1947 County Fair Plans Near Completion

Last Rites Held for J. W. Kendrick Sunday

Funeral services for J. W. Kendrick were held here Sunday afternoon at 3:30 P. M. in the First Baptist church of this city. Mr. Kendrick died in Ralls as a result of a lingering illness.

Thirty Days of Weed-Killing In Hale County

Hale County, Texas, has added another month-long observation to the list. This time it's Weed Control Month which has just been observed during August.

1948 Wheat Crop Prospects Can Be Brighter White Says

Even though the prospects for a wheat crop in 1948 are not bright, the farmers of this section cannot afford to wait until the last minute to locate planting seed.

New Sidewalk to Be on North End Of "Main Drag"

The "main drag" (street) of Silverton will be somewhat adorned probably the latter part of this week, when E. A. Bellinger of Bellinger's Dry Goods and Virgil Ballard of Ballard Drug are planning to put new sidewalks that extend to the curb of the street in the fronts of their buildings.

First County Fair in Ten Years to Be Held Here September 19-20; Exhibitors Information Given

Nelda Montague Named National Dog Week Chairman Here

Girl Scout Leader Miss Nelda Montague of Silverton will head up this community's observance of National Dog Week, September 21-27, according to an announcement received here from National Dog Week headquarters in New York City.

FARM MARKETS SWING OF THE SOUTHWEST

Southwest farm markets sold generally firm to higher last week, with cotton and some cattle classes the major exceptions.

Prizes Totalling More than \$300.00 To Be Awarded

With the approaching Briscoe County Fair which is to be the center of attraction for the folks of this county, and which will be held here on September 19th and 20th, Leo White, general chairman of the association has this week announced the plans for the Fair are nearing completion and that questions regarding exhibits are already beginning to come in.

Precautions Should Be Taken To Guard Child's Ears

The child who cannot hear is badly handicapped. Hard-of-hearing children are often considered backward and become greatly retarded in school when in reality they may be highly intelligent but simply cannot hear much of what is said to them.

High School Pep Squad Selects Leaders Monday

The High School Pep Squad girls met Monday, September 8, to elect their leaders and the styles of their uniforms.

Donkey Ball Game To Be Played Here Tonight

A donkey softball game, sponsored by the local veterans posts will be played in Silverton tonight, it was reported to the News this week by Gordon Fore manager of the affair.

Rock Creek Voters Vote to Sell Rock Creek School

In the election held last Saturday at Rock Creek to determine whether or not the Rock Creek School house would be sold, citizens of that community voted to sell, it was reported to the News this week.

Junior Ball Club Beats Quitaque In Game Last Week

In a scheduled game last Thursday night between the Silverton Juniors and a powerful Quitaque team, the Silverton boys chalked up top honors over the boys under the hill to the tune of 24 to 4.

Rock Creek Voters Vote to Sell Rock Creek School

Believed to be accurate, but unofficially, the tabulation was given as follows: 15 for selling the school with only 9 against.

Exhibits

The local Veterans hall being the scene of the fair, all exhibits must not be brought in until the morning of September 19th and all exhibits must be in their places in the building by 10:00 o'clock on the same morning.

Plans to Secure Doctor Continue; Meeting Held

The doctors meeting of merchants and towns people which was called off in last week's edition of the News was "called on" on Wednesday night of this week when several citizens of the community—business men and others—met in the local high school to further discuss plans for the securing of a doctor for this community.

Plans to Secure Doctor Continue; Meeting Held

No definite plans were completed in regard to the aforementioned but committees were appointed to look into the situation and make a report at the next meeting of the committee which is scheduled to be held Saturday afternoon in the courthouse.

Texas Tech Purchases Two Registered Mares

Purchase of two registered mares as foundation animals for the establishment of a quarter horse stud at Texas Technological College, has been announced by Dean of Agriculture W. L. Stangel.

Expression and Personality Class To Be Started

According to an announcement received by the News this week, Mrs. Wm. F. Talley will start her Expression and Personality Singing Class next Monday, September 15.

NOTICE TO LADIES OF FIRST BAPTIST CHURCH

Buckner's Orphan Home is making a call for the following things, which you may bring or send to the Church by next Monday, Sept. 15th.

WELCOME, NEW SUBSCRIBERS

We welcome the following and renewal subscribers to the News this week. No restrictions are placed on weekly news subscribers, so if you are now a subscriber, we hereby invite you to become one:

PERSONAL ITEMS OF LOCAL INTEREST

Mr. and Mrs. J. W. McCracken went to San Angelo last Sunday. J. W. returned home Monday. Mrs. McCracken remained for a longer stay.

PERSONAL ITEMS OF LOCAL INTEREST

Jackie McDaniel left last week for Albuquerque, New Mexico to take his physical for the Army.

PERSONAL ITEMS OF LOCAL INTEREST

D. H. Yancy went to House, N. M. last week, where he will make his home with his daughter, Mr. and Mrs. L. V. Vaughan.

PERSONAL ITEMS OF LOCAL INTEREST

J. D. Taylor of Dimmitt visited in the home of Mr. and Mrs. C. E. Anderson and daughter last week. Mrs. Anderson is a sister to Mr. Taylor.

PERSONAL ITEMS OF LOCAL INTEREST

Prizes will be awarded to the first three places for the following livestock exhibits: Dairy Cattle—(Jerseys)—Four divisions. Females, under and over two years of age and Males under and over two years of age.

Those Price Tags . . .

Don't look to your retailer to put into effect major price reductions that people are always talking about and which never occur.

Retailers, large and small, chain and independent, dealing in every kind of commodity, have fought one of the most aggressive battles against price inflation. They are on the firing line—they get every consumer complaint and have an intimate understanding of consumer economic problems. They have used every weapon in their arsenal to hold price increases to the minimum.

But that arsenal is limited. Retailers must pay the going price for goods at wholesale. Like all other business, they must carry heavily increased overhead, in the form of higher wages, rents, taxes, supplies, and everything else. They must earn some kind of profit or go to the wall. What they have done is to cut their unit profits to a low figure, and kept down expenses to the limit of their ability. That has saved American consumers untold millions of dollars, and will save them millions more in the future.

Retailers will reduce prices if—and when—wholesale prices and the unavoidable costs of running a store come down. Competition, which grows stiffer every day as more and more goods are produced and the "easy money" dwindles, will take care of that. The price tags on the goods you buy are an honest reflection of today's conditions. Your retailer is not a magician—but remember that he is doing a fine job in providing you with what you want at the lowest price now possible.

