carol Coburn, annoyed of Eric (the Red). She is returning to her native land. Her father, a scoundrel with an unproven mine, Lander, an engineer for the

Trumbull Co., which is fighting the Coburn claim, breaks with Trumbull. But she remains engaged to Trumbull's daughter, Barbara. Lander becomes field manager for the Matanuska Valley project.

Carol and he both are enthusiastic about the future of the new colony. Eric, the Red, and a gang of workers bring Carol a blackboard and becomes insulting. She faces them with a pistol. Lander arrives and knocks Eric out.

### INSTALLMENT XIII

"You all right?" he asked. "All right," I told him. And he tried to prove it by going out into the mud-smear'd gotten blackboard. I was watching me as I wiped it, and then what was un-bly a bloodstain, from that acquired symbol of author-ty, still without speaking, he rather foolishly looking at other's eyes.

Katie hurriedly donned a uniform, as brand new as her Red Cross flag, and gave instructions for the carrying in of the sick children. There were seven of them by this time. And just as the last of them was being tucked into bed Doctor Rud-dock appeared in our midst and promptly announced that from that day forward he was to be recog-nized as the official man-of-medic-ine for the valley project.

there was the same division be-tween the misery-mongers and the homemakers. While the triple-chinned Betsy Sebeck sat on a chop-ping-block and railed at the Com-missary for lading out coffee that wasn't dated and butter that smelt cheesy, a more energetic group of housewives were down at the salmon stream, with pitchforks, lading out half a ton of fresh fish, where the water was almost solid with red-meated bodies, which were prompt-ly dressed and salted, or processed and canned and stowed away against a rainy day. Some of them, I noticed, had already planted sweet peas along the black-earthed ter-races in front of their still unfinished houses.

I could see the glow that came into Katie's Celtic eye as she caught the significance of that announce-ment. "That's great," she said, with a quaver in her voice. He inspected the building and lamented the ab-sence of running water and laughed at the electric sterilizer, which couldn't be used, of course, until the completion of the Project's gen-erating plant.

"They're throwing money away on the wrong things," he said, af-ter a quick appraisal of the sup-plies. And that seemed confirmed, two days later, when a motor am-bulance was unloaded from a flat car, a highly varnished and urban-look-ing ambulance designed for the use of the new Red Cross nurse. But Katie promptly cottoned to that ve-hicle, which because of its sable paint scheme, she christened "Black Maria."

They made my own humble wicky-up, when Ruddy's prairie fire was finally stamped out and I moved back to my home on the Jansen clearing, seem a very small and antiquated affair. The quietness op-pressed me. I was glad when Katie dropped in. But her spirits, for once, seemed anything but light and airy. "What's on your mind?" I de-manded. "A couple of snapshots," was Katie's rather cryptic answer. "Snapshots of what?" I asked. "Of a snip of a surgical nurse down in that Seattle hospital," the gloomy-eyed Katie replied. "Rud-dy just showed 'em to me. He seems to think she's the last word in womanhood."

"What is it you want?" asked Doctor Ruddock here. "Katie's prompt proclamation. Inside of twenty-four hours I want to have a hospital of some kind. You'll get it," Lander said, assuring curtness. "We've got the material and we've got two workers," challenged Kathoese bundle stiffs in the CCC have just told me they're going out. They say they're on. And the building-gangs claim they will be on to stick to houses."

But Katie soon had other things to think of. Two cases of scarlet fever developed in our little tent city. Life, I felt when Katie went on her way again, was a dolorously muddled-up affair. It didn't make a good beginning for my first night back in the wicky-up. And, a little later, it was crowned by a still more unpleasant thing. For most unmistakably, on that first midnight of my new loneliness, somebody came to my cabin and tried to force the door open.

I waited, with the big six-gun in my hand, until the sounds began again. Then I deliberately fired a shot at the wall, as a gentle reminder of what that would-be intruder might expect. The warning, apparently, wasn't wasted. For nothing but silence, after that awful roar of sound, came to my ears. But, even though I took Sock-Eye's six-gun to bed with me, it was a long time before I could go to sleep.

"That's great," Katie said. And that stirred her Ruddy into still more frantic action. He bundled his nurse off to an isolation tent in a clearing at the edge of the Wiebel farm and commanded her to carry on as best she could.

"This is like stamping out a prairie fire," he announced. "We've got to check it before it starts." Katie went without a murmur. I think she would have gone to the north pole if her abstracted man-of-medic-ine had ordered it. He boiled with indignation at the carelessness of the colony mothers. One neglected child, in spite of his warnings, developed pneumonia. And that brought a hurry call to me.

"We've got to have help here," he said when I confronted him in his crowded little tent office. "And as I'm stopping all public assemblage, your schoolwork peters out and leaves you free."

### CHAPTER XVI

on is eloquence, as Shake-speare once said. Lander didn't fail the valley in use of need. And Katie got her share. She got was a board shed in-duced with plywood and roofed with paper, a bald-looking build-thing square windows and a row of coats along one wall. But shelter for Katie's patients. "It wasn't easy. When Lan-der's pride in his pocket and to the transient workers he was nothing but jeers. For Eric the obviously, had been working hard. They declared they were imposed on and underpaid. Lander didn't give up. He daily canvassed the colony tents and unearthed three men who had done carpenter work. Then he after the old-timers. He got Wiebel. Then he got Sock-Eye and the quick-handed father of Eckstrom, and a stalwart ex-tyrannizer who knew the mean-est tools. The acid-spirited Bryson, it's true, flatly refused me to our help. But Salaria's flatly defied all paternal in-terventions and joined up with the

And that stirred her Ruddy into still more frantic action. He bundled his nurse off to an isolation tent in a clearing at the edge of the Wiebel farm and commanded her to carry on as best she could.

So I was not only a day-nurse and scrubwoman and deputy-mar-shal but also a human laundry and a stove-stoker and milk-distributor and oiler of desquamating little bod-ies. I took temperatures and changed sheets and doled out a gal-lon of cathartics. I kept the shed warm at night and the sunny side screened by day. I patted soda solu-tions on itchy little torsos and swabbed out spotted little mouths and baked sheets and played check-ers with the convalescents and shooed over-inquisitive urchins away from the door and went to bed so dog-tired that seven hours' sleep seemed nothing more than seven ticks of my alarm clock.

But behind my back, all the while, life was going on as life has with the habit of doing. For the colony wasn't without a valor all its own. Every mass mi-gration, I felt, must have had its casual mishaps and touches of misery. The mistifs might rill at Ruddy and his health rules and the mal-contents might squab at the Com-missary porch and orate at the bu-reaucrats who were turning Matuska into something worse than Soviet Russia. But the real home-seekers were already out on their plots getting a bit of land ready for belated seeding or lending a hand at building shelter for their belated stock. They were the hope of the Project.

WRIGHT A. PATTERSON (Released by Western Newspaper Union.)

### A REAL PICTURE OF WEALTH DISTRIBUTION

IN A HOTEL ROOM in Wilming-ton, Del., I picked up a printed financial statement of the DuPont company which some one had left. It was an unusual statement of its kind, in that it showed the total receipts of the company and then in totals and percentages, the expendi-tures of the total receipts.

Of those expenditures, 68 per cent was paid to labor, 21 per cent, as I now recall it, was paid for taxes to support government, 4 per cent went to stockholders as interest on their investment and 2 per cent to management, which included salar-ies of executives and office em-ployees. The other 5 per cent went to reserve, a provision for bad years so the company might continue to operate and continue to employ labor when times were bad.

That morning I had an appoint-ment with Pierre duPont, head of that company. I took the statement along and during my visit said to Mr. duPont:

"I believe you are doing your company, the people who work for it, and the public generally a grave injury when you do not publicize the facts contained in this statement. I realize it is public property and that copies of it have been sent to news-papers. One, for example, went to the New York Times, where it was placed on the desk of the financial editor, who was interested in just two things—the receipts of the com-pany and the dividends paid stock-holders. The big story it tells is the dividend of 68 per cent paid to labor. That is a front-page story which the financial editor over-looked."

What is true of the DuPont com-pany is equally true of all industry. The big news of their operations is that big dividends they pay to labor and to the government. On an average, approximately 70 per cent of each dollar of value pro-duced by industry goes to labor, to those whose work produced that value. That, and the percentage paid to the government as taxes, are just as much dividends paid by industry as is the percentage paid to those who provide the tools need-ed—the working capital.

A general distribution of such in-formation on the part of all industry would solve the ever-present fric-tion between labor and capital. It would give labor, and the public, a real pic-ture of the continuous distribution of the wealth of the nation. Every pay-day in every industry is a part of that system of distribution.

### TOGETHER WE STAND —AS AMERICANS

WHAT WE NEED in America is Americans, not self-interest seeking classes. We have had all too much of mi-nority rule, of classes demanding and receiving consideration at the expense of the whole.

