More Street Paving On P.O. Street

PLANS STARTED FOR RODEO HERE JULY 11th & 12th

In an effort to have a bigger and better rodeo than ever before, early plans are being made, and the dates of the Silverton Rodeo have been set at July 11 and 12.

Last week a "Gallup Poll" was taken of the stockholders of last year's affair, and already 45 men have placed their money on the barrel head, and their name on the stockholders' list. It is expected that fully two dozen more men will sign as backing the Silverton celebration. There were 53 stockholders last year.

Letters are being written and the dates advertised already. With three full months in which to work, the celebration will no doubt outdo last year's in many ways, both in prize money offered, and the number and type of events offered.

SCOUTS PREPARING FOR DISTRICT CAMPOREE

Silverton Scouts are preparing all this month to participate in the Northern District Camporee to be held at Dimmitt on April 25-26 Henry Teubel Tulia, chairman of Camping and Activities, will be in charge of the Camporee.

After pitching tents Friday night, Scouts will have competitions in cooking supper, then a night campfire and stunts, Saturday morning contests will be held in Camping, Cooking, signaling, first aid, fire building, knot tying, knife and hatchets and many other events.

Awards will be presented to Patrols in each troop that place in the various events and make enough points to qualify that award.

FFA NEWS

Members of the local FFA Chapter took part in the Area 1 judging contests in Lubbock last Saturday.

The Crops Judging team was made up of Charles Quillen, Grady Martin, and Kenneth Austry. In this contest the boys must be able to identify fifty different kinds of grain place and give reasons for placing of six four-sample classes of grains, and give the commercial grades of ten samples of grains.

The Poultry Judging team consisted of Troy Hill, Buck Hardin, and Norlan Dudley. The boys were required to identify ten breeds of poultry and tell whether the bird was a cull or good enough to keep.

Each boy handled fifty birds during the contest.

After the contests were over the group of boys made a tour of the Tech College Farm and inspected the livestock. After the tour the boys attended the showing of "The Green Hand" a picture especially for FFA boys.

Property owners along what is known as the Postoffice street, got together the first of the week and contracted for the paving of that block. The money has been deposited and everything is ready to go. The paving will be from the Main Street pavement, west past the Burson Motor Building, and including that frontage.

The work will be started within a few days, along with the work of paving the block north from Crass Motor Company. It is intended to complete the entire city paving job at the time the contractor "hot-tops" the new three miles of paving west of the town.

The town will receive two and a half blocks more of hard surfacing — north of the square, south to the hotel, and west past the Postoffice. Added to the pavement we already have, the entire business district will be paved, and will make the city a much more attractive and convenient trading center.

SERVICES AT PRESBYTERIAN CHURCH APRIL 9, 10, and 11

Rev. Clarence Wylie, of Canyon, this week sent word that he would be in Silverton and hold church services Wednesday, Thursday, and Friday night, April 9, 10, and 11, and also on Easter morning. He is asking that all members and friends meet with him.

PREACHING AT ROCK CREEK

C. W. Watkins, who held a meeting for the Rock Creek Church of Christ last September will preach for them over the week end, Saturday night and Sunday, April 5th and 6th. The Church invites you to come to these services.

MARY ELLA FOGERSON

Mrs. Mary Ella Fogerson, 71 years old, died in a Clovis Hospital March 26th, 1941. Burial was in Silverton cemetery by the side of her husband Z. G. Fogerson, who passed away in 1936.

Mrs. Fogerson was well known to the people of Silverton, having lived here many years.

She came to Silverton with her husband in 1891 from Missouri, where she was born. Since her husband's death she has made her home with her children in Clovis, New Mexico and Amarillo, Texas.

She is survived by twelve children, eighteen grandchildren and two great grand children one brother and one sister.

She has many friends in Silverton as well as other places she has lived. She was a member of the Primitive Baptist Church.

Funeral services were conducted at the 1st Baptist Church in Silverton under the direction of the Bomar Undertaking Company.

The Pall Bearers were four of her sons: Zeph, Dewey, Herman, Pat, and two son-in-law, W. N. Gurrett and W. E. Clauser.

CARD OF THANKS

We wish to thank the many friends of Silverton for their kind deeds and expression of sympathy. Also the beautiful floral offerings. May God bless each of you.

Forgerson Brothers & Sisters

MRS. BUNDY HONORS GUEST

Mrs. O. T. Bundy entertained with a "42"-luncheon last Thursday honoring her cousin and house guest, Mrs. Hugh McDaniel of Milford. The charm and cheer of spring itself were reflected in the early flowers and other pleasing table-appointments. After the delicious three-course repast, several games of 42 were enjoyed; the tables and baskets of white and green mints suggested Erin and its patron Saint. The "leaping prize" went to Mrs. Williamson for keeps at the closing hour. Mrs. McDaniel received a guest gift. Those present were Mrs. Hugh McDaniel, Mrs. Fred Lemons, Mrs. J. S. Fisher, Mrs. Ben O. King, Mrs. Temp Whiteside, Mrs. J. H. Williamson, Mrs. Paul Rogers, Mrs. Clyde Wright, Mrs. R. E. Douglas, Mrs. R. G. Alexander, Mrs. W. Coffee Jr and Mrs. Bruce Womack and the hostess

THE POCKETBOOK of KNOWLEDGE

Floral Club's Dream Of Park Is Now A Reality

Many years ago the Silverton Floral Club began planning to secure a Park in Silverton. They investigated as possible donations, properties with heavy tax-accumulations — all in vain; their committees patiently repeated their plea for help from tactful, but from "no men", holding county and city offices; finally we raised buying a park plot; and the Bank closed over their hoarded earnings. Years of drought and tight financial straits did not dim their Park visions, nor lessen the faith and determination of the Silverton Floral Club, through fifteen years of disappointments and perseverance.

Last year, Mrs. Clyde Wright, club Chairman, and the Park Committee, Mrs. B. P. Harrison with Mrs. Edd Thomas and Mrs. Homer Williamson, the executive committee, Mrs. Bob Dickerson & Mrs. Webb sought new ways and means. The Mayor and City Council were friendly, cooperative and interested. It was a happy day when Mrs. Wright announced that under the auspices of the Floral Club a gracious gift had been received. The half block of land that had been the home-site of the late Mrs. Mary Jane Frieze, was deeded to Silverton by her daughter, Ina Bell (Mrs. J. E.) Crawford, of Tulia, Texas, for the Inabel Park. To her the citizens of Silverton are deeply grateful.

Under the leadership of the capable new chairman, Mrs. A. P. Dickerson, the same Park Committee of last year, together with Mrs. D. F. Wulfman, Mrs. Noah Amason Mrs. Strickland and other special assistants are busy in developing the ground into a spot of beauty for recreation and rest.

There are at present, 64 trees planted. The City Council promptly and courteously piped city water to the Park, and soon grass flowers and shrubs will be added. Fronting the highway only one row of trees is planted, thus leaving space for more special or choice selections at some later date. Many towns people have donated the price of a tree; and several organizations have helped. The Floral Club raise extra funds the past year through personal giving and a bazaar, a hamburger stand, cold-drink sales, etc. Mr. Noah Amason and others have donated labor and time.

