BETTER DIRT ROADS

Military roads and airports have been rendered usable by our armed forces on various fronts by application to the surface of a new, patented resin compound, called Stabinal, which "waterproofs the soil" so that during rainy weather vehicles will not become bogged down in mud. This new product of the laboratory of Hercules Powder company is also being sprinkled this spring on dirt roads in several states. On a road so treated surface water will drain off or evaporate rather than seep thru. A truck can move over it during or after a rainstorm without churning up mud or forming ruts.

In addition to promising greater mobility to everyone living in rural areas where dirt roads are common, the product is said to have other interesting possibilities. Treated clay tennis courts, for example, will not only be weedless but playable immediately after a rain has stopped.

A. & M. Specialist To Work In Briscoe County

Miss Graham Hard, Emergency War Food Assistant, has been assigned to spend one week of each month in Briscoe County by the Extension Service, according to an announcement made in Silverton April 11th by Miss Kate Adele Hill, District Agent, A. & M. College, College Station.

Mrs. Alton Steele again proved her success as an original pleasing hostess when, on last Friday morning, she entertained the Victory Bond Coffee Club, with a delectable breakfast at "Bills Cafe". Mrs. McMurtry's cordiality, combined with the courteous service of the Cafe's new management, created an atmosphere of good cheer for the thirteen members, as they enjoyed comradeship and quantities of homecooked food.

The Secretary, Mrs. Dean Allard reported sufficient funds had been paid in for 4 bonds. A new member Mrs. Minnabell Snowden, drew the names. Miss Evelyn Coffee, Miss Dorothy McMurtry, Mrs. Alton Steele and Mrs. Tom Bomar received bonds.

Mrs. Alton Steele will have the next meeting on April 21st at 8:30 a. m., in the home of Mrs. W. E. Redin.

BITS O' BUSINESS

Demand for Plywood products, especially fir plywood, will greatly exceed the supply for years to come. Supply of horses on farms dropped during 1943 for the 29th consecutive year to 9,330,000 compared with 21, 431,000 at the beginning of 1915; mule population is down for the 19th consecutive year to 3, 559,000 from 5,918,000 in 1925.

can't tell a penny from a dime without feeling of it — BUT, let the editor start into a coffee joint and Potter can see it five blocks away. It beats the heck out of me.

A FEW WEEKS ago the city almost lost a maintainer. They got it off in the canyon while moving some tin cans out on the dump grounds. Summers and all the rest of them were wondering where it was, and all the time I knew, Mart was working the street by our house, and I plainly heard him say that "This goddammy machine ain't fit for anything but junk." And the funny thing about it is that the City Dads still think that the maintainer got in the junk yard by accident.

JUDD DONNELL HAS been trying to get hold of a chicken sexer over at the Hatchery for some time. This week he was calling by long distance asking for a man to sex his chickens and he couldn't get the wire. He thinks perhaps someone in the phone company thought he was using obscene language and you know that is forbidden. Next time he had better call for just a plain poultry specialist.

THE HAHNS ADDED to their farming operations last week when the Easter Bunny brought two rabbits to live with us. We now have the following livestock: One dog, one cat, two rabbits, 75 laying hens one mother hen and 24 baby chicks. All we need now is a horse and a cow and we will be getting civilized far beyond our wildest dreams.

MY GAMBLING BLOOD is aroused each time I buy a ticket at the Palace Theatre. I am entranced by the diamond ring, and have been buying at least two sacks of pop corn, in the hopes that some day I'll get lucky. It may take a long time to win, but it's a better game than bank night. I can think of no better mishap than to break a molar on a lovely diamond.

IN FACT MY gambling gets me into lots of trouble, and if I would pay off all the bets I lose I'd be in bad shape. However, when I say "I betcha five bucks" I mean "I betcha" period. Anyway Dee McWilliams didn't understand me that way. I bet him five that he'd be in the army by April 1st. And the draft board failed me and he claims that I owe him. The way it all figured up finally is this: In 1940 he subscribed for the paper

for \$1.25 and then never paid it. I figured that if he could owe \$1.25 four years, then at the same rate it will take me 16 years to pay off the five spot. I am a fair man and I offered to split it into 16 equal payments. Each year, starting April 1, 1945 I would mail his wife a check for 31 1/2 cents. Up to date he is still trying to get a better deal.