We cannot consider business as one class, and provide for business at the expense of labor and the farm. We cannot consider labor and farm and provide for it at the expense of business and the farm.

There is a greater interest than any one or any number of classes. That is the interest of all as Amer-icans. Unless all classes work together for the general interests, we will lose all the opportunity America offers. Business, labor and farms cannot work as separate classes, they must work together as Americans, or it will be just too bad for all of us.

### THIS MAN'S HOBBY IS ELEPHANT PHOTOGRAPHING

ON BUSY STATE STREET in Chi-cago there is a doctor who works 18 months out of each two years that he may have the other six months to devote to his hobby, which is that of photographing elephants in the jungles of Africa.

Dr. Frank Thompson is a small, frail individual, weighing about 130 pounds. For six months of each two years he penetrates the wastes of the Dark Continent, accompanied only by a small number of native boys and living on whatever the country provides that he may bring back movies of the great beasts to show to his friends.

Frank Thompson is credited with knowing more about African eleph-ants than any other man in this country, and he has certainly had some harrowing experiences with them in their native haunts, but of which he talks very little, except to a few close friends. He is a man well worth knowing.

### RURAL AMERICANS JUST WHAT PLACE

JUST WHAT PLACE rural Amer-ica plays in the nation is evidenced by the fact that a trifle over 50 per cent of the members of the national house of representatives are elected from districts in which there is no town of more than 5,000 people. The rural people can, and do, control the destinies of these United States.

### MRS. ROOSEVELT has found that

Congressman Dies was not far wrong in his judgment of the Amer-ican Youth Congress.

## Alaska Enjoys New Boom

Since 1867 when the U. S. paid Russia \$7,200,000 for Alaska, America has taken the territory for granted, taking from her soil \$500,000,000 worth of gold and enjoying a profitable "export" market. But last summer, with Europe aflame and with both Japan and Russia looming menacingly on the far eastern horizon, the U. S. appropriated \$50,000,000 for her defense.

Huge airfields are springing up, roads are penetrating the forests, and workmen such as those shown above are building bridges over the rushing streams. Soon 10,000 troops like the soldier at the right will disembark in Alaska.

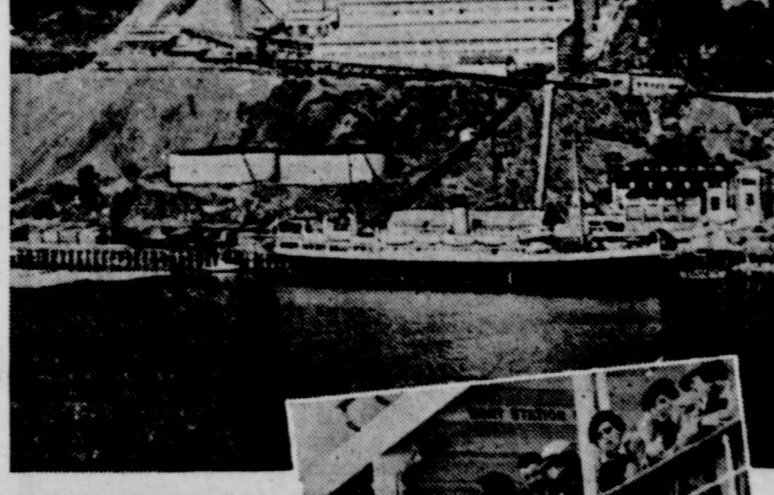

Farm products, as shown in the above pic-ture, are raised in abundance, but mostly for local consumption.

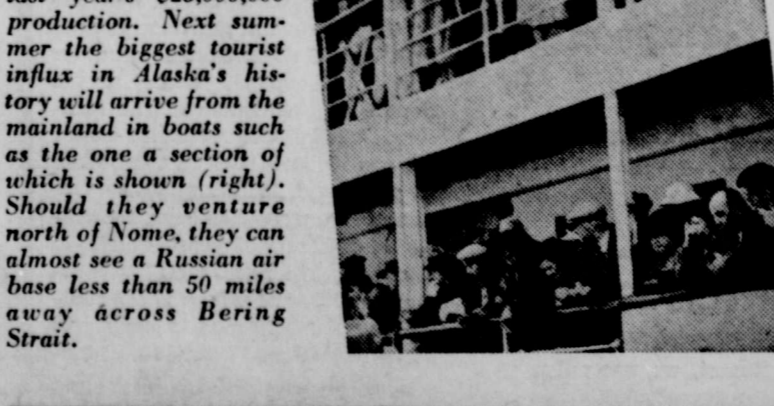

In the first 10 months of 1940 exports to the territory totaled \$41,600,000 against \$36,400,000 in the same period of 1938. Above (left), is Theo. C. Wiehe, president of the Schenley International Co., pointing to Alaska's place on the map, after predicting an unprecedented boom for the territory which he toured extensively.

Some 25,000 peo-ple are employed in 100 canneries (left) which pack 7,000,000 cases each year. Seal fishing is a profit-able enterprise. Alas-kan imports from the U. S. include meats, dairy products, grain, fruit, tobacco, cot-ton, etc.

The gold mill at Ju-neau (shown above) is the world's largest, pro-viding a large part of last year's \$25,000,000 production. Next summer the biggest tourist influx will arrive from the mainland in boats such as the one a section of which is shown (right). Should they venture north of Nome, they can almost see a Russian air base less than 50 miles away across Bering Strait.

Alaskans travel by air. This is the new Pan-American clipper.

### THINGS for YOU TO MAKE

Pattern No. Z9220

CROCHET stars again in the form of attractive creamer and sugar panholders. Gay little flower sprays distinguish them as a set—lovely to give, receive or keep. Best of all they are speedily done in single crochet.

Z9220, 15c, brings the detailed directions. Do them in the kitchen colors of red, light green or blue with white flowers; the blue gives a lovely Wedgwood effect. Send or-der to:

Form with fields for Name, Address, and other contact information.

### Turkeys Fake Relics

The demand for seals and small gems from Pompeii and Herculaneum far exceeds the supply. Many of those sold are, in fact, cut in Italian workshops, after which turkeys are forced to swallow them. They remain in the gizzard, a natural millstone, which grinds them down and imparts a natural aged appearance.

## COLDS

... such as tough coughs, chest tightness. Rub with Penetro—pleasing, quick disappearing, mutton-suet base. Extra medication. Rub tonight to help you get extra benefits of rest, one of Nature's greatest colds fighters. 10c—25c sizes.

## PENETRO

Rebound Tells Attack is the reaction; I never think I have hit hard unless it re-bounds.—Samuel Johnson.

### HERE'S WHAT TO DO ABOUT '4 O'clock SLUMP'

If that "washed out," sluggish feeling is due to temporary constipation, try Garfield Tea tonight. Cleanse internally this mild, pleasant way. Tire less quickly—feel, look, work better all day long. 10c—25c at drugstores.

Safe to Advise One can advise comfortably from a safe port.—Schiller.

## FEMALE PAIN

WITH UPSET NERVOUS SPELLS—

You women who suffer from irregular periods with nervous, crampy spells due to monthly functional disturbances should read Lydia E. Pinkham's Vegetable Compound simply marvelous to relieve such annoying symptoms. Pinkham's Compound is made especially for women to help relieve such distressing feelings and thus help them go smiling thru such "difficult days." Over 1,000,000 women have reported remarkable benefits. WORTH TRYING! Any drugstore.

### Increasing Evil

The love of pelf increases with the pelf.—Juvenal.

### That Nagging Backache

May Warn of Disordered Kidney Action Modern life with its hurry and worry; irregular habits, improper eating and drinking—its risk of exposure and infection—throws heavy strains on the work of the kidneys. They are apt to become over-taxed and fail to filter excess acid and other impurities from the life-giving blood.

You may suffer nagging backache, headache, dizziness, getting up at night, leg pains, swelling—feel constantly tired, nervous, all worn out. Other signs of kidney or bladder disease are sometimes burning, scanty or too frequent urination. Try Doan's Pills. Doan's help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!

ROY W. HAHN  
Editor and Publisher

WANTED: a bank in Silvertown by harvest time. (signed) if SILVERTON COMMUNITY

THE WANT AD above really got a good circulation last week. I was listening to the Suburban Editor Sunday morning over the Fort Worth Station, and the Ye Olde Editor of the Air, boomed her out for everyone to hear. I have been thinking I should write to the Suburban Editor and thank him for the ad—but these darn newspaper and radio men—you never can tell, the blooming guy might send me a bill for advertising. Joking aside, Mr. S. Ed., Silvertown appreciated the mention of our bank project, and a blanketful of folks have told me they heard it.

