PUBLISHED EVERY THURSDAY AT SILVERTON, BRISCOE COUNTY, TEXAS

THURSDAY, SEPT 15, 1949

Rites For Mrs. Sally Malone-- County Pioneer

Plainview, September 7.—Funeral services for Mrs. Sally M. Malone, 94 years old, was conducted at 2 o'clock Thursday afternoon at the Plainview First Baptist Church.

Mrs. Malone died at 11 o'clock Tuesday night at the home of her son, Rev. R. C. Malone, 1001 Smyth Street following a long illness.

Dr. A. Hope Owen, pastor of the First Baptist Church, officiated. Interment was in the family plot in the Milo Cemetery in Briscoe County.

Mrs. Malone was born October 5, 1854, in McNary County, Tenn., where she spent her childhood and young womanhood. She and her parents and several of the 10 brothers and sisters in the family were living close enough to the scene of the battle of Shiloh that

they could hear the cannons roar. Mrs. Malone had a brother fighting with the Confederacy at Shiloh and in later life recalled her parents' concern as they listened to the sound of combat. The brother survived the fighting but died soon afterwards of what probably was sunstroke.

On Christmas Day 1882 Mrs. Malone was married to the late Henry A. Malone. They moved to Springtown in Parker County, Texas, in 1885. They lived there until 1892 when they moved to Briscoe County.

The family filed on a section of land 15 miles northwest of Silvertown and resided there until 1922 when Mr. and Mrs. Malone moved to Plainview with their son, R. C. Malone, and family. Henry A. Malone died here February 15, 1923.

Mrs. Malone and her husband were closely connected with their church and its work throughout their active lives. She was a member of the Plainview Baptist Church.

Besides the son the other immediate survivor is a daughter, Mrs. J. D. Roberts of Fort Worth. 12 grandchildren and seven great-grandchildren survive. Mrs. Malone was the last survivor among a family of 12.

Shirley Mae France

DOVER, ENGLAND—Shirley Mae France, shown receiving some of her birthday parcels from the Royal Mail van on the occasion of her 17th birthday. The American girl in England to make an attempt to swim the English Channel, trained under the supervision of her father, Mr. Walter France, and her school coach, Harry Boudiken.

Future Farmers Met Monday Night and Elected Officers

The 1949-50 Class of Future Farmers of America met Monday night, September 12, and elected the following officers:

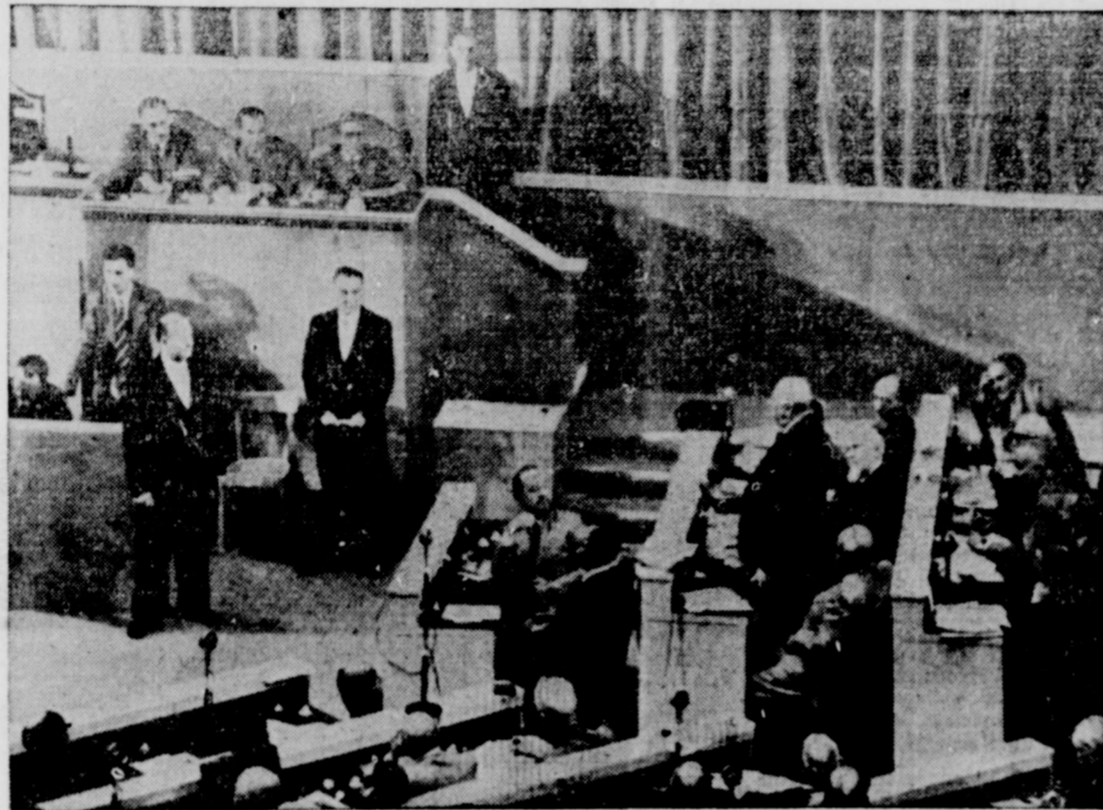

John Francis, president; Donald Bean, vice president; Ray Savage, Secretary; Pat Northcutt, treasurer; Billy Tension, reporter; Ray Tiner, parliamentarian; Sam Lusk, sentinel; Roy Hyatt, historian; Billy Don Stevenson, 3rd vice president.

The adviser is Mr. Glenn Bunch. After electing the officers the boys were served soda pop.

The boys plan to have an active year and look forward to the show next spring.

Paul Reid and P. H. McKenney, made a business trip to Dallas Thursday, returning home Friday.