Anyway the Park is started; the work has been done quietly and without fan-fare as is the usual way of the Floral Club's working. From its earliest days — after it was first quietly organized, about 20 years ago by a little group of flower lovers, headed by Mrs. U. M. Meeker, this club has carried out a program of self development, home improvement

and civic betterment. Many lasting benefits to this town and the whole county can be traced to this little band of women. They sponsored a Beautiful yards contest, when many new lawns and trees were first started in Silverton; they agitated and put over having an annual County Fair that were a pleasant success for several years; they promoted the idea of having an agricultural department for the school and county; through their efforts, we had a Home Demonstration agent for Briscoe County; whose helpful instructions revolutionized home making, sewing, cooking and financing methods in many homes or our county.

Among the charter members of the first "Flower Club" Mrs. T. L. Anderson, Mrs. Jno Burson, Mrs. J. E. Daniel, Mrs. Bob Dickerson, Mrs. R. L. Campbell, Mrs. Clyde Wright and Mrs. R. M. Hill are still active workers in today's "Floral Club" Mrs. N. W. Haynes, Mrs. Miner Crawford Mrs. C. L. Dickerson and others were long faithful members.

Present day members include Mesdames: T. L. Anderson, Noah Amason, Frank Beauchamp, Jno Burson, J. Bragg, R. E. Brokshier, Bob Dickerson, A. Dunnegan, Gabe Garrison, B. P. Harrison, R. M. Hill Mac McKinney, James Patton, E. H. Perry, Ab Stevenson, C. M. Strickland, Edd Thomas, Paul Webb, J. H. Williamson, Bruce Womack, Clyde Wright, A. P. Dickerson, and Dan Wulfman.

NEW REPORTER FOR YOUR HOME TOWN NEWS

Mrs. Don Alexander is the new "Home Town News" editor and a glance at the local news this week shows that she is going to give you a lot of news. You can help her a lot when she asks you for the news. Don't say "No", say "Maybe", and Mattie Bell will do the rest.

TWO CAR WRECKS TODAY

Silverton folks figured in two car wrecks today (Thursday) and no one was injured seriously.

Thursday morning Lee Deavenport and Mrs. Barney Stephen collided west of the post office. Neither were hurt, according to reports but the cars were considerably bunged up.

Mrs. Clay Fowler, while taking students to the Music Festival at Amarillo overturned her car between Tulia and Canyon. Mrs. R. L. McMurtry, who accompanied her, received gashes about the head and face. Details of the wreck have not been learned.

Briscoe County To Be Included In Food Stamp Area May 1

AID FOR ENGLAND MAY BE GIVEN THROUGH SCRAP IRON

Arrangements have been made through the Silverton Lions club for the accumulation of old scrap iron, to send to England for military use. Here is a small way that each one, large and small, may give Hitler a slap in the face.

The iron will be dumped on the "truck lot" north of the highway east of the Magnolia Station. A sign will be erected explaining the "Aid to England", and each one who wishes may unload there. All donations will be very much appreciated, whether one piece junk iron, or a truck load. Each donor is asked to leave his load, then drop around the News Office or the city Hall and leave his name.

To each of us, that is a very small thing to do. However, when you know that 110 lbs. of junk iron can be made into a machine gun that will fire 300 shots a minute, and consider that this work will be carried on over the entire U.S.A. then you can get an idea of the immensity of the thing.

Look around this very day for old junk iron. Do not bring old tin.

ONE MAN LEAVES FRIDAY

Bruce Blankenship, of Quitaque, will leave here Friday morning for the induction station at Lubbock. According to R. E. Brookshier, he is the last of the volunteers in the Selective Service training program. Unless more volunteers are received in the next few days, the boys will be called in the regular order they have been classified by the draft board.

LIONS ATTEND ZONE MEETING AT TURKEY

Eight members of the Silverton Lions Club attended a zone meeting at Turkey, Tuesday night along with nearly a hundred other Lions in this District. The principal address was made by Lion R. E. Drennan of the Clarendon Junior College. His main topic was in the form of a question, "Are We as Americans, Preparing Ourselves to Take Our Place in World Affairs?"

In the absence of Zone Chairman John Stapleton, the business session was presided over by Henry Pipkin of Matador. Reports showed that nearly all clubs are planning to attend the District Convention in Amarillo and the International Convention at New Orleans.

Food Stamps To Be In Use Here About May 1st

The long awaited "food stamp plan" will go into operation in Briscoe County about May 1st, according to information released at Childress, Friday, by H. D. H. D. Kreeger Assistant to James Allen. Several Briscoe County men attended the Childress meeting.

Distribution of surplus commodities through food stamps, has proven in other places to be a much more satisfactory way, than the direct truck-to-consumer now in use. Efforts have been made at various times to have Briscoe County included for use of the stamps.

The stamps are in 25c denominations, and may be used at any food store for the purchase of foods. WPA workers may purchase orange stamps and receive free blue stamps worth half that amount. The orange stamps may be used for any food, but the blue stamps must be used only for surplus commodities. For unemployed persons, blue free stamps will be issued of the same amount as orange stamps purchased.

The stamp program as it is to be inaugurated here is far from being entirely suitable in all its phases. County authorities are working with food stamp men in an effort to make the plan more flexible and usable by all classes of relief clients. The plan will undoubtedly smooth out, and when it does, it will be far better from every angle than the present method of relief work.

Commodities which can be purchased with the stamps are: Butter, Raisins, Rice, Pork Lard, Wheat Flour and Whole Wheat (Graham) Flour, Fresh Grapefruit, Onions (no green onions), Pork, Corn Meal, Shell Eggs, Dried Prunes, Hominy (Corn) Grits, Dry Edible Beans, Fresh Cabbage, Irish Potatoes, Fresh Apples, and Fresh Peas.

DICK COWART IS BACK IN GROCERY BUSINESS HERE

Dick Cowart, is back again and is in the grocery business on the same corner that has housed a Cowart Grocery Store for nearly a half century, with the exception of a few months during the past year.

Silverton folks are glad to welcome the Cowarts back home. On the back page is Dick's opening ad—he says he's glad to be back again too.

The store has been remodeled and repainted from stem to stern and is a very attractive place to shop.

FARM TOPICS

LIQUIDS REPLACE DRY FERTILIZER

Helps to Prevent Big Loss Caused by Drouth.

By DR. V. A. TIEDJENS (Associate Olericulturist, N. J. Agricultural Experiment Station.)

Farmers need no longer fear the bugaboo of drouthy years that heretofore have robbed them of returns they should have had on their fertilizer dollars. They are licking the problem by applying fertilizer in solution instead of in the dry form to vegetables, farm crops, pastures.

By thus applying chemical fertilizer dissolved in water, the burning of fertilizers applied dry is eliminated and phosphates are made more available.