'TIS A LONG TIME since I have been privileged to use this column in an effort to annex a party of the first part to a party of the second part. BUT GIRLS, don't look now, but there is a new man in town. That curly headed, tall, slender young man who is here to manage the Palace Theatre is Odell Walls, formerly of Hale Center. And from everything I can hear the party of the first part is ripe for picking, by some party of the second part. Now golly, this bird is bashful, altho I heard it mentioned by his sidekick Walter Smock, that he does get around, and that he has a method all his own. Sounds kinda interesting doesn't it?

SMOCK AND WALLS are the new managers of the Palace Theatre, taking over Friday night. They have really got some keen shows lined out, and believe me they believe in giving a man his money's worth. For instance on any Saturday night, you can arrive at the window about nine o'clock, plank down 20c and see three full features. Then next week there'll be a dime show too. On the colored page this week you can get full information concerning the new set-up.

**Need clothes?**

--please come in and look at the finest collection of the latest woollens produced by the Finest Mills in the country. It will cost you nothing to find out that you can have your own choice of cloth and style, yet PAY NO MORE for clothes that are--

WHEN THIS Odell came to town, I jumped him right out and got him for a roomer. Now I've heard of dirty competition, but when Dee McWilliams gets this old boy off and confidentially tells him that he has ruined his chances by rooming with the editor, I think that's going far enough. Especially when I check into it and find that Dee has a room for rent. You can draw your own conclusions as to this man Dee, when I tell you that until he reads this, he doesn't know that I know he is an undermining rat.

AND I PROMISE you further that anything that happens to Dee in the future will be magnified to the fourth degree. If he dies, I'll give him four funerals. If he gets run over by a street car, I'll make it four street cars and . . . oh, figure it out for yourself what I'm going to do to him!

MAYBE SOME OF you birds won't get, but some will . . . it's about getting athletes in the family. Now I'm not going to monkey around with a bunch of Indians. If I go in for athletes in the family, I'm going in big! I'm going to adopt me a bunch of little niggers. Maybe one of them will turn out to be a Joe Louis!

**AN OPEN LETTER**  
To the Citizens of the 18th Congressional District

Dear friends:  
As you know, the government is now engaged in one of the largest defense programs in its history. The main objective in negotiating defense contracts is to serve in the best way possible the national welfare security. Projects are being operated in the locations where it is felt they will do the most good.

It is my opinion that contracts for locations of cantonments, airports, training schools, etc., should be spread out as much as possible for two reasons: First, from the viewpoint of military safety and strategy, and second, in order that the money involved may be distributed as evenly as possible throughout the length and breadth of our country.

It stands to reason that many existing facilities will be overlooked unless the government officials are informed of them and just what the local communities and individuals can contribute. I am greatly interested in securing as large a share in the defense program as is possible for the district I represent, and I shall be more than glad to submit any prospectus, brief, or suggestion that may be sent to me. The information should be as definite and concrete as possible, so that those in charge may get a clear picture of the situation.

It is the duty of the Advisory Commission to the National Defense Council to supervise and direct investigations and make recommendations to the President and heads of executive departments as to:

(1) The location of railroads and transportation facilities for mili-

tary purposes.  
"(2) The mobilization of military and naval resources for defense.  
"(3) The increase of domestic production of articles and materials essential to the support of armies and of the people during the interruption of foreign commerce;  
"(4) The development of seagoing transportation;  
"(5) Data as to the amounts, location, method and means of production, and availability of military supplies;  
"(6) The giving of information to producers and manufacturers as to the class of requirements relating thereto; and  
"(7) The creation of relations which will render possible in time of need the immediate concentration and utilization of the resources of the Nation."

I shall appreciate your cooperation in this matter in giving whatever publicity is necessary in order to secure the greatest possible response from those who might be in a position to supply material or do work under the defense program, and I shall then see that any information sent me is submitted to the proper officials who have jurisdiction over these matters.

It is my earnest desire to cooperate in every possible way throughout the entire 18th congressional district in seeing that the facts are presented and that, if possible, our facilities are utilized.

Sincerely yours,  
Eugene Worley

**TURKEY IS 48 YEARS OLD**

A two-day celebration, February 28 and March 1 will be held here observing the forty-eight Birthday of Turkey.

Beginning Friday night February 28 with an old time dance at Hedrick's Hall, the celebration will continue on Saturday with the registration of Old Settlers. Several hundred Old Settlers are expected to attend an assembly to be held at 11 a. m. in the Gem Theatre where an appropriate program will be given, commemorating the occasion.

A series of public events are being planned for the remainder of the day by a committee of citizens.

Man is what woman marries. Men have two feet, two hands and sometimes two wives, but never more than one collar button or one idea at a time. Like Turkish cigarettes, men are all made of the same material, the only difference is that some are better disguised than others. Generally speaking, they may be divided into three classes--husbands, bachelors and widowers. An eligible bachelor is a man of obstinacy surrounded with suspicion. Husbands are of three varieties--prize, surprise and consolation prize. Making a husband out of a man is one of the highest plastic arts known to civilization. It requests science, sculpture and common sense, faith, hope and charity--mostly charity. Swiped by the Kemp News--and re-swiped by this column.

In noting the powerful posts in our national government that are occupied by Texans--(Sam Rayburn, Speaker of the House; Jesse Jones, head of the RFC and Secretary of the Interior, and the numerous House chairmanships)--it should be remembered that one of the important positions is that held by United States Senator Morris Sheppard, dean of the Senate and chairman of the Military Affairs Committee. Senator Sheppard has served in the Senate 28 years and, including his service in the House, he has been a member of Congress 39 years. Gillett of Massachusetts and Morrill of Vermont, neither of whom is now living, are the only men in history to serve as national lawmakers longer and one more term for the Texan would give him the greatest length of service of any man since the United States was founded.

**The Value Of A Smile**

The thing that goes the farthest toward making life worthwhile, that costs the least and does the most is just a pleasant smile. The smile that bubbles from the heart that loves its fellow men will drive away the clouds of

gloom And coax the sun again. It's full worth and goodness, too. With manly kindness blent--It's worth a million dollars, And it doesn't cost a cent.

With Texas newspapers: Clay Puckett's Devil's River News points out that, because of Sonora's strategic location on two main highways, 232 travelers from 28 States and Alaska spent a night there during two recent weeks--A home for Santa Claus in the hills covered with cedars (year-round Christmas trees) should be established near Glen Rose, says Editor F. D. Hicks of the Reporter. . . . Joe T. Cook's Mission Times has scored as Citrus Fiesta edition, 68 pages of pictures and special articles--again with the eighth annual Texportraying the scenic, historic and industrial appeal of the Lower Rio Grande Valley. . . .

Six trucks are needed to haul a load across Texas that can be loaded onto a single truck at the Oklahoma line, a situation which

prompts the Weatherford Democrat to declare editorially: "A condition of that kind is bound to interfere greatly with inter-state commerce. Texas has a particular stake in the truck load limit because there are so many perishable products here that are largely moved by truck. In our own county in 1940, we moved our peaches and other crops largely because the load limit was ignored. A new load limit law should be passed in keeping with conditions."

And Frank Harrison's Corpus Christi Press tells of a man who entered a book store and asked, "Do you have a book called 'Man, the Master of Woman?'" and the salesman replied, "Yes, you will find it in the fiction department."

**FOODS FOR THE FUTURE**

Thirty-two million pounds of food! Sixteen thousand tons of fruits, vegetables, meats and nuts. That's the amazing volume of

food canned, stored fresh, dried or cured, or placed in freezer lockers by home demonstration club women and 4-H Club girls in Texas during 1940. Grace I. Neely, specialist in food preservation for the A. and M. Extension Service, says the exact figure is 32,020,042 lbs. according to compiled reports of county home demonstration agents in Texas.

Breaking down this figure she says about 20,444,744 pounds of this were canned, and about half that much was stored fresh, dried or cured. Club women stored 2,777,013 pounds to bring this figure to 10,285,303.

A remarkable increase was noticed also in the amount frozen--that is, stored in freezer lockers. Of the 1,289,996 pounds of food preserved in this way, more than a million pounds was meat. Reports showed that 5,042 of the families live in 85 Texas counties.

Miss Neely also pointed out that in 1940 ventilated pantries and ventilated cellars were increased

by approximately 2,000. She says the report encouraging not because of the increased use of preserved food, but because farm families are using a variety of ways to store it--canning, drying, curing, and freezing.

**Furniture Hardware John Deere**

We have one of the largest selections of new furniture in this territory. Just arrived are

- New Living Room Suites
- Chromium Breakfast Sets
- Bed Room Suites
- Coffee Tables
- Occasional Chairs
- Dining Room Suites

From a 1c screw to a \$200 refrigerator, our hardware stock is complete.

- Heating Stoves
- Cooking Stoves
- RCA Victor Farm Radios
- Frigidaire Refrigerators
- Dishes, Glassware
- Congoleum Rugs
- Farm Tools

We Can't Describe Our Large Selection Fully -- Come in and see it!

There's a John Deere tractor size for every farm, big or little.