Churchill Addresses European Assembly

STRASBOURG, FRANCE—The European Assembly Meeting in Strasbourg to map future security of Western, Democratic Europe, gets words of advice from an expert, Winston Churchill, who stands to speak at one of the meetings. The man who had much to do with coordinating defense and attack of the Western Allies in World War II may well be said to qualify as an expert in the planning to withstand any possible future aggressor.

Owls Fight Price College In Over-Weighted Lineup Here Friday Night

BURIAL FOR MRS. LOLA McCAIN FRIDAY

Funeral services were held Friday morning at 10 o'clock at the Temple Baptist Church in Lubbock for Mrs. Lola McCain, who passed away Wednesday evening, September 7, 1949 at 5 o'clock at her home in Lubbock after some eighteen months of illness. Following the services the body was brought to Silvertown for burial, where last rites were held at 2 p. m., at the graveside.

Mrs. McCain, a former resident of Silvertown, had lived here for 15 years before moving to Lubbock in 1937. Her husband and two sons preceded her in death. Surviving children are: Marvin, Beauford, Wayne and Conrad, all of Lubbock; three daughters, Mrs. Lillian Strange, of San Antonio; Mrs. Eula Mae Sherrord, of Brownfield; Mrs. Mary Sue Wilson, of Seagraves. Also seven grandchildren and a host of relatives survive.

3-Ring Italian Bees Produce 24 Pounds Of Comb Honey

Ware Fogerson robbed his hive of Italian bees early this week and from the new hive of three pounds, placed in late spring, after the trees had finished blooming, Ware took 24 pounds of comb honey.

Ware has the type of bee hive built so the bees make their honey in pound squares, and he said it was as fine as he ever looked at, and has a very delicious flavor.

Based on the retail price of comb honey Fogerson's hive produced at the first robbing \$9.60 worth of honey.

Ware failed to say if he "got stung" while committing the robbery.

Ware's success with the hive of bees illustrates what could be done in Briscoe County if each home or farm unit in the county possessed a few bees.

If you saw the game Friday night, you saw a team that was out-weighted, out-aged, out-experienced and every other "out" except out-fought.

You say your Owl football team, which is composed of boys around 17 years of age, rise up and nearly beat a bunch of boys that were in the vicinity of 18, 19 and 20 years of age and a lot heavier.

The statement last week, "who knows, the Owls may even score," will have to be taken with a big "gulp". All right, so I was wrong, but don't forget, so was Mr. Gallup in the past presidential election. Anyhow, we had a lot of fun listening to the criticism. "One big-merry-go-round, that's what it is: The fans criticize the coaches, the coaches criticize the boys, the boys fuss about the referees and the referees fuss about the fans."

Price College opened with the scoring in the first period with a 45 yard touchdown jaunt around left-end. Silvertown tied the score in the 2nd frame when D. Rhea slanted 25 yards off right tackle for the tally. The Owls went ahead in the 3rd period with a pass from Donald Rhea to Wayne Hamilton, right end which covered 50 yards. A little later, the Cardinals tallied again when Don Ackerman raced 60 yards on a punt return to make the score 14-13.

In the final period, the Cardinals scored two touchdowns while holding the local talent scoreless. The final score Price College 27, Silvertown 13.

The outstanding linemen were: Flunoy Hutsell, John Francis and Donald Paige playing a defensive end. Paige rushed in sametime to smack the opponents and then other times he played the blockers off and got the tackle. Paige was a demon on defense and also played wisely from quarterback on offense.

Flunoy Hutsell, right tackle, lived up to his last years all regional rating by playing the best game this corner has seen him play. Several times Flunoy crashed in and dropped the runner for a huge loss. Flute was a big gun in the blocking department also.

Big, gigantic 140 pound John Francis at right guard proved it doesn't take a big man to play football, it takes a tough and wise one. John played opposite a

mighty big boy, yet, he slashed through time and again to drop the runner.

Of course, big Donald Rhea was practically the whole offensive threat for the Owls. Rhea busted the line for almost 200 yards. Should McWilliams, Baird, Wilson, or Satterfield develop, the Owls would have a most patent running threat.

Two of the main reasons why we did not win that game is because we fumbled 7 times and 5 of those were recovered by Price College. The second reason is the poor showing we put forth on pass defense.

The Owls trek to Matador Friday, September 16, to do battle with the Matadors. About the only thing that is known about this opponent is that powerful Turkey just barely squeezed by them last week 13-7. Game time 8:15.

We have another treat coming up in the way of football. Coach Hank Brown pits his Juniors against the Tullia, Junior HI, on the night of September 27. This game is sponsored by the Quarterback Club to help pay for uniforms for the juniors. Incidentally, Coach Brown is doing a fine job coaching the high school boys, too.

Last Rites Held For Silas Teague Here Friday Afternoon

Funeral services for Silas Teague, 67 years old, was conducted at 3 o'clock Friday afternoon at the Silvertown High School Auditorium. Earl Cantwell, Church of Christ minister, officiated. Burial was in Silvertown cemetery.

Mr. Teague, a native of Stephens county, had lived at Plainview 12 years until the family moved to Silvertown in 1945. He was a member of the Rock Creek Church of Christ.

He was married to Miss Nodie Jarry, at Broken Arrow, Oklahoma, April 19, 1925. To this union, were born five children, all of whom survive. They are: Afton Teague, Plainview; Miss Wanda Teague, Portales, New Mexico; Novie, Mary and Carol Teague, all of Silvertown, and a brother, Bob Teague, Mesa, Arizona.

P. T. A. Meeting Called For Thursday Night

O. G. Hogue in Charge of Boot Making Department

Perry Thomas makes the announcement this week that he has secured Mr. O. G. Hogue, of Amarillo, to be in charge of the boot-making department of the City Shoe Shop.

Mr. Hogue was recently employed by Beek Brothers, Amarillo, and has had fifteen years experience making boots and can give prompt delivery on all orders.

Mr. Hogue and family moved here last Sunday and are living in one of Mrs. Fowler's houses.

