JAPAN:

Shows Hands

Dwarfing even the Russo-German war, with all its action, the Japanese situation because of its closeness to involvement of the United States, stole the world spotlight.

While there were indications that the Japanese were to continue the war with China, perhaps on even a more vigorous basis, and that Nippon was attempting to strengthen its hand on the Russian front, the main move was the military and naval occupation of French Indo-China.

While this had been foreseen as a major Japanese objective, and even regarded as a probable one during and after the period of the change in government in Tokyo, the actual occurrence fell with a sense of considerable shock on the United

For once the nation began to feel the hot breath of actual war blowing upon it, and the feeling that "all that" was far, far away began to be a distinctly shaky sort of thing.

For the action taken by this government was swift, drastic and met complete collaboration by Great Britain, Canada and Australia. It consisted of this, as the first

The freezing of Japanese assets. The limiting of all trade with Japan under special license. The mobilization of the troops

the Philippines. In addition to the British empire's collaboration with the first two plans. Britain's far eastern troops were on the qui vive for action and a request by Thailand for British aid in case her territory was violat-

ed was met with instant assent. In fact, it seemed extremely likely that Britain would move into Thailand in order to create a buffer state that might prevent Japanese attempt to cut the Burma road, which lies only a short distance, relatively speaking, from Hanoi in the northern part of Indo-China.

REACTION:

And Results

The immediate reaction of Japan was what amounted to a "sparring for time." Nippon was caught with several ships tied up at American wharves, automatically, by this government's declaration, prevented from moving.

Some 40 additional ships were en route here, and were hove to at sea. And if the Pan-American republics were to take similar action to the United States they might find it hard to make a port where they would be able to unload. One of the vessels was carrying a \$2,500,000 silk cargo and nearly 500 passengers bound for

Most serious result, however, was seen as the immediate stoppage of oil exportation to Japan from American sources. Utterly dependent on foreign supplies of petroleum, and for much of her scrap metal as well, Japan was visualized as practically forced to move on the Netherlands East Indies for the former and for supplies of tin as well.

Most observers felt that if and when such a move was made, it would find the United States taking some sort of direct naval action of a preventive nature

Tokyo, immediately after President Roosevelt's outline of American action with regard to the Indo-Chinese incident, broadcast an ap-

COINCIDENCE:

It so happened that the sudden move by Japan and the countermoves by this government were timed exactly to coincide with congressional consideration of the measure to keep draftees, guardsmen and reservists in the armed forces for the duration.

ears the solemn warning Wright Patman, of Texas,

"This year and next the farmer is going places. There are certain indications that he will continue to see considerable new money: Indications based on conditions that affect the farmers' general outlook on life, as well as his cash income."

That statement did not come from "official sources"-it didn't even come from a farmer, although he used to be one. It was made in my office by square-cut, squarejawed Conklin ("Pop") Mann, an editor and advertising man, keen student of rural matters, and a longtime friend of mine. Mann was down from New York bursting with enthusiasm for his favorite themeassured prosperity on the farm. Mann believes that business has a job ahead to interpret and readjust its marketing to meet the sweeping economic changes now taking place in American agriculture.

The farmer is now becoming a far more important factor in the distribution of both consumable and capital goods than ever before. That rise in the farmers' economic importance isn't just a matter of great cash income, according to Mann. It is due, rather, to the fact that the farmer now has a sound business platform under him and can plan and work on a basis comparable to any other business man.

doing well and experiencing a new sense of economic security because of parity and guaranteed prices for farm products. There is a definite psychological response to their feeling of increased safety. When a farmer is doing well, and feeling secure, look for a strong upward surge in his buying psychology."

Mann interprets the farm in terms of modern industry-he sees the farm as a manufacturing plant, producing the raw materials for food, clothing and numerous other products. "Evolutionary changes, deep down in farm economics," says this agro-idealist, "have taken place which give the farmer a stabilized economic base from which he can plan and work with a sense of ecurity he never had be

"How would I feel about buying anything but necessities if my whole economic structure was a gamble? Suppose I owned a ten or fifteen thousand-dollar plant and a lot of livestock, and, once a year, I planted crops, not knowing if the price would make them worth harvesting; how would I feel?"