Liquid fertilizers are used as starter solutions applied to the roots of plants when they are set, or applied in the drill with beans, corn, and other seeds. They may also be applied as a side-dressing as the crops are growing.

Regular fertilizer mixtures may be used for liquid applications, but they usually have so much residue that the solution must be prepared a day or two in advance and the liquid separated from the residue. These mixtures are too acid for starter solutions, but may be used for side-dressing purposes.

Higher analysis mixtures have been used to better advantage when the phosphorus was derived from mono-ammonium phosphate. A 13-26-13 mixture, made with urea, mono-ammonium phosphate, muriate of potash and nitrate of soda and used at the rate of 2 to 4 pounds in 50 gallons of water, has given very good results as a starter or side dressing solution. This mixture is almost wholly soluble and can be made up as it is used. It becomes sticky when exposed to the air.

Liquid fertilizers have given more economical results than dry mixtures due to the greater availability of the phosphates.

Liquid fertilizers have been used successfully to grow large acreages of tomatoes, beans, cauliflower, broccoli, cabbage, sweet corn and celery. In every case yields were better because, as growers stated, the crops grew in spite of dry weather.

GRAY HAIR

Do you like them? If not, get Le's Hair Preparation. It is made to make your gray hairs a color to the natural color; the color before turning gray; of the color hair that has not turned gray yet.

Your friends can't tell the difference what color your hair is so simple to use—just rub drops upon the scalp for a few minutes. Your druggist has Le's Hair Preparation, or can secure a bottle for regular dollar bottle of Le's Hair Preparation will be sent you, postage extra, upon receipt of one dollar money order or stamps. (Send extra.)

That Nagging Backache

May Warn of Disordered Kidney Action

Modern life with its hurry and irregular habits, improper eating, drinking—its risk of exposure to cold, its strain on the muscles of the kidneys. They are apt to become over-taxed and fail to filter and other impurities from the blood.

You may suffer nagging backache, dizziness, getting up in the morning with aching legs, pains, swelling, feeling tired, nervous, all worn out, such as kidney or bladder disorder, such as burning, scanty or watery urination.

DOANS PILLS

Try Doan's Pills. Doan's Pills kidneys to pass off harmful wastes. They have had a century of public approval, and are endorsed by grateful users everywhere. Ask your neighbor!

WANTED: a bank in Silverton by harvest time. (signed) SILVERTON COMMUNITY

COMES CLOUDS — comes another rain—tomorrow or tonight. That report is authentic—just got the inside dope.

HATCH ANDERSON is still playing April Fool jokes. His Missus was trying to sleep a little late April first, and Hatch went over to the kid's bed and hollered that the kind had a tooth. I guess that there was plenty of action for a little while.

I CAN HARDLY wait until that kid of Dee McWilliams' is old enough to give him trouble. Of course he'll think he's having a lot of trouble from now on—but the kind of trouble I want him to have is this question and penny trouble. Dee's the worst pest in town when it comes to making a nuisance out of a boy.

I THINK WE had a school meet this week with Quitaque. I heard that Silverton won. It is reliably reported that Quitaque was the winner. Rumor has it that there were no casualties. Informative

sources yesterday morning said that the winner had not been determined as yet. I have a report from Paul Rogers for the front page. Maybe I'll run it. Maybe not. That has not been determined as yet by the board. I'll have to see the board about it for, for all I know the report might be wrong. Reports have been wrong, or so it has been reported. Who cares? Nobody reads the paper anyway—the President of the Board said so himself. So why run it? What the heck am I wondering about now, I wonder. Oh, yes, the track meet (without the track). I am of the opinion that there was one but I think not. I know now that I have it right now and I'll bet you right now, that if we do have one, that Silverton wins it. 'Twas ever thus—ain't we got fun—education is the foundation of all sports—quoth the raven, et cetera and abbadacabra.

IT MAKES a heap of difference who you're fightin' with. Take the case of the Coffee family for instance. I've seen Mrs. C. take Mr. C. around the yard up there with all the enthusiasm of a Panzer tank corps. And he shows all the fight of a woolly worm. But Sunday, a little red rooster about the size of a half grown onion whetted his spurs and took after Mrs. C. and you should have heard her shriek. She called for Charley Chan, Dan Dunn, and finally she cried Donald Duck. Woodson that she said Superman and he came a'running. When he saw the size of the rooster, he just sat down and laughed. The rooster looked at him and he laughed too.—Some fun. The title of this little story is "Neighboring Neighbors". If I hadn't been a neighborly neighbor I wouldn't have been peeking and if I wasn't a real pal, I wouldn't say anything about it.

I ASKED LAST week for some copies of the paper of the week before. I got a lot of them—even got one from Otto Bordenkircher, the "Vignettes" of the Star Telegram. And by the way, Otto, I'm no poet, but my wife has a cousin that used to paint a little, and I think that poetry last week by

Vic Lamb was terrible. His metre was bad, his rhyming was bad, and the poem was bad. I'd write a poem about him, but I can't get "punk" to rhyme with "Lamb."

I'LL QUIT. I didn't have anything to say this week anyway.

OH, YES I did too. Collin has lost his knitted blue cap again. If you find it let me know, will you?

I hate to be a kicker. I always long for peace. But the wheel that does the squeaking is the one that gets the grease.

It's nice to be a peaceful soul, and not too hard to please. But the dog that's always scratching is one that has the fleas.

"I hate to be a kicker" means nothing in a show. For kickers in the chorus are the ones that get the dough. The art of soft-soap spreading is a thing that dalls and

stales. But the guy who wields the hammer is the guy who drives the nails.

Let us not put any notions that are harmful in your head. But the baby that keeps yelling is the baby that gets fed.
(Author Unknown; clipped from L. F. Wade's Jaton Chronicle)

WHEN A MAN LOVES HIS MOTHER-IN-LAW FOR SILENCE — THAT'S NEWS!

EVERY YEAR, more and more people who've had experience with other makes are changing to Servel Electrolux. They know the Gas Refrigerator "stays silent... last longer"—because its freezing system has no moving parts to wear or make a noise.

Different from all others

- ▶ NO MOVING PARTS TO WEAR in its freezing system
- ▶ PERMANENT SILENCE
- ▶ CONTINUED LOW OPERATING COST
- ▶ MORE YEARS OF DEPENDABLE SERVICE
- ▶ SAVINGS THAT PAY FOR IT

Stays silent... lasts longer

that most of the folks have not been able to come in. Free Pass to Mrs. Bruce Womack We are ready for business now...for Friday and Saturday we have two swell pictures...Blondie Plays Cupid" and "Tugboat Annie Sails Again". "Blondie Plays Cupid" furnishes plenty of laughs and fun with the Bumstead family. The Bumsteads are taking a vacation which proves to be really a lively one. "Tugboat Annie Sails Again" has plenty of action thrills with a lot of laughs thrown in Free Pass to Bob London.

For the Free-view Saturday midnight and Sunday -- Monday "Little Men" which is taken from the book that everyone has read. "Little Men" needs no comment, but speaks for itself.