Behind The Scenes in AMERICAN BUSINESS

By REYNOLDS KNIGHT

NOTE TO READERS—The information contained in this weekly summary of happenings in the world of business and industry has been obtained from sources we consider reliable but is not guaranteed. Opinions and forecasts are based upon careful analysis but are subject to change without notice.

—The Editor.
NEW YORK, Sept. 8.—The theory that the laborer should be worthy of his hire got a postwar endorsement from a rather unusual source in Great Britain on Labor Day. Britain's trade unions celebrated Labor Day by endorsing the principle that higher wages, shorter hours and improved working conditions must be paid for by hard work and greater productivity. In a nation struggling for survival, the stretch-out and the slow-down tend to grease the economic skids rather than apply the brakes, England's union leaders have conceded. Their Labor Day resolution, adopted by the Trades Union Congress, called upon mine workers primarily for "an immediate and substantial output," but union leaders pointed out that the resolution in a broader sense "is a signpost to every trade unionist to work harder."

EUROPE'S HOPE—The small farmer is Europe's principal hope for more food, Joseph W. Frazer, famed industrialist, reported as he stepped off the Queen Mary recently. Frazer should know. As head of Graham-Paige Motors Corporation, he is responsible for the first mass-production of the rototiller, the small farm implement that plows, discs, harrows, in one operation. Frazer went to Europe to see about reported new advances in the design of the machine, which is a Swiss invention. He found a bountiful harvest in France, Belgium and Switzerland, where good weather had come to the aid of the crops. But much of the yield must go to feed the farm animals, said Frazer. European farms have not achieved anything near the mechanization we consider essential. The noted industrialist was not optimistic about England. There he found all kinds of government edicts—getting in the way of increased food production. But everywhere he found Europeans willing to part with scarce dollars for the thing they need most desperately—farm machinery.

THINGS TO COME—New millimeter sound movie projector housed in aluminum is 52 per cent lighter and 69 per cent smaller than comparable machines . . . Fly ash from industrial smokestacks, long a nuisance in manufacturing areas, is combined with formerly useless slag from soft coal furnaces to make a new type of building brick . . . Boudoir luxury climbs two more points with introduction of a folding sunlamp for the head of the bed and an electrical footwarmer for chilled tootsies . . . An air purifier that automatically destroys harmful bacteria and removes unpleasant household odors has been developed by a Chicago manufacturer . . . Plastic signs said to be free from reflections are announced by a New Jersey manufacturer . . . Neatest trick of the year is a tomato slicer that retains the juice while slicing evenly . . . A new paint made with synthetic resin dries in less than half an hour and is said to have the durability and finish of high class oil paints.

parently are not satisfied with possessing the world's most completely equipped and modern factories. Now they are converting their homes into well-equipped miniature factories. A most 1,000,000 American homes—60 per cent more than before the war—are now stocked with modern workshops, says R. R. Zisette, general sales manager of SKF Industries, Inc. in a report on production of small anti-friction bearings for workshop equipment. More than 80 per cent of the people now building homes specify home workshops in their original plans, he says, whereas a decade ago only 10 per cent of the nation's home owners were interested in such units. The sudden popularity of the home workshop stems from such factors as high building costs and material shortages, technical and manual skills acquired by thousands during the war, and the development of a whole new line of portable power tools, including jig saws, spindle lathes and motor-driven bench saws. The result is a "do-it-yourself movement," says Zisette, with the new tools transforming such hobbies as cabinet making, antique finishing and light building chores into skilled avocations.

prices, now at a new postwar high, are nearly two per cent above a month ago and nearly 20 per cent above a year ago . . . A Janesville Wisconsin, manufacturing plant paid 40 per cent of its employees' salaries in Mexican pesos recently to illustrate the value of foreign trade . . . Steel shortages and plant-wide shut-downs for vacations dropped July production below June levels in most industries . . . American life insurance companies increased their investments in American industries and business by 26 per cent over a year ago, during the first half of 1947 . . . California's huge grape crop this year may make raisins one of your most economical foods . . . During the year ended June 30, the United States shipped more than 33 million tons of coal abroad to become the world's greatest coal-exporting nation replacing Britain. Failure of England and Germany to come close to their prewar production put the job of supplying foreign coal largely up to America.

Last year, each farmer in the United States spent an average of \$270 on clothing for himself and his family.

Why take any chances on not having your equipment in good running order next season when you can have it all fixed up now. That's our business—expert repairs on any tractor, implement or tool used in farming. We have the mechanics, the special shop equipment and a big stock of genuine IHC parts to do your work right.

The main thing is to give us a little advance notice when you tan. Most of the time our shop is swamped but when we know ahead of time we can schedule your jobs and have your machines ready when you want them.

Just give us a ring. Then when you're coming in, on the next trip, load up your tractor or any other piece of equipment and drop it off here. You'll find our service as good as the McCormick-Deering machines we sell. Our prices are reasonable. And we guarantee your satisfaction.

Big engines... long trains

mean lower cost to you

But union leaders want "half-trains"—double crews

Big locomotives are built to do a big job in the big country which is America—a big job in peacetime as in wartime. They are built to pull long trains.

Long freight trains can handle more goods at less cost—to you—than short trains.

Long trains mean fewer trains—fewer chances for accidents—fewer interruptions to traffic.

But a few railroad union leaders oppose long trains—among their current 44 demands for changes in rules is one limiting the length of freight trains to 57 average cars. Why do they demand this?

For "safety," they say. But is it? Government figures show definitely that long trains mean greater safety for railroad employees and public alike.

Then, if safety is not the real reason, what is the reason behind this demand? It is to make more jobs which are needed—to get more pay! This "work" would be sheer waste. Think of modern locomotives using only half the power.

For this waste, you—the public—must have to pay. Higher costs mean a lower standard of living for everybody. Everybody wants that!

Here's the record . . .

In the quarter century . . . 1921-1946 . . .

Average length of freight trains has gone up	39%
Average speed of freight trains has gone up	39%
The rate of injuries to railroad employees has gone down	60%
Average wages paid railroad workers have gone up	84%
Price of railroad materials and supplies has gone up	58%
Railroad taxes have gone up	76%
But the average charge by railroads for hauling a ton of freight one mile has gone down	23%

Meat Cookery

Most common of these is grinding; other processes include cubing, scoring and pounding.

The most familiar example, says this authority, is ground beef—made from thrifty less-tender cuts of beef, such as chuck shank neck and brisket.