LIONS CLUB WILL MEET TONIGHT (THURSDAY)

The Lions Club will gather in their regular meeting tonight (Thursday) at the Methodist Church. Everyone are urged to attend.

Main subjects to come up for discussion at tonight's meeting will be a paved road to the cemetery and the up-keep of the cemetery. Ways and means of construction and financing of the project will be brought before the gathering of lions.

"Edward, My Son" Showing At Palace Tues. and Wed.

Showing at the Palace Theatre, Tuesday and Wednesday, September 20-21, "Edward, My Son," with Spencer Tracy, and Deborah Kerr, in one of their best performances, and the other cast are: Ian Hunter, James Donald, Merwyn Johns, Leueen MacGrath, Felix Aylmer, Walter Fitzgerald, Tisa Page, Ernest Jay, Colin Gordon, Marriette Johns, Julian d'Albie and Clement McCallin.

Be sure and see this great picture—and remember on this date is "Hot-Spot Night."

There will be a meeting at the school building Thursday night, September 22, for the purpose of organizing a Parent-Teachers Association. Plans for this made last year failed to materialize. Every patron interested in the school is urged to be present next Thursday night.

Dr. Wivell from the University of Eastern New Mexico at Portales will be present to speak and help with the organization. Plan now to attend the meeting on Thursday, September 22, at 8 o'clock.

CARL GRAHAM ENROLLS AT TEXAS TECH COLLEGE

Carl Graham, son of Mr. and Mrs. M. A. Graham, has enrolled at Texas Tech College, Lubbock, for the term. Mr. and Mrs. Graham carried their son to Lubbock Sunday. Carl is one of the graduation class of Silvertown school this spring.

ROSE QUEEN

Rose Marie Young of Tyler will be crowned Rose Queen of the Twelfth Annual Texas Rose Festival to be held Sept. 30, Oct. 1 and 2 in Tyler. Also in attendance at the coronation will be Duchesses and ladies-in-waiting from 27 Texas cities, six other states and Mexico.

New Weapon In Undulant Fever Fight

Foremost in public interest is the undulant fever menace which strikes 40,000 new victims every year. Health authorities agree that raw milk is a dangerous carrier of undulant fever, bovine tuberculosis, typhoid and other diseases. Pasteurizing milk is the only safe way to check such milk-borne diseases, they say. This new Safford home milk and cream pasteurizer offers an easy way to combat the disease for it makes pasteurizing milk at home a simple task. It is completely automatic so that anyone can operate it.

Happy Birthday!

Someone made her happy with this present—one of the newest wrinkles in birthday gifts. It seems that since a carton of cigarettes has always been one of America's favorite birthday gifts, Chesterfield came up with a novel carton specifically designed for the purpose. Its colorful birthday motif and greeting card device mean that you don't have to wrap it either.

Efficient Feeding Produces Better Pork

Efficient feeding and profitable pork production go together. About 80 per cent of the pork production costs are in feed bills, says Leo White, county agricultural agent, and one item that many swine producers overlook is vitamin A.

All of our farm grains and mill products are deficit in vitamin A, except yellow corn, says Leo, and hogs of all ages require vitamin A for maintaining their health. Breeding hogs need it for normal development and reproduction. Brood sows produce less milk when their ration is lacking in vitamin A and hogs of any age maintain a greater resistance to flu and other diseases when their ration is well supplied with it, adds Leo.

Results of research work done at the Texas Agricultural Experiment Station show that sows fed rations deficient in vitamin A farrowed pigs that were deformed; some even had no eyeballs while others were born dead.

Vitamin A as such does not occur in green grass or other plants, but a substance called carotene is found in green grass, green alfalfa hay and yellow corn. This carotene is converted into vitamin A within the animal's body, says Mr. White. Fish oils do contain the actual vitamin A.

Good green pastures will furnish hogs with the necessary vitamin A, and green pastures are about the best and cheapest source of the vitamin, continues White. But if green pasture is not available, the ration for fattening hogs should contain from 5 to 6 per cent of green leafy alfalfa meal, and brood sows and other breed-

ing animals should have from 10 to 15 percent of green alfalfa meal in their ration says Leo. The efficient hog producer should plan to have green pasture for as many months of the year as is possible.

Cotton Seed Reports Are Available to Plains Growers

Cotton growers were urged today to write for the free cottonseed market news reports issued by the Production and Marketing Administration, U. S. Department of Agriculture's southwest cotton office at Dallas.

According to John McCollum, area manager, many cotton growers are not making full use of this report and in certain cases they are not receiving maximum returns for their cottonseed. He pointed out that unlike many other agricultural products, there are no organized markets to provide basic cottonseed information. Therefore, farmers are entirely dependent upon local quotations with no basis for comparisons unless they receive these reports.

Current cottonseed prices are gathered by PMA from ginners and cotton oil mills.

McCollum said cotton growers particularly need this cottonseed market information this year since the Commodity Credit Corporation has a cottonseed loan program in operation. These reports will help growers determine whether it would be more profitable for them to place their seed in loan or sell it, he explained.

The cottonseed report may be obtained by writing local USDA cotton classing offices, or Mr. McCollum at 1104 South Eryv Street, Dallas 1, Texas.

Boy Scouts Pick Historic Site For Jamboree

NEW YORK.—The Boy Scouts of America has selected Valley Forge, Pa., for its second national scout jamboree in 1950, Dr. Arthur Schuck, chief scout executive of the organization, announces.

Over 30,000 Boy Scouts from every state and all U. S. territories will camp together from June 30 to July 6, 1950 on the site notable as the winter encampment of George Washington and his continental army from Dec. 19, 1777 to June 19, 1778.

Valley Forge park is owned, maintained and preserved by the commonwealth of Pennsylvania. An invitation to hold the jamboree there was received from Governor James H. Duff by the Boy Scouts of America and accepted by its national executive board, Dr. Schuck announced.

Will Climax Crusade

The national jamboree will be the climax of the Boy Scouts' two-year crusade to "Strengthen the arm of liberty."