In the past few weeks we have had several requests to book airplane pictures. We had so many that for next Free Pass to Mrs. John Bain Tuesday, Wednesday and Thursday we are trying to get "Hells Angeles", which is really an air and action picture. This picture is costing us so much that we are sorry to say that we will have to charge the regular admission price which will be 10c and 20c. This picture is really an exceptional one. It is not definite that this picture will be shown, but so far as we know now Free Pass to Mrs. Charlie Garrison, we

will be ready to show you "HELLS ANGELES" Tuesday, Wednesday and Thursday. However if this picture is not available we will have to go on with our regular booking which will be "Comrade X" with Clark Gable and Hedy Lamar.

Watch for our handbills for the coming pictures. We have been working and trying to get our April calanders out. Many have ask me if we were going to have calanders for next month. Those will be distributed just as soon as possible and if you do not get one soon ask for one when you are at the Palace Theatre. Free Pass to Ray McEntire We have just as good line up of pictures this next month if not better than the last. We hope that you will enjoy them as much as we enjoy bringing them to you.

Be seeing you the the Palace.

WHEAT CROP GUARANTEE

Regardless of any disasters of nature, at least eleven thousand Texas wheat producers are assured of a crop this year. Agricultural Adjustment Administration records show that 11,40 Texas wheat farmers have insured with the Federal Crop Insurance Corporation on the production of 4,943,435 bushels of wheat.

WEEKLY NEWS ANALYSIS By Edward C. Wayne

Soviet Russia Pledges Its 'Neutrality' In Case of Nazi Attack on Turkey; British Lose Tons of Vital Supplies As German Raiders Roam Sea Lanes

EDITOR'S NOTE—When opinions are expressed in these columns, they are those of the news analyst and not necessarily of this newspaper. Reprinted by Western Newspaper Union.

The above photo was taken in Ottawa, Canada, at the signing of the agreement between the United States and Canada making possible the start of work on the St. Lawrence-Great Lakes waterway project. This agreement must be approved by Congress and then by the Dominion parliament. Above: MacKenzie King, Canadian prime minister, hands over a signed copy of the pact to J. F. McNiff, U. S. minister to Canada.

RUSSIA: Another Pledge

In World War I, Turkey's national interests seem to logically lie on the side of Britain and in opposition to Adolf Hitler. But Turkey has usually been forced from speaking too loudly against Germany. Reason: Josef Stalin and his Soviet Union. For Turkey knows well that she cannot risk armed conflict unless Russia approves.

This condition exists because since the Turkish army is equipped elsewhere the Soviet legions could easily move in and take over the national government. And Russia is interested in Turkey because Turkey controls the Dardanelles, those strategic straits which form Russia's only year-round, warm-water route to the outside world.

With the Dardanelles threatened by German activity in the Balkans and with the Nazis poised in Bulgaria for a thrust at Greece, Russia began to worry. That worry reached the point where Russia decided to sign a pledge of benevolence and helpful neutrality in case Turkey is attacked by Germany. Following the signing of this agreement Soviet troops were reported to have moved up closer to the massed Nazi forces in southeast Europe.

UNITED STATES: An Axis 'Foe'

It made hardly a ripple in the United States that Italian and Nazi papers were openly listing this country as among the Axis "foes." Said one Fascist organ: "The democratic powers wanted the war and now must undergo defeat and ruin. The Italian revolution, begun 22 years ago, is today a world revolution."

A Milan paper said: "The new Europe will not forget at the opportune moment President Roosevelt's action and from now on assign such powerful arms to the duty of liquidating with its victory over the London democracies, also the spurious democratic remnants across the ocean."

These were typical of the other thinly veiled threats that American democracy was to be included with that of England and Greece and China in the general overthrow by the Axis powers, assuming victory to be certain. Yet little Yugoslavia, even while apparently ready to sign against its will to sign up with the Axis, was making such a spectacle of the signing that Germany and Italy could have no slightest doubt that it was being done under the strongest duress.

In fact, Yugoslavia held back so long and so obdurately that it was evident she was hoping against hope that Germany would move over the Bulgarian border and that British forces, by engaging the Nazi border, would enable the Serbs to do a bit of fighting on their own, along with their friends, the non-Axis neighbors.

There was some talk that Russia was friendly to such an idea and that this was giving the Yugoslavs additional courage to hold out. But hold out they did, even in the vital meeting of the cabinet when the vote for signing up was to be taken.

Jugoslavia might give in, the word went plainly out to the Axis, but she would give in unwillingly.

AIR: Blitz Serious

The sudden and continued heavy air attacks, not only on London, but on smaller cities and towns, particularly on the eastern coast of Britain proved not only to be spectacular but heavily damaging.

The Germans berided each of the first raids as "another Coventry," but toward the last they ceased the Coventry references and apparently were content to let the damage and the magnitude of the attacks speak for themselves.

FLEET: On the Loose

In World War I, the German fleet steamed out of Kiel and was promptly defeated and sunk by the Allied naval forces. In World War II, the German fleet has sailed out of its harbors piecemeal, and has wreaked devastating destruction on the British merchant shipping.

It was with disguised ear that the United States heard Britain, through Prime Minister Churchill, announce that two of Germany's strongest battleships, the Scharnhorst and the Gneisenau, had escaped cordons of British vessels set to intercept them, and were "on the loose" in Atlantic waters.

According to some reports, within a week these two vessels, possibly with the aid of others, had sunk around 24,000 tons of British and neutral shipping, particularly some vessels reportedly loaded with lend-lease aid to Britain.

The warning of Churchill that some German war vessels might be expected to act within American neutrality zone waters was followed dramatically by the announcement that two of the Nazi navy's capital ships were roving the high seas, obviously looking for easy prey in unprotected convoys.

For, under the British convoy system 40 to 50 vessels meet at Halifax or some similar port as far out as possible into the eastern Atlantic, and from there are conveyed some distance from land, after which the pitifully small convoying force returns to port after which the convoy is "on its own" until some point where it is picked up, say, 500 to 700 miles off the Irish coast, by another, also pitifully small convoy.

It had been somewhere between these points, according to Churchill, that the Scharnhorst and the Gneisenau, first-line battleships, with which destroyers and cruisers would be unable to cope, that the heavy current sinkings had been done.

SEVEN BILLION: In the Bag

Approval of the seven billion dollar British aid bill came as both House and Senate passed the measure with top heavy votes. Only the President's signature was needed to start the spew of U. S. supplies to Britain. President Roosevelt was vacationing off the Florida coast and arrangements were therefore made to dispatch the measure to him by airplane.

The President could afford to leave Washington, he felt, and he saw by the house action and by the senate reaction that his \$7,000,000,000 plan would become a fact. Long before the house and senate acted on the lend-lease bill, administration advisers, working with the President and British representatives in this country, had formulated a general budget plan, somewhat flexible, but complete and separated into its various items.

In fact, that was one reason, it was generally believed, why the house passed the request by such a strong majority. It could not, in the face of the President's message, be said that the figure was just a "dream amount" hatched in a general way out of the administration's conviction that our aid to Britain and other democracies should be of the greatest possible amount.