These cuts ordinarily have to be cooked with moisture to make them appetizingly tender. But after they have been ground, they are prepared quite differently. Ground beef may then be made into meat loaf and roasted; or

made into patties to be broiled or panbroiled. These cooking methods use dry heat.

Also, by using these methods, cooking time required is considerably less than it would be if the meat were not ground.

Ingenuous homemakers buy ground meat frequently. By doing so, they can have greater variety in their meals. What's more, asserts Miss Staggs, it is a practical way to make use of the less-demanded cuts of meats which are easy on the budget.

Wheat Farmers Who Know

THESE NEW VARIETIES WILL GROW

Comanche . Westar . Wichita

Were Top Yielders in This Area This Year!

COMANCHE . . . At or near top in all field tests . . . good straw . . . good test weight . . . drought resistant . . . popular with all growers who try it.

WESTAR . . . Consistently high yields . . . similar to Comanche but higher yielding in the Panhandle . . . stands well for combining . . . resistant to leaf rust . . . exceedingly popular in the Panhandle . . .

WICHITA . . . Early . . . equal to Early Blackhall in yields . . . stands much better for combining . . . resistant to drought and disease . . . safest and surest of early varieties . . . large acreages assured in 1948!

Housewives demand quality bread . . . this requires strong gluten . . . beardless varieties have weak gluten . . . flour mills this year stayed out of areas raising beardless wheat . . . they are shipping in outside wheat to strengthen their mix . . . Exports have been heavy and are present outlet for poor baking flour . . . these are apt to be curtailed anytime . . . We must regain our local markets . . . start NOW to find seed of these new high yielding, high quality varieties!

Avoid future discounts. Help improve our local wheat variety reputation. Seed of these new wheats already in heavy demand. See the County Agent or call on us.

SUNDAY SCHOOL LESSON

Cultivating Good Will

LESSON TEXT FOR SEPTEMBER 14
—Proverbs 3:30, 31; 15:1, 18; 22:24, 25; 23:18, 21, 22; 26:20, 21; Matthew 5:9; James 3:17.

MEMORY SELECTION—Blessed are the peacemakers: for they shall be called the children of God.—Matthew 5:9

EDITOR'S NOTE: Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

By WILLIAM CULBERTSON, D. D., Of The Moody Bible Institute, Chicago.

IT IS true that the Christian life gives offense on occasion. When a controversy exists between men and God, the Christian has no other course of action than to align himself on God's side. As he takes his stand in such cases, he should do it in love, but nevertheless with firmness.

The Bible nowhere commends a critical spirit or a perverse attitude. It rather emphasizes the necessity of firmness in the course of right, a firmness that loses nothing of its intensity through being tempered in the fires of love.

The Christian beyond all others should give himself up to a life manifesting sympathy, kindness and charitableness. Thus he will open avenues of opportunity, of witness, and of service in which the Lord may be greatly magnified.

I. Contributing Factors to the Making of Good Will (Prov. 3:30, 31; 22:24, 25; 25:16; 26:20, 21).

VARIANCE and strife mar good will (Prov. 3:30, 31). Notice that this strife is unoccasional. When we strive with men to no purpose; when men have not harmed us, and with bitterness of spirit we turn upon them, we of course forfeit every opportunity to influence them for good.

The man of variance similarly should be passed by. We are not to emulate him; we are not to envy him; we are to choose none of his ways.

A wrathful spirit also mars good will (Prov. 22:24, 25). A man of anger is not to be followed by the child of God. This passage enjoins us to have no friendship with such individuals, for there is danger that we shall learn their ways and their ways will then be a snare to our souls.

Another way in which we mar good will is to be the purveyors of untruth (Prov. 25:18). The false witness is characterized as a large hammer or a sword or a sharp arrow, for he wounds his neighbor, often grievously.

The man or the woman who in gossip has maliciously wounded another loses all opportunity to influence him for God. The cultivation of good will involves the speaking of truth.

Let us with all diligence, with the help of God, banish from our hearts and minds all of these attitudes which harp and mar.

II. Contributing Factors to the Making of Good Will.

IN THE first place, the soft answer of the controlled spirit will establish good will (Prov. 15:1, 18). The soft answer does turn away wrath. The man who is slow to anger appeases strife.

Let us not confuse a soft answer with an unconvincing one, or with that mealy-mouthed procedure that we commonly call double talk. Happy is that man who knows how to present the truth convincingly, who can make men, despite his opposing standards, understand that he has their good at heart. Of course, there is one absolute requisite to such a testimony, and that is a life wholly lived for God.

Another factor in making good will is the act of kindness (Prov. 25:21, 22). This passage, you will remember, is quoted in Romans 12. Here is the opportunity for us, in all matters of personal injury, to place our case in the hands of God rather than to seek revenge. By such acts of kindness, as we trust God, we shall be obeying the Lord; and who knows but that our enemies may thus be turned to him.

A third contributing factor in making good will is that of making peace (Matt. 5:9). So often this business of attempting to make peace is a thankless task, but that thanklessness is only from human sources. So far as God is concerned, he has placed his seal of approval upon every child of his who seeks to lead men into peace with God and to make peace between men.

God speaks of them as being "called" sons of God. It is one thing to be a son of God; it is another thing to be acknowledged as a son of God.

III. The Source of Good Will (James 3:17).

THAT wisdom will be characterized by purity, peaceableness, gentleness, approachableness, mercy, and will be without partiality and without hypocrisy. This wisdom which is from above is guaranteed to those who know him who has been made unto us wisdom (I. Cor. 1:30).

Released by Western Newspaper Union.

LOANS MADE BY SAVINGS AND LOAN ASSOCIATIONS

Austin, Texas, September—Loans for the purchase of homes during July plunged 28 per cent below July 1946 figures in spite of a 27 per cent June-to-July increase, the University of Texas Bureau of Business Research reported.

Data covering lending activities of 119 insured associations throughout Texas reveal that the total number of loans for all purposes registered a 25 per cent monthly decline but reported an

11 per cent drop below the July 1946 mark.

Business Women Support UMT At Annual Conclave

FRENCH LICK, Ind.—Support of universal military training has been voted by the board of directors of the National Federation of Business and Professional Women, which held its annual session here.

The action followed an address by Mrs. Georgia L. Lusk, Democratic Congresswoman from New Mexico, who lost a son in World War II. She pointed out it "is far better to have our sons trained now in peacetime than to wait for emergency conditions."