THE FIFTH WAR LOAN starts June 12th, and the amount is \$16,000,000,000.00 (16 billions) According to figures just released it is now costing a quarter of a billion dollars a day to run the war. The war bond drive will run 30 drive is over, the money raised will already be half spent. We should all be buying bonds in between to cut that overage just a little. We should remember that our leaders are trying to save lives in this war. That can be done only if we have the best of equipment for our men. We are the ones that are buying that lifesaving equipment.

CONTRAST THE TWO plans of government that are in the world today. In the totalitarian system the individual is completely submerged to the state. He is nothing. He is allowed to exist simply for the use of the government. In this country, the state is in existence because it is of service to us as individuals. Does not that account for the fact that the totalitarian leaders so recklessly squander their manpower, while our leaders try to save their men, that more of them will return to enjoy the things for which they have fought.

I TALKED TO M. K. Summers this week about having a City Clean-up Week. He didn't think it was time, so I guess it isn't. M. K. is the kind of a guy that has to think of an idea himself, before it is any good.

BUT FORGETTING THE fact that my ideas are no good, that I am overcritical and super-gripping and a non-tay payer I'd like to venture the observation that Silverton is at this time, dirtier than I've ever seen it. It's not only the alleys and vacant lots. There is a mess of papers, dirt etc., on everyone's front doorstep every time there is more than a breath of wind. It blows from behind the buildings and piled up in front of them. If it goes on long enough we can use the alley for our main thoroughfare and pile junk in the front street.

THE NEWS OFFICE will be closed most of the day Friday as we are going to the Press meeting at Amarillo. Jean will have the place under control Friday evening and Saturday (I hope). Barb is going too, this year in spite of all that I can do. I've thought and thought about the ways and means of this trip. Every time I think of an excuse why she should stay home, she thinks of a reason why she should go.

I JUST HEARD why we have so many men stationed in England. On the surface of the thing, they are there to take part in the big invasion of the Continent. The real reason, so I heard, is to try to stop the Russians when they get to the English Channel.

M. C. POTTER, who has been here so long that he can say anything he wants to, without fear of contradiction, says that the greatest thing the war has done for Briscoe County, is to make some real dirt farmers out of some of the boys. "We were needing some farmers," he says, "and lo, the war comes along, and we have them."

POTTER IS A great guy. He claims he can't see very good anymore. I cannot understand it. He

IT'S NEWS, said a famous editor, when boy bites dog but commonplace when dog bites boy.

It is not quite clear why our young inquiring reporter had to sink his teeth into the subject to discover that it isn't the genuine article. But many a motorist would like some similar way of quickly discovering the real thing when he wants high quality motor oil.

The difficulty is that he can't detect quality in a lubricant by taste, smell, sight, or feel. Yet there is an easy solution to the problem. Just remember that to end confusion and doubt, Phillips makes this simple, straightforward statement: If you want our best oil, remember we specify that Phillips 66 Motor Oil is our finest quality... the highest grade and greatest value... among all the oils we offer to average motorists.

The recommended oil change period used to be every 1,000 miles. With today's reduced driving, experts say motor life is lengthened by changing oil every two months. And now is the time for seasonal change to replace winter-worn lubricant. So be sure to get quality by asking for Phillips 66 Motor Oil.

WE NEED A CLEAN-up very badly. In a few weeks the flies are going to be swarming and breeding. Now is the time to get rid of the breeding places. Trash burners in the residential sections are full to overflowing and no place to overflow them except on the ground. Whether or not Silverton is sanitary this coming hot weather, depends on the action we take now. A day should be set, and not only the business houses should close and clean their lot, but everyone in town should get rid of all trash and so forth. It doesn't do much good for just one to do it. It needs to be a concentrated drive on the part of all.