Quite to the contrary, the exact division of the amounts and the purposes had been set forth, and even the allowance for shifting from one account to another had been set, showing that the whole plan had been carefully thought out.

It was openly declared by Secretary Knox of the Navy that the first aid to be sent under the bill would be considerable numbers of naval vessels, particularly the smaller ones, including destroyers (coverage in all probability) mosquito boats, trawlers and converted private yachts.

New Martial Notes in a War-Minded World

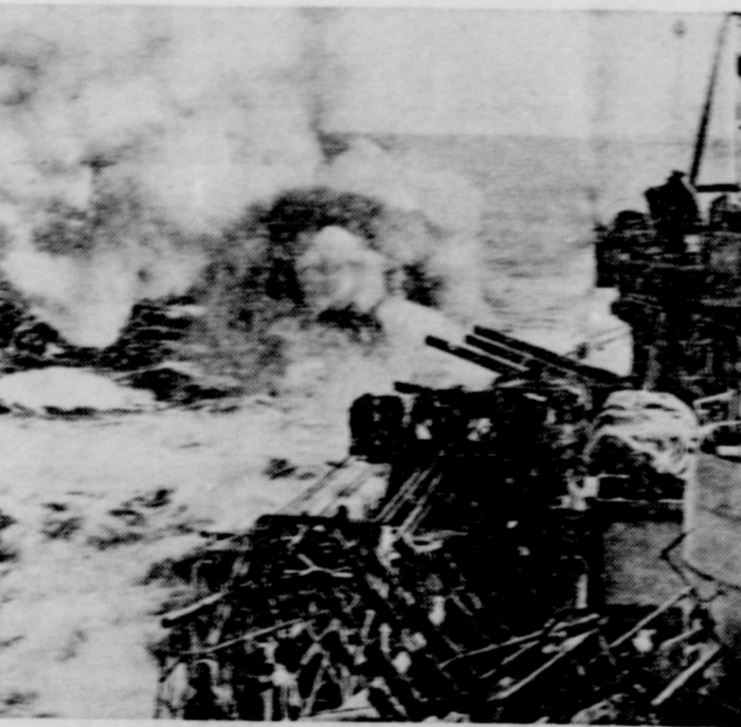

Left: Diana Wells of Pueblo, Colo., comes forth with some novel headgear for the forthcoming Easter parade. The hat is a metal helmet, relic of the first World War. Right: Star attraction at New York's national flower show was this English air raid shelter. The prominent sailings are painted green, and between them flowers are blooming. The shelter accommodates six persons.

Food for Hungry France

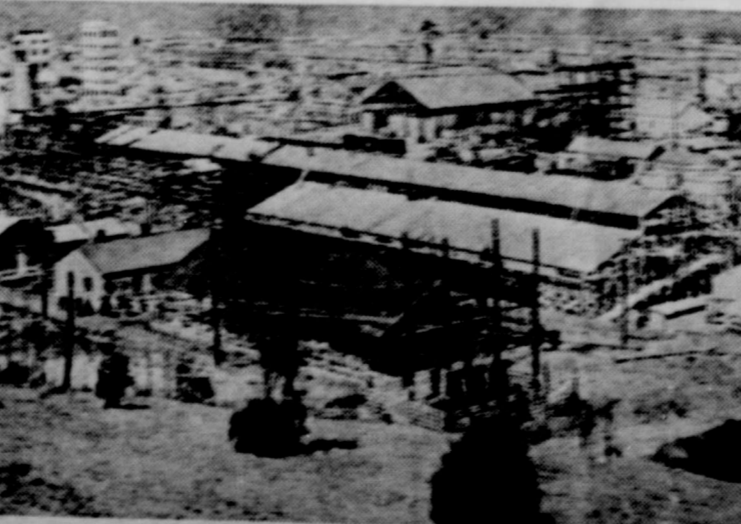

Here are two recent steps taken to provide aid to stricken France. The Red Cross mercy ship Exmouth sails from New York to unoccupied France with a \$1,500,000 cargo of medicine, milk and baby clothes. Inset: A food station is opened in Paris by Nazis, serving bowls of chocolate and soup. Those who can pay are charged one franc.

Britain's Most Powerful Battle Wagon

Great Britain's newest and mightiest battleship, the King George V, is shown here—somewhere in the Atlantic—firing its quadruple 16-inch guns at the quarterdeck. This was the ship on which Lord Halifax, the new British ambassador to the U. S., was brought to the United States. He was quite safe, judging from this picture.

First New Powder Plant Ready to Roll

Ten thousand people cheered as Undersecretary of War Robert P. Patterson dedicated this big new \$44,100,000 smokeless-powder plant at Radford, Va., three months ahead of schedule. It is rated to produce 200,000 pounds of powder a day in the nation's defense drive. It was rushed through in seven months.

No Frivolity

C. A. Higgins, president of the Hercules Powder company, of Wilmington, Del., sliding down one of the safety chutes at the new \$44,100,000 smokeless-powder plant at Radford, Va., at opening ceremonies.

Rescued

Common Edda Ciano, daughter of Mussolini who was saved from a hospital ship sunk by British torpedoes near Volos, Albania, according to Italian dispatches.

Washington Original

National Gallery of Art Is New Capital Attraction

Wide Array of Great Works Displayed; Late Andrew Mellon's 'Dream' Realized in Recently Opened Exhibit.

By BAUKHAGE National Form and Home How Commentator.

WNTU Service, 1242 "H" Street N. W., Washington, D. C.

WASHINGTON.—A slight, white-haired man walked into one of the narrow little houses that line the west side of historic Lafayette square opposite the White House and which he had just rented for himself and his staff. He looked it over from cellar to attic, indicated where he had planned to sit and watch the dream of a lifetime come true.

His staff moved in and worked there for four years. A few days ago they locked the door and moved into a \$18,000,000 building, which the man who had dreamed about and paid for, as a gift to the nation, never lived to see.

The building is the National Gallery of Art. The man was Andrew Mellon, who died only a few months after the ground for his "dream" was broken. He had hoped to sit at a desk in Lafayette square, only a few blocks from the art gallery, with his son, Paul Mellon, and with David Bruce and Donald Shepherd, directors of the trust which turned the gallery over to the government.

Congress accepted the gift and established it as a bureau of the Smithsonian institution, the other great museum which was turned over to the government by an individual.

The day after the President of the United States dedicated America's new temple of art, I walked down the corridor toward the fountain beneath the rotunda on the first floor. About me moved some 2,000 other visitors who came from towns and cities and villages, all over America.

And from other places, too. As I stood there on the marble floors that are like black mirrors, I heard a woman murmur, "Magnifique." I looked at her and saw a refined French woman whose eyes spoke spontaneous tribute to the beauty about her. I had no doubt that she had seen the Louvre with its "Winged Victory" and its smiling "Mona Lisa"; the Luxembourg with its masterpieces of Rodin. But here she found something different. Here were the priceless paintings and sculpture of the old and the new world in a temple, which, despite its shining corridors and its great dome, was a friendly human place.