Now is the time to buy. With the government demanding defense machinery, prices of farm machinery is likely to raise.

Come in! Tell us what you have, and what you want. We will work out a trade for you.

# Palace Theatre

SILVERTON, TEXAS

Friday and Saturday

## Double Feature Program

Number One---

JON HALL — LYNN BARI  
In

### "KIT CARSON"

THE THUNDERING SPECTACLE OF AMERICA'S MOST FABULOUS DAYS

More spectacular thrills than Hollywood ever gave to one picture. The saga of a nation pushing westward with Kit Carson, incredible adventurer, volunteering as a one-man convoy to replace an army that had fled in terror. Adventure after adventure until the wilderness between the Mississippi is spanned!

Number Two---

#### HILLBILLY POLITICS

Moanin' mountain music sets the rhythm for the most hilarious campaign in the history of politics.

### GRAND OLE OPRY

WEAVER BROTHERS and ELVIRY

with LOIS RANSON - ALLAN LANE - HENRY KOLKER

and Radio's Popular Artists

UNCLE DAVE MACON and his son DORRIS

ROY ACUFF and his SMOKY MOUNTAIN BOYS

with RACHEL

GEORGE DEWEY HAY "The Solomon Old Judge"

## Silverton's HOLLYWOOD

By Walter R. Smock

Howdy, Folks...I wish it were possible for me to personally meet each of you, but for the time being this means of saying "hello" will have to do....By the time you have read this far in the News you will know that a young fellow by the name of Odell Walls and myself have taken over the Palace Theatre.

Right off, there is one thing which I want to get settled....Odell and I are not "big shots" nor "High moguls" of the movie business....Instead we are just a couple of young fellows trying to build ourselves a little business....Keep this in mind so you will not get any ideas that we are "out of circulation".... Just drop around anytime and Odell or I will gladly take on a jag of coffee with you.

As you also know we are the same "boys" who try to operate the Ritz theatre over in Hale Center...Odell will be here from now on and wants to be considered as an addition to the population...Not an "out sider"....

When you buy a ticket at the Palace it will be genuinely appreciated and will be a vote for our continuation here...That is something which we both wish to make permanent.

By this time most of you will have received our calanders for the month of March.... In this line-up of pictures we have tried to bring you the very best there is in pictures... No trouble or expense has been spared to get the very latest and best pictures.

There will be several changes in the policy of the Palace...The first being that we are going to try to operate full time...The program changes will be Prevue Saturday night Sunday and Monday; Tuesday, Wednesday and Thursday; Friday and Saturday...There will be Matinees on both Saturday and Sunday...On both of these days the boxoffice will open at 1:15 in the afternoon and the show will run continuously until closing time at night.

Another change will be in the admission prices...Friday and Saturday the regular price will be 10c for children and 20c for adults...Sunday and Monday the same prices will prevail...With the exception of "Gone With The Wind" we hope to make 20 cents our top price...On Tuesday, Wednesday and Thursday the price will depend entirely upon the picture we are able to get..For the first Tuesday, Wednesday and Thursday we will be showing "City For Conquest" with 10 cents for all being the price.

Another big attraction will be the double feature programs booked for each Friday and Saturday...On these programs you will see two good pictures instead of one...Then if you come about 9:15 on Saturday night you can stay for the prevue of the Sunday show without charge - FREE...Now how does that sound?

Now for a few words about the greatest of all pictures..."Gone With The Wind"... We have been very fortunate in getting an early date on this picture...March 7 and 8...There will be only two shows each day...One in the afternoon and one in the evening...The admission price for this program will be 40 cents for adults and 25 cents for children in the afternoon with all seats being 55 cents at night... These prices include tax...The admission price for this picture is set by the company which owns the picture and we have no control over them.

For our first Double Feature program we have set two grand pictures...The first being

"Kit Carson", one of the greatest pictures of the old west...Then there is "Grand Ole Opry" with the Weaver Brothers and Elvira... Also in the cast is the WSM Grand Ole Opry stars...Here is a program which will please everyone and wish each of you would make it a point to see these pictures...At the Saturday night Free-Vue and Sunday and Monday you will see Tyrone Power and Linda Darnell in a swell picture "The Mark of Zorro".

Roy has promised me that I can write you a message each week...So to be sure that you read my ramblings we are going to insert the names of five people each week who will receive a free pass to the Palace...So be sure to read "Silverton's Hollywood" each week.

Just remember that we are here to give you the very best there is in motion picture entertainment and that each time you attend the Palace you are helping a couple of young fellows make good.

Be seein' you at the Palace.

### PALACE THEATRE

Silverton

March 4 - 5 - 6

10c to All

## PALACE, SILVERTON

Admission 10c, 20c

**W. T. C. C. PRACTICES  
WHAT IT PREACHES**

In its advocacy of economy in operation of government, the West Texas chamber of commerce is wearing the jewel of consistency. For—said a statement from WTCC's headquarters office this week its own operating budget for 1941-42 has not been increased in spite of new activities, and enlarged activities, in the work program.

The West Texas chamber derives its financial support from individual membership in its affiliated towns and from advertising revenues in its magazine, WEST TEXAS TODAY, the latter merely breaking even with publication costs. Its affiliate, the Freight Rate Equality Federation, is similarly financed from dues of its 134 affiliated associations and individual members, aided by direct grants from the WTCC treasury.

Little publicized is the regional chamber's annual membership gathering campaign. Under the organization's policy since 1933, when D.A. Bandeen became manager, the membership campaign is conducted, not by the headquarters staff, but by the local directors assisted in some places by staff members and directed by the executive board. Each district director, as a member of the board, is responsible for the campaign in his own district. Every effort is made to complete the work quickly without interruption of work program activities. The campaign starts January 1 and usually is substantially completed within two months.

**Results To Date**  
This mid-week the directors were contacting their members in 28 towns. The campaigns had been

completed in twelve towns, and next week will be under the way in about 50 more.

First new affiliated town for 1941 is O'Brien, bringing the total to 170 West Texas communities closely linked with the regional body. The lively community of O'Brien is on the northern border of Haskell county, and given its standard quota based on population, met it quickly, and every new member there is actively engaged in farming. The O'Brien director is S. N. Reed, himself a prominent farmer and secretary of the West Texas Gunners association.

First town to fully meet its quota this year was Stamford, C. M. Francis director. Mr. Francis is mayor of his city and one of its most prominent business men as an oil mill operator.

Towns so far over-subscribing their quotas are Lueders, Moran, Silverton, Roscoe, and Hedley. Other towns, where the membership campaign has been completed, are Rock Springs, Graham, Childress, Memphis, Wheeler and Ruby.

Towns where the campaign is under way, in most cases nearing completion, are Lubbock, Waco, Brownwood, Abilene, Amarillo, Rising Star, Odessa, Big Spring, Childress, Jacksboro, Bowie, San Angelo, Crowell, Rotan, Electra, Iowa Park, Henrietta, Rule, Rochester, Goma, Burkburnett, Quanah, Fort Worth, Sweetwater, Throckmorton, Stephenville and Breckenridge.

**FOR SALE**—Several reams of Hammermill Bond paper, neatly printed with your business name and address. Only \$1.50 per ream.

**PLANNED FARMING  
AND THE AAA**

Systematic planning of farming operations for the coming year will enable each farmer cooperating with the national farm program to get the greatest benefits from the program.

To that end representatives of all branches of the United States Department of Agriculture and the Texas A. and M. College Extension Service are working together in an effort to have every farmer cooperating with the Agricultural Adjustment Administration fill out a farm plan sheet for 1941.

Working with the individual producers in planning farming operations will be representatives of the various agencies, when possible, members of Land Use Planning Committees, and AAA county and community committeemen. On the farm plan sheet will be listed the farm's allotments, estimated payments for complying with allotments, and estimated maximum soil-building allowance. The farmer and the committeemen will work together in planning the acreage to be devoted to soil-depleting and non-depleting crops and the soil-building practices which will be carried out on the farm.

Preliminary meetings in the 12 districts of the state already have been held. E. F. Vance, state AAA administrative officer in charge said. The meetings at which farm plan sheets and procedure for getting the sign up were studied, were attended by representatives of the interested agricultural agencies.

As soon as a supply of the printed plan sheets is received, similar meetings will be held in each county, followed by intensive drives to sign up all farmers in the state who are cooperating with the farm program.

The Planned farming will result in greater conservation of the soil in the state, the administrator predicted, in that the individual producer will have access to technical advice as to what conservation practices are especially needed on his farm and will be able to plan his operations so as to obtain the greatest benefit out of the program.

**GUERNSEY IS SOLD TO HICKS**

The American Guernsey Cattle Club, Peterborough, New Hampshire reports the sale of a registered Guernsey bull by J. W. Monroe to C. E. Hicks of Meadow, Texas. This animal is Lady's Boliver of Briscoe County.