Mann has a deep inherited kin-

"Some day a saga will be sung about the courage that kept the farmers going through their darkest

I wish I might write that saga for I know it from brave letters that poured into me from radio listeners all through the worst of the depression. I can tell you that they gave me a renewed faith in America that has kept me from being cynical through these days of distrust and

the greatest concentrated drive to increase farm production, to assure the farmer a definite price for what he produces will be on. For the first time in history, milk and poultry producers will be asked to pledge themselves to raise as much of their product as they possibly can-and they will get all the cooperation, advice and assistance that the government can give them. Quite a different picture from "plowing under."

Cotton Linters And Powder Making

Cotton linters, the hair-like fibers that cling to the seed after the long. staple cotton is removed in ginning, is a vital ingredient in the manufacture of smokeless powder. Army officials are checking to see whether or not there is going to be a shortage of this product that will seri-ously interfere with the defense program. They have ringing in their

aboard.

"Naturally."

Bill Roper started to say, "Jody, | downed Jim Leathers. The sobs that how on earth-"

Jody did not seem to see him; she appeared to be thinking only of the slim youngster whom the cowboy carried. The cowboy laid the limp figure on the floor of the kitchen, ripped off his own neckerchief and spread it over the youngster's face. Jody Gordon methodically shut the

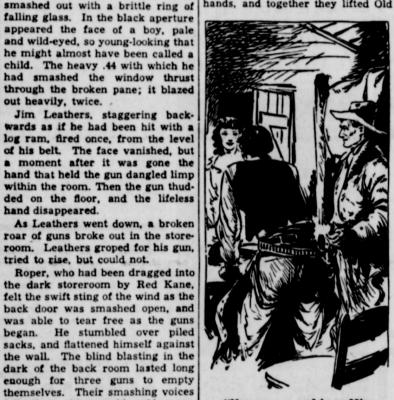

door. Then she dropped to the floor beside the fallen youngster, lifted his head into her lap, and gave way to a violent sobbing. The highkeyed nervous excitement that had sustained her through the hard necessities of action was unstrung abruptly, now that her work was now. Deliberately he pulled on his done; it left nothing behind it but a sheepskin. "Get out the back, ungreat weariness, and the bleak consciousness that this boy was dead tie the ponies and get your man because of her.

Roper and the King-Gordon cowboy stood uncertainly for a moment. Then the cowboy picked up Leathers where he lay struggling for breath, carried him into the back room and put him down on a bunk. For a moment he hesitated; then closed the door between the two

rooms, leaving Jody alone. "Seems like the kid got Jim Leathgirl," Marquita said. "Luck saved ers; but Jim Leathers got the

grease the intricate mechanisms. what risky. So one of the extremely important The dog got loose because three questions of the time is this: Have women undertook to stage a"dog we the motor fuel we need-and delivery" at the city pound in prowill there be enuogh left over for test against animal experimentaour cililain demands after military tion which they contended en-

requirements are met? That vital question was recent-

ly answered by the Texas Compan. It is estimated that gasoline for the Army's 250,000 motor vehicles-tanks, blitz buggies, trucks, etc.-may total 1,000,000,000 gallons a year. That's a lot of gasyet, says the Company, America's refineries can turn out that billion gallons in less than two weeks, leaving 50 weeks to produce for the air force, the Navy and the civilian population.