Nearly 60 per cent of the farms in the United States now have electricity.

The burrow of a prairie dog goes straight down 10 to 15 feet.

Our slogan is double Church gifts for devastated areas.

DAY	BOOK	CHAPTER
Sun.	Acts	8:14-40
Mon.	Acts	9:1-35
Tues.	Acts	9:35-10:23
Wed.	Acts	10:24-11:18
Thurs.	Acts	11:19-12:25
Fri.	Acts	13:1-20
Sat.	Acts	13:31-14:7

Businessmen are shipping the Scriptures by the ton

Starting with less than a dozen gifts in 1816, the American Bible Society last year received hundreds of thousands of individual contributions for copies of the Scriptures, the Bible, and the New Testament.

Today, from every part of the globe, requests for copies of the Scriptures are being received from millions of men, women, and children in devastated areas.

Knowing the great good that has followed

the work of our Missionaries, American businessmen are urging their friends to double their gifts to the American Bible Society—for 130 years a nonprofit organization.

5¢ will pay for a portion of the Scriptures, 20¢ will buy a New Testament, and 50¢ will place a copy of the complete Bible in the hands of someone who is starving for God's Word.

The First Baptist Church The Methodist Church

L. T. D. Club Meets With Mrs. Dillard Scott

The LTD Club met Wednesday, September 3, with Mrs. Dillard Scott. "Guess Whats" were given to Mrs. Ware Fogerson and Mrs. J. W. Lyons, Jr.

Refreshments were served to Mrs. J. W. Lyons, Jr., Mrs. Conrad Alexander, Mrs. Durward Brown, Mrs. Arnold Brown, Mrs. Gatewood Lusk, and Mrs. Ware

Fogerson.

The next meeting will be with Mrs. Conrad Alexander on September 16

Burson Reunion Held in Patton Home Sunday

The J. R. Burson reunion was held at the home of Mr. and Mrs. J. E. Patton Sunday. A fried chicken dinner and supper was enjoyed in the backyard.

Starts Wednesday At The Palace

The entire cast of "Maggie" sets out for game. The Technicolor musical romance includes Jeanne Crain and radio's comedy sensation, Alan Young

Those present were: Mr. and Mrs. J. R. Burson, Maud Dean and Max; Mr. and Mrs. Todd Edd Burson and Terrial, Mr. and Mrs. Guy Whitacre and Val Keene, Mr. and Mrs. Less Weak and Billy, all of Plainview; Mr. and Mrs. Jerry Burson of Mineral Wells; Mr. and Mrs. Grady Burson Jimmy Carl, Lou Ann, and Cheryl of Clayton, New Mexico; Mr. and Mrs. O. Z. Light and Don of Panhandle, Tex.; Mrs. M. K. Bell and Kay of Monrovia, California; Mr. and Mrs. Shelby Haynes and Shirley, Mr. and Mrs. James Patton Pat, J. E. and Jerry, all of Silverton.

The entire family was present except one son-in-law and one granddaughter and husband.

Pictures were made in the afternoon. The occasion was very much enjoyed by everyone.

Senior Girl Scouts Enjoy Swimming Party In Plainview

The Senior Girl Scouts made a trip to Plainview Saturday, Sept. 6, at the country club

Those attending were: the leaders, Mrs. J. W. Brannon, Jr. and Mrs. Billie Wood; the scouts, Marion Arnold, Wanda Garvin, Polly Chitty, Hazel Chitty, Juanita Edwards, Beth Joiner, Betty Dickerson, Betty Gardner, Mary Lou Bellinger, Pat Baird, Betty Marshall, Jo Teeple, Teresa Crass, Joye Brown, La Nell Copeland, Mary Tom Bomar, Nelda Montague, and Lona Stephens; and a few of the mothers, Mrs. Arthur Arnold, Mrs. Edwin Crass, Mrs. Albert Dickerson, Mrs. Raymond Teeple, and Mrs. Earl Brock.

Intermediate Girl Scouts Enjoy Swimming Party

The Intermediate Girl Scouts enjoyed a swimming party and afterwards a lawn supper at the Scott Smith home Monday afternoon.

Those attending were: Kay Steele, Junis Mercer, Shirley Copeland, Frances Elley, Milly Jo Marshall, Anne Brown, Pat Patton Patsy Crass, Mary Dudley, Joni Jo Ballard, Beth Mason, Faith Smith, Mrs. Virgil Ballard and Betty Lou, Mrs. Edwin Crass and Bobby, Mrs. James Patton and the hostess, Mrs. Scott Smith.

George Rampley Honored With Farewell Supper

A farewell supper honoring George Rampley, who left Tuesday for Las Cruces, New Mexico to attend school, was given in the home of Ray and Norma Jo Teeple's grandparents, "Papa Bert and Mama Teeple" in Floydada Monday night, September 8.

Those attending the supper were: Ray Teeple, Nelda Montague, Clifton Stodghill, Betty Dickerson, Jimmie Price, Lona Stephens, Wilton Whitehead, Shirley Haynes, the honoree, George Rampley, and the hostess, Jo Teeple.

All attended the show after the supper.

Mrs. Pleas Visage and Henry McMinn of Lubbock are here at the bedside of their father, W. L. McMinn.

Grover Lee Harris small son of Mr. and Mrs. Berry Harris spent a few days with his grandparents, Mr. and Mrs. Grover Harris near Memphis.

County Fair--

to 1945. Grand champion stallion and grand champion mare. A reining class open to Mares, Stallions and Geldings.

Kid Ponies—Open to any horse under 1000 pounds and ridden by a child under 14 years of age.

General Rules A list of general rules and regulations governing Briscoe County's 1947 Fair will be found in an advertisement of the Association on page four of this week's edition of the News.

Prizes Prizes to be given all first place winners in the livestock exhibits of this years fair will be \$5.00 each. Second prize winners will receive \$2.50 and the winners of the first three places in each division will be awarded ribbons.

Prizes for the best agricultural exhibits will be: \$1.00 first prize; \$.50, second prize; ribbon, third prize. First three places will each receive a ribbon.

Entries "Any exhibitor may enter as many of the various divisions as he chooses, but only one entry will be accepted in each division," fair officials concluded.

FARM MARKET--

Denver. Sows brought mostly \$20 to \$25 and pigs \$20 to \$26.

Slaughter and stocker calves dropped sharply at most southwest markets last week, and cows lost at some places. Common to medium slaughter cows ranged largely from \$12 to \$16, and calves \$13 to \$19. Most good calves sold at \$19.50 to \$22. Common to medium stocker calves brought mostly \$16 to \$18.50.

