## Transportation Is Needed For Farm TOUR

### Texas Highway Commission Pass On Farm Roads

A letter from the Texas Highway Department to the Briscoe County News dated August 15, signed by John Davenport, Administrative Aide, reads in part as follows:

"Enclosed you will find a copy of designation of Farm-to-Market construction just passed by the Texas Highway Commission. This work is to be built under the provisions of Senate Bill 287, passed by the 51st Legislature.

"As this construction is within the county in which your newspaper is located, I have been directed to notify you at once.

"Funds for the roads to be built under Senate Bill 287 will become available in September of this year, but the Commission has taken immediate action to program roads in order to insure quick work as construction funds accrue."

**DESIGNATIONS**

"In Briscoe County the following described roads are hereby designated as Farm to Market Roads subject to the availability of funds under the terms of Senate Bill No. 287 and subject to the condition that Briscoe County will furnish all required right-of-way free of cost to the State:

"From State 86, 4.0 miles west of Silvertown, north and west to Tule Creek Canyon, a distance of approximately 5.0 miles.

"From end F. M. 598 at Francis School south to road intersection, a distance of approximately 2.0 miles.

"Upon acceptance of the provisions of this Order by the proper officials of Briscoe County the State Highway Engineer is directed to proceed with the preparation of plans for construction at an estimated cost of \$53,500.00 and when right-of-way and funds are available to proceed with construction and to assume the roads for maintenance upon completion of construction."

Mr. and Mrs. Ware Fogerson and children spent Sunday in Clovis, New Mexico with relatives.

However, after the scrimmage starts we will know who is going to do what and where and when. Right now it looks like a bonnet full of ??? marks.

Billie Wilson has assumed a fine attitude and he believes that anyone that beats him out for the right half position is going to have to hustle. Billie Tennison has shown some life and will be a top end contender. Ray Savage would well give someone a run for the left tackle slot. And Buford Clemmer is licking his chops over the center position.

Darrell McWilliams seems to have his mind made up about who is going to play left half-back—namely himself. However, Billie Ray Satterfield has his mind made up also, that that is his position. This has possibilities of shaping up into the most bitterly contested position on the team. Both boys are fairly fast and shifty and it may be that the one that is in the best condition will get the call. Donald Rhea, W. Hamilton, Donald Paige, M. Hamilton, and Donald Bean are showing signs of hustle.

Joe Wayne Brooks, a freshman 159 pounder, put himself on the spot by saying that his name is going to come up on the first team. A confidence like this may make it embarrassing for some of the veterans if he beats them out.

Shown above is a group of Central Plains theatre owners and personnel who gathered at the Granada Theatre in Plainview to make plans for the "Texas Takes Care of Its Own" polio fund campaign which has been under way since August 11. Standing, left to right, are C. E. McSwain, Plainview; L. F. Stocker, Dallas; J. B. Prather, Hale Center; J. B. Seale, Lockney; George Reed, Abernathy; J. H. Hotchkiss, Silvertown; seated, left to right, Mrs. George Reed, Abernathy; Mrs. Mamie Love, Abernathy, and Mrs. J. H. Hotchkiss, Tulla.

### Silvertown Theatre Patrons Contribute \$145.48

#### District Commander Deen to Discuss State Veteran's Land Loan

The regular meeting of Silvertown V. F. W. Post will be held at 8:30 p. m., Wednesday night, August 24, at the fire hall. District Commander Deen will attend this meeting to discuss the new State Veteran's Land Loan deal and also to give latest information on the National Service Life Insurance dividends that will be paid to veterans the early part of 1950. This meeting will be of interest to all V. F. W. members, so plan now to attend. Cards will be mailed to members in good standing, the first of next week.

Any veteran who has served over seas can now join the Veterans of Foreign Wars. By paying your dues now you will be a member in good standing the remainder of 1949 and all of 1950. Eligible veterans may contact Travis W. Black or Melvin Yancey for further information. If you served overseas you belong in the V. F. W.

#### FIRST STATE BANK DOES PAVING JOB

The First State Bank has concrete paving and side walk work turned on their property at the Corner of Main and Commerce streets last Friday and Saturday. This piece of work is one of the outstanding jobs of the clean-up program which has been under way for the past several days in Silvertown.

Miss Blanche Thompson visited a few days in the home of her parents, Mr. and Mrs. J. M. Thompson last week, they accompanied her home and they all spent the week end in the home of Mr. and Mrs. Durward Schmidt of Lamesa.

#### ATTEND READING CONFERENCE AT ALPINE, TEXAS

Miss Anna Lee Anderson left last week for Alpine, Texas. She met Miss Mary Kate Campbell of Amarillo in Odessa and they went on to Sul Ross College, where they will attend a conference on reading.

Mr. and Mrs. Judd Donnell and children spent the week end in Canyon with relatives.

### Irrigation and Soil Improvement To Be Observed

#### "Knock On Any Door", Palace Sun. Mon., August 21-22

"Knock on Any Door" is a story with a moral for all men and boys, of all ages. Fathers with sons especially should see this picture.

Knock on any door, and the circumstances of this great picture could be lurking there in one form or another. It is one of the best pictures of this or any season and we predict, when the "Oscars" are handed out, "Knock on Any Door," will be a strong contender. It stars that universal favorite, Humphrey Bogart in his best role to date, and introduces John Derek in a great performance for a new comer. This is not just another gangster picture but a hard hitting portrayal of juvenile delinquency of today. You owe it to yourself to see this one.

#### HERE FROM NEBRASKA

Mr. and Mrs. H. G. Klumpe and family of Hayes Center, Nebraska, were guests of Mr. and Mrs. W. N. West from Thursday until Monday. They all spent Saturday touring the museum and college campus of Canyon. Then were supper guests of Mr. and Mrs. Dock Wallace and family Saturday night.

Mr. and Mrs. Troy Cox left Thursday for Gainesville, Texas where they will visit Mrs. Cox's sister, Mrs. Lila Clark and other relatives.

## A HOME TO LIVE IN

Design D-127. There are two bedrooms, bath, living room and combination kitchen-dining room on the first floor. A rear dormer gives clear eaves providing for two bedrooms on the second floor which could be finished in the future.

The central hall gives this plan exceptional circulation, making it possible to reach all rooms without first passing through any other room and all rooms, on both floors, have cross light and ventilation.

Wardrobe type closets are used, with storage above the hanging space. Linen storage and guest coat closet are in the front hall and there is a closet and laboratory in the rear vestibule.

The kitchen cabinets are on opposite walls with a sink under the window, the range next to the chimney and the refrigerator on the inside wall. A large dining space in the kitchen has cross light.