That shows how well the oil industry is prepared for this emergency. Under the America private enterprise system, it has developed on its own initiative and with its own money, the greatest plant of its kind in the world. Thus, oil belongs with those other great industries-electric power, railroads, mining, etc.-which are ready to meet any demands circumstances may impose. That is what the private enterprise system -the democratic system-has done for this country. It is the system which has made America great, and which we are building our de-

THE TOLL FIRETAKES

"Our productive forces must be protected against the destructive great profusion of flowers from forces of fire from whatever source Silverton for Mom. I never had it springs," said E. Kent Hubbard, props out from under, as did her Association of Connecticut. "But death. And right when the ten- yesterday, machines, vast plants sion was greatest, there comes and factories and raw materials her tribute from Silverton. From could be replaced with speed and nee or twice. You'll never know facility. Medical experimentation on animals has resulted in some of the great and most beneficial medical for ratification, are first passed discoveries. It has been the means upon by the Foreign Relations of saving hundreds of thousands Committee. Recent legislation or of human beings from suffering national interest which commitand death. To forbid it, would tee has handled has been the Neuturn back the clock of medical trality Acts and the Lease-Lend advancement.

HOUSING UNITS IN DUMAS

Fifty housing units in the Dumas national defense area were completed last week by the U.S. Housing Authority, Governor W. the world, and his acknowledged Lee O'Daniel, Chairman of the debating ability. National Defense Committee for Texas, was advised today.

C. F. Palmer, Coordinator of Defense Housing, made the announcement regarding the completion.

CONNALLY HEAD OF OF BIG COMMITTEE

Texas' Senior Senator, Tom Connally, has been elevated by the Senate of the United States to head the powerful Foreign Relations Committee. Senator Connally is the first Texan to have ever gained this distinctive honor. Connally was first assigned to

the Foreign Relations Committee of the Senate in 1931. In ten years he has advanced from a position of twentieth on the committee to the chairmanship. Before being elected to the Senate Connally served on the Foreign Affairs Committee of the House. The Foreign Relations Commit-

tee, rated as one of the three most important committees of the Senate, works in conjunction with the President and the Department of State to form and to enforce the foreign policy of the United States, a matter of topmost importance at the present time. In their natural course, matters to be takento Congress relating to foreign policy from the President or the State Department pass through

Yexans Give Oil To Great Britain

the hands of the Chairman of the

JOHN F. CAMP, San Antonio oil operator, heads the "Oil for Britain" movement by Texas producers to lift the shutdown to permit an extra day's allowable from their wells to be given to the President of the United States with the request that it be released to the people of Great Britain. The plan people of Great Britain. The plan sponsored by Camp, when perfect-ed and given final approval by the Texas Railroad Commission, should make available to Great Britain a million barrels or more of Texas crude. The Texas gift is to be made direct to the President who, in turn, will pass it on under the terms of the Lend-Lease Act.

the Lend-Lease Act.

The San Antonio man has already donated 5,000 barrels of regular production from his wells. In acknowledging the girt, President Roosevelt said: "This gift demonstates that democracy in action is not a bare and meaningless phrase; it symbolizes the spirit of patriotism and unselfishness which exists throughout the country today."

Foreign Relations Committee.

All treaties before the Senate Act.

Senator Connally is particularly well suited for his new asignment, with his years of service on the committee in both House and Senate, his knowledge of conditions in other countries gained by personal visits to all sections of

BEWARE OF HOUSE TO HOUSE AGENTS

"Beware of house to house agents who would sell you merchandise under some high sounding name and claiming that it will cure all diseases known to affect man or beast," warns Dr. Geo. W. Cox, State Health Officer. "By patronizing such people the

general public is not wasting its money but is often purchasing an article that may be dangerous to the safety of persons or livestock. One of the more recent frauds

uncovered by field inspectors of the State Department of Health concerns so-called "radio-active Cones". Agents for this company have been coverning certain sections of the State zealously, and have been selling a product that is not only worthless, but if used according to directions would be very dangerous to the public health.

False claims have been made by salesmen peddling this product that it will not only cure all diseases, but if used continuously will definitely prolong life.

Laboratory analysis reveals that this product contains radon in sufficient quantities and potency to be unsafe for children and if used by adults frequently and in high dosage would be dangerous to their health.