Gov. Duff's invitation to the Boy Scouts was accepted after a dozen sites in all sections of the United States were inspected by the engineering service of the Boy Scouts of America.

Gov. Duff's invitation addressed to Dr. Schuck follows:

"On behalf of the commonwealth of Pennsylvania and the Valley Forge park commission, I wish to extend to the Boy Scouts of America a cordial invitation to hold their jamboree at Valley Forge park during the summer of 1950 at such time as their executives may elect.

"I am fully acquainted with the Boy Scouts' program for the year 1950—to 'crusade to strengthen the arm of liberty'—and it was my privilege last February in an address at Gettysburg to sponsor this crusade for the commonwealth of Pennsylvania. I can visualize no more appropriate location for its climax than Valley Forge where the sacrifice and training were undergone on the basis of which our heritage of liberty was won.

"You may be assured of the full cooperation of the commonwealth and its agencies. The Valley Forge park commission will make available the facilities it has at its disposal during the period of preparation. Should your national executive board accept this invitation, the Valley Forge park commission will be designated as the coordinating agency of the commonwealth with which you should develop your detailed plans insofar as they involve the commonwealth."

To Occupy 600 Acres

Boy Scout officials announced that the jamboree camp will probably occupy 600 of the 2,033 acres in Valley Forge park. This would provide 32 sectional camps for a maximum of 40,320 scouts and adult leaders and a headquarters camp for 460 leaders. Valley Forge park is 20 miles northwest of Philadelphia and seven miles west of Norristown.

The first national scout jamboree was held in a 400-acre tent city on both sides of the Potomac river at Washington, D.C., from June 30 to July 9, 1937 at the invitation of President Franklin D. Roosevelt. It brought together 27,232 scouts and leaders whose fees paid for the expenses of the entire jamboree. President Roosevelt not only visited the huge jamboree camp but took part in the "stand still parade" in his honor on Constitution avenue. The scout campers lined the entire length of the historic avenue and were reviewed by the President as he drove between their lines.

Boy Scouts of twenty-four other nations were guests at the encampment.

Communists Move to Quell Belief in Ploesti Images

BUCHAREST.—Hundreds of people in Ploesti reported seeing an image of the Virgin Mary and the Infant in a shop window on the main square.

Word of blessings bestowed by the vision spread over the Romanian oil city of 100,000 population and out into the country.

Then the Communists wheeled in to action with a debunking mission. The militia moved in a week ago to break up crowds blocking traffic on a main international highway running past the shop.

The crowds moved off to other shops where some reported seeing other members of the holy family. The militia then whitewashed the shop windows and hundreds attracted from the countryside turned away disappointed.

The official Communist newspaper Scantela gave this version of what happened: "Reactionary" elements at night washed the windows on the inside with kerosene. When sunbeams hit the oil spectrum in daylight all the colors of the rainbow were reflected and mass suggestion did the rest."

Mr. and Mrs. R. E. Brookshier made a business trip to Lubbock Thursday.

Mrs. Oscar Thompson, of Chli-fornia, is a guest in the home of Mr. and Mrs. R. E. Brookshier.

Mrs. O. T. Bundy visited several days last week in Lubbock with her daughter and family, Dr. and Mrs. Clarence Mast.

Mr. and Mrs. Jack Billingsley and children returned Thursday from Lubbock where they have been visiting relatives. Mr. and Mrs. Andy Billingsley and baby and Don Billingsley accompanied them home. Andy, their little son remained in Lubbock for a longer visit.

Supervisors for Cap Rock District—Earl I. Cantwell, Chairman; Obra Watson, Bray H. Cook, L. A. McJimsey and R. L. Brunson

Jimmie Baird of Quitaque is a firm believer of terraces on sloping ground. And well, he should be if the existing cotton crop on his farm is any indication. Mr. Baird and his tenant estimate they will make from 3-4 to 1 bale of cotton per acre. Much of the credit for this bumper crop, Jimmie says, goes to the eleven miles of standard terraces that he had constructed on his farm last fall. These level terraces have equalized the distribution of rainfall and reduced run-off to a minimum, and as a result the crop didn't have to suffer for moisture

during dry periods between rains. A. L. Morris, who is renting this farm from Mr. Baird, says that the increased yields will more than pay for the extra trouble of farming the crooked rows. This farm is located 1 mile south east of Quitaque for the information of those who wish to see a good set of terraces doing a good job of conserving the soil and increasing crop yields at the same time. This farm, and its present crop, indicates the whole truth in the saying that if this land is to take care of us we will have to take care of it first.

Lem Weaver will vouch for the value of legumes in conditioning land for crop production. His farm, which is located in the north eastern part of the Cap Rock Soil Conservation District, contains a considerable area of alkali soils. Lem has made several attempts at growing cotton on this area, but has been unsuccessful until this season. Two years ago he seeded the land to a mixture of yellow and white blossom sweet clover. Several of the legumes are lime tolerant plants. The clover added nitrogen and organic matter to the soil, and the penetrating root system aerated the soil that some of the alkali accumulation was beached downward. Cotton was planted this year following the clover, and Lem estimated that he will make close to a bale per acre.

Joe W. Jennings Is Candidate for Representative

Joe W. Jennings of Hale County has announced his candidacy for Representative of the 120th Texas Legislative District.

The office was recently left vacant by the resignation of Rep. I. B. Holt of Lamb County.

Gov. Allan Shivers has called a special election for November 3 to select a successor to Holt.

Jennings has been farming in Floyd and Hale Counties for the past twenty years. He is a mem-

ber of the Hale County Water Use and Conservation Association. In connection with his candidacy Jennings said:

"I am in full accord with the principles of the recent "Water Bill" sponsored by the High Plains Association and passed by the 51st Legislature. I will support that law and any amendments that may be necessary to strengthen or clarify the law.

"I am a firm believer in Farm-Market roads and will support such construction within the financial ability of the state. I realize a solvent financial condition is necessary to the maintenance of constitutional democratic government and shall oppose deficit financing at all times.