The exterior is frame construction with siding, and asphalt shingle roof.

The main body of the house is 38 feet by 22 feet with a front bedroom projection of 10'-6" without the porch, the area is 972.5 square feet and the cubage is 22,220 cubic feet.

For further information about the type of construction used, address the Home Building Editor of this newspaper, or see your local lumber dealer.

MRS. M. B. CAVANAUGH IN MINERAL WELLS FOR REST

I know now why she has that broad smile on her face. Maybe it isn't just right to say so, but I feel confident she was thinking all the time how funny it would be to leave me at home while she enjoys a few days rest and vacation in Mineral Wells, Texas with her sister. Well, anyway, the "Briscoe" has to make the mail, so here it is.

### SOME THINGS THAT SHOULD BE ON EVERY DAIRYMAN'S "MUST" LIST

There are certain items that should be on every dairyman's "must" list and one of these, says County Agricultural Agent Leo White, is small grain pastures for fall and winter grazing. Plan at least one acre for each cow in the herd, for it is one way to get more feed for less money and that means lower production costs and more net income.

Silage is another source of cheap feed nutrients so have the silo ready for filling by the time the crop you are growing for silage is ready for harvesting.

In many sections of the state, it will pay you well to supplement the drying pastures with plenty of good quality hay and silage, says Mr. White. Give the cows all they will eat. They will pay you well for it. Summer time isn't over in Texas and chances are good that many pastures will be brown from heat and dry weather before fall grazing crops are available so have the supplements ready.

Herd culling is always in order, says Mr. White. Make the herd fit the feed supply. The same amount of feed produces more

milk when fed to high producing cows, he adds. There is no profit in feeding cows that only pay their board bill. They should be culled.

The mark of an efficient dairy herd is a high average production of milk and butterfat per cow. The efficiency of the breeding program is indicated not only by the high average production, but also by the increasing percentage of uniform high producing females born in the herd each generation and a decreasing number of low producers born each generation. The proved-sire system of breeding, says Mr. White, has demonstrated its worth as a sound method of improving the efficiency of dairy herds. Through artificial breeding associations, services of outstanding bulls are widened and are made available to dairymen who could not otherwise afford to own such animals.

Don't place fruits that you want to ripen in the refrigerator. Soft fruits, such as plums and peaches, should be spread out to ripen. Store on shallow dishes to avoid bruising.

### Milking Machine Clinics Help Farmer and Consumer

Proper operation and care of milking machines, as emphasized particularly during a series of clinics just concluded, soon pays off in terms of better satisfaction among all concerned, including milk consumers.

The clinics, held in all but one of the 67 counties of Pennsylvania, attended by a total of 6153 persons, most of them farmers. Many of them have since reported improved operation of their machines and the production of cleaner milk.

Production of a better grade of milk was the main objective. Discussions centered on quality milk and how to produce it, milk secretion, mastitis prevention, dairy herd management, managed milking, installation and care of milking machines, and washing and sanitizing dairy utensils.

Milk plants have since reported less evidence of mastitis, lowered bacteria counts, less sediment, and better flavor in milk they receive. Farmers say they are saving time in their milking routine, their cows have less udder trouble, and that as a result of the clinics they also expect their machines to last longer. Both dealers and their farmer clientele are better informed on milking machines and their use, and the public is getting better milk.

### Yachts in Britain

There are probably more yachts per head in Britain than in any other country. The British Travel association explains this enthusiasm for the breezy sport with a few facts and statistics. Britain has 5,000 miles of coastline and 2,000 miles or navigable rivers and canals. Hundreds of sheltered estuaries and friendly harbors provide safe anchorage. The sailing season for most starts early in spring and continues through to late fall, though the weather on the whole is so temperate that many sail and live afloat all-year-round. There's seldom a day without a breeze and the British brand of zephyr has its own gentle mischief, sometimes circling the compass in a matter of hours. All yachtsmen love to have a wind with some wit in it.

### Frog Superstitions

From the earliest times superstitions have been associated with the frog. One of the most familiar is the false belief that handling frogs or toads will cause warts. Toads particularly, because of their unlovely form, have been linked with witches brew and magic health and love potions. Actually, instead of being harmful to man, most frogs are extremely useful. Frogs' legs are popular delicacies for civilization's tables, while the poisonous secretions of certain species are much prized by primitive tribes for tipping arrows. Most valuable of all is the common frog's voracious appetite for all sorts of insects that otherwise would wreak damage on farmers' crops.

### Finds Lost Charter

Lost for years, the original charter establishing the Phi Beta Kappa chapter at the University of Cincinnati, the Delta of Ohio, was found almost on the eve of a celebration marking its issuance 50 years ago. The charter turned up during a housecleaning of the university's observatory, located in suburban Mt. Lookout, about eight miles from the campus. It was discovered there by Paul Herget, director of the observatory, who wasn't sure just what the charter was doing at the observatory.

## Aladdin Had His Magic Lamp—But Look at the Crosbys' Dresser!

AT THE BING CROSBYS—where the "menfolk" outnumber Mom five to one—this elegant Welsh dresser is a compromise between a decorative and functional piece of furniture. In the picture at left, Mrs. Crosby's fine pewter gets at least half a chance to arrest appreciative eyes. Gary, Lindsay, Phillip, Dennis and Der Bingle himself rig the dresser this way while televiewing the fights. When the feature bout is over, down comes a movie screen from under the cornice and technicolor cowboys take over the living room, the sound of their six-shooters crackling from the speaker in the right-hand compartment. Of course, Dad is still the favorite minstrel around his own ranch and the family can tune in his programs or play his records from behind other panels in this awesomely versatile unit. When the boys are in bed and Bing has his nose in a book, the dresser's handsome, rustic facade hides away its magical talents and twentieth century spectacle gives way to period charm. These pictures and others made in the home of the music-minded Crosbys flavor two full pages in the August issue of House Beautiful magazine.

### HUBERT DUKE OF HAPPY REALIZES PROFIT FROM USE OF FERTILIZER

The use of fertilizers paid off last year for Hubert Duke of Happy, says Swisher county agent Calvin D. Holcomb.

Duke fertilized four different plots of wheat and in his report to Holcomb he said one plot was fertilized with 400 pounds of ammonium nitrate per acre and from the plot he harvested 48.2 bushels of wheat per acre. On another, he applied 100 pounds per acre of the same fertilizer and harvested 46 bushels per acre. On a third plot, he used 200 pounds of

16-20-0 fertilizer per acre and harvested 45.4 bushels per acre and on the fourth, he used 100 pounds of 16-20-0 per acre and harvested 44.2 bushels per acre. From his check plot, he harvested only 28.2 bushels per acre.