Unlike so many of the musty museums of the old world, it seems as hospitable as it was spacious. Even its size, by the clever design of the architect, has been disguised with interrupting archways, with gently sweeping lines which give its classic dimensions a warmth and intimacy. The visitor feels at home. The pictures on the walls are less exhibits than a part of the decoration of a beautiful living room.

There are upholstered couches in the galleries. There is a smoking room and even (shades of Raphael and Rembrandt!) a very modern cafeteria.

In a simple office, I met David Finley, director of the gallery. He rose from a great leather chair that all but engulfed his dynamic figure. He is a slight man who served in the last war and later became a lawyer. He was a member of the war loan staff of the treasury and later assistant to the then secretary of the treasury, Andrew Mellon. The two became friends and Finley went to London as honorary counselor to the embassy when Mr. Mellon was ambassador. He was one of Mr. Mellon's confidants from the time the wealthy Pittsburgh banker began planning the gift of the gallery to the nation.

Mr. Finley believes that the National Gallery of Art will become a powerful force for bringing about a love and an understanding of art among all Americans, not merely because it belongs to the people of the nation, but because it is located in the national capital, New York, he pointed out, has its fine galleries, but visitors to the metropolis go there chiefly for amusement. People come to Washington to see the historic spots of the nation, to visit buildings—which are themselves monuments. But few buildings, save Mount Vernon, with its treasured possessions of our first President, contain things which have a patriotic and a cultural value.

Mr. Finley looks forward to the time when the pictures and the statues in the National Gallery of Art can be brought to the homes of the people through television. Meanwhile, he hopes through the gallery's

publications, to carry knowledge of the paintings and the sculpture and the facts concerning the artists to the people in order to treasure under his care the treasures shared with the schools and individuals of the nation.

There are two publications available now. One is the preliminary catalogue containing a detailed list of the collection with the prices for 55 cents which can cover the cost, yet it contains pages, the last 26 of which are printed in black and white reproductions of some of the paintings. The which is to sell as cheaply as possible, is paper bound, but the printed, containing brief biographies of the artists, descriptions of their works and factual information about them.

The other volume is a book. It sells for one dollar and contains black and white reproductions of all the paintings, totaling 548 illustrations. The date and name of author are but no additional text.

If any readers of this column would like to buy either of these books, I suggest that you write to ascertain the postage rates. I shall be glad to give you information because I think that art student or art lover ought to have them. They are not at a profit. They are part of an institution which belongs to the people which some day you will visit.

When you do come to the National Gallery of Art, you will understand why the President spoke of the terpieces it houses as "symbols of the human spirit, and of the freedom of the human mind—a world against armies now are raised . . ."

I first saw the stick the morning, lying across the club which is always referred to as "Blah."

The poet, John Boyle O'Reilly, knew for one verse of his life learned by heart for my first. It goes like this:

"Oh, the red rose breathes passion And the white rose breathes love. The red rose is a falcon And the white rose is a dove."

O'Reilly, a wild Irish lad, born in County Meath, Ireland, died in County Mayo, Ireland, in 1882. He came to America, fought his fight, but with his love for the Old Ireland wrote his poems. Today he is immortalized in stone by the sculptor, Daniel Chester French in Boston, his adopted city.

The year the poet died, or about, a little fellow in a Texas large saw a toy balloon and wondered whether it be a plaything maiden's heart or the moon. Toy balloons cost 10 cents and ones were few for Texas farmers. Years passed, the desire for a balloon faded but the wound black lingered. The boy grew sometimes lonely perhaps, but never married, but never loved. Never very long alone, for he loved dogs, children, people.

He also loved walking sticks. It is never without one. But he owned a blackthorn. This one of those many friends of mine brought this fine old blackthorn like Ireland aroused, its worn smoothie and gentle as a heart, by the hand of John O'Reilly, who carried it for 25 years.

The friend laid it affectionately Bishop's hands.

And then "Blah" told us, with a reminiscent twinkle in his eye, note in his voice that belied it, the balloon and the aged, "Now," he said, caressing his prize, "John Boyle O'Reilly has more than made up for it."

I think the poet looked down and smiled.

Farm and Hom-lilies by Baukhage

Speaking of horses, the Federal Communications commission here in Washington received a letter from an organization complaining of broadcasters who disseminate false and misleading information designed to eliminate the use of horses and mules. Such broadcasters never tried to talk a mule into eliminating himself.

This man needs a rubber stamp. He is Private William Williams street, Williamson, W. Va. who is now on duty at Fort Liams, Maine.

Even if you miss every word worth experiencing in life you can bail off as the person who has put on everything worth watching.

The Lamp in the Valley

ARTHUR STRINGER

W. N. U. Service

THE STORY SO FAR

women love Sidney Lander. She disappears. Lander finds Salaria. Barbara misinterprets the rescue and flings away her engagement ring. Lander and Carol fly to Chaktana, scene of her claim. Someone shoots at the

plane. It was Sock-Eye, a friend. He thought it was a Trumbull plane. He told them Trumbull had sent Eric, the Red, for dirty work. Eric the Red, had annoyed Carol on several occasions and threatened her.

INSTALLMENT XVIII

stippled stadium to where a small whiff of smoke was drifting off between a sprinkling of hardheads. I could see him suddenly bend low and run toward the shelter of a larger boulder, where he again guardedly trained his rifle and fired at some undecipherable target.

I forgot my trail mate's warning and went scrambling over the shelf edge, groping for my six-gun as I went.

I knew it was dangerous, but I didn't much care. All I remembered was that I was Alaska born and my blood was up. I couldn't see a man killed for a cause that was essentially mine. To stand aside, at such a time, was more than cowardly.

I disregarded Lander's shout of warning and ran on, scarcely thinking of cover.

Then an odd thing happened. Instead of the bark of a rifle I heard the bark of a voice, half in protest and half in anger.

"Sock-Eye," was the shout that fell on my ears. It came from the tall figure which was no longer crouching behind its rock shelter.

"How the hell do you get up there?" I called out to me.

"I'm getting their range," my mate sardonically observed.

"Who is it?" I gasped.

"That's how they welcome us!" as his eyes narrowed and he grinned slightly with a grim humor.

"Another bullet cut across the rock behind which we hid."

"I'm getting their range," my mate sardonically observed.

"Who is it?" I gasped.

"That's how they welcome us!" as his eyes narrowed and he grinned slightly with a grim humor.

"Another bullet cut across the rock behind which we hid."

straight. And Trumbull cashed in on that when he posted him here as an armed guard to protect his property. It was like leavin' a trap set with pizen bait behind him."

"What did you mean by saying you had Trumbull licked?" Lander demanded.

Still again I saw the look of guile on Sock-Eye's crafty old face. His eyes, when he spoke, were not on Lander, but on me.

"I ain't got nothin' against college-dood engineerin'," he said. "Least-aways, when a high-collar photo-crat tries t' change the face o' nature, there's always two can play at the same game."