THE SPOT FORMERLY occupied by the Odd Fellows old building is a typical example of what I mean. There's not another such an eyesore this side of the Mississippi. If you've lost something it ought to be there. Looks like everything else is.

Mr. W. E. Burselson visited relatives in Plainview the past week.

The Helping Hand Club met with Mrs. Edwin Crass Thursday April 6th. Members present were Mesdames W. C. Price, J. Lee Francis, W. A. Rowell, F. A. Fisch, H. C. Mercer, Wilbur Wilson, D. L. Young, Carl Wimberly and Ernest Strange. Guests were mesdames Bryan Strange, J. C. Bramlet and A. A. Boling. The next meeting will be with Mrs. W. C. Price on April 13th. Sunshine sisters will be revealed at this meeting.

Rock Creek News

Mrs. Earl Bell of Lubbock was visiting in this community Tuesday.

Work is almost completed on the new telephone line being constructed from here to town.

Mrs. Betty Guffee is spending a few days this week with Mrs. R. N. McDaniel Sr.

The Club met with Mrs. R. L. Johnson Tuesday. Members present were Mesdames Bradford, Gardner, Steele, Martin, Fitzgerald

Guffee, Dee Reid, W. W. Reid, R. N. McDaniel, Bob McDaniel, McKay, Charlie Johnson and the hostess Mrs. R. L. Johnson. Visitors were Mesdames Betty Hodges Edwin Crass and Wilbur Wilson. The next meeting will be with Charlie Johnson April 25th.

Mr. and Mrs. Wade Steele were dinner guests Sunday in the Louie Kitchens home.

H. C. Peugh is home for a few days furlough.

Vigo Park News

Sunday visitors in the S. C. Cherry home were Mr. and Mrs. Fay Berry and Mr. and Mrs. Louie Wesley of Leslie.

Mr. and Mrs. Pete Jones were guests Sunday in the C. H. Rogers

Nearly every member of the Woodrow Bice family were sick last week.

Mr. and Mrs. John Culwell went to Meadow Sunday to the funeral of his aunt.

Last Sunday we had fifty for Sunday school and several who attend regularly were not present. This proves that we could have more than fifty all the time. We wonder just how many should be in Sunday school all the time? Beginning the first Sunday in May a worker from Wayland will be here to help conduct a Sunday school Training course and to take a census of the community. Everyone who has any love for God and the cause of the Right should be in Sunday school and Church.

Mr. and Mrs. Chester Foster and children visited in Whitfield on Sunday.

The School children of Vigo and also of San Jacinto had an Easter egg hunt last Friday.

The R. F. McNitts spent Sunday in Tulia with the Dick Clennens. They reported good church services in town.

Miss Betty McMurtry spent the week end at home and returned to school Sunday evening.

I GIVE YOU TEXAS

A passenger on the famous "slow train through Arkansas" said to the conductor. "You ought to put the cow-catcher on the back end of the train because there is absolutely no chance that we will overtake a cow but a cow might overtake us and wander in."

Around over Texas: In the southeast corner of Montague County are the ruins of a cabin, near a stream in a heavily wooded area, which was a hideout for Sam Bass, the famous outlaw, according to Joe Benton Nocoma who has made a life study of the history of that section.

Dr. N. W. Crain, who has been practicing medicine since 1886, recalls that, when he went to Spanish Fort (on Red River) in 1880 that there were no ruins remaining of the old fort (of Spanish, French and Indian days) but that there were large pits, which apparently had been dug to enable some 20 men to lie in them, their feet in the center and facing outward in a circle, making it possible to oppose enemies attacking from any or all directions.

Candidates are proverbially optimistic. It is related that an aspirant for office approached a voter who grew red in the face and belatedly:

"I think you are a contemptible reprobate and I wouldn't vote for you if you were the only man in the race; do I make myself clear?" The candidate replied, "You surely do—and I'll put you on my doubtful list."