The increased yields paid for the fertilizer and left Duke a very good increase in money income per acre from each of the four applications that he made, says Holcomb. The per acre yield increases ranged from 16 to 20 bushels per acre and a little simple arithmetic shows the money income per acre was increased approximately \$27.50 to \$35.00 per acre. Take off the cost of the

fertilizer, and you still have an excellent return on the investment.

Duke says the ammonium nitrate produced slightly higher yields than the 16-20-0 but that the stalks on the 16-20-0 plots were stronger and this made possible a better combining job.

Fertilizers have been used on the Duke farm for the past four years and he tells Holcomb that its use is becoming a must in his farming operations. He plans to increase his acreage of fertilized crops next year.

## 25 YEARS... on the job

This month marks the 25th anniversary of the day we first went to work for the folks in the Panhandle-Plains-Pecos Valley-Eastern New Mexico area. We say "went to work" because that's exactly what we did.

Our job for the past quarter-century has been to keep pace with the great strides these folks—our customers—have made... agriculturally, industrially, commercially.

We've really enjoyed our work, and we're looking forward to many more pleasant years "on the job" for the area we serve.

### Our 25th Anniversary

In the years to come... as in the past... it is our constant aim to keep pace with the ever-increasing power needs of the vast area we serve... to provide low-cost, dependable electric service for better living—electrically—for everyone.

Hear "HYMNS OF THE WORLD" each Sunday at 12:45 P.M. on YOUR PUBLIC SERVICE COMPANY NETWORK

# SOUTHWESTERN PUBLIC SERVICE COMPANY

25 YEARS OF GOOD CITIZENSHIP AND PUBLIC SERVICE

Home Decoration Ideas Advanced by Specialist

Getting too much design into a single room is the commonest mistake made in home decoration.

If your rug is figured, your walls should be plain, or vice versa. The production of floral and figured designs on the fabric and wallpaper makes it difficult to find plain patterns.

It is always better taste to have too little design in a room than too much. Color may well be the accent instead of over-design. Red and green are two of the smartest colors in 1949 decoration.

The green may be either a deep magnolia tone or a bright Kelly. The new reds are bright tomato or lipstick, rather than wine or burgundy. Gray continues to be a popular choice as are the brown tones cocoa, tobacco, and rich tans. Chartreuse is another accent on the color calendar.

When selecting the color scheme for your upholstered pieces, Mrs. Archer thinks it best to follow a definite plan. If you are using flowered draperies, choose upholstered pieces from the colors represented in the print, not the background color. Your walls or rug can match the background color in a lighter or a deeper tone.

If you decide on one floral upholstered piece, bring out the colors of the print in the other pieces, only remember to use just one patterned upholstered piece. Complement it with a stripe and a solid color and you will have a distinctive color scheme.

Once 'Changeless India' Undergoes Transformation

The face of once "changeless India" is undergoing transformations to tax the most agile map maker. Since the British withdrawal and the establishment of the India and Pakistan dominions, the hundreds of individual prince-ruled states have been literally pulling themselves together.

Numerous unions have been formed among the big and little royal entities whose dazzling courts and maharajas were reminders of the feudal age. Separate states have been merged with neighboring provinces.

Largest of the new Indian coalition is Rajasthan, in the north-central west. Recently inaugurated at Jaipur, capital of one of its 15 states, it covers most of the former British-protected Rajputana agency.

The Rajasthan Union was first organized with ten small and medium-sized states. Lately it was augmented by the larger units of Jodhpur, Bikaner, Jaisalmer, and Jaipur. Within the combined area live some twelve million people, mostly of the Hindu faith.

Both the names Rajasthan, which means "Land of the Kings," and Rajputana, "Land of the Sons of the Rajas," have their roots in the long rule of the Rajputs, descendants of the Aryan warriors who came down from central Asia to conquer the earlier inhabitants.

Pair of Glasses

Seventy million Americans wear eyeglasses today, according to the Better Vision Institute, and every pair of those corrective glasses has been produced by more steps than there are days in the year. It has been computed that as many as 363 different operations and skills may be required for the production of a perfect lens blank alone. And these manifold precise operations constitute only Step One as far as your individual eyeglasses are concerned. From the perfect lens blank must be fashioned the particular combination of curves and powers that will correct your visual faults, as determined by a specialist's analysis of your eyes. Moreover, the lenses must be shaped to suit your features best, and placed before your eyes in exactly the right position to assure maximum efficiency and comfort.

In Days of Charlemagne

Compulsory education, of some sort, was introduced in the Netherlands more than 1,100 years ago by Charlemagne, king of the Franks and emperor of western Europe. Motivated by the sole aim of extending the authority of the church, Charlemagne issued, in 805, a decree stating, "It is everyone's duty to learn the articles of faith, the Lord's prayer and the formulary of baptism. Whoever does not know these must be whipped, or may drink nothing but water, until he knows them by heart. Those who refuse to learn them will be brought before the Emperor. Women, however, must be whipped until they give in."

Greater Steel Production

The steel industry now has more than 400 plants making or finishing iron and steel in 30 states, compared with 360 plants in 27 states in 1938, says the American Iron and Steel Institute. Ten years ago, Florida, Iowa and Utah were not on the steel map. Since then, Florida and Iowa have acquired finished capacity without becoming steel ingot makers. Utah has the Geneva plant—built during the war—of U.S. Steel Corp. The state is in fourth place in plate capacity, exceeded by Pennsylvania, Indiana and Illinois.

Plastic Surgery Offers Hope for Mr. 'Big Ears'

Protruding ears, source of innumerable jokes and subject of many a schoolyard razzing, are as unnecessary as the external ear itself, Dr. Oscar J. Becker, Chicago surgeon and member of the staff of the University of Illinois college of medicine, declares.

Dr. Becker points out that simple plastic surgery can correct protruding ears.

Since little importance can be attached to the function of the auricle (external ear), it is only because of the deleterious psychic effect on the patient that protruding ears assume a clinical importance.

Actually, the external ear in man is undergoing regression, according to the comparative anatomists.

The day may come, he says, when the outside ear may disappear altogether. At least it is in for further trimming. In lower animals, the external ear has the important functions of determining directions of sounds and in protection of the internal auditory mechanism.

"The psychic effects of protruding ears vary with the sensitivity of the individual," the doctor says.

"In almost all my cases, and surprisingly enough it was marked in children, a feeling of insecurity was evident in these patients, since this deformity, unlike most deformities, produces reactions of mirth in other people."

Acid Found in Clover Linked to Cattle Bloat

Welsh scientists, across the Atlantic, have discovered what may be the missing link in the search for the true cause of bloat in cattle and sheep.