"What do you mean by that?" Lander questioned.

"I mean, mister," was Sock-Eye's quiet-toned answer. "That I happened t' mush in here afore Trumbull and his survey officials dropped into this valley. They was bankin' on the Big Squaw t' show 'em ol' Klondike Coburn's claim couldn't lie along the creek bank where his patent sure said she ought t' lie."

I waited for Sock-Eye to go on. But as he stood silent for a moment or two, with a somber light in his crafty old eyes, he seemed to be turning a succulent thought over in his mind very much as a squirrel turns a nut over in its paws.

"I reckon an earthquake must've run recent through these regions," he blandly suggested. "For there was the ol' Big Squaw, right back in the bed where she belonged. And when them engineerin' sharps got through with their maps and sightin' tools they sure had t' tell Sock-Trumbull the mine was located proper and the claim stood as recorded. And the ol' skunk was se sprayed with his own scent that he—"

"Wait a minute," interrupted Lander, fixing the other with a steady eye. "How much dynamite did you pack into this valley?"

Sock-Eye scratched his head and spat. Then his leathery old throat shook with a chuckle.

"I reckon, tenderfoot," he observed, "I savvyed how t' handle blastin' powder afore you was born."

"Then it was you changed the course of the Big Squaw?"

"I put 'er back where she belonged," Sock-Eye stubbornly maintained, "where she was on the original survey."

"But that doesn't mean the issue's settled," contended my champion.

"Sure she's settled," Sock-Eye proclaimed. "Them government' sharps flew out three days ago headin' for Juneau t' register their findin' and confirm the claim. I'll lead you over t' the Big Squaw and show you where your location posts is all set reg'lar and your limits defined."

"Why do you say when the coast is clear?" Lander exacted.

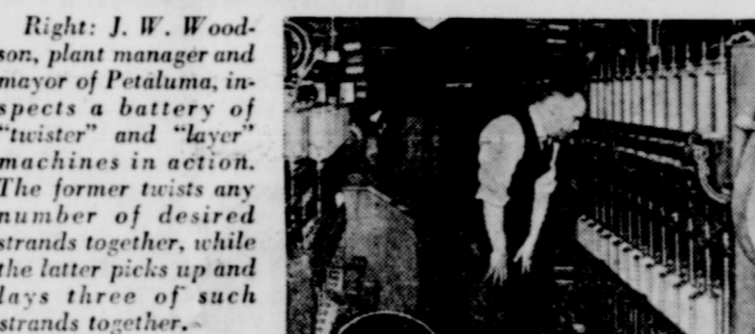

"'B'cause there's a hate-soured son o' misery skulkin' around behind them rocks," he announced, "and he ain't consoomed with love for any one of us. Fact is, folks, we've got t' git under cover."

Making Fish Lines That Will Hold the BIG Ones

Imported silk and flax fiber are two important materials used in the braiding and twisting of the kind of fish lines that hold the big ones. The manufacture of quality lines of this kind is one of the most unique industries in the Redwood Empire countries of northern California and southern Oregon. These photos take you through one of the plants at Petaluma, California.

Dena Jacobsen places a valuable skein of pure imported silk on a wooden spindle, before winding on uniform size spools.

Right: J. W. Woodson, plant manager and mayor of Petaluma, inspects a battery of "twister" and "layer" machines in action. The former twists any number of desired strands together, while the latter picks up and lays three of such strands together.

Left: Ruth Bondelle, standing in front of a line "polishing" unit displays an armful of "treated" oil fly and tapered lines on her right. On her left arm are oil-treated bait casting lines.

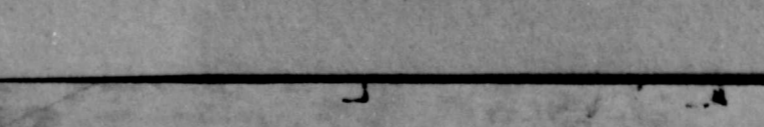

Below: A battery of 300 braiding machines, representing the latest method of converting raw materials into sturdy lines.

Finished twisted lines being placed on paper tubes, ready to be wound on fisherman's reel.

Fine trout lines are minutely inspected. This girl "feels" the line for lint.

A lucky fisherman takes a salmon from the world famous Rogue river in the Redwood Empire of southern Oregon.

'Around the World'

HELLO America! Here I am sitting on the very edge of Lake Placid in the Adirondack mountains of New York. Mirror Lake inn is perched on a hillock above me. I've just finished a stack of flap-jacks with some of the best maple-sugar syrup I've ever tasted. The sun is shining on the frozen lake; mountain peaks are clothed in the deepest snow I've seen anywhere in America this year. The woods and trails are dotted with skiers. Roadways banked in ice, with three-passenger and ten-passenger sleighs skimming along behind jingle-belled sturdy, mountain horses.

For months now I've been bobbing about the country. I have been trying to find out how the country is getting on, what people are thinking about, and what's happened since I was last there. Since early September I've been lecturing too, in nearly every state in the Union.

But this is not new to me, for all my life it seems, I've been going places. Even as a boy I made dozens of trips across the Atlantic, and visited nearly every country in Europe, as well as a major portion of our own country. For the past 23 years I've been a Roving Correspondent in all parts of the world.

I was in Italy when Fascism walked into Rome; in Germany when Nazism began; in Russia just after Communism was born; in China as the Japanese stalked into Shanghai; in Spain two hours after the revolution broke out; at Hyde Park, N. Y., the night the New Deal swept into power; in Europe the summer of 1939 on the eve of the Armagedon; and in Central and South America last summer as democracy lay at the cross-roads.

Being on the spot at the crucial moment has been partly luck, partly experience, and partly the good judgment of the editors who employ me. Don't know how far I've traveled, but would say well over 2,000,000 miles.

Early in life I made up my mind to find out for myself how people lived in all walks of life. With a Fifth Avenue background this was impossible if I stayed there. So when just 17 I ran away from home and enlisted in the United States army. I added a year to my age. Spent 22 months as a buck-private with the American Expeditionary forces in France. After the war I went to work on the editorial staff of a New York newspaper. Since 1919 I have been employed by I don't know how many newspapers and magazines, and for the past 11 years almost continuously for one big string of publications.

The more I've traveled abroad, the more I realize how fortunate we are to be Americans. Every time I step on a gangplank of a ship that has "U. S. A." written on the other end, I breathe a sigh of relief for the freedom from petty nuisances and regimentation found elsewhere. I always feel like embracing the Statue of Liberty and shaking hands with the first cop, when I reach home.

I think I would be satisfied if, during the rest of my life, I could be of some aid in helping Americans better to appreciate their native land. The more one travels in this great country of ours, the prouder is he to be an American. We must iron out our internal difficulties and forget our sectional jealousies. We must pull together, all of us, for the time is fast approaching when we may have to stand together, alone, against the rest of the world. Only through a strong feeling of fellowship and close co-operation will we be able to protect our priceless heritage of liberty and our form of democracy.