Shorty Shannon of Tulla was a Silverton visitor Wednesday morning.

Social Security Administration Tells Nothing

Like the daisies, the Social Security Administration won't tell. This Federal agency keeps its mouth shut, and some of the 88,000,000 Americans who hold social security cards would be mighty unhappy if it didn't

Concentrated in the Accounting Operations Division of its Bureau of Old-Age and Survivors Insurance in the Candler Building in Baltimore are more personal facts and figures about more Americans than any other place in the country.

Just how old is your mother-in-law? The Social Security Administration might know but it won't tell. How much did your ex-wife earn last year? The record is there, but only she can get that information—and she already knows.

When the Social Security asks for and gets from a worker the information necessary to set up and identify his account, it pledges itself to regard such information as confidential and to withhold it from all but authorized persons.

The worker whose boss thinks he is ten years younger than he is need have no fear that his secret will come to light. It is guarded from prying eyes at all times of the day and night by guards whose sole job is to keep the records safe.

The Social Security Administration's local office in Amarillo receives requests each week for aid in locating missing husbands, absconding treasurers, and persons who find it easier to move than to pay bills, Manager J. R. Sanderson reports. "In every case," he says, "we must tell the caller that our records are for social security purposes only and that we are not permitted to release any such information. Without such protec-

tion to individuals, we would no longer get the accurate information necessary and we would soon be spending more time furnishing information than we now put on the bookkeeping the law requires."

Washington is known as the "Evergreen State."

1947 Briscoe County Fair SEPTEMBER 19th and 20th

General Rules and Regulations

- Rule No. 1: All agricultural exhibits must be entered by 10:00 A. M. September 19, 1947 and will remain on exhibition until 5:00 P. M. of that day, or until the judging is completed.
Rule No. 2: All livestock entries must be entered by 10:00 A. M. September 20, 1947 and remain on the grounds until the judging of all livestock classes are completed.
Rule No. 3: All crop exhibits that compete for prizes must be produced in Briscoe County and harvested in 1947.
Rule No. 4: All livestock exhibits that compete for prizes must be owned by a resident of Briscoe County excepting such cases where rule five (Rule No. 5) is applicable.
Rule No. 5: Members of 4-H Clubs and FFA Chapters in Briscoe County are eligible to compete for prizes with the approval of the County Agent or the Vocational Agriculture Teacher.
Rule No. 6: The superintendent of each division reserves the right to refuse any entry that, in his opinion is not worthy of a prize.
Rule No. 7: Any eligible individual will be entitled to enter one (1) and only (1) entry in each lot.

REGULATIONS

In order to have uniform exhibits of agricultural products the following regulations must be followed:

- 1. Each exhibit must be tagged showing the class number, lot number and exhibition number.
2. Cotton Bolls must be in an attractive box to prevent scattering.
3. Grain and seed may be in a closed container, but not sealed.
4. Sheaf grains must be in a bundle three (3) to five (5) inches in diameter and tied in three (3) or more places.
5. All corn exhibits must have shucks removed.
6. Fresh fruit and vegetables should be in an attractive box to prevent scattering.
7. Canned products should be displayed in Quart Containers, however other sizes will not be rejected.
8. Only one container is required to make an entry.

Oil Business Statewide Industry In Texas

The oil business is literally a statewide industry in Texas where billions of dollars have been spread across each of its 254 counties which either oil or gas, have had production, or now have land under lease for development. A map prepared by the Texas Mid-Continent Oil and Gas Association shows actual oil and gas production in 172 counties. Sixty-eight counties, now without production, have leasing and development activities in progress. The other fourteen counties which once produced are no longer in production.

that since 1919 more than two and one-half billion dollars have been paid—chiefly to farmers and ranchers—for bonuses, rentals, and royalties.

These payments in 1946 totaled \$248,108,000, which is equivalent to 18c for every dollar of Texas farm and livestock income, according to the survey.

The association estimated there are 169,560 owners of royalties in Texas, which has 58,232,557 acres, or 34.4 per cent, of its land surface under lease. There are now approximately 28,900 producing leases of which 12,700 produce gas, the Association reported.

Farm real estate values for the country as a whole increased two percent during the four months ending July 1, 1947.

The Association's study showed

Civil Service Announces Exam For Economists

The U. S. Civil Service Commission this week announced an examination for filling Economist positions in Washington, D. C., and nearby Virginia and Maryland, at salaries ranging from \$3,397 to \$5,905 a year.

No written test will be given competitors for these positions. To qualify, they must have had from 5 to 7 years of responsible experience in economic research, part of which must have been in a specialized branch of economics. Study in a college or university of recognized standing may be substituted for part or all of the required experience for the two lower salary grades, and for part of the experience required for the two higher grades.

Further information and application forms may be secured from the U. S. Civil Service Commission, Washington 25 D. C., from most first- and second-class post offices, and from the U. S. Civil Service regional offices. Applications must be received in the Commission's Washington office not later than September 30, 1947.

The sea's temperature at one point off Alaska is 18 degrees warmer 20 fathoms down than it is at the surface.

W. A. Stephens, cooperater of the local Cap Rock Soil Conservation District, who lives seven miles south of Silverton, is planting his improved pasture this week. Mr. Stephens is planting a mixture of Smooth brome grass, perennial rye, orchard grass, hairy vetch, and alfalfa. The land has been summer fallowed and is being drilled with the slope to make irrigation easier.

Joe Mercer, cooperater living in the Mercer Conservation Group is busy this week leveling on a 50 acre field. He is using a crawler type tractor and a 6 yard Eversman land lever.

Benecer Long and Jake Honea are putting down new wells southwest of Silverton.

Reed Lawson, farming in the Gregg Conservation Group, plans to drill a well soon. Mr. Lawson is a cooperater with the local Soil Conservation District.

Many Young People Attended Church Camps This Summer

Some half million young people attended 3,000 church camps and conferences during the past summer in the United States and Canada, according to Dr. Roy G. Ross, general secretary of the International Council of Religious Education, which represents 90 per cent of American Protestantism in educational work.

Although only a fairly recent development, denominational camps going back to about 1918, summer camps have become a very important phase of the church's program for inspiring her outstanding youth with ideals of Christian service and educating them for their tasks.

"Camps have done more to

In Navasota, there is the Tumble Inn.