Personnel of the State Department of Health are constantly on guard to protect the general public against such fraudulent practices but to gain a greater degree of success every citizen should be extremely careful in purchasing any treatment concoction or device from persons who claim marvelous results from their fraudulent product.

"If you or your family needs attention, play safe, see a compe tent physician and leave the quacks alone," concluded Dr. Cox.

> THANK **Y01**1

As the harvest season nears a close ir this locality, we wish to say "THANK YOU" for the generous business the wheat growers of this section have given us this season.

Frankly, grain dealers have been put to lots of work and additional handling charges this year that will materially affect the year's earnings. But we are happy to have contributed our effort and facilities in helping you realize the most profit from your year's labor.

Maybe conditions will be better next year and the farmer and the grain dealer alike will realize more from their efforts. At any rate you will always find us doing our best to serve you in the best possible manner.

WORLD AT

360-B HERE'S one of those very satisfying everyday dresses that's decidedly out of the ordinary in charm and practicality. The lines are really as good as those of your favorite afternoon dress. The skirt sweeps, from a high, small waistline, to a flare that ensures working comfort and looks pretty besides. You can draw the waistline in as slim as you please, by means of the back-tied sash belt-and adjust it to give yourself plenty of leeway for reaching, stretching, sweeping, dusting and so on. This design (No. 1360-B) is simple to make and it really is necessary to a busy day.

Barbara Bell Pattern No. 1360-B is d Sarbara Bell Pattern No. 1300-B is designed in sizes 12, 14, 16, 18, 20 and 40. Corresponding bust measurements 30, 32, 34, 36, 38, and 40. Size 14 (32) requires 374 yards edging. Send your order to:

GOLDEN-RIPE JUICY PEACHES FOR LUSCIOUS JELLY (See Recipes Below

IT'S CANNING TIME

With food taking on a greater than ever importance under the national defense program. you'll want to make a thought-

ful selection for stocking a shelf of extra good jams and jellies for later use. When winter comes you'll glow with deep satisfaction over your canning efforts of the summer.

Since a record breaking peach crop, the third greatest in the history of the country, is expected, plan to put up many, many jars of this golden ripe fruit, not only as jam, jelly, or marmalade, but as conserve combined with other fruits.

*Ripe Peach Jelly. (Makes 6 medium sized glasses)

2½ cups juice

31/2 cups sugar 1 box powdered fruit pectin

To prepare juice, pit and crush thoroughly (do not peel) about 21/2 pounds fully ripe peaches. Add 1 cup water, bring to a boil and sim-(be "engrafted") in our mer, covered 10 minutes. Add a few peach pits, crushed, to mixture read the Word, or even while cooking. Place fruit in a jelis it. It must take root ly cloth bag and squeeze out juice.

Place the juice over a hot fire, -But Do Not Forget to and add fruit pectin. Mix well and continue stirring until mixture faith? Yes, we are, and comes to a hard boil. Add the sugway; but the man who ar, stirring constantly. Bring to a s faith in Christ will in- fully rolling boil, boil hard 1 mintow the results of that ute, remove from fire, skim, pour quickly into glasses. Paraffin at

(Makes 11 small glasses) 4 cups prepared fruit 71/2 cups sugar 1 bottle fruit pectin

To prepare fruit, peel off the yellow rind of 1 medium orange and 1 medium lemon with sharp knife, leaving as much of the white part on the fruit itself. Put rinds through food chopper twice. Add 34 cup water and it teaspoon soda, bring to a boil and simmer covered 10 minutes.

Cut off the tight skin of the peeled fruit and slip the pulp out of each section. Add pulp and juice and the juice of an additional lemon to the rind, simmer, covered 20 minutes.

Peel 11/2 pounds of ripe peaches. Pit, grind or chop fine. Combine with fruits. Mix sugar and fruit, place in a large kettle. Bring to a boil, boil gently 5 minutes. Stir constantly while boiling. Remove from fire, stir in bottled pectin. Then stir and skim by turns for 5 minutes to cool slightly and prevent floating fruit. Pour quickly and paraffin at once.