**F.S.A. HAS PLAN FOR  
LOWER PRICED SEEDS**

Farm families in Briscoe County are being urged to join in a cooperative purchasing association to acquire their garden seeds for use this spring, according to Jesse Mae Watson, home management supervisor and Claude C. Carpenter, rehabilitation supervisor for the Farm Security Administration. Last year hundreds of farm families in this part of the state cooperated with their seed purchases. In addition to saving a great deal of money, this cooperative enterprise resulted in the families having a lot better variety of foods in the diet.

"The standard packages of garden seeds contain sufficient amounts as estimated to meet the need of the average family for fresh, canned and stored vegetables," Mrs. Watson said. "Moreover, the varieties are selected to suit the local climatic and soil conditions."

Some of the advantages of group purchase of seed, as outlined by Mrs. Watson are:

1. This program applies to every farm family in the county, no matter what the circumstances are. Since one of our aims is to encourage people to work and think together, this gives all of us the advantage of group cooperation.

2. It has been an effective method of introducing a better variety of foods in the family diet.

3. Seed on hand at planting time eliminates the fear of late planting due to the lack of seed or money at garden planting time.

4. Standard packages of seed secured for germinated tested seed and reliable housed not only induces good quality seed, but reduces the cost materially. Many of the standard packages delivered last year at a cost of from \$2.00 to \$3.00 would have cost \$8.00 and up had they been purchased individually.

Mrs. Watson said that when the home garden plan for Briscoe County has been completed, the purchasing committee, composed of local farm men and women, will contact local dealers for reputable seed houses, and secure bids for a sufficient number of packages to supply all cooperating farm families in the county as recommended by the State Extension Service and in cooperation with the local agent.

Care will be taken to secure seed of proper germination value and quality.

Mrs. Watson emphasized the fact that every effort will be made to purchase the seeds through local dealers.

"Although the local representatives of the Farm Security Administration do not enter into contracts with dealers or merchants relative to group purchases," Mr. Carpenter said, "we do encourage the farm families with whom we are working to do their trading with home merchants."

The Farm Security Administration is assisting approximately 150 farm families in Briscoe County. The cooperative purchasing project is not confined to these families, but is open to every farm family in the county. All those who are interested in the group purchase of garden seeds should contact the local FSA office immediately.

**CIVIL SERVICE  
EXAMINATIONS ANNOUNCED**

Open competitive examinations for the positions described below

**Lubbock  
Sanitarium & Clinic**  
Medical, Surgical, and Diagnostic

- General Surgery
- Dr. J. T. Krueger

WON'T YOU COME FOR TEA?  
(See Recipes Below)

**TIDBITS FOR TEA TABLES**

A visiting celebrity comes to town, there is a new bride to be entertained. For these and many other occasions, an afternoon tea provides just the right touch of sociability.

You can be on the committee in charge and still have as much fun as the guest of honor if you make your plans carefully. Plan to make only enough tea for 12 teacup servings at one time, and repeat the process as fresh tea is needed. A large saucepan works like a charm for such teamaking. Tie 6 tablespoons of tea loosely in 2 thicknesses of cheesecloth. Place the bag in the saucepan and pour 2 quarts of vigorously boiling water over it. Cover and let stand for just 5 minutes over a very low heat. Then pour the tea immediately into a teapot which has been rinsed with scalding water. The tea bag can be removed and the remainder of the tea kept over low heat until it is needed.

If it is part of your job to buy the tea accompaniments—the sugar, lemon and cream—remember that there are about 80 tablets of sugar in a 1-pound box and that you should count on 2 per serving. Allow 2 tablespoons of coffee cream per serving—a pint and a half of cream will be more than sufficient for 25 persons. Allow also 1 slice of lemon per serving. A large lemon makes about 10 slices, 1/4 inch thick.

Then, should you be asked to bring two or three kinds of cookies or several dozen midget tea cakes, here are recipes that will make your tea contribution outstanding. There are fruit cake fingers rolled in chopped almonds and toasted in the oven, a simple-to-make tidbit that has a special affinity for hot, clear tea served with lemon. The small almond finger biscuits have pale beige frosting and are fragile enough even for a bride's tea. Amusing as can be the Swedish nut wafers, which are baked on the bottom of bread pans, cut into strips and molded over a rolling pin into crisp semi-circles.

**Fruit Tea Fingers.**  
(Makes 16 fingers)

Fruit cake  
1/4 cup condensed milk  
3/4 cup almonds (finely chopped)  
Cut fruit cake into 16 fingers about 2 1/2 inches long, 3/4 inch wide and 1/2 inch thick, or cut into 1-inch squares. Spread each finger with condensed milk on all sides and roll in chopped almonds. Place in a 2-quart heat-resistant glass utility dish and bake in a moderately hot oven (375 degrees Fahrenheit) for about 30 minutes or until lightly browned.

**Swedish Nut Wafers.**  
(Makes 6 dozen wafers)

1/4 cup shortening  
3/4 cup sugar  
1 egg (well-beaten)  
1 1/2 cups flour (all-purpose)  
1/2 teaspoon salt  
1 teaspoon baking powder  
2 tablespoons milk  
1 teaspoon vanilla  
1/2 cup chopped nut meats.  
Cream shortening until soft, then add sugar gradually, creaming until light and fluffy. Add egg and combine thoroughly. Sift flour once before measuring, then add salt and baking powder and sift again. Add milk to the creamed ingredients, then flour and vanilla. Spread a part of the batter in a very thin, even layer over the bottom of a bread pan, using a small spatula. Sprinkle with nut meats and mark into strips 1/4 inches wide by 4 1/2 inches long. Bake, one pan at a time, in a moderately slow oven (325 degrees Fahrenheit) for about 15 minutes. Cut into strips, loosen strips from bottom of pan with spatula, and shape each one over the rolling pin. If strips become too

brittle to shape, return them to oven to reheat and soften.

**Almond Finger Biscuits.**  
(Makes 5 dozen)

1 1/2 cups cake flour  
1 teaspoon cream of tartar  
1/2 teaspoon soda  
1/2 teaspoon salt  
1/2 cup butter  
1/4 cup sugar  
1 egg (separated)  
1 tablespoon warm water  
1/2 cup almonds (finely chopped)  
1/4 teaspoon vanilla  
3/4 cup confectioners' sugar  
Sift flour once before measuring. Add soda, salt, and cream of tartar and sift together. Cream butter until soft, add sugar gradually, then add egg yolk beaten with warm water. Add flour to creamed ingredients and combine well. Chill dough in refrigerator for about 1 hour. Roll stiff dough out 1/4 inch thick on lightly floured board or pastry canvas. Add vanilla to egg white, then beat in confectioners' sugar (use rotary beater) gradually until the icing is smooth and the proper consistency to spread. Spread frosting over dough and sprinkle surface with almonds. Cut dough into strips 1/2 inch wide and 3 inches long, then place carefully on lightly greased baking sheet. Bake in a moderate oven (375 degrees Fahrenheit) until they are a light brown color, about 10 minutes.

**Tiny Tea Cakes.**  
(88 2-inch cakes)

4 1/2 cups cake flour  
6 teaspoons baking powder  
1 teaspoon salt  
1 cup butter or other shortening  
2 1/2 cups sugar  
5 eggs (separated)  
1 1/2 cups milk  
2 teaspoons vanilla  
Sift flour once before measuring. Add baking powder and salt and sift 3 times. Cream butter until soft, add sugar gradually, creaming until the mixture is light and fluffy. Add the dry ingredients to creamed mixture in thirds, alternately with milk, beating until smooth after each addition. Add vanilla. Beat egg whites until they are stiff but will still flow from an inverted bowl, and fold them lightly into the cake batter. Drop the batter from a dessert spoon into oiled muffin tins about 2 inches in diameter. Bake in a moderate oven (350 degrees Fahrenheit) for 20 minutes. Cool and ice with your favorite icing.

**Pecan Crescents.**  
(Makes 30 crescents)

1/2 cup butter  
3 tablespoons powdered sugar  
1 cup flour (all-purpose)  
1 cup pecans (finely chopped)  
1/2 teaspoon vanilla  
Cream butter, add sugar and blend well. Add flour gradually and mix thoroughly. Stir in nut meats. Shape into small rolls, about the size of a finger, then form into crescents. Place on a greased baking sheet and bake in a moderate oven (350 degrees Fahrenheit) for approximately 20 minutes. Roll in powdered sugar while warm.

**Meringue Bars.**  
(Makes 40 1 1/2-inch squares)

1/2 cup shortening  
1 cup sugar  
2 egg yolks (well-beaten)  
1 teaspoon vanilla  
1 1/2 cups cake flour  
1 teaspoon baking powder  
1/2 teaspoon salt  
3/4 cup jam  
Cream shortening and add sugar gradually. Beat in egg yolks and vanilla. Sift flour once before measuring, then add baking powder and salt and sift again. Add flour to shortening and sugar mixture, mixing thoroughly. Spread 1/4 inch thick on well-greased baking sheet. Spread lightly with jam. Top with the following meringue and bake in a moderate oven (350 degrees Fahrenheit) for about 25 minutes.