"I pledge adequate support to all necessary government functions, but am opposed to waste and extravagance.

"I pledge my best efforts in the interests of the district. I have no ambition for any other or higher office. My sole ambition is to represent our district and I will devote all my efforts to the work at hand."

Harold M. LaFont Of Plainview Enters Representative Race

Harold M. LaFont, former District Attorney of the 64th Judicial District, today made his formal announcement for the office of Representative of the 120th Representative District of Texas. In connection with his announcement, Judge LaFont makes the following statement:

In making my announcement for this office, it is with a full sense of understanding that whoever the people elect to this office will have the responsibility of making the laws that govern over six million people of the State of Texas. These laws affect directly the daily lives of practically all of us and serious thought and consideration should be given to each and every law that is passed by the Legislature. Men who fill these places of responsibility and in whom we place our trust and confidence should be honest, sincere and capable.

All of us are interested in the progress and welfare of our District and the State of Texas as a whole, and all of us want our fair share of those things for which our tax money is expended. These include educational assistance, police protection for our families and property, welfare assistance and State Highways and farm-to-market roads. All of these items and other state governmental help make our district a better place in which to live and to rear our families.

I would like to have the opportunity to represent the people of the 120th Representative District. If you can see your way clear to support me in this race for this office on November 8, I assure you that no one will appreciate it more than Harold M. LaFont, and no one will try harder to represent all of the people of this district than I will.

Messimer Family Hold Reunion at Lubbock Park

Mr. and Mrs. Jim Messimer and daughter, Miss Ruth, of Strawn, spent the week end with his brother, Bill Messimer and family. They all attended a Messimer family reunion at McKenzie Park at Lubbock Sunday.

37 were present for the gathering and they carried basket lunches and enjoyed a big feast at the noon hour. They voted to make it an annual affair.

CARD OF THANKS

We wish to thank each and everyone for the thoughtfulness and for the flowers during the illness and death of our dear husband and father.

Mrs. Silas Teague, Wanda, Novie, Mary Dell and Carol; Mr. and Mrs. Afton Teague and son.

Mr. and Mrs. Bill Swindle and young son, of Hart, visited Sunday in the home of Mr. and Mrs. Jim Clemmer.

Creeping Deaths Lessen

Fewer persons lost their lives in 1948 in highway grade-crossing accidents than in any year back to and including 1940, according to a study made public by the interstate commerce commission recently. Fatalities resulting from such accidents involving motor vehicles totaled 1,355 in 1948, according to the commission, a reduction of 10 per cent compared with 1947. Persons injured totaled 4,054 in 1948, which was an increase of 0.15 per cent compared with the preceding year.

New World's Record

There are now more cars, trucks and buses running the roadways of the world than at any other time in history—some 57,502,898 motor vehicles. This was revealed in the 1949 World Motor Census published by American Automobile (overseas edition) and El Automovil Americano. The census shows a gain of 4,630,007 units, or 8.7%—somewhat smaller than the increase in 1947, but triple the size of annual increases before the war.

American Touches in London

In London there's the new Roccasevit statue in Grosvenor square nearby the house of John Adams and the former residences of Walter Hines Page and John Winant. Abraham Lincoln's gaunt figure looks down on Parliament square and in the public record office is the historic Olive Branch Petition to George III signed by John Adams, Benjamin Franklin and Thomas Jefferson. There's also a letter from George Washington to "his great and good friend George III." More recent drama is preserved on the tablet to General Eisenhower at Norfolk House St. James' square, Allied invasion headquarters.

"Lighted" Fish

In the dark, mysterious regions of the deep sea, fish have developed fantastic lighting effects, some have luminous spots along their sides, so spaced as to give the look of lighted portholes in tiny ocean liners. Others have huge glowing eyes, tail-lights, head searchlights, and clusters of bright bulbs or strange patterns of colored fire marking their bodies. Such light organs are known as photophores.

Mr. and Mrs. Wayne McCutchen had as their guests this week his parents, Mr. and Mrs. Bill McCutchen, of Robert Lee, Texas, and his brother and wife, Mr. and Mrs. J. D. McCutchen, of Levelland, Texas.

Frigidaire at Simpson Chevrolet Company.

Rev. and Mrs. B. P. Harrison, of Burnsflat, Oklahoma, spent Monday night with Mr. and Mrs. Bud McMinn.

Miss Fayree McMinn, of Plainview, spent the week end with her parents, Mr. and Mrs. Bud McMinn.

Mrs. Lillie Meek, and children, of Hedley, visited her brother, Mr. and Mrs. Bill Messimer Saturday night.

D. O. Bomar and John Bain, of Lubbock, were business visitors in Silverton Monday.

PERSONALS

L. B. Garvin, son of Mr. and Mrs. Dick Garvin left Monday for Lubbock where he will enroll at Texas Tech College.

Miss Jewell Hodges, of Lubbock, spent the week end with her parents, Mr. and Mrs. T. J. Hodges.

Mrs. Bruce Womack is visiting her daughter-in-law, Mrs. Raymond Lee Womack in Big Spring this week.

Mr. and Mrs. Doyle Smith, of Ropesville, visited her parents, Mr. and Mrs. Ed Thomas Wednesday and Thursday of last week.

British Manover in 1830 Taught Rails' War Value Wars were fought, lost and won, long before man ever conceived the idea of a railroad, but the importance of the industry in expediting manpower, food and equipment during such times was quickly realized once the rails were down.

As early as 1830, only one year before the first "iron horse" appeared in this country, a British regiment was moved 34 miles in two hours as against two days of marching on the opening of the Liverpool and Manchester railway. In 1833, a German who had participated in the Napoleonic Wars, proposed a plan for construction of a certain rail line because of its future military value. Prussia, Russia, Austria and other eastern hemisphere countries soon followed this line of thinking.

American railroads had the first major chance to prove their military worth during the Civil War. Because of the vast area of military operations in that war, it has been said that "without the help of railroads it could hardly have been fought at all."