Preserved pears make a good accompaniment either for the meat course or for muffins and rolls served at luncheon. You'll like:

> *Pear Chips. 8 pounds pears

4 pounds sugar 1/2 pound ginger (preserved)

Wipe pears, remove stems, quarter and core. Cut into small pieces. Add sugar and ginger and let stand overnight. Add lemons cut in small pieces, rejecting seeds and cook

LYNN SAYS:

slowly 3 hours. Put into glasses,

To test when jelly is done, dip in a clean spoon and hold it high. When the last drop sheets or flakes off the side of the spoon, remove from the fire. Another way which I like too, is to see if two drops drip off the side of the spoon simultaneously. If they do, the jelly will jell.

Fresh fruit which is ripe should be used for jams, jellies, conserves, marmalades, and preserves. Remove any spots or bruises as they may cause your whole batch to spoil. Cook them as short a time as possible so they will retain their lovely colors and look as though they were brought from garden to glass

Pick a rainy day or a day be fore you start canning to look over your equipment and get it clean for use. Dirty jars should be boiled in soda water and washed in soap suds. Boil old lids 20 minutes in soda water using 1 teaspoon soda to 1 quart of water.

Recipe Given

*Apple Butter.

(Makes 6 pints) 4 quarts cooked and sieved apples

2 cups sugar 1 teaspoon cloves

1 teaspoon allspice 11/2 teaspoons cinnamon 6 cups sugar 2 cups cider vinegar

Combine apples, 2 cups sugar, and spices; cook until thick. Add remaining sugar and vinegar. Cook until thick, stirring constantly. Pour into hot sterilized jars and seal immediately. This may also be cooked in a pressure cooker or in the oven to prevent sticking.

Since some fruits do not convert into jelly easily, a commercial pectin is usually employed to make the fruit jell properly. Often fruits which jell easily, that is, those which have sufficient pectin in themselves are used in combination with fruits which do not. Crabapples, unripe grapes, currants, gooseberries, cranberries, quinces, huckleberries, and blackberries jell well. If enough of them are not used in the combination, better use the pectin and play

Here's a bright and quivery jelly which you'll like to have on hand for fair weather or foul. It's a grand accompaniment for chicken or hot

*Gooseberry and Raspberry Jelly. (Makes 11 medium glasses)

1 quart ripe gooseberries 1/2 cup water

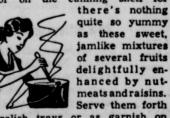

1 quart red raspberries

61/2 cups sugar 1 box powdered fruit pectin

Crush and grind thoroughly the gooseberries, add water, bring to a boil. Simmer, covered, for 10 minutes. Crush thoroughly the raspberries and combine with gooseberries. Place in jelly bag and squeeze out juice. This should make about 41/2 cups juice. If there is a slight shortage of juice add small amount of water to the pulp and squeeze again. Put juice into a 5 to 6-quart saucepan. Place over a hot fire, add fruit pectin, mix well and continue stirring until mixture comes to a hard boil. Pour in the sugar. Let boil hard for a half a minute. Remove from fire, skim, and pour into

(Released by Western Newspaper Union.) SUSANNA FOSTER, the 16-year-old who sings C above high C, has appeared in two pictures, is being co-starred for the first time in Para-Jackie Cooper is her leading man, and thrilled her half to death recently when he came on the set with a huge box for

chairs with a canvas back-rest that

was finished. Furthermore, the loss of weight began to show on the film. So the director, Sam Bischoff, had a dummy head made, with a face like Soderling's; now the girls are dummy-dragging.

time the picture

It does seem as if the young people of Hungary would be too much upset at the moment to think of forming a fan club. But one Joseph Hamor wrote to Virginia Weidler recently, from Budapest, to tell her a Virginia Weidler club had been formed. The members wear badges bearing her picture, and are obliged to learn English. Virginia's honorary president.