**Meringue**

2 egg whites  
1 cup brown sugar (firmly packed)  
1 cup nut meats (finely cut)  
Beat egg whites until stiff, and gradually beat in the sugar. Fold in nut meats.

**Star Dust**  
STAGE SCREEN RADIO  
By VIRGINIA VALE  
(Released by Western Newspaper Union.)

AT LAST moviedom's favorite word, "colossal," can really be applied to a motion picture, "Land of Liberty." It was more than a quarter century in the making, cost incalculable millions, and boasts a cast of more than 30,000, headed by dozens of top-flight stars. Cecil De Mille assembled it. It's an all-industry picture. It was assembled from scenes of 112 feature pictures, dozens of news reels, shorts and documentary films, dating from the present day back before "The Birth of a Nation."

Spectacles include practically every great moment in our history, from the battles of Bunker Hill and Lexington, of the Alamo and Gettysburg, to the beginning of World War No. 2.

Some of the "matching" of scenes from different pictures is remarkable. One instance covers a mine disaster, the first part of which was taken from De Mille's "Dynamite," produced in 1929, and the second part from a news reel shot of an actual event, taken in 1937.

This is a stirring document, as well as a great human one, far more important than a mere motion picture. The producers receive no revenue from "Land of Liberty"—rental receipts beyond cost of distribution will be devoted to war emergency welfare work.

Jane Russell, the new Howard Hughes discovery who will make her movie debut in his "The Outlaw," has been chosen "The Girl of the Year" by the Sigma Phi Epsilon

JANE RUSSELL

chapter at Duke university. Certainly not because she's described by the old song, "Five feet two, with eyes of blue," either. She's five feet seven, weighs 122 pounds, and has brown eyes and hair.

The men of Sigma Phi Epsilon like the fact that she has "enough meat on her bones to make a bathing suit justify its existence, obtainable only by ordering flapjacks and sausage instead of lettuce-and-tomato sandwiches when on dates with fraternity men." Says Jane, as comment on that, "And do I eat like a horse!"

Mickey Rooney pushed war news off page one of the London Daily Mirror recently, when it was announced that, as the result of a poll of 4,000 British cinemas—motion picture theaters, to us—he was the top box-office star of 1940. He also won top honors in the recent annual poll of American exhibitors.

Stirling Hayden is headed straight for the top, if Paramount executives know anything about what makes a movie star. He's slated for a top role in "Dildo Cay," opposite Dorothy Lamour; he'll play the rich young owner of an island in the Caribbean who's regenerated by his overbear's daughter. And a year ago Hayden never dreamed of having a movie career!

Greer Garson stars her second year in pictures in this country with a new Metro-Goldwyn-Mayer contract and the outstanding role of her career. In "Blossoms in the Dust" we'll see the full beauty of her red hair and green eyes. The picture is based on incidents in the life of Mrs. Edna Gladney, famous Texas humanitarian who has devoted her life to child welfare.

Johannes Steel of the Mutual chain is probably the only radio newsmen in America with a price on his head and a prison cell yawning for him should he ever be caught in Germany. Son of a Prussian officer father and a Scotch mother, he was born in Heidelberg, and held many an important position. Not in favor of Hitler, he spent nine days in a Nazi prison, escaped, and finally reached this country, where he became an American citizen.

ODDS AND ENDS—Hedy LaMarr rates good parts after the way she comes to life in "Madame X"; Joan Crawford broke 7 mirrors the other day and didn't bat an eye; it was just part of the day's work. She finished the scene, went to her dressing room—and broke her hand mirror. "And Lady Luck can chalk that one up against me!" she wailed. Columbia Pictures has signed CBS news reporters Linton Wells and William L. Shirer to co-star with Dorothy Thompson and Wyke Williams in "What's the Shooting?," first of an "International Forum" series.

**Ask Me Another**  
A General Quiz

**The Questions**

1. Which of the Great Lakes has the least elevation above sea level?
2. In what country was the original Arcadia?
3. Of the bills vetoed by Presidents, does congress generally pass them over the veto?
4. Nobel prizes are awarded in how many fields of endeavor?
5. What name is given to a group of paid applauders?
6. From what language does the word mile come?
7. Who are the Genro of Japan?
8. Is there any city or town in the United States with an apostrophe in the possessive case in its name?

**The Answers**

1. Lake Ontario (245 feet above sealevel). Lake Superior is 602 feet above.
2. Greece.
3. During the last 50 years congress has passed only 1 out of every 35 bills that have been vetoed.
4. Five. For distinguished work in chemistry, physics, physiology or medicine, literature, and the cause of international peace.
5. A claque.
6. Latin (millia passuum, a thousand paces).
7. Elder statesmen.
8. No city, town or village in the United States is officially listed with such an apostrophe in its name, although many of them, such as Grays Landing, Kings Mill, Martins Ferry and Penns Park, are in the possessive case.

**TIPS to Gardeners**

**NEW SWEET PEAS**

A NEW, more vigorous, longer-blooming, heat-resistant sweet pea family has been introduced to the gardening world. It is the spring flowering sweet pea. Because of their newness, spring flowering sweet peas are as yet available in only seven colors. Three All-American prize-winners were introduced last year: Rose pink, blue, and lavender. The new ones this year are white, clear pink, light lavender, and mauve.

The new sweet peas are grown just like other types now in general use. They may be planted outdoors as soon as the soil can be worked. For best results the soil should be spaded to a depth of 18 inches, and the lower 12 inches mixed with fertilizer, preferably well-rotted manure. The trench should then be filled with the soil-fertilizer mixture to within six inches of the top, and the seed planted one inch deep in this shallow trench.

After vines are well established they should be watered thoroughly once every five to seven days, and the flowers picked regularly.

SECURITY OF CHRIST

EXT.—Luke 19:41—20:8.  
EXT.—And why call ye me,  
and do not the things which  
I do.

authority doest thou  
The question of the  
a proper one, even  
spirit and purpose in  
have been wrong. Any  
aims to have authority  
should expect to be asked  
and be prepared to  
answer.

Rejected (vv. 41-44).  
vious day our Lord had  
triumphant entry  
and many had ac-  
(see vv. 37-40); but the  
hole—and especially its  
religious and govern-  
rejected Him.

oward the city the  
it spread out before  
ful panorama. His ten-  
s broken and He wept.  
not for Himself, but  
ple who had rejected  
ere told that the word  
weeping here does not  
"tears" but "rath-  
ing of the bosom, and  
cry of a soul in agony"

He feels about you  
his authority today, for  
usalem represented the  
unbelieving humanity.  
sa, sinner, and weeps  
ection of Him; but just  
ately had to reject the  
it rejected Him. He will  
anna you in your sin if  
to reject Him. Why

Asserted (vv. 45, 46).  
Jesus in cleansing the  
very bold, for He held no  
temple and He had no  
s. Only a man with a  
and or in a frenzy of  
assume such authority  
belong to him. This  
Jesus acting as He did  
deliberately, and in-  
was declaring by His  
One whose authority is  
ck of all human author-  
to cleanse His Father's

ing scene. Let us see  
gracious majesty, pow-  
erty of the Son of God,  
and Lord.  
ity Accepted (vv. 47,

"were very attentive,"  
ctively, as in the Re-  
they "all hung upon  
remarkable it is that  
in people heard him  
rk 12:37), while the  
ers, both in religious  
circles, hated and re-

tion has continued  
centuries. Let us not  
or confused by the fact  
of "leading" men and  
God, not all of them,  
reject or question  
Christ. It is the very  
t to expect.

ple, be not at all dis-  
nt supposedly conclu-

WON'T YOU COME FOR TEA?  
(See Recipes Below)

TIDBITS FOR TEA TABLES

A visiting celebrity comes to town, there is a new bride to be entertained. For these and many other occasions, an afternoon tea provides just the right touch of sociability.

You can be on the committee in charge and still have as much fun as the guest of honor if you make your plans carefully. Plan to make only enough tea for 12 teacup servings at one time, and repeat the process as fresh tea is needed. A large saucepan works like a charm for such teaming. Tie 6 tablespoons of tea loosely in 2 thicknesses of cheesecloth. Place the bag in the saucepan and pour 2 quarts of vigorously boiling water over it. Cover and let stand for just 5 minutes over a very low heat. Then pour the tea immediately into a teapot which has been rinsed with scalding water. The tea bag can be removed and the remainder of the tea kept over low heat until it is needed.