Foreign vultures with their power diplomacy and jungle strategy approach more ominously each day. Few Americans realize what a privilege it is to make the 3,000-mile run from San Francisco to New York on a wide, well-kept, well-marked highway, bordered with excellent service stations, fine restaurants and stores and modern hotels and tourist camps. To encounter everywhere expert, courteous service and fair prices. Or to make the 2,200-mile run from Los Angeles to Chicago in less than 40 hours in luxurious streamlined trains; or the overnight skyway hop from coast-to-coast.

Compare this with what you used to find in Europe—in the Orient there is nothing actually to compare with. But enough about me and my own travels. From hereon I promise to talk chiefly of places, people and things along the way.

So let's get going—going places. Next week we'll be on our way.

SEEING THINGS: Driving up to Placid from Plattsburgh Barracks where the U. S. is training ski-troops for service in Newfoundland and Alaska, could scarcely keep my eye on the road for watching the fantastically beautiful mist formations rising from Lake Champlain. Expected to be equally moved by Ausable Chasm. It is reputed to be one of the marvels of this part of the country. Perhaps this is an awe-inspiring sight to easterners, but to one familiar with the West, this chasm was but a spasm to me.

PATTERNS SEWING CIRCLE

PERFECT for slim, young figures, this flaring frock has a tiny corselet waistline, and bodice gathers to round you out a bit. With the bolero, it serves as a "little suit" for street wear. Make this of gay silk prints, or flat crepe, plain or with lots of braid in bright contrast.

Pattern No. 8880 is designed in even sizes 12 to 20. Ensemble, size 14, 5 1/4 yards 39-inch material without nap. For this attractive pattern send to

SEWING CIRCLE PATTERN DEPT. Room 1324 Chicago 211 W. Wacker Dr. Enclose 15 cents in coins for Pattern No. Size. Name. Address.

TAKE THE SPRING OUT OF SPRING COLDS—USE 2 DROPS OF PENETRO NOSE DROPS

Truth is Hardy Truth is tough. It will not break, like a bubble, at a touch; nay, you may kick it about all day, like a football, and it will be round and full at evening.—Oliver Wendell Holmes.

Pull the Trigger on Lazy Bowels, with Ease for Stomach, too

When constipation brings on acid indigestion, stomach upset, bloating, dizzy spells, gas, coated tongue, sour taste and bad breath, your stomach is probably "crying the blues" because your bowels don't move. It calls for Laxative-Senna to pull the trigger on those lazy bowels, combined with Syrup Pepsin for perfect ease to your stomach in taking. For years, many Doctors have given pepsin preparations in their prescriptions to make medicine more agreeable to a touchy stomach. So be sure your laxative contains Syrup Pepsin. Insist on Dr. Caldwell's Laxative Senna combined with Syrup Pepsin. See how wonderfully the Laxative Senna wakes up lazy nerves and muscles in your intestines to bring welcome relief from constipation. And the good old Syrup Pepsin makes this laxative so comfortable and easy on your stomach. Even finicky children love the taste of this pleasant family laxative. Buy Dr. Caldwell's Laxative Senna at your druggist today. Try one laxative combined with Syrup Pepsin for ease to your stomach, too.

BUREAU OF STANDARDS

A BUSINESS organization which wants to get the most for the money sets up standards by which to judge what is offered to it, just as in Washington the government maintains a Bureau of Standards.

You can have your own Bureau of Standards, too. Just consult the advertising columns of your newspaper. They safeguard your purchasing power every day of every year.

Antelope Flat News

by Nadyne Waldrop
Jeannine Waldrop spent the week end with her sister, Mrs. Sam Hendrix, of Lesley.

Emma Bullock was in Memphis Tuesday.

S. A. James was in Memphis on business Tuesday.

Mr. and Mrs. Dan Dean, and Mr. and Mrs. D. W. Evans were in Silverton Wednesday.

Mrs. A. L. Durham returned home Wednesday from a visit with her daughter, Mr. and Mrs. Justice Ridge.

Mr. and Mrs. C. C. Brown, Mr. and Mrs. Walter Smith and Mrs. Sim Rhodes were in Silverton Friday.

Mr. W. N. Bullock, Lucy Gibson, Ray Waldrop, Leon Sanders, and Steve Edens were in Silverton Friday.

Iona Durham spent the week end in Memphis with relatives.

Mr. and Mrs. Oscar Bullock and children were in Silverton Saturday.

Due to the muddy roads, the school bus was unable to run Wednesday.

Mr. and Mrs. Bill Edens, Marian Evans, Lola Mae Turner, and Nadyne Waldrop were in Memphis Wednesday to see "Gone With The Wind".

John Durham, who has been seriously ill in the hospital at Memphis, is reported improving.

Nadyne Waldrop spent Wednesday night with her sister Mrs. Sam Hendrix of Lesley.

Mrs. John Durham and children visited their husband and father Saturday.

Mr. and Mrs. Elmer Sanders, and son Glenn, Mr. and Mrs. Dan Dean and family, Misses Sudie Waldrop, and Lola Mae Turner were in Memphis Saturday.

Mr. and Mrs. D. W. Evans transacted business in Memphis and Childress Friday.

Mr. and Mrs. Tom Blasingame and son Tommy and Carolyn Schott were in Clarendon Friday.

Mr. and Mrs. Chester Morehead and son of Memphis visited her sister Mr. and Mrs. Bill Edens Sunday.

Mr. and Mrs. Albert Bruce, Mr. and Mrs. Slade Walker and daughter Donna June of Amarillo, and Mrs. San Tankersley of Clarendon, visited in the home of Mr. and Mrs. L. L. Waldrop.

Mr. and Mrs. S. A. James went to Clarendon Sunday for her sister Cleo Bradley.

Rev. Leaverett of Silverton filled the pulpit here Sunday, Mrs. Leaverett, Mrs. Stodghill, and Miss Thompson accompanied the Mr. Leaverett.

The quilting club met Thursday, and quilted a quilt for Mrs. Virgil Sanders.

Miss Sudie Waldrop of Amarillo, who has been visiting relatives here, went to Silverton Sunday for a short visit with friends.

The Antelope "Breeze - Busters" met Sunday for the first baseball work out of the season.

Mr. and Mrs. Hugh Sanders and children were in Clarendon Sunday.

Mr. and Mrs. D. W. Evans and daughter Marian and Lola Mae Turner were in Memphis Sunday.

In listing out of town relatives who attended the funeral of W. E. Schott week before last, several were overlooked. Among them were: Mr. and Mrs. Dan McAnally, Monohans E. J. Foster, Artesia, New Mexico; Mr. and Mrs. John Dryden, Sherman; Mr. and Mrs. Cye Davis, Lockney; Mr. and Mrs. John Dendy, Amarillo; Mr. and Mrs. Joe Kitchens, Abilene.

C. E. Anderson, high mogul from Quitaque, returned Tuesday after a short trip to Houston. He reports that he found more fishing, fun, and friendlier folks than he ever met in his life.