Their need was soon seen by the government, and Congress, in 1862, authorized the President to take possession of the rails, whenever necessary, and approximately 2,105 miles of railroad were taken over during the war.

A Lot of Crust

In the few seconds it takes you to read this sentence, more than 4,500 loaves of bread will have been turned out by bakeries all over the country, according to the American Bakers association. U.S. bread production is estimated at better than fourteen and a half billion loaves a year—sufficient to provide each man, woman and child with about 100 loaves annually.

Biggest Earthquake

The most violent earthquake in history was that which occurred at Assam, India, north of the Bay of Bengal and Calcutta, on June 12, 1897. There was complete destruction over an area of about 9,000 square miles, while the area of moderate destruction covered 150,000 square miles. The shock could be felt over a total area of 1,750,000 square miles, about equal to half of Europe. Great changes in topography were produced.

Dyes for Diapers

Use of aniline dyes, those derived from coal tar, to mark diapers may cause serious poisoning in babies according to the Journal of the American medical association. Seventy two cases of poisoning in babies from the dyes have been reported, including five deaths, the Journal says, adding: "Prevention of such accidents is simple. If the diapers are boiled after they are stamped and thoroughly dried before use, the dye becomes fixed and absorption does not occur. The ideal method of prevention would be the use of nontoxic dyes, but, unfortunately, vegetable pigments, charcoal, and silver nitrate lack the permanence required for marking clothing in large institutions."

Illustrious Blind

The great Handel became a victim of eye disease while he was composing the oratorio "Jephtha," and later underwent three unsuccessful operations for cataract. He

Tips on Storage of Coal Given by Heat Engineers

Adequate provision for handling and storing coal should be made in all houses in which coal will be used as a fuel. Because of the bulk and weight of coal, the house plan should provide for a short, streamlined movement of the coal from truck to bin to heating plant, says the Plumbing and Heating Industries bureau.

There are five essentials to keep in mind in planning a basement or utility room with coal storage facilities, the bureau points out. These are:

- 1. The coal bin should be located so that the coal can be moved from the coal truck into the bin without having to be rehandled.
2. The bin should hold five tons or more.
3. All bins for coal that must be shoveled into the stoker hopper, or fired by hand in the furnace, should be sloped toward the coal outlet.
4. The coal bin may be placed under the driveway, inside the basement proper, or partly inside and partly outside the basement. If inside, the bin should extend from the floor to the ceiling.
5. For use with bin-feed stokers, a hopper-type bottom in the coal bin will facilitate coal removal and handling. However, it is not necessary to have a hopper-type storage bin if the reserve coal is allowed to remain in the bin. The coal takes the place of the hopper sides. A bin 6 feet square, filled to the depth of approximately 5 1/2 feet, will hold 5 tons of coal.

Lebanon In Effort To Preserve Last Of Famed Cedars

BEYROUTH.—Lebanon is making a determined effort to preserve its few remaining cedar trees—famous through history as a building material.

Once the mountain ranges were covered with the great, spreading trees.

Now these slopes, gradually denuded down the centuries, are nearly bare, only a few groves remain.

The cedar is to Lebanon what the American eagle is to the United States. As the emblem of the country, it appears on coins, stamps, military decorations, and official papers. To protect the few trees remaining, Lebanon has forbidden further cutting without special government permission.

And when one tree is cut down the person who does it must plant 50 new trees. A 20-year reforestation program, to start next fall, includes plans to set out thousands of young cedars on the cool slopes where they grow best.

Lebanon cedar—a hard and lasting wood—was used for thousands of years by civilizations now long perished.

Locomotive Whistle Gives Way to Diesel Train Hoot

PHILADELPHIA.—The nostalgic wail of the steam locomotive, which stirs the imagination of many a farm boy, is gradually giving way to the modern but less romantic hoot of the diesel-electric.

Though still far from extinction, the famed Mikados, Pacifics, Hudsons and Mountaineers of American song and story are heading for the last roundhouse in a steadily increasing ratio.

Yards that scrap giant steam locomotives are doing a thriving business these days, reports R. R. Zisette, general sales manager of SKF Industries, Inc., which pioneered anti-friction equipment for both types of locomotives. It takes 80,000 man-hours to design and build a locomotive—but less than eight hours to scrap one.

"In the last two years, 4,800 steam locomotives were retired, while only 138 were ordered," he says. "In 1948 alone, 2,678 diesel-electric units were ordered as compared to only 69 for steam—a rate of more than 38 to one. Since 1942, the number of steam locomotives in service has declined by more than 6,300 while the number of diesel-electrics has increased by nearly 4,000.

Steam locomotives still account for nearly 85 per cent of all railroad motive power, he says, but the swing to diesel-electrics increases in momentum each year.

Costs of diesel-electric locomotives range from \$100,000 for a 1,000-horsepower switcher to more than \$600,000 for a 6,000-horsepower freight unit.

Flying Family Needs Score Card to Enumerate Members

NEW YORK.—The Buhler family, migrating in a flock like the birds, flew into New York—and it was hard to keep track of them without a score card.

Fourteen Buhlers, the oldest 56 and the youngest five months, got off a single plane at LaGuardia Field.

With 727 pounds of baggage, the family was enroute from their old home at Carrot River, near Saskatoon, Saskatchewan, Canada, to live in Asuncion, Paraguay, because they want to live in a less cold climate. They are farmers.

"We expect it to be a bit rough at first," said Peter A. Buhler, head of the family. "But we'll clear the land and raise wheat, alfalfa, sugar cane and corn."

Two married Buhler children stayed in Saskatchewan. Papa Buhler said the 7,000-mile trip is setting him back \$5,700 in airline fares.

Fire Enthusiast Keeps Fire Alarm in Bathroom

BOSTON.—Benjamin M. Ellis, who claims to be the nation's No. 1 "spark," even has a fire-alarm gong in his bathroom.