An English reviewer many years ago wrote a rhymed review of a book that had mainly been plagiarized from another book:

"The part you stole I liked the best; Take courage, man, and steal the rest."

Homer Sanders returned Wednesday from Dallas where he has been on business.

Mr. and Mrs. Clyde Wright, Mr. M. C. Potter, Mr. Jake Honea and Mr. Lanham were among Silverton people attending the funeral of Mr. Jeff Morris a Briscoe County pioneer at Quitaque last Friday.

A school teacher asked the pupils to write a short essay and to choose their own subjects.

A little girl sent in the following paper:
"My subject is 'ants'. Ants is two

kinds, insects and lady uncles. "Sometimes they live in holes and sometimes they crawl in sugar bowls, and sometimes they live with their married sisters."

Definition of "Morale"
"Morale is what keeps yo' feet goin,' when yo' head says it ain't possible."

"And that, my son, was how the first World War was won."
"But Pop, why did they need all the other soldiers?"

Started Chicks

All ages up to 4 weeks. See them this week and save money.

TOO MANY PEOPLE are selling their flocks and before long, eggs and broilers are both bound to get scarcer, and, of course, higher. Now is the time to order chicks. They will make you some money this summer.

If you are planning to bring us eggs for Custom Hatching, better do it AT ONCE, as we plan to stop setting custom eggs soon.

Judd's Hatchery

Planting seeds this year are not low in price. In fact they are too high to take chances on anything but TESTED seed. All our planting seeds are tested and tagged by the State Department of Agriculture. The tag shows exact weight, and germination and purity tests of each sack. You can't go wrong.

News from Boys in Service

(Continued from front page)

remember me but I have met you and my Dad and Mother live in Silverton. I live in Tullia but graduated from Silverton High School in 1927 and I have a lot of friends

there. I would like to hear from all of them. After spending a few months in the New Guinea jungles I can really appreciate the good old U. S. A. and especially the Panhandle of Texas, my home.

I get the Silverton paper and really enjoy it. Especially News from the boys overseas. I notice where John Harris has met up with a Evans boy from Tullia, that

I know. I know that they are somewhere close and would sure like to get in touch with them. If you are allowed to print my address I would appreciate it, (Sorry we aren't allowed to give addresses. Gov't. rule). I would like to hear from all my friends in Silverton and the boys overseas.

I hope you have great prospects for a bumper crop and my best wishes to all of my friends. I know that my Dad and Mother will appreciate this letter, I hear from them very often and I think they are getting my letters O. K.

Best of luck and everything to the people at home and I will really be glad when I can be back among you."

LEN PERKINS writes to Tom Bomar from Africa. "Dear Tom, Just a few lines to let you know I am still kicking. I hope you are well. I haven't had any mail in several days and don't look for any for several more. You remember your brothers middle name the one that was in the store with you? I can't tell you where I am but I think you can guess. How does your wheat look? I wish I could be there to help cut it. But the way things look I won't be. But you can never tell what might happen. As ever Len".

CPL. JAMES E. MINYARD in a letter to Mr and Mrs. Noah Amason says "The package I had written Tom Bomar to send arrived before his letter came, explaining how he secured the fountain pen. I sure want to thank you for lending me the pen and I hope I will be fortunate enough to return and bring the pen back with me. However I did not calculate that it was impossible to buy as common an item as that when I wrote Tom to send the package. Before I left New Caledonia I bought a pen and pencil set at a Post Exchange, the pen was larger than I wanted and my old pen was still holding together so a New Zealand soldier came along and wanted to know if I would sell it,

so I let him have it for what I had paid, then I went to the Post Exchange to get another one that I thought I would like better and they were out.

This is five of these islands I have been stationed since leaving the States, they are all very much alike, from bad to worse.

Since coming overseas in 1942, I have seen several of the hometown boys, Brubs Bomar, Bennett Haley, and Alvie Boyce being the most recent, they are all making it O. K. It has sure been hot the last two days, but it has just the few minutes started to rain, there is only two choices here in weather, either mud or heat.