Corp. James Stewart showed his family around the Metro lot the other day; Mr. and Mrs. Stewart and their daughters, Mary and Virginia, visited the sets of "Honky-Tonk" and "Smilin' Through" and had a chat with Clark Gable.

Laraine Day has been going on and on as Nurse Mary in the Kildare's Wedding Day"-but she has the most important role of her career in "The New York Story," with Edward G. Robinson, Edward Arnold and Marsha Hunt.

RKO Radio received a nice communication not long ago; it was a letter from Maj. Gen. E. S. Adams, adjutant general of the United States army, saying that "Para-chute Battalion" is "the most satisfactory army picture produced to

Gap," in which Charles Laughton circled by almost insurmountable ally occurs at 22,000 feet.

recited the Gettysburg address so effectively that he's been in demand to do it ever since? It's been re-issued, which is good news for everybody who missed this hilarious comedy the first time out, as well as for those who want to see it twice.

Charles Laughton In Warner Bros.' "The Maltese Falcon" Humphrey Bogart plays his first detective role -sort of a relief from gangsters. So he can play love scenes. He has one with Mary Astor that was a change for both of them; gangsters can't have true loves, under the producers' code, and as for Mary, she said that the last time she'd been really kissed was in "The Prisoner of Zenda."

Speaking of the beautiful Miss Astor, she certainly stacked up laurels for herself in "The Great Lie," playing opposite Bette Davis. If you want to realize what excellent character portrayals the girls gave, see the picture on a double bill with one of those phony B pictures that Hollywood turns out.

Those who loathe the commercials mixed into their radio programs will hail with delight the announcement that the FFC has granted a permit to Muzak Inc., to build a station in New York that will carry absolutely no advertising.

ODDS AND ENDS-Margaret Lind-ODDS AND ENDS—Margaret Lindsay's signed to appear in four more of Columbia's Ellery Queen pictures . . . Vietor McLaglen ended his personal appearance tour because "The Marines Are Ready" was ready . . . Jack Benny will make "The Widow Wouldn's Weep" for Warners when he returns from his vacation in September . . . Richard Travis, cast opposite Bette Davis in "The Man Who Came to Dinner," owes his big chance to her recommendation after seeing his test . . . Bob Hope's bed sunburn held up "Louisiama Purchase" . . . ZaSu Pitts will flutter her hands in RKO's "Week End for Three" . . .

HEALTH

How to Get It and How to Keep It

Physicians tell us that the liver destroys, or renders harmless, poisons such as uric acid and other toxic waste matter that is normally formed in the tissues, and also prevents the formation of poisons in the bowels by manufacturing a greenish-yellow, bitter fluid called bile, which, between meals, is stored up in the gall-bladder, but after each meal is poured out into the intestines. The bile is purgative and indirectly antiseptic or prophylactic. In health it is your bile that makes your bowels act regularly and freely every day,—it is Nature's Purgative. It is your bile that keeps your bowels pure, clean and free from excessive fermentation (gas) and putrefaction. Remember that putrefactive germs do not thrive where there is fresh bile and there can therefore be no fermentation to cause gas, nor putrefaction to produce poisons, or How Does the Liver Purify?

tion to cause gas, nor putre-faction to produce poisons, or toxines. Also, as bile is Nature's

faction to produce poisons, or toxines. Also, as bile is Nature's purgative, there can be no constipation if the bile is flowing naturally and freely from the gall-bladder into the bowels after each meal.

But when the bile becomes stagnant your bowels stop acting regularly and the contents become a breeding bed for the germs of fermentation (gas) and putrefaction. These poisons, (called toxines), are gradually absorbed into your blood and if the quantity be more than the liver can destroy, may circulate all over your body, poisoning, irritating or inflaming your brain and nerves, your muscles and joints, your heart, skin, kidneys, and every vital organ of your body. Your doctor calls this "intestinal toxaemia," and tells you that your system is "toxic," or, if mild, "bilious."