The 56-year-old fire-appliance-company executive says he has witnessed 43,202 fires from Alaska to Florida since 1901. They involved total damage of around 10 million dollars.

Ellis' five-story home on Beacon Street has a fire alarm gong on each floor.

Speech Practitioner Embarrassed As Law Fails to Comprehend

MILWAUKEE.—The next time Whitey Berghofer practices speech making, he'll choose a place less public than a downtown street.

While waiting for his wife to shop, Berghofer decided to rehearse a speech he had to make. So he gave his ear a "talking to," complete with arm waving and finger shaking.

A policeman witnessed the exhibition for a while, then walked to Berghofer's car and demar how many drinks he'd had. hofer embarrassedly explai

Holland Case Is Moved to Briscoe For Trial

George Holland, negro, charged with murder of a Crosby County sheriff, will be tried at Silvertown and the case has been tentatively set for September 19, District Attorney John Stapleton said this week.

Holland was first tried in Lubbock county where he was convicted and given the death penalty. However, the case was reversed and remanded and was transferred to Silvertown on a change of venue.

Rev. G. A. Elrod, Mrs. G. R. Dowdy, Mrs. W. E. Stodghill, Mrs. Ray C. Bomar, Mrs. A. H. Jackson, Mother Perry, Mrs. A. D. Arnold and Miss Lilly Hundley, attended the W. M. U. Association Meeting in Crosbyton last Thursday.

A long and happy life depends largely on what and how much you eat. Too many fats, starches and sweets in the diet decreases your life expectancy. Plenty of green leafy vegetables, milk, fresh fruits and animal protein foods increase your chances for a long life and good health.

Points to Remember
When Bagging Wool Clip

Wool growers expect to receive a premium price for their 1949 wool clip, then they should exercise care and care at the shearing in putting up their clip, according to Berry N. Duff, Colorado A. M. extension sheep and wool specialist. Some of the important points that should be followed by wool growers if they expect to package and market a quality clip, are: (1) If belly wools are defective (containing burrs and needles) they should be shorn and bagged separately from the balance of the fleece. (2) Cut out black sheep and shear them last. Do not pack black fleeces in the same bag with other fleeces. (3) Shearing should be done on concrete or wood floors. If at all possible, keep "holding pens" sprinkled down. (4) Keep shearing sweats clean of tags, sweat marks, face and leg wools. Put the fleeces in a separate bag and under no conditions should they be put in with the fleeces. This applies to heavy tags and dung locks also. (5) Use only regular wool fleece twine for tying fleeces and never use binder twine. There is a penalty of five cents a fleece against a clip when anything but regular fleece twine is used. (6) The fleeces well, but not too tight and always with the flesh side out. (7) Never shear or sack wet or damp wool. (8) Keep bags from being rolled or piled on the ground. Keep bags out of weather and under cover.

Barnyard Diets
Key to Hen Eggs

Ever try green scrambled eggs? If you are interested, you can get the necessary hen fruit in Yorkshire, England, where some barnyard biddies have been acting up lately. They're laying eggs with green yolks. What's more, the eggs are good for you. The behavior of the British chickens may sound a little fantastic at first, but the explanation is quite simple, notes the National Geographic Society. The color of the egg yolk is controlled by the diet of the layer. A yolk will turn out to be a light yellow by keeping chickens away from greens, yellow corn, and all but a little alfalfa. A richer shade of yellow, sometimes red-orange, may be obtained by feeding heavily yellow corn and alfalfa. But an overdose in the hen's diet of such barnyard "delicacies" as fresh greens, cottonseed meal, or worms from certain types of oak trees, will make her egg an outcast. It will show up with the greenish-colored yolk that has some Yorkshire farmers looking aghast at their flocks these days. Nutritionally, eggs with green yolks are just as good for human consumption as those with light or orange-yellow ones. But man's eating habits have accustomed him to the yellow yolk, which doesn't leave much market for other shades.

Heating by Heat Pumps
Now in limited use, the heat pump is a device which picks up heat at a lower temperature (from a source such as the earth, water or air) and delivers it at a higher temperature. The heat pump "steps up" the temperature by compressing a gas when it is returned after circulating through coils in contact with the heat source. It can be installed so that it may be reversed in the summer to cool a house or other building.

Inventions Taper Off
There has been a marked decline in inventions since World War II, according to researchers gathering information for the new World Book encyclopedia. According to the researchers, the United States Patent Office issued an average of over 700 patents a week from 1935 to 1940, while the 1948 records reveal that only 460 were issued each week. In 1947, the weekly average of patents issued was 385 as compared with 430 in 1936.

Tropical Fireflies
In Mexico, Brazil, and other parts of the American tropics, fireflies grow so big as to put United States species to shame. Best known of the tropical flying maddas is "cucujo." To the bug professors, cucujo is Pyrophorus noctilucus of the pentamerous family Elateridae. When they shorten its name they call it the Elater firefly. Seen by day, cucujo is a greenish-black beetle, one to two inches long. Behind each eye is a transparent module filled with a luminous substance. When cucujo decides to light up, it gets lit up all over.

Early Days in Dallas
Dallas, Tex., got its first newspaper in 1849, the printing press and the town's first piano arriving simultaneously by oxcart. A school, a bowling alley, a wagon and buggy factory, and a tavern were established in rapid succession. Alexander Cockrell, a Kentuckian, became the first industrialist of the city by becoming a manufacturer of bricks, a lumber dealer, contractor, by operating a ferry across the Trinity river, and by building the first bridge over the Trinity.

Overeating Shortens
Your Life Says
Louise Mason

As we grow older we begin to dream of living longer. But a long and happy life depends to some extent on what and how much you eat, according to Louise Mason, extension foods and nutrition specialist of Texas A. and M. College. She says it isn't easy to cut down on certain foods that you have become accustomed to, but sometimes it's necessary in order to prevent some diseases and ailments that come on with old age. Over-eating seems to be our greatest common dietary fault. That is, eating too many fat, rich, and sweet foods. Miss Mason

recommends eating more green leafy vegetables, milk, citrus fruits, tomatoes and animal protein foods such as cheese, eggs, lean meat, beef, pork and poultry to ward off such ailments as high blood pressure, diabetes, hardening of the arteries and even cancer.