If it is part of your job to buy the tea accompaniments—the sugar, lemon and cream—remember that there are about 80 tablets of sugar in a 1-pound box and that you should count on 2 per serving. Allow 2 tablespoons of coffee cream per serving—a pint and a half of cream will be more than sufficient for 25 persons. Allow also 1 slice of lemon per serving. A large lemon makes about 10 slices, 1/2 inch thick.

Then, should you be asked to bring two or three kinds of cookies or several dozen midget tea cakes, here are recipes that will make your tea contribution outstanding. There are fruit cake fingers rolled in chopped almonds and toasted in the oven, a simple-to-make tidbit that has a special affinity for hot, clear tea served with lemon. The small almond finger biscuits have pale beige frosting and are fragile enough even for a bride's tea. Amusing as can be are the Swedish nut wafers, which are baked on the bottom of bread pans, cut into strips and molded over a rolling pin into crisp semi-circles.

**Fruit Tea Fingers.**  
(Makes 16 fingers)  
Fruit cake  
1/4 cup condensed milk  
1/4 cup almonds (finely chopped)  
Cut fruit cake into 16 fingers about 2 1/2 inches long, 3/4 inch wide and 1/2 inch thick, or cut into 1-inch squares. Spread each finger with condensed milk on all sides and roll in chopped almonds. Place in a 2-quart heat-resistant glass utility dish and bake in a moderately hot oven (375 degrees Fahrenheit) for about 30 minutes or until lightly browned.

**Swedish Nut Wafers.**  
(Makes 6 dozen wafers)  
1/4 cup shortening  
1/4 cup sugar  
1 egg (well-beaten)  
1 1/2 cups flour (all-purpose)  
1/2 teaspoon salt  
1 teaspoon baking powder  
2 tablespoons milk  
1 teaspoon vanilla  
1/2 cup chopped nut meats.  
Cream shortening until soft, then add sugar gradually, creaming until light and fluffy. Add egg and combine thoroughly. Sift flour once before measuring, then add salt and baking powder and sift again. Add milk to the creamed ingredients, then flour and vanilla. Spread a part of the batter in a very thin, even layer over the bottom of a bread pan, using a small spatula. Sprinkle with nut meats and mark into strips 1/4 inches wide by 4 1/4 inches long. Bake, one pan at a time, in a moderately slow oven (325 degrees Fahrenheit) for about 12 minutes. Cut into strips, loosen strips from bottom of pan with spatula, and shape each one over the rolling pin. If strips become too

brittle to shape, return them to oven to reheat and soften.  
**Almond Finger Biscuits.**  
(Makes 5 dozen)  
1 1/2 cups cake flour  
1 teaspoon cream of tartar  
1/2 teaspoon soda  
1/2 teaspoon salt  
1/2 cup butter  
1/4 cup sugar  
1 egg (separated)  
1 tablespoon warm water  
1/2 cup almonds (finely chopped)  
1/4 teaspoon vanilla  
3/4 cup confectioners' sugar  
Sift flour once before measuring. Add soda, salt, and cream of tartar and sift together. Cream butter until soft, add sugar gradually, then add egg yolk beaten with warm water. Add flour to creamed ingredients and combine well. Chill dough in refrigerator for about 1 hour. Roll stiff dough out 1/4 inch thick on lightly floured board or pastry canvas. Add vanilla to egg white, then beat in confectioners' sugar (use rotary beater) gradually until the icing is smooth and the proper consistency to spread. Spread frosting over dough and sprinkle surface with almonds. Cut dough into strips 1/2 inch wide and 3 inches long, then place carefully on lightly greased baking sheet. Bake in a moderate oven (375 degrees Fahrenheit) until they are a light brown color, about 10 minutes.

**Tiny Tea Cakes.**  
(88 2-inch cakes)  
4 1/2 cups cake flour  
6 teaspoons baking powder  
1 teaspoon salt  
1 cup butter or other shortening  
2 1/2 cups sugar  
5 eggs (separated)  
1 1/2 cups milk  
2 teaspoons vanilla  
Sift flour once before measuring. Add baking powder and salt and sift 3 times. Cream butter until soft, add sugar gradually, creaming until the mixture is light and fluffy. Add the dry ingredients to creamed mixture in thirds, alternately with milk, beating until smooth after each addition. Add vanilla. Beat egg whites until they are stiff but will still flow from an inverted bowl, and fold them lightly into the cake batter. Drop the batter from a dessert spoon into oiled muffin tins about 2 inches in diameter. Bake in a moderate oven (350 degrees Fahrenheit) for 20 minutes. Cool and ice with your favorite icing.

**Pecan Crescents.**  
(Makes 30 crescents)  
1/2 cup butter  
3 tablespoons powdered sugar  
1/2 cup flour (all-purpose)  
1 cup pecans (finely chopped)  
1/4 teaspoon vanilla  
Cream butter, add sugar and blend well. Add flour gradually and mix thoroughly. Stir in nut meats. Shape into small rolls, about the size of a finger, then form into crescents. Place on a greased baking sheet and bake in a moderate oven (350 degrees Fahrenheit) for approximately 20 minutes. Roll in powdered sugar while warm.

**Meringue Bars.**  
(Makes 40 1 1/4-inch squares)  
1/2 cup shortening  
1 cup sugar  
2 egg yolks (well-beaten)  
1 teaspoon vanilla  
1 1/2 cups cake flour  
1 teaspoon baking powder  
1/2 teaspoon salt  
3/4 cup jam  
Cream shortening and add sugar gradually. Beat in egg yolks and vanilla. Sift flour once before measuring, then add baking powder and salt and sift again. Add flour to shortening and sugar mixture, mixing thoroughly. Spread 1/4 inch thick on well-greased baking sheet. Spread lightly with jam. Top with the following meringue and bake in a moderate oven (350 degrees Fahrenheit) for about 25 minutes.  
**Meringue**  
2 egg whites  
1 cup brown sugar (firmly packed)  
1 cup nut meats (finely cut)  
Beat egg whites until stiff, and gradually beat in the sugar. Fold in nut meats.

**JANE RUSSELL**  
chapter at Duke university. Certainly not because she's described by the old song, "Five feet two, with eyes of blue," either. She's five feet seven, weighs 122 pounds, and has brown eyes and hair.  
The men of Sigma Phi Epsilon like the fact that she has "enough meat on her bones to make a bathing suit justify its existence, obtainable only by ordering flapjacks and sausage instead of lettuce-and-tomato sandwiches when on dates with fraternal men." Says Jane, as comment on that, "And do I eat like a horse!"

Mickey Rooney pushed war news off page one of the London Daily Mirror recently, when it was announced that, as the result of a poll of 4,000 British cinemas—motion picture theaters, to us—he was the top box-office star of 1940. He also won top honors in the recent annual poll of American exhibitors.

Stirling Hayden is headed straight for the top, if Paramount executives know anything about what makes a movie star. He's slated for a top role in "Dildo Cay," opposite Dorothy Lamour; he'll play the rich young owner of an island in the Caribbean who's regenerated by his overseer's daughter. And a year ago Hayden never dreamed of having a movie career!

Greer Garson stars her second year in pictures in this country with a new Metro-Goldwyn-Mayer contract and the outstanding role of her career. In "Blossoms in the Dust" we'll see the full beauty of her red hair and green eyes. The picture is based on incidents in the life of Mrs. Edna Gladney, famous Texas humanitarian who has devoted her life to child welfare.

Johannes Seel of the Mutual chain is probably the only radio newsman in America with a price on his head and a prison cell yawning for him should he ever be caught in Germany. Son of a Prussian officer father and a Scotch mother, he was born in Heidelberg, and held many an important position. Not in favor of Hitler, he spent nine days in a Nazi prison, escaped, and finally reached this country, where he became an American citizen.

**ODDS AND ENDS—Hedy LaMarr** rates good parts after the way she comes to life in "Madame X" . . . Joan Crawford broke 7 mirrors the other day and didn't bat an eye; it was just part of the day's work. She finished the scene, went to her dressing room—and broke her hand mirror. "And Lady Luck can chalk that one up against me!" she wailed. . . Columbia Pictures has signed CBS news reporters Linton Wells and William L. Shirer to co-star with Dorothy Thompson and Vytha Williams in "What's the Shooting For?," first of an "International Forum" series.

Star Dust  
STAGE-SCREEN-RADIO  
By VIRGINIA VALE  
(Released by Western Newspaper Union.)

AT LAST moviedom's favorite word, "colossal," can really be applied to a motion picture, "Land of Liberty." It was more than a quarter century in the making, cost incalculable millions, and boasts a cast of more than 30,000, headed by dozens of top-flight stars. Cecil De Mille assembled it. It's an all-industry picture. It was assembled from scenes of 112 feature pictures, dozens of news reels, shorts and documentary films, dating from the present day back before "The Birth of a Nation." Spectacles include practically every great moment in our history, from the battles of Bunker Hill and Lexington, of the Alamo and Gettysburg, to the beginning of World War No. 2.