Functions of Gall-Bladder

In 24 hours your liver manufactures about 3 to 4 teacupsful of bile, which flows through millions of minute canals, or ducts, uniting to make a large tube which empties into the gall-bladder, as creeks and rivulets unite to form a river that flows into a lake. Your gall-bladder is a hollow muscle that serves the double purpose of a reservoir and a pump. Its functions are similar to those of the urinary bladder. About three hours after eating, when the food is passurinary bladder. About three hours after eating, when the food is passing from the stomach into the intestines, your gall-bladder should begin its contractions, thus pumping the bile into the small intestine where it is mixed with your food. Bile is also an essential digestive fluid, aiding in the digestion and absorption of fats and oils. Its absence inevitably

SMALL INTESTINE DESCENDING

teaches you only this one lesson about your own body it may be worth more than millions of dollars to you; for of what use is money without health, or after you are dead?

The lesson is this:—"Keep your system pure and you may have health and strength to gain and enjoy happiness, success and length of years." But you may ask:—

The lesson is this:—"Keep your system pure and you may have health and strength to gain and enjoy happiness, success and length of years." But you may ask:—

The lesson is this:—"Keep your system pure and you may have ing freely into your bowels, you, sooner or later, begin to feel some of the following symptoms:—Your twenty-five foot canal, including your stomach, small intestine and bile ducts into the small intestine and thence through and out of the bowels. When you have taken what the doctors call a cholagogue or bile expelling medicine. It cleans you sooner or later, begin to feel some of the following symptoms:—Your your stomach, small intestine and thence through and out of the bowels. When the bile becomes stagnant in your gall-bladder and is dammed back into your liver instead of flow-stowers and length of the following symptoms:—Your your stomach, small intestine and thence through and out of the bowels. When the bile becomes stagnant in your gall-bladder and is dammed back into your bowels, you, sooner or later, begin to feel some of the following symptoms:—Your stomach, small intestine and thence through and out of the bowels. When the bowels when the bowels when the bowels when the bowels you know that you be taken what the doctors call a cholagogue or bile expelling medicine. It cleans you the provided the powels are through and out of the bowels. When the bowels when the bo mealth and strength to gain and enjoy happiness, success and length of years." But you may ask:—

How Can I Reep My
System Pure?

That is not a hard question to answer, for Science plainly teaches you that your liver, which is larger than all of the other glands of the body combined, has the special work of purifying your blood and thereby your entire system and of keeping it pure.

Sooner or later, begin to feel some to feel some of the following symptoms:—Your symptoms:—Your symptoms:—Your stomach, small intestine and large intestine or colon is thoroughly cleared and washed clean and pure, and you can see and feel the bile in tobacco) lose their natural flavor, your food does not agree with you; you may have heart burn, gas, or fluttering around the heart, dizziness all of the other glands of the body combined, has the special work of purifying your blood and thereby your entire system and of keeping it pure.

NOSE PHARYNX.

NOTE—If the stagnation of bile is caused by the pressure of a tumor upon the gall duct, or by a permanently impacted gallstone, only a surgical operation can remove the cause. But the common cause of stagnation of bile is the accumulation of catarrhal mucus in the gall-bladder or gall-duct. This mucus may be expelled by Calotabs. The mucus is caused by engorgement of the liver, usually the result of overindulgence in highly seasoned foods, or stimulating drinks. Calotabs help to relieve this engorgement.