And the Meyer Hotel of Comfort urges, "Rest in Comfort." And, speaking of signs, one of the oddest I ever saw was over a country store and it read, "Why go elsewhere to be robbed?"

In San Angelo, the B & H Grill has a sign, "Capacity 1,000—14 at a time." Also in San Angelo, there is this sign, "We will tan your hide." It is a leather shop, of course.

Coming into Seguin from Cuero, I couldn't see a highway sign telling how to get to New Braunfels, so I stopped, got the information and ate breakfast. I guess the State Highway Department figured I'd be hungry, anyhow.

And as I entered Fredericksburg there was no sign telling how to get to Mason. So I stopped again and got the information at a bakery shop and bought some coffee cake. They bake mighty good coffee cake in Fredericksburg.

This column has been appearing for over nine years. Countless individuals and towns have been mentioned favorably—yet the "thank-you" letters could be counted on the fingers of your two hands. What prompts this comment is that the proprietor of El Sombrero, the quaint-looking roadside cafe at Bangs, wrote a letter after the place was mentioned in this space and invited your columnist to drop by and have a bowl of chili.

How to succeed as a writer: Just keep alive long enough and observe as you go along; remember what you observe—and then write it.

change the lives of the young people who have attended them, especially in enlisting them for Christian leadership, than any other single factor of the church's program," Dr. Ross claimed.

The reasons for their great influence are, according to Dr. Ross: (1) The opportunity which they give youth for fellowship with other young people of high ideals, thus helping them to feel a part of a large and significant movement of serious Christian youth. (2) The close association with noted leaders who symbolize their own opportunities for significant service. (3) The opportunity to think seriously about the current problems which face Christian youth in their everyday thought and activities.

Although summer camps have until recently been primarily for youth from about 12 to 25 years, other age groups now have their camps in large numbers. Children, adult, and family camps are now multiplying rapidly.

Even for young people there are new developments. Work camps, caravans, relief projects, students working in industry, government, agriculture, and cooperatives are among the many other types of new summer opportunities which churches are providing for their youth.

The value of the linen in Buckingham Palace has been figured at \$40,000.

An acre was originally the area that could be plowed by a yoke of oxen in a day.

Britain faces a raincoat scarcity.

Partial Skeletons of Prehistoric Animals Brought To Tech

Partial skeletons of three types of dinosaurs and a prehistoric turtle have been brought to the West Texas museum at Texas Technological College by Wann Langston, geology instructor, who headed an expedition into the Big Bend National Park where the fossils were discovered this summer.

The collection is composed entirely of creatures of the Upper Cretaceous age, which closed about 60 million years ago, Langston stated. Bones collected include leg bones and a few vertebrae of the hadrosaur or "duckbill dinosaur", a hind limb and partial foot of a ceratopsian or "horned dinosaur", and a number of large limb bones of saurapod dinosaurs, in addition to the turtle which has not yet been identified.

The bones will not be on display for several months since mounting is a slow process, Langston stated.

The "duckbill" type dinosaurs ranged in length from 10 to 30 feet and were characterized by peculiar construction of the head, which bears considerable resemblance to the head of the present-day duck. One specimen may have as many as 1000 teeth, and two excellent "mummies" have shown that the feet were webbed.

Among the most bizarre of all dinosaurs, the "horned" species ranged from 10 to 30 feet in length and unlike most dinosaurs, had huge heads, with the heads of some 30-foot specimens measuring 10 feet long. The saurapod type, largest land animal ever known, had an absurdly small head. An 80-foot specimen's head might measure as little as one and one-half feet. Two saurapod limb bones collected this summer were more than five feet long and in the fossil state weighed more than 600 pounds each, Langston stated.

In 1945-46, about 4,000,000 pieces were added to the Library of Congress collection.

Veterans' News

World War II veterans entering any type of farm training under the GI Bill after September 1 will be enrolled in training courses which combine classroom instruction with practical farming, VA has announced.

Known as institutional on-farm

training, the program will be considered full time training under the provisions of Public Law 377 recently signed by President Truman.

The course will be considered full time when it consists of at least 200 hours of group classroom instruction per year at an accredited training institution, combined with supervised work experience on a farm or other agricultural establishment.

In addition, a veteran must receive at least 100 hours of individual instruction each year, 50 of which must be on the farm, by his classroom instructor who is re-

FARM FACTS WORTH KNOWING

Q. Will treating alfalfa with DDT greatly increase the seed yield?

A. Yes, DDT is effective against alfalfa weevil and Lygus bug, and control of them will greatly increase the seed yield. The Wyoming agricultural extension service announced the following results from a plot treated with a 10% solution of DDT compared to an untreated or check plot:

No. 1 Seed	No. 2 Seed
Yield per acre of treated plot . . . 126.0 lbs.	14.0 lbs.
Yield per acre of untreated plot . . . 86.6 lbs.	14.5 lbs.

Q. How much feed does it take to produce a dozen eggs?

A. This will vary with annual egg production, and birds bred for high egg production will naturally require less feed per dozen eggs than producing breeds. Figures from a New York egg laying contest for 1945-46 give the following averages on the amount of feed required to produce a dozen eggs:

Leghorns	5.5 lbs.
R. I. Reds	5.8 lbs.
New Hampshires	6.7 lbs.
Barred Rocks	6.9 lbs.

Q. Is it good practice to wean young rabbits at six weeks of age?

A. Yes. At the Ralston Purina Research Rabbitry young rabbits taken from the doe at six weeks of age. Weaning young at this age has proved entirely satisfactory. The does are bred 21 days after kindling and are in condition to kindle again about 10 days after the previous litter is weaned. This practice results in more young rabbits per year, more pounds of meat, and less cost per pound.

Q. Has anything been done to control sex of calves from cows bred by artificial insemination?

A. Many experiments have been made on this, but so far all have proved a failure. A study of the sex ratio of cattle from 15,579 births showed that the number of males and females was almost equal.

Advise Immediate Steps To Protect Fall Pigs

With the farrowing season just a few weeks away, livestock health authorities are urging swine producers to make preparations now for the care of fall litters—in order to prevent another "baby pig blitz" like the one of last spring.

According to these authorities, swine growers can save themselves a lot of headaches this fall by looking after the following things at once:

"Provide pig brooders or a means of artificial hating to prevent chilling—sometimes a cause of extensive losses;

"Construct guard rails to prevent overlaying or crushing of pigs by the sow;

"Feed the sow a nutritionally balanced ration that contains 15 percent of alfalfa;

"Supplement the ration with nicotinic acid if a large amount of corn is being fed."