A possibly important trouble-causing factor in bloat cases, according to these investigators, is the "hydrocyanic acid or other cyanogenetic glucosides" found in the leaf juice of certain legumes, such as white clover. These chemicals were shown to cause relaxation and then paralysis of the smooth muscle of the rumen in cattle.

American veterinarians have long acknowledged that bloat is due to a paralysis of the belching mechanism whereby ruminants become unable to expel the gases that form during digestion. However, the prevailing theory has been that unusually large amounts of two poisonous gases—carbon monoxide and hydrogen sulfide—form after legumes are consumed and that it is these poisons which cause the paralysis.

If the Welsh investigators' view is proved correct in further research, the likely explanation of bloat will be that it is caused by the combined action of two different paralyzing agents: poisonous gases naturally formed in the rumen, and hydrocyanic acid or its equivalent naturally present in legumes.

Grazing in Woodlands

Grazing woods provides livestock with little forage and inflicts serious damage to the timber land, says Forest W. Dean, extension forester at Ohio State university. "In a good forest cover, nature has provided one of the most effective covers against soil and water loss," he explains. "Grazing not only destroys young trees but removes this cover as well." Citing studies made in southwestern Wisconsin, Mr. Dean says that from an open pasture, with a slope of 25 to 35 per cent, the water run-off was 20 times as great, and the soil loss was 45 times as great as it was from an ungrazed woods with a slope of 25 to 50 per cent. From a grazed woods, with a slope of 15 to 28 per cent, the water run-off was 56 times as great, and the soil was 112 times as great as from the ungrazed woods. Rainfall on all areas was the same.

Foot-Rot in Cattle

Over two years of professional field experience has emphasized the value of sodium sulfonamides in the treatment of foot rot in cattle, the American Veterinary Medical association has announced. Veterinarians are rapidly abandoning older and more costly methods of handling this stubborn foot disease because the sulfonamide treatment is simpler and more effective in most cases. Skilled use of specially prepared sulfonamide solutions usually brings about relatively prompt recovery following a single treatment and eliminates the need for surgery and bandaging, according to the AVMA.

Something About Hedges

Almost everybody is familiar with the hedge of privet or barberry, but there are many other shrubs which lend themselves to this use. Shrubs which grow close, hold their foliage late and are amenable to being clipped include the various hawthorns, rose of Sharon, European beech, Japanese quince, honey locust, several varieties of honeysuckle, European hornbeam, Cornelian cherry, Russian olive, several kinds of euonymus, mountain currant, five-leaf aralia, and various viburnums. Hornbeam, beech and hawthorn will keep out man and beast.

ENGINEER TEST-ING RED RIVER WATER

URRFICD Secretary Tom Dunbar disclosed this week that an engineer, Robert Doleman, of the U. S. Geological Service is now at work on the Mulberry Fork and on the main stream of Red River near here.

Doleman has set up water-gauges and is testing the flow and purity of water in Red River.

Another engineer, J. O. Erns, of the Geological Surface Water Survey, is working with Doleman, Dunbar said.

This work has been authorized by the Reclamation Bureau, following a meeting in Memphis two weeks ago.

It is the preliminary work for the bureau in deciding upon the advantages of building the proposed dam on the Prairie Dog Town Fork of Red River.

Dunbar said the engineers would be working on Red River for several months before completing their tests. Doleman is staying near the watergauge locations while Erns is working out of Wichita Falls.—The Memphis Democrat.

Texas Tech College Football Players To Report

Football players of Texas Technological college, seeking its ninth Border conference championship and the third in succession this fall, will report for the season September 1.

Coach Dell Morgan and his aids expect a rough fall, with one of the roughest schedules ahead which could be planned. Four Southwest conference opponents, five of the Border conference and Tulsa of the Missouri Valley circuit will be faced.

Twenty-five lettermen will be back, along with several likely transfers and many promising sophomores. But nine key lettermen have been lost from the 1948 champions and coaches see difficulty molding a winning team.

Big Don Williams, letterman tackle, has been shifted too guard to fill a major vacancy. With several good fullbacks, it is expected a shift or two from that post to right halfback will be made to correct another deficiency.

Three ends graduated, but replacements are seen in Dick and Hugh Jackson, brothers from Phillips, both transfers. Jack Davis, Littlefield sophomore, also is expected to help.

Strongest spots for the Red Raiders seem to be at tackle and center. All-Conference Marshall Gettys and John Andrews, starters of last year are back, along with reserves Doug McSwane and Bobby Breyles. Jerrell Price, all-state two years at Brownfield high school, is seen as a stand-out addition at tackle.

Bobby Williams is back at center for his fifth year, bolstered by J. B. Mahler, 1948 letterman, and Aubrey Phillips, 6-4, 225-pound sophomore.

Teach this fall is expected to do more passing, with at least four acceptable chunkers at quarterback.

L. T. D. CLUB MET TUESDAY, AUGUST 9

The L. T. D. Club met Tuesday, August 9. Mrs. J. W. Lyon, Jr. was hostess. Guess whats were given to Mrs. Ware Fogerson and Mrs. Johnnie Lanham.

Refreshments was served to Mrs. Bob Hill, Mrs. Ware Fogerson, Mrs. Arnold Brown, Mrs. Dee McWilliams, Mrs. Johnnie Lanham, Mrs. Coleman Garrison, Mrs. L. D. Griffin and the hostess.

The next meeting of the club will be August 23 with Mrs. Johnnie Lanham.

ENTERTAINED FRIENDS

Mr. and Mrs. Albert Mallow entertained several friends with a supper on the lawn recently. Turkey and all the trimmings were served. After supper 42 was played.

Guests were Mr. and Mrs. Alton Steele, Kay and Jim; Mr. and Mrs. Louie Reithmayer; Mr. and Mrs. Gordon Alexander; Mr. and Mrs. Lee D. Bomar, Joe and Patsy; Mr. and Mrs. Printz Brown; Mr. and Mrs. W. R. Hardin and Joyce; Mr. and Mrs. Henry Price; Mr. and Mrs. Jack Harris and Riley; Mr. and Mrs. George Seaney.

Mr. and Mrs. L. K. Gilkeyson and family visited relatives in Dallas last week.

Mr. and Mrs. Clyde Lightsey spent Sunday with his sister, Mrs. Grace Iron.

Roy Rogers Will Appear at Boy's Ranch Rodeo September 4

Excitement has been running high at Boy's Ranch ever since it was learned that Roy Rogers, the famous screen cowboy, would appear in person at the Boy's Ranch Annual Rodeo, September 4. Dale Evans, Roy's leading lady on the screen and his wife off the screen, will accompany him and appear at the rodeo.