Formula and Action of Calotabs

The formula of Calotabs is The formula of Calotabs is designed to make calomel-taking a pleasure, to obviate the necessity of following it with a dose of Epsom Salts, and thus make it just as pleasant and safe as any other purgative. Calotabs are composed of a thoroughly purified and refined calomel combined with assistants and correctives. The Study the above drawing for a few minutes. Notice particularly how the bile flows from the liver into and out of the gall-bladder and thence into the small intestine which it enters at a point just below the stomach. A cut-off valve prevents the return of the bile from the intestine into the gall-bladder. The gall-bladder is the pump for the bile, acting like the bulb of an atomizer. assistants and correctives. The calomel acts as a "cholagogue"

or blind spell; you may be troubled with belching or frequent passages of gas from the bowels; the gas "balloons" your bowels and presses so hard on the kidneys that it gives you pain in the small of your back over your kidneys, making you think you have kidney trouble; at night the gas in your bowels presses upon your bladder making you get up frequently, thus breaking into your sleep.

In the morning you are tired instead of refreshed. Gradually your health is injured. Your complexion becomes sallow or billous; dark rings may appear under your eyes, you may feel lazy, dill and irritable or blue and melancholic. You may have if frequent colds (catarrh) or dull headache; your bowels stop their free, full and natural action; you have constipation, gas, putrefaction and self-poisoning or "intestinal tox-aemia," as the doctors call it. This group of symptoms is referred to, in the South, as "Torpid Liver," but apparently a better expression might be Torpid Bile Flow.

NOTE:—If the above symptoms are very mild, they are called billous; if severe, "toxic." Some ma; be of nervous reflex origin.

CONOCO N MOTOR OIL

Plenty of good old pre-streamline cars with OIL-PLATED engines still pass your house quietly ... pass newer cars on the road ... pass oil-inspection many a time without needing a quart. That's because inner engine parts have been kept OIL-PLATED by the strong magnet-like action that won't let OIL-PLATING quickly drain down. Even all night, OIL-PLATING stays up to its topmost point-on guard against wear in advance! Yet this famous OIL-PLATING—based on the Conoco Germ Processed oil patent-is merely one factor in today's great success of the new

CONOCO N# MOTOR OIL -Lasted 5,683 miles longer than next-best oil tested in Death Valley

Conoco Nth oil invited itself straight up against 5 other representative oils in an all-out test to the death...unbiased... Certified. The graveyard was cruel Death Valley—so hot you can't sweat. 6 everyday coupes were used-all alike. Each

got one 5-quart fill of some one compet-ing oil—locked in by the Official Referee. Then under strictly equal conditions all cars sped without added oil, till engines cracked up.

The weakest oil gave up while Conoco Nth still had 8,268 miles to go . . . Certified. All 5 rivals together averaged 7,057 miles less than Conoco Nth oil . . . Certified.

Real difference—from a Real source Two modern synthetics are in new Conoco

Nth oil. Now think of modern vitamin synthetics, replacing some of Nature's life-givers lost in modern food processing. Similarly, the latest oil refining methods destroy some of Nature's life-givers. But today full life is brought back—more than generously-by the two Conoco synthetics.

One of these will make Conoco Nth motor oil keep your engine OIL-PLATED. The other will check the effect of foul leftovers caused by every engine's normal firing. This commonest of all oil troubles is now checked—inhibited—by Thialkene

IMPARTIAL

Latest available oil of each competitive brand bought retail by Referee. New stock coupes all alike; broken-in alike; tuned alike; handled alike. Engines had been taken apart for Referee—to assure same conditions for all oils. Same route for all. One fill of oil per car. None added. Engines under lock-under scrutiny-every mile.

inhibitor...Conoco Patent 2,218,132. But why technicalities?—when you know the Certified Economy record of Conoco Nth in Death Valley. You'll never Death-Test your Conoco Neh oil, nor make your car try any other proving-ground tortures. You'll still drain and refill at the recommended intervals. But knowing that one fill of Conoco Nth outlasted the other Death-Tested oils—by 74% all the way up to 161%—you can figure on a long time between quarts of Conoco Nth oil. Change today-at Your Mileage Merchant's Conoco station. Continental Oil Company—Pioneers in Bettering America's oil with Synthetics

CERTIFIED I hereby certify that the Death Valley Test