They also recommend routine blood testing of herds to detect swine brucellosis, a disease known to cause widespread pig losses.

FARM AND FACTORY

Farm mechanization in the South has been stepped up with invention of a revolutionary new peanut planter. It puts seeds into the ground at the rate of 40 a second, while moving down the rows at nine miles an hour under tractor power. The planter can be rigged to seed several rows in a sweep.

Latest thing for duck hunters is a recently patented wing-flapping head-shaking decoy. The decoy is moored to an anchor. Resting on the bottom the anchor weight causes the wings to flap as the body rises and falls with the waves, while a ball-bearing arrangement turns the duck's head.

Automatic bedroom night light has been patented by Californian. It operates by a current-breaking mechanism which turns on a seven-watt bulb when weights lifted from the bed. It is adjustable to any weight by a switch, and attaches to the leg of the bed.

Self-propelled mechanical four-row corn picker was recently patented by Illinois farmer.

Every sixth wedding in South Africa now ends in divorce.

Asia, the world's largest continent, covers 17,000,000 square miles.

ARMY NEWS FROM HERE & THERE

War Brides Passage The War Department has announced that war brides of Armed Forces personnel, who have refused passage to the United States arranged by the Army to join their husbands, will not be offered another opportunity to use Army facilities for their passage to the United States and will in the future have to arrange their own passage at their own expense for which they will not receive reimbursement. The program for bringing approximately 1,260 war brides and children from the United Kingdom to the United States is moving slowly because brides are not taking advantage of Army transportation arrangements. Shipping space for 200 United Kingdom brides is available each month on United States ships.

Seek More Pilots Additional qualified pilots are needed to fly the 780 latest-type observation and liaison planes assigned to National Guard ground units. More than 700 vacancies exist and qualified pilots, particularly former AAF pilots who can pass Class I or II physical examinations will be commissioned and authorized up to 100 hours flying time annually. Non-flyers meeting necessary physical and other requirements may be chosen for pilot training. Those accepted will undergo an eight and one-half month course at Fort Sill, Oklahoma, and San Marcos, Texas.

Enlisted Discharge Policy Enlisted personnel returning from overseas, who have 60 days or less of effective service remaining in their enlistment and who declare their intention not to reenlist, will be discharged for the convenience of the government, according to a recent War Department announcement.

Select Schools Before Enlistment A vital part of the Army's post-war program will be completed in the next two weeks when the United States Army will join the United States Air Force in offering high school graduates the opportunity to select the technical training they wish before they en-

ter the service. This pre-selection plan, announced recently by the War Department, will become effective September 15th. A similar program begun by the U. S. Air Force in June is already attracting graduates at the rate of more than 1000 per month. Local Recruiting Offices will have the full details of the plan.

One hundred, sixty-seven buildings of various types, with an acquisition cost of approximately \$2,000,000, will be sold through simple sales methods at Big Spring Army Airfield at Big Spring, Texas, September 30. It has been announced by War Assets Administration's Office of Real Property Disposal. The structures are offered to "the general public" together with all the fixtures they contain with "no red tape involved", it was said. Included are barracks, administration, warehouse and repair houses. Prospective buyers are urged to visit the field, procure listings of the buildings, make their inspections between September 18 to 29 and attend the sale on September 30, bid, pay for the desired structure, move it intact or dismantle it. No priority will be required. There will be no delay and any one can buy

Mail order sales of war surplus have been stepped up rather than slowed down by declining inventories, records in the Grand Prairie War Assets Administration's Customer Service Center indicate. The Center's interregional branch processed sales of goods costing \$133,795.88 for the week ending August 29, it was disclosed. During the same week the branch put through new orders for surplus valued at \$109,274 and accepted orders from other regions for \$53,301 worth of property. The inter-regional branch accepts orders to WAA centers throughout the country and to United States possessions abroad.

Radial and press drills, high duty grinders, hack saws and pipe benders, all classified as standard in make and readily adjustable to commercial use and for instruction purposes in schools, are tendered for sale through the Customer Service Center of the War Assets Administration at Grand Prairie through September 26. The machinery, which also includes a quantity of rivet machines, lathes and drill bushing, is being offered at fixed prices to priority groups and commercial channels.

More than a million dollars of surplus electronics materials are being allocated to schools and universities throughout the Southwest in a program aimed at saving valuable specialized equipment from the scrap heap and putting it to work in research laboratories and classrooms, it has been announced by the zone office of War Assets Administration at Grand Prairie, Texas. Arkansas, Oklahoma and Louisiana schools, however, already have been allocated approximately 80 per cent of re-

maintaining electronics materials in this region as the result of direct sales and redistribution through the FWA.

Everything from mortuary cabinets to gasoline hose and trenching shovels is included in a fixed price sale of surplus hardware items in a catalog offering of the War Assets Administration at Grand Prairie. Samples of these items may be seen at the Customer Service Center until October 9.

Office equipment ranging from multilith duplicators to typewriter ribbons and desks and chairs will be available as war surplus in this

When the first gusher started the Panhandle's oil boom just 26 years ago, the area we serve became one of the most productive of crude oil in the world! But . . . greater days are yet to come! We have more than one fifth of this nation's reserve . . . still underground! Oil is destined to become even more important to folks in this area in the years to come. We have so much faith in the oil industry—and all other industries we serve, that we are investing 35 million dollars in a building program. This expansion program in our territory will bring more dependable electric service to industry and better living—electrically—to everyone.

A colored spectrum around the moon is caused by small ice crystals existing in high clouds.

Since the period 1935-39, farm land values for the country as a whole have increased 95 percent.

Duck Season Open On November 4

Open seasons for duck hunting in Texas this year will be from November 4 to November 17 and December 16 to December 29, according to the Texas Cooperative Wildlife Research Unit and the Texas A. and M. department of fish and game. Under new regulations of the Department of the Interior, states west of a certain north-south line are allowed to choose either a season of 35 consecutive days or a split season of 14 days each, and Texas has chosen the latter.

Both the hunting season and bag limits have been reduced in order to stem the noticeable decrease in waterfowl which has occurred during the past three years, according to the Secretary of the Interior, who states: "If the sport of wildfowling is to continue, we must regulate the take to less than the season's increase."

Texas, in the Central Flyway, with birds coming from the Canadian and Alaskan breeding grounds is better off than eastern states, the breeding grounds for which are in unfavorable condition.