Both Dale and Roy said that they would be more than happy to come to Amarillo for this big event, and insisted on paying their own expenses. They are donating their transportation, expenses, and their time.

Because Roy's famous horse, Trigger, is on location, he will not appear with Roy. But Roy and Dale will be the feature attractions at the Rodeo.

This year, all the boys at the ranch are going to participate, even the little fellows. The youngest ones will try their hand at calf riding on some small yearling calves. Even the 5 year old son of the Superintendent will straddle one of the calves.

The older boys will participate in bronc and steer riding, trick roping and trick riding, ribbon roping, and many other events. From the looks of the number of entries and the number of events, the rodeo this year will be the biggest and best yet.

The date of the Boy's Ranch Rodeo will be September 4th, and it will be held at the Tri-State Fair Grounds in Amarillo. There will be two performances—one in the afternoon and one in the evening. And Roy Rogers and Dale Evans will appear in both of them.

Tickets are on sale now for both performances. The entire proceeds of the rodeo will go to Boy's Ranch. Prize money will be given to the winners of the different events, and Roy Rogers has offered to donate some boots and metal figures of Trigger as additional prizes.

Put a circle around September 4 on your calendar. That's the day of the Fifth Annual Boy's Ranch Rodeo, to be held at the Tri-State Fair Grounds. Remember, Roy Rogers will be there in person.

40 Hour Work Week Becomes Effective September 1

The 40-hour work week, which in effect becomes a 5-day work week, for non-operating railroad workers throughout the nation as a result of the report made December 17, 1948 by a Presidential emergency Board, is to become effective at all Burlington Lines stations in Texas September 1st, according to an announcement issued from the Fort Worth headquarters of Fort Worth and Denver City, and Wichita Valley Railways. Non-operating employees are all of those not directly involved in the movement of trains.

This week, representatives of the management of these railroads are touring the Texas areas served by Burlington Lines, explaining to Chamber of Commerce managers and others concerned the mechanics of the new working arrangement and its effect on service to the public.

Little change will be noticed insofar as passenger service is concerned. About the only difference, one spokesman said, is that travelers from some towns should anticipate the purchase of tickets, and the checking of baggage and express, between Monday and Friday for trips beginning on Saturday or Sunday; however, this will not be necessary at the larger stations.

Customary service will be accorded to United States mail.

Beginning September 3rd all freight stations will be closed to forwarders and receivers of freight on Saturdays as well as on Sundays and holidays; however, at all of the stations where heavy freight movements occur the same arrangements will be made for carload handling and for emergencies on Saturdays that heretofore have obtained on Sundays.

Demurrage and storage rules have been amended to meet this new situation.

Mrs. Lenine Cortese has been away for the past few days on a vacation trip with her brother, father and mother, Mr. and Mrs. Charles Koehler, of Lamesa. They expect to sight see in Colorado, Wyoming and the Yellowstone National Park region.

Dreams for Sale By Old Chinaman At Two Cents Each

SINGAPORE.—Wong, the half-blind consumptive story teller, has a dream for sale.

For 20 years Wong has pierced the sad cold walls of illiteracy in Singapore's Chinatown with the drone of his metallic voice. He sets up his wooden boxes, his kerosene lamp and, for all who care to pay two cents, he is willing to give to his fellow Chinese the magic benefits of his ability to read.

To thousands of illiterate laborers in the overcrowded streets in this island speck at the bottom tip of Asia, Wong is an oasis in a desert of sorrow.

The story of Wong's work is told with sympathy and understanding by Sot Yin Fong, young Chinese feature writer for the Singapore Straits Times.

Sot sat and listened in a smelly back lane (at other times Wong holds court on a temple porch of a traffic island) as the story teller read the news of the day from Chinese language newspapers.

Sometimes as many as 100 gather around. Emergency regulations in this area of turmoil prohibit mass assemblies, but the police understand and tolerate Wong's sessions. Chinese story telling is as old as the colony itself.

Wong spices the news with comments of his own and generally simplifies world events for his backward audience. It is only through Wong's weakened eyes that some poor Chinese keep abreast, not only of momentous events, but also of municipal regulations and government statutes.

In his story telling he talks with few gestures and transports his listeners from the drab, unhappy land of today to the world of Chinese fancy, of ancient wars and adventures, of heroes and fairies.

The poor coolie, sitting in the dim light of a wick lamp, is lifted by his soothing words to consort with the three brother heroes—Kuan-Yu, the fierce god of war, Liu-Pei, the noble-minded emperor, and Chang-Fei, the gallant, impulsive warrior.

He may dream of crossing swords with Tsao-Tsao, that tyrant of tyrants, or making love to that seductive lady, Sable Cicada, whose beauty was the downfall of heroes. He finds himself within the precincts of the many-walled, moated mandarin mansions, sharing the intrigues of an aristocratic family.

Then comes a tap on the shoulder and the genii's voice is stilled as the coolie is asked by the story teller's assistant to pay up the two cents.

Felon Outwits Police; Leaves Jail With Loot

ATLANTIC CITY.—Police were somewhat red-faced when they discovered that a prisoner not only had sneaked out of jail, but took with him \$141 belonging to a cellmate.

Acting Detective Capt. James Pike said it all happened this way:

Twenty-eight-year-old Major Lofston was jailed for brandishing a loaded revolver at another man.

Because the resort jail is crowded, Lofston was placed in a cell with another man, who was getting over some boisterous celebrating.

Lofston managed to sneak from his cellmate's pocket a police receipt for valuables—\$196 in cash—checked at the desk when he was admitted.

Armed with the receipt, Lofston waited for police to change shifts. He hollered for the new turnkey, announced that he was now sober and wanted out.

With his receipt as evidence, Lofston passed himself off as his cellmate, collected \$141, minus \$5 for bail, and walked out a free man.

It wasn't until the morning check-up of prisoners that Lofston's absence was discovered.

Police immediately got busy. They found Lofston at his home, and \$113 in an empty can.

Back to jail went Lofston with two new charges against him—"jailbreak by ruse" and "larceny by trick."

Beavers Get Credit For Conservation Work

BEAR MOUNTAIN, N. Y.—Three pairs of beavers brought to this area in 1920 by the Palisades interstate park commission as an experiment are making it possible for thousands of city families to enjoy outdoor meals beneath canopies of lush green foliage despite the record drought.

Capt. Sterling Gassaway of the Palisades interstate park police said the lakes made at beaver ponds were keeping near-by foliage in excellent condition.

Henry James, administrative director for the park commission, said this was the first large-scale proof of the conservation value of the commission's long range plan for drought protection.