Some of the men in this organization that have been overseas 2 years, think they will be given a furlough back to the States sometime shortly, so it may work around to where they will get their system worked out to give men who have been over here two years a furlough by the time my two years is in.

Hoping this finds you and family all well, and thanks a lot for the favor, I remain, Sincerely Doc."

BATTLE TRAINING FOR THE MARSHALLS

Army Ordnance battle experience gained in the Aleutian campaign with the crack Seventh Division was put to good use in the Marshall Islands offensive.

Captain R. N. Smith, commanding Pantex Ordnance Plant, Amarillo Texas, cited the fact that Ordnance experts found a stock pile of Jap ammunition on Attu but no gun that could use it. Ordnance officers in New Guinea found a gun but were unable to locate any ammunition for it. Ordnance headquarters in Washington brought ammunition and gun together. Today every combat characteristic of both gun and ammunition is known to Army, Navy and Marine invasion units.

According to a report from Cpt. E. I. Creed of Philadelphia, Japs are particularly skilled in throwing up strong defensive positions,

constructing deadly pill boxes and fox holes of whatever material is at hand.

On Massacre Bay, for example an American company barber was charged by five howling Japs, including one officer wielding a heavy Samauri sword. The barber emptied an Ordnance carbine into the Japs, firing from the hip and killing them all. This same Jap offensive weakness is being exploited today in the Southwest Pacific.

Captain Creed reported that the Japs, despite their simple diet, are physically strong. In the Holtz Bay area, two Japs, one of them suffering from a minor hip wound were cut off from their unit and hiked fourteen days without food except what the barren island offered, in a vain effort to rejoin their company. They were captured by an American patrol.

Japs are very clever in exploiting the battle turns against them, a heavy fog would descend half unition to continue to fight. The same mysterious phenomenon has been frequently noted in the South west Pacific. In various suicide pacts, however, the last Jap frequently loses his nerve and is taken prisoner.

Japs are very clever in exploiting natural advantages. On Attu, a heavy fog would descend half way down the mountains. Japs would follow the fog down. They could see the Americans but could not be seen by them. Japs are today exploiting jungle and atoll conditions to the maximum extent.

The Japs have devised many attractive booby traps that have a certain nuisance value. One such item is a small black box containing an explosive charge. It is six inches long and nearly an inch in diameter, and has a small parachute attachment. White Jap lettering on the box carries a "hands off" warning — an example of Jap humor.

The Japs covered the whole east area of Holtz Bay with attractive booby traps. They are employing the same tactics in the Southwest Pacific, but our troops are now familiar with the tricks and combat qualities of the treacherous enemy.

The far-reaching tentacles of the usury business in Texas are revealed by the fact that one company has no less than 38 offices in 23 counties, according to Assistant Attorney General Fred Isely, who has been active in fighting the loan shark evil. There are other companies with nearly as many offices and most of these concerns are owned out-of-state and it is extremely difficult, if not impossible, to get service on them in case a victim wants to bring suit. The sharks take in millions of dollars in exhorbinat interest

but immediately siphon most of it out of Texas so there won't be a substantial amount of assets on hand to levy on, in case of a suit — and also so they won't have to pay taxes to our cities, counties, and State on their huge "take."

To move an American armored division by rail, with its approximately 3700 odd vehicles, required 75 trains and 2,700 cars. To move it overseas with its reserve complement of equipment and spare parts supplies requires at least 15 Liberty ships, in addition to the necessary troop ships.

Nine hundred spare parts are needed to keep each General Sherman Army Ordnance tank in operation for a year. These spare parts are calculated in sets, one set

being the number of parts required to service 100 tanks in the field for a year. The shipment of a complete set of 90,000 spare parts required 16 fully loaded freighters. Nearly 2,000 boxes and bundles are required to crate a single set, and more than four miles of strapping are needed to bind them securely.