Daily shooting hours for waterfowl have been reduced to the period from sunrise to one hour before sunset, with hunting not permitted before noon on the opening day of each split season. The duck bag limit has been reduced to four a day, with eight in possession. The daily bag limit for geese or brant in Texas is also four, with only one Canadian or one white-fronted goose. Post season period for possession of migratory game is still 90 days.

Not more than one wood duck may be included in the bag of four. American and red-breasted mergansers may be possessed 25 singly or in the aggregate.

Regulations prohibit taking waterfowl by bait or with live decoys.

Adapt Sandwiches from Tea Table for Summer Fare

Hot weather meals must have more "punch" than winter menus because, as the temperature soars, there is a real need for ideas on foods to pep up lazy appetites.

To get that added punch there are all sorts of ideas that can be employed by the homemaker, according to Reba Staggs, well-known home economist.

A new note in summer food is hearty open-faced sandwiches. Adapted from tea-time fare, these sandwiches are on a much larger and more satisfying scale to appease family appetites. Each is topped with a bit of garnish, such as sliced sharp pickle, stuffed olive, or hard-cooked egg.

Spreading each half of the sandwich with a different filling will provide variety a-plenty for each family member. The sandwiches are served with potato chips on a simple wooden platter, with a tray of crisp relishes as accompaniment.

In making sandwiches from cold cuts, fit slices cut from round loaves of meat on bun halves and slices from square loaves of meat on bread. This adds to the orderly arrangement of the tray.

Meats that may be used include bologna, minced ham, spiced ham, salami, cervelat, jellied beef loaf, pickle-and-pimiento loaf, and cooked ham. Softer loaves, such

as liver sausage, provide a simple delicious topping when mashed and spread on bread. In preparing the sandwiches, spread butter or margarine to the outer edge of each piece of bread or bun before adding topping—a single dry bite detracts from the goodness of the entire sandwich.

A bacon-and-peanut butter filling is something new in sandwich spreads. Toast bread on one side, turn, and spread with peanut butter. Top peanut butter with finely diced bacon (allow 1 slice per sandwich). Broil until bacon is crisp. Egg salad sandwich filling to which cubed cooked ham has been added is another delicious flavor combination.

Nominations For Representative To Advisory Council

Ballots are being mailed to Conference B schools in Region 1 of the University Interscholastic League to secure nominations for a representative to the Legislative Advisory Council to succeed A. L. Faubion, Superintendent of New Deal School, Lubbock, whose term expired August 31.

Nine new council members will be selected in October who will attend the annual meeting November 7 and 8 in Austin where current legislative problems will be discussed by the 24 representatives from every region and conference in the state, according to Roy Bedichek, Director of the League.

Each of the 82 member-schools of Region 1, Conference B, will be notified to mail to the State Office the name of its nominee. Nominations close October 1. Representatives who are eligible are superintendents, high school principals and county superintendents.

In accordance with the provisions of the Constitution, the names of the five leading nominees will be placed on a ballot which is mailed to each school in Region 1, Conference B. Each school has one vote for its choice of the nominees. Ballots returned to the State Office are canvassed and the selection announced.

On the agenda of the November session of the council will be the various suggestions made by administrators, coaches and teachers attending the State Meeting of Delegates during the State Meet.

Recommendations of the Advisory Council involving changes of rules are submitted to the entire membership for a mail-referendum. An eligibility rule so voted must be published one year before it becomes effective.

Five changes recommended at the 1946 meeting of the Advisory Council were adopted as follows: Conference A football state championship; eight-semester rule; prohibition of spring football training; prohibition of the practice of paying coaches from gate receipts; and prohibition of post season games.

The following schools are in Region 1, Conference B:

Ackerly, Adrian, Amherst, Anton, Booker Bovina, Briscoe, Bulla (Enechs), Carey, Channing, Claude, Cooper (Lubbock), Cotton Center, Darrouzett, Dawson (Welch), Dickens, Estelline, Farwell, Flomot, Flower Grove (Ackerly), Follett, Friendship (Wolforth), Girard, Goodnight, Groom, Gruver, Hale Center, Happy, Hart, Hartley, Hedley, Higgins, Idalou, Jayton, Kelton, Kirkland, Klondike (Lamesa), Kress, Lazbuddy, Lella Lake, Loop.

Lorenzo, McAdoo, Meadow, Miami, Mobettie, Morse, Nazereth, New Deal (Lubbock), New Home (Tahoka), Oklahoma (Farwell), Patton Springs (Afton), Peacock, Pep, Pettit, Plains, Quail, Quitaque, Roaring Springs, Robertson (Lorenzo) Roosevelt (Lubbock), Ropesville, Samnorwood, Shallowater, Silverton, Smyer, Spade, Sparenberg, Springlake (Earth), Southland, Stinnett, Stratford, Sunray, Three Way (Maples), Turkey, Ujoan (Brownfield), Union (Lamesa), Vega, Wellman, Whiteface, Whitharral, Wilson.

Tech To Exhibit Livestock At Fair In Lubbock Soon

Texas Technological College will again have an exhibit of representative livestock at the Panhandle South Plains Fair which will be held in Lubbock, September 29 through October 4. The last such exhibit by Tech in 1941 was one of the biggest drawing cards of the Fair.

From 36 to 40 representative animals will be shown, according to Dean W. L. Stangel, head of the Department of Animal Husbandry at Tech. These will include Aberdeen-Angus, Hereford, Jersey, Holstein-Friesian cattle; Duroc, Hampshire, and Poland China hogs; Hampshire, Rambouillet and Southdown sheep; and Angora goats; quarter horses, American Saddle horses, American jacks, Percherons and mules.

The entire exhibit will be housed in the Livestock building on the Fair grounds. None of the animals will compete for prizes.

Other features of the Fair are a giant balloon parade opening day, the Buck Steiner rodeo, midget auto racing and the Bill Hames Shows on the Midway.

Save Round to Braise; Grind Less-Tender Cuts

Homemakers who invariably ask meat retailers for "ground round", when they want ground beef for hamburgers, should consider the merits of other cuts for this purpose, says Reba Staggs, cookery authority.

In the first place she says, round steak is so lean that it needs extra fat ground with it for flavor and juiciness. So in that respect, cuts such as beef chuck or brisket are more suited to making ham-

burgers, because they have fat. She goes on to point out various other cuts make good ground beef, where round steak is ideal for popular dishes as Swiss stuffed round steak, beef fricassee of beef.

About 17 of every 20 arriving in New York harbor oil as fuel.