Some of the "matching" of scenes from different pictures is remarkable. One instance covers a mine disaster, the first part of which was taken from De Mille's "Dynamite," produced in 1929, and the second part from a news reel shot of an actual event, taken in 1937.

This is a stirring document, as well as a great human one, far more important than a mere motion picture. The producers receive no revenue from "Land of Liberty"—rental receipts beyond cost of distribution will be devoted to war emergency welfare work.

Jane Russell, the new Howard Hughes discovery who will make her movie debut in his "The Outlaw," has been chosen "The Girl of the Year" by the Sigma Phi Epsilon

JANE RUSSELL

LAY in a supply of pretty cottons like chambray, gingham, calico and percale, send for these two easy patterns, and make yourself plenty of comfortable aprons. No. 1247-B is the kind of cover-

Ask Me Another  
A General Quiz

The Questions

1. Which of the Great Lakes has the least elevation above sea level?
2. In what country was the original Arcadia?
3. Of the bills vetoed by Presidents, does congress generally pass them over the veto?
4. Nobel prizes are awarded in how many fields of endeavor?
5. What name is given to a group of paid applauders?
6. From what language does the word mile come?
7. Who are the Genro of Japan?
8. Is there any city or town in the United States with an apostrophe in the possessive case in its name?

The Answers

1. Lake Ontario (245 feet above sealevel). Lake Superior is 602 feet above.
2. Greece.
3. During the last 50 years congress has passed only 1 out of every 35 bills that have been vetoed.
4. Five. For distinguished work in chemistry, physics, physiology or medicine, literature, and the cause of international peace.
5. A claque.
6. Latin (milia passuum, a thousand paces).
7. Elder statesmen.
8. No city, town or village in the United States is officially listed with such an apostrophe in its name, although many of them, such as Grays Landing, Kings Mill, Martins Ferry and Penns Park, are in the possessive case.

TIPS to Gardeners

NEW SWEET PEAS

A NEW, more vigorous, longer-blooming, heat-resistant sweet pea family has been introduced to the gardening world. It is the spring flowering sweet pea.

Because of their newness, spring flowering sweet peas are as yet available in only seven colors. Three All-American prize-winners were introduced last year: Rose pink, blue, and lavender. The new ones this year are white, clear pink, light lavender, and mauve.

The new sweet peas are grown just like other types now in general use. They may be planted outdoors as soon as the soil can be worked. For best results the soil should be spaded to a depth of 18 inches, and the lower 12 inches mixed with fertilizer, preferably well-rotted manure. The trench should then be filled with the soil-fertilizer mixture to within six inches of the top, and the seed planted one inch deep in this shallow trench.

After vines are well established they should be watered thoroughly once every five to seven days, and the flowers picked regularly.

**LOANS AVAILABLE FOR WATER FACILITIES PROGRAM**

Loans are now available for farmers in Briscoe County to participate in the Water Facilities Program of the U. S. Department of Agriculture, Claude C. Carpenter, rural rehabilitation supervisor for the Farm Security Administration, announced this week. "Facilities which may be installed with funds borrowed from the federal government," Mr. Carpenter said, "include repairing or providing wells, cisterns, pools, ponds stock tanks together with the installation of windmills stock trough, storage tanks, bathroom fixtures, sinks, pipes and so forth".

These loans are also available for facilities for developing irrigation systems for subsistence gardens and truck crops up to one acre of land. He emphasized the regulation prohibiting loans for irrigation systems in excess of one acre of land.

"No loans will be made for irrigation purposes which exceed one acre of land," he said. "The program is designed to modernize farm homes by putting water into them, to make adequate water available for livestock purposes and to enable farm families to raise subsistence gardens and truck crops as a feature of the live-at-home programs in areas of low rainfall."

**COUNTY OFFICIALS STRESS FARM-TO-MARKET ROADS FOR DEFENSE**

—Photo by Highway Information Service.

Importance of farm-to-market roads to national defense was highlighted by deliberations of County Highway Officials at 38th annual "Roads for Defense" Convention of American Road Builders' Association in New York City, January 27-31. Left to right, above, are L. V. Belknap, president, ARBA County Highway Officials' Division and engineer-manager, Oakland County Road Commission, Pontiac, Mich.; Paul B. Rynning, Jackson County, Medford Ore., engineer; N. P. Lowrey, vice-chairman, Board of County Commissioners, Miami, Fla., and Manton Hannah, McLennan County, Waco, Tex., engineer, division vice-president. Belknap said, "No army, no navy can move without food and supplies. Roads are as necessary to national defense as guns and ammunition. We need roads to the farms where the food is produced. We need roads so our defense forces can be transported, wherever and whenever needed."

Water facility loans, it was explained, are made for a period of from one year to the useful life of the facility or a maximum of 20 years at three per cent interest.

Low income farmers and others who cannot obtain adequate credit elsewhere are eligible to apply. Applicants are not restricted to farmers who are not being assisted by the Farm Security Administration. Farm owners, farm tenants and farm operators are eligible to make application for water facilities loans.

Mr. Carpenter invites all farmers in Briscoe County, who believe they can meet the requirements for application, to visit him

at his office at the court house, and obtain more complete information about this program.

**Pamer Wheat Suffered**

According to the State Line Tribune, wheat suffered badly from the recent sand storm. There are 195 insured fields in that county and 75 of those have applied for inspection. Three fourths of the 75 farmers are claiming total loss.

**Child Victim**

Joyce Dirickson, 6, daughter of Mrs. Thelma Dirickson of Mator, died of injuries there last week after being struck by a car driven by Clarence Jenkins. According to the Tribune, the girl was struck when she stepped into the road at a turn, and while the driver's attention was being given to making the turn. The little one was not seen until after the car had struck her.

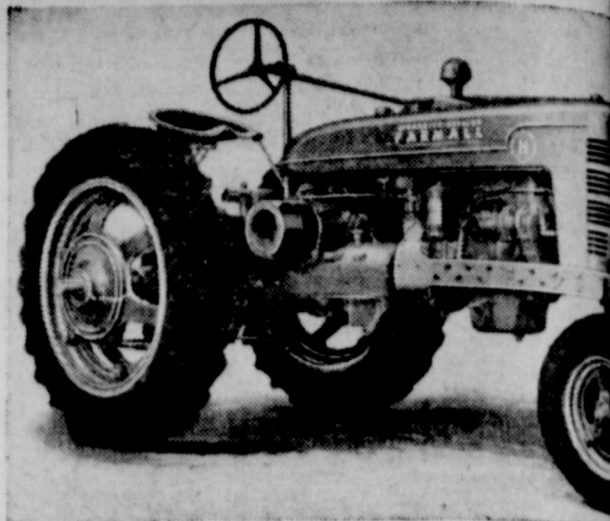

**SOUTH PLAINS JUNIOR STOCK SHOW MARCH 24 to 26**

Plans are going forward to make the forthcoming South Plains Junior Fat Stock Show to be held in Lubbock March 24, 25 and 26, a really big event.

Open house will be held Monday evening, March 24, from 5 to 8 o'clock at the livestock barns, to which the public in general is invited. A banquet sponsored by Texas Technological College, Kiwanis, Rotary, Lions, American Business and Optimist clubs and the Junior Chamber of Commerce, will take place Tuesday evening, March 25, at 7:30 at the Tech Livestock Judging Pavilion to which all exhibitors are invited. The highlight of the banquet will be awarded of premium checks; beautiful plaques for each grand champion, compliments of the Jenkins Jewelry Co.; the Texas Swine Breeder's Association trophy to be awarded to the person having the grand champion barrow and, if possible, announcement of awards offered by the Kiwanis Club will be made. A parade will be staged at 11 o'clock Wednesday morning by 4-H and FFA clubs. Entries will be accepted from thirty counties, but they must be postmarked not later than March 19.

**UNPAINTED BUILDINGS! DILAPIDATED PORCHES!! and UNSIGHTLY PREMISES!!!**

**... IN SILVERTON**

At a recent gathering here, an out-of-town visitor was asked to say candidly, just what impression he had on entering Silverton . . .

**AND WAS HE CANDID? HE WAS!!**

He said "I was impressed by the LACK OF CIVIC PRIDE among property owners. Roofs are unpainted, windows are broken out and in one case in particular there is nearly a block of business buildings whose awnings and fronts were in such a bad state of repair that I believed the buildings to be unoccupied."

**THINK THAT OVER PROPERTY OWNERS!**

The above statement came from a non-resident and one who was honest enough to say what was on his mind. It made no difference just what we thought, nor how angry his statement might make us.

**LET'S DO SOMETHING ABOUT IT!**

From a town-wide business standpoint we cannot afford to have strangers get this impression of our town. Look over your premises today — and look at them impartially and critically. Do they need repair? Will customers come more often if you boost appearances?

This advertisement is paid for by a group of citizens Interested in the advancement of Silverton