"Depressions from the Ice Age left natural hollows for lakes and ponds," James said. "The beavers were placed near these spots and they dammed up water to form waterholes. The park authorities built twenty-six lakes at such sites and the beavers went ahead to select new natural sites."

Hood Family Hold Reunion Picnic Sunday

The children of Mrs. E. E. Hood, deceased, held a family reunion Sunday, August 14, at the Palo Duro Canyon.

A picnic dinner was enjoyed following which the Hoods entered the Treasure Hunt of the Palo Duro Canyon Boosters Club. Three prizes were awarded their members, one a table lamp, a charm bracelet and a chicken dinner. Lots of fun was had in the hunt.

Those attending the reunion were: J. R. Hood and family, of Port Bary, Louisiana; Mrs. W. R. Raines and family of O'Donnell, Texas; Joe Hood, of Silverton; M. Hood and family, of Silverton; N. B. Hood and family, of Hereford, Texas; Mrs. Ray Howell and son, of Hereford, Texas; Mrs. L. P. Griffin and son, of Granville, Texas; and R. T. Rains and family, of O'Donnell, Texas.

Mr. and Mrs. J. H. Stone of Tonkawa, Oklahoma, visited relatives here Thursday. They had been on a trip to Washington, Oregon, California, and Yellow Stone National Park.

Frigidaire at Simpson Chevrolet Company. 10ffc

W. H. Newman made a trip to Wellington last week, he returned home Saturday with T. W. Davenport of Wellington, who spent a short while here. Mr. Newman reports crops as looking good over the route he made on his trip.

GET MORE POUNDS GAIN FROM YOUR GRAIN AND ROUGHAGE

Balance with PURINA STEER FATENA

You feed cattle to make money... and the more pounds of gain you get from your grain and roughage, generally speaking, the more money you can make.

Feedlot tests prove that Purina Steer Fatena makes grain put on more pounds gain. At the Purina Research Farm it took 117 pounds less grain feed to make 100 pounds of gain than with a single protein supplement. And hundreds of cattle feeders also report top results: proof that Steer Fatena pays off in the feedlot—pays off in saving grain.

So, before you buy feed ask us about Purina Steer Fatena. It's priced right for profit!

**Voters Okay School Tax Rate Bond Assumption by 7 to 1**

Voters of the newly formed McLean Independent School District approved both the tax rate and bond assumption issues by a more than seven to one majority in balloting held last Saturday.

Voting was light, as had been expected, with only 88 qualified taxpaying voters going to the polls.

Except for one ballot being mutilated, the majority for both issues was the same. Seventy-eight voted for the maintenance and bond tax rate, with ten voting against. Seventy seven ballots were cast for the bond assumption, with ten against. In the latter case, one ballot was mutilated, and therefore could not be counted.

The two elections, held simultaneously, were mandatory under the provisions of the Gilmer-Aiken minimum education foundation law, passed at the 51st session of the Texas Legislature. Under the law, consolidations were brought about, and an equalization of tax rates became necessary. Also, it was necessary for outstanding bonds of the districts to be assumed by the newlyformed, larger district.

In the case of the McLean district, the former dormant districts of Liberty, Pleasant Mound, Watkins, Sillet, Huntsman, and a part of Heald, were annexed to the old McLean district. The voters in these incoming districts, as well as the voters of the old McLean district, had to approve a uniform tax rate and assumption of all bonds outstanding in all the districts. The tax rate voted upon was \$1.50 per \$100 valuation, a rate which was already in effect in the old district in McLean. The bonds outstanding included \$122,500 in the old McLean district and \$1,300 in the Skillet district—McLean News.

**WATKINS DEALER WANTED IN THIS AREA!** A real "honest-to-gosh" set-up for right man over 25 and under 55 years of age. If you have car, plenty of ambition, and like to deal with farm customers, don't pass this up as just another ad—it isn't. For details without obligation, write A. Lewis, % The J. R. Watkins Company, Memphis, Tennessee. 30-3tc

**Texas Baptists Will Explain Denominational Education**

In 81 mass meetings, Texas Baptist leaders will blanket the state between August 22 and September 2 to explain the denominational education, hospitalization and evangelization program and the need for a ten million dollar budget next year.

From three to five "Grow With Your Church" rallies, as the meetings are called, are to be held in each of the 17 denominational districts in the state. Baptist churches in about two thirds of the districts will participate in the rallies from August 22-26; the others will meet August 29 September 2.

Teams of eight, composed of well known pastors, representatives of the Woman's Missionary Union, the Brotherhood, Sunday School and Training Union, and other denominational leaders will conduct the one-day meetings.

A ten million dollar budget for the coming year, beginning in November, was recently adopted by the executive board of the Baptist General Convention of Texas. Half of this amount was designated for worldwide causes; the other half, for state causes. The budget will go before the general convention at El Paso in November.

The convention operates nine colleges and universities, one academy, and six hospitals in Texas. There are over 3,000 Baptist churches in the state.

Mr. and Mrs. Wylie Bomar left Thursday for Eureka Springs and other points in Arkansas.

## Only The Blind Get to 'See' Science Items

LONDON.—If you can see, you can't get into the London science museum's popular science exhibition. It's for the blind alone. They "see" with their hands.

The museum thinks it is the first one of its kind anywhere in the world. Officials conceived the idea when a blind boy—surrounded by magnificent exhibits in glass cases—asked what was the good of a museum to him. He couldn't see the exhibits, he said, and he could not touch them. All he could do was listen to a guide.

Officials gave some valuable exhibits to the boy to handle—and took the lesson to heart. Next day they hauled out scores of choice items and arranged them on tables in a special room. The national museum for the blind hastened to provide descriptive labels in Braille. Now the exhibition is thronged every day.

### Housed Wright Plane

The science museum is the one that housed the plane the Wright brothers flew at Kitty Hawk, N.C., in 1903. It was displayed as a prize exhibit from 1928 until last year, when it was sent back to the Smithsonian Institution in Washington.

The exhibition for the blind has everything from a three-foot replica of an ancient Egyptian chariot wheel to the real thing in Spitfire, aircraft engines. There are models of aircraft, locomotives and ships, an old spinning wheel, hand looms, mine rescue apparatus, tuning forks, a 14th century axe. All are strange and wonderful to the sightless.

The Spitfire engine sits ponderously on the floor near the door. The blind go over it lovingly, fingering every bolt. One man, fascinated, put in two hours "looking" at it.

That's what they say—"looking," not "touching."

"Quick, look at this!" blind schoolboys call excitedly to blind companions.

### No Fear of Damage

The museum isn't afraid the exhibits will be damaged. The blind have a feather touch.

"Seeing" the exhibition is a two-handed job. Visitors use their left hand to read the braille description while their right races over the exhibit.

"You wouldn't think a kid could fall in love with a sun-recorder, would you?" an attendant asked, pointing to a blind boy running his hands over the smooth, round glass instrument. The boy snuggled his cheek against it; he still was "looking" much later.

The museum doesn't know how many of Britain's 76,000 blind will visit it. But the exhibition is packed every day. Parties of blind schoolchildren have traveled as far as 80 miles. That's a long way in England.

For blind youngsters, a visit is "better than listening to the circus." That's what one told his mother.

## Ignatius, The Ghost, Irrked By Publicity

LONDON.—Ignatius, the friendly ghost, is annoyed at all the publicity he's been getting. Mrs. Irene Bradshaw, 39-year-old wife of the vicar of Elm, reports.

Ignatius warns of impending deaths in the parish by tolling his phantom bell. Mrs. Bradshaw contends.

Twenty-seven times the death knell has sounded—27 times a villager has died. But Mrs. Bradshaw is the only one who can hear the bell.

Since Mrs. Bradshaw told reporters of her little chum, hundreds of curious men and women have invaded the quiet vicarage in Cambridgeshire.

"I don't want any boy friends, and Ignatius needs no girl friends," Mrs. Bradshaw wrote London newspapers. I am a very busy woman, with a beautiful house and no maid, who has not time to answer the door to visitors who ask, "Have you an evil eye?"

"Strange men send me their telephone numbers; stranger men ask me if they can spend the night here," she added furiously.

"Psychic-research people wish to hear me. People send letters to Ignatius asking if he will cure them of falling hair or other trouble. Many people have invaded the churchyard and vicarage gardens. Hooplans have broken down a tomb, and Ignatius is annoyed. Instead of keeping to his corridor, he came to my bedside and, after throwing down some photographs, told me how foolish I was to let him get into the news."

Mrs. Bradshaw said she first met Ignatius about two years ago when she bumped into him in a dark corridor in the church. They struck up an acquaintance which has lasted ever since.

Ignatius, she said, used to be a monk in the church several centuries back. He was assigned the bell-ringing job, but once forgot to ring it to warn of approaching floodwaters. He keeps trying to make up for his mistake by warning of approaching deaths now.

## SOMETHING NEW FOR THE FARMERS TO THINK ABOUT

College Station, August 18—County agricultural agents report that farmers are beginning to figure on what they'll plant on the land to be taken out of cotton next year because of the acreage allotments. These same reports indicate that many are planning to plant legumes and soil building crops and others expect to put some of this cultivated land into pastures.

The Texas Extension Service has just released a new bulletin, B-168, Clovers for Texas Pastures, and it is available to you. Your local county agent can supply you with a copy and he can also give you other information that may be helpful in getting the new pasture started.

"Clover for Texas Pastures" was prepared by R. R. Lancaster, extension pasture specialist of Texas A. and M. College. He says every grassland needs a clover and every clover needs a grass. They just go together most everywhere, and it takes a variety of good grazing plants to make a real pasture.

Tree ripe peaches, free from bruises, are best for quick freezing.

HOUSE JOINT RESOLUTION NO. 15

Proposing an amendment to the Constitution of the State of Texas...

SENATE JOINT RESOLUTION NO. 1

Proposing an amendment to Section 2 of Article VI of the Constitution...

Section 1. Section 2, Article VI of the Constitution of the State of Texas...

Section 2. The foregoing Constitutional Amendment shall be submitted to a vote of the qualified voters...

Section 3. The Governor of the State of Texas shall issue the necessary proclamation...

Section 4. The sum of Five Thousand (\$5,000.00) Dollars, or so much thereof as may be necessary...

Section 5. Two (2) regular sessions of each Legislature shall be held...

Section 6. At other times, when called by the Governor, the Legislature shall convene in special session...

Section 7. Appropriations for monthly recurring expenses and salaries paid by the State shall be made for a period of not more than twelve (12) months...

Section 8. At the second regular session of each Legislature, only proposals to amend the Constitution and to make appropriations to pay monthly recurring expenses...

Section 9. The Amendments proposed herein, if ratified by the people, shall become effective January first, A. D. 1950.

Section 10. The foregoing Constitutional Amendments shall be submitted to a vote of the qualified voters of this State at a General Election...

Section 11. Each voter shall express his vote on the proposed Amendment in the manner provided by law.

Section 12. The Governor of this State shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 13. The Governor of the State of Texas shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 14. Each voter shall express his vote on the proposed Amendment in the manner provided by law.

Section 15. The Governor of this State shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 16. Each voter shall express his vote on the proposed Amendment in the manner provided by law.

Section 17. The Governor of this State shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 18. Each voter shall express his vote on the proposed Amendment in the manner provided by law.

HOUSE JOINT RESOLUTION NO. 5

Proposing an amendment to Section 2 of Article VI of the Constitution...

SENATE JOINT RESOLUTION NO. 5

Proposing an amendment to Article III of the Constitution of the State of Texas...

Section 1. That Article III of the Constitution of the State of Texas be, and the same is, hereby amended by adding to said Article a new section...

Section 2. The Governor of the State of Texas shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 3. Each voter shall express his vote on the proposed Amendment in the manner provided by law.

Section 4. The Governor of this State shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 5. Each voter shall express his vote on the proposed Amendment in the manner provided by law.

Section 6. The Governor of this State shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 7. Each voter shall express his vote on the proposed Amendment in the manner provided by law.

Section 8. The Governor of this State shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 9. Each voter shall express his vote on the proposed Amendment in the manner provided by law.

Section 10. The Governor of this State shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 11. Each voter shall express his vote on the proposed Amendment in the manner provided by law.

Section 12. The Governor of this State shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 13. Each voter shall express his vote on the proposed Amendment in the manner provided by law.

Section 14. The Governor of this State shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 15. Each voter shall express his vote on the proposed Amendment in the manner provided by law.

Section 16. The Governor of this State shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 17. Each voter shall express his vote on the proposed Amendment in the manner provided by law.

Section 18. The Governor of this State shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

prepared by the State Comptroller.

Section 2. That Section 5 of Article III of the Constitution be amended to read as follows:

Section 3. The Governor of the State of Texas shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 4. The sum of Five Thousand (\$5,000.00) Dollars, or so much thereof as may be necessary, is hereby appropriated out of any funds in the Treasury of the State not otherwise appropriated, to pay the expenses of such publication and election.

Section 5. Two (2) regular sessions of each Legislature shall be held; and until otherwise provided by law, the time of the convening of the first regular session shall be at noon on the second Tuesday in January of each odd-numbered year, and of the second regular session, at noon on the second Tuesday in January of each even-numbered year.

Section 6. At other times, when called by the Governor, the Legislature shall convene in special session.

Section 7. Appropriations for monthly recurring expenses and salaries paid by the State shall be made for a period of not more than twelve (12) months.

Section 8. At the second regular session of each Legislature, only proposals to amend the Constitution and to make appropriations to pay monthly recurring expenses and salaries and such other measures only as four-fifths (4-5) of the Membership of each House may determine shall be considered.

Section 9. The Amendments proposed herein, if ratified by the people, shall become effective January first, A. D. 1950.

Section 10. The foregoing Constitutional Amendments shall be submitted to a vote of the qualified voters of this State at a General Election to be held throughout this State on the second Tuesday in November, 1949, same being November 8, 1949, at which election all ballots shall have printed thereon:

"FOR the Constitutional Amendments relative to sessions of the Legislature and to compensation of its members."

"AGAINST the Constitutional Amendments relative to sessions of the Legislature and to compensation of its members."

Each voter shall express his vote on the proposed Amendment in the manner provided by law.

Section 11. The Governor of this State shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 12. Each voter shall express his vote on the proposed Amendment in the manner provided by law.

Section 13. The Governor of this State shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 14. Each voter shall express his vote on the proposed Amendment in the manner provided by law.

Section 15. The Governor of this State shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 16. Each voter shall express his vote on the proposed Amendment in the manner provided by law.

Section 17. The Governor of this State shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 18. Each voter shall express his vote on the proposed Amendment in the manner provided by law.

Section 19. The Governor of this State shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

of the votes cast are in favor of said amendment, the same shall become a part of the Constitution of the State of Texas.

Section 3. The Governor of the State of Texas shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 4. The sum of Five Thousand (\$5,000.00) Dollars, or so much thereof as may be necessary, is hereby appropriated out of any funds in the Treasury of the State not otherwise appropriated, to pay the expenses of such publication and election.

Section 5. Two (2) regular sessions of each Legislature shall be held; and until otherwise provided by law, the time of the convening of the first regular session shall be at noon on the second Tuesday in January of each odd-numbered year, and of the second regular session, at noon on the second Tuesday in January of each even-numbered year.

Section 6. At other times, when called by the Governor, the Legislature shall convene in special session.

Section 7. Appropriations for monthly recurring expenses and salaries paid by the State shall be made for a period of not more than twelve (12) months.

Section 8. At the second regular session of each Legislature, only proposals to amend the Constitution and to make appropriations to pay monthly recurring expenses and salaries and such other measures only as four-fifths (4-5) of the Membership of each House may determine shall be considered.

Section 9. The Amendments proposed herein, if ratified by the people, shall become effective January first, A. D. 1950.

Section 10. The foregoing Constitutional Amendments shall be submitted to a vote of the qualified voters of this State at a General Election to be held throughout this State on the second Tuesday in November, 1949, same being November 8, 1949, at which election all ballots shall have printed thereon:

"FOR the Constitutional Amendments relative to sessions of the Legislature and to compensation of its members."

"AGAINST the Constitutional Amendments relative to sessions of the Legislature and to compensation of its members."

Each voter shall express his vote on the proposed Amendment in the manner provided by law.

Section 11. The Governor of this State shall issue the necessary proclamation for said election and shall have same published as required by the Constitution and laws of this State.

Section 12. Each voter shall express his vote on the proposed Amendment in the manner provided by law.

### State Fair of Texas Will Show Growing Crops This Year

The dirt farmer of Texas will achieve a large measure of glamor in the fresh, living Agriculture Show now being readied for the 1949 State Fair of Texas October 18-23.

There will be the old fashioned museum like jars of seeds and prize ears of corn so long a fixture of state fairs. Instead, at the 1949 State Fair of Texas majestic stalks of corn and billowing sheaves of wheat will be shown growing with their roots in actual soil, under typical farm conditions brought indoors.

"There will be more actual growing plants at the Fair this year than at any fair anywhere before," declared E. C. English, chairman of the Fair's Agriculture Committee. "Visitors who've never seen rice or peanuts, for example, except in a bowl or cereal or a candy bar, will get a chance to see them as they grow in the field.

There will be living exhibits of flax, grain sorghum, grass,

corn, cotton, wheat, roses, legumes, oats, barley, and vegetables."

A fabulous exhibit of more than 40 varieties of Texas grass alone is worth a trip to the Fair, Mr. English said. The Texas Forest Service will set up a tall living pine tree; and a dazzling exhibit of roses by Tyler growers will probably be the Fair's most colorful single display.

A huge and impressive exhibit will show how the vast Texas A and M College System reaches into every county in the state to help farmers and ranchers to better crop quality and yields and improve livestock.

The cotton industry will tell the full story of Texas' leading crop in an interesting exhibit pin pointing the advantages of mechanization and modern marketing methods which have enabled Texas to hold its position as the nation's leading cotton growing state.

Displays by West Texas groups will portray the importance of this vast agricultural empire in the economy of the state. The miracle of irrigation in the "shallow water" section of the area

will be demonstrated.

"We have tried to give the new Texas agriculture every bit of emphasis which the importance of this \$2,000,000,000 industry deserves," Mr. English said.

"There will be a harvest of ideas for the farmer and a new perspective for the city dweller in the new approach to this year's Fair."

The interior of the huge Agriculture Building has been newly "showsaped" by the nationally famous Lambert Landscape Co. of Dallas.

### METHODIST W. S. C. S. MET MONDAY AT THE CHURCH

The Methodist W. S. C. S. met at the church Monday at 4 p. m. for their program and monthly business meeting. There were eleven members present. Mrs. Joe Smith was program leader and a very interesting program on our work in Burma was presented. Mrs. S. R. Turner gave the devotional and Mrs. Smith, Mrs. Bill Edwards and Mrs. R. M. Hill gave some interesting facts about Burma.

In the business session the society voted to sponsor the sending of a box of supplies to a Mission Settlement House in El Paso, Texas. We need bed linens, table cloths, paper towels and clothing for the children of all age. All women of the church are asked to cooperate in furnishing the supplies for this worthy cause. The box must be sent before September 1st. Mrs. C. M. Strickland is secretary of Supplies for the local W. S. C. S.

### 1925 STUDY CLUB ENTERTAINED WEDNESDAY MORNING

Mrs. R. G. Alexander, president of the 1925 Study Club entertained seventeen members of the club and two guest with a coffee Wednesday morning, August 17.

Each member received a new yearbook—the course of study for 1949-1950 is "Citizenship." The first meeting will be held September 21.