Some folks are allergic to certain foods; some don't like them; some can't digest certain foods. Therefore, each person develops his individual food habits. You can develop these habits to extend your life expectancy. Eat the foods you like, says Miss Mason, but eat more of the good mineral and protein rich foods and less of the sweet and rich foods for longer healthier living.

Winter Legume
Varieties For
Diverted Acres

With acreage allotments definitely ahead for several cash crops, many Texas farmers are turning to winter legumes for soil improvement on diverted acres. It is important that farmers plant legume varieties that are best adapted to their particular soil and climatic conditions. Experiments and demonstrations all over the state have proven that certain legumes give better results in certain areas. Leo White county agricultural agent says alfalfa under irrigation is the most satisfactory adapted legume for the High Plains, Pecos Valley and El Paso Valley. Benial sweetclovers also do well under irrigation when planted in early fall. If you have plans for more soil improving crops this winter, Leo suggests that you use one of the latest proven recommendations as to legume varieties, fertilizer requirements, seed inoculation and planting methods.

NOW...
LESS FEED

makes
MORE EGGS

It's true — Purina Research Tests prove that it now takes less feed to make more eggs than with Purina's 1948 formulas when you feed

NEW PURINA "HIGH ENERGY" PLUS
LAYING CHOWS

They're new — the best in Purina history. You won't want to miss getting your flock started on Purina Layena or Lay Chow — in every bag you get these four extras:

1 EXTRA VITAMINS Added vitamins and better controlled vitamin quality result in better condition of birds through the year!
3 EXTRA PALATABILITY Purina Laying Chows now have more appetite appeal — the taste is better — the texture is better!

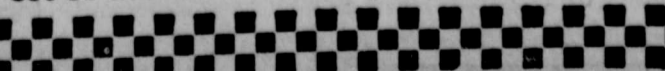

2 EXTRA PROTEIN QUALITY It takes several kinds of proteins to make egg whites and yolks. Purina this year gives you a higher-quality blend of proteins.

A HOME TO LIVE IN

Design B-130. The floor plan of this small house is square but because of its low pitched gable roof and bay window, it does not, from the exterior, have the appearance of being square. It is small enough to fit on a narrow city lot, if necessary.

There is a comfortable living room, two bedrooms with bath between, a combination kitchen-dining room, and a full basement. The living room has a projecting picture window with a 12 foot ledge and overhanging eaves. The exterior is finished with wide siding and an asphalt shingle roof.

The bedrooms have wardrobe closets with overhead storage space. The linen closet is next to the bathroom and there are additional closets in the living room, kitchen and bedroom hall.

The dimensions are 28 feet by 28 feet with a floor area of 784. There are 15,288 cubic feet including the basement.

For further information about construction and plan features address the Home Building Editor of this newspaper, or your local lumberman.

Out of Town Relatives Attend Teague Funeral

Among the out of town relatives and friends who attended the funeral of Silas Teague Friday afternoon were: Mr. and Mrs. H. J. Jerry, Plainview; Mr. and Mrs. Afton Teague, Plainview; Mr. and Mrs. J. R. Teague, Mesa, Arizona; C. C. Medlock, of Lamesa; Ben and Wood Medlock, Lubbock; Mr. and Mrs. Paul Hanner, of Olton; Mr. and Mrs. Clifton Reid, John Damron, Sudan; Mr. and Mrs. Claudia Damron, Hereford; Mr. and Mrs. Elzie Teague, of Mimmitt; Mrs. Lavella Mapes, Dimmitt; Mr. and Mrs. Oscar McGavock; Mr. and Mrs. Loyd Jerry and son, of Tucumcari, New Mexico.

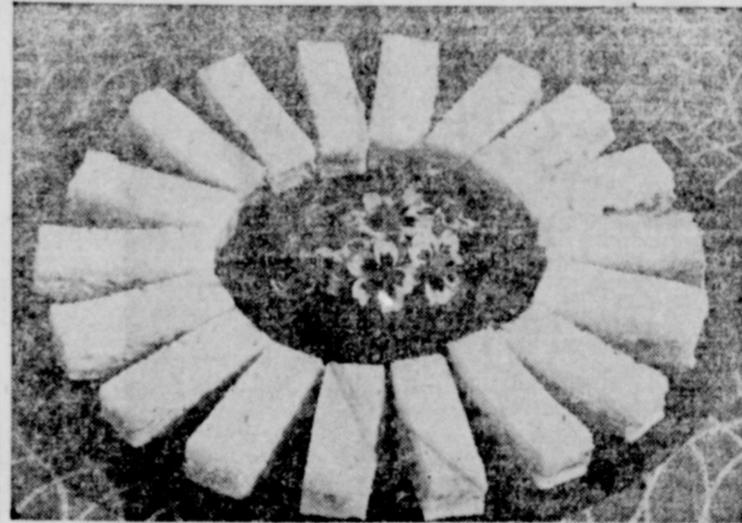

Mr. and Mrs. A. P. Dickenson returned from a visit in Dallas with their daughter, Mr. and Mrs. George Terry and family. Their son, Gene, stayed in Dallas where he will attend Southern Methodist University.

Mr. and Mrs. J. T. Neese spent Sunday in Wildorado, Texas, visiting their children.

Mr. and Mrs. Herman Robinson and children, of Cactus, Texas, spent Thursday night and Friday in the home of Mr. and Mrs. J. C. Hill.

Small Sandwiches, Big Flavor

Cheese spread and almond sandwiches can be cut into dainty finger sandwiches and still keep their man-sized flavor. That's because the cheese spread itself, one of a large family of cheese spreads which come in attractive five-ounce glasses, has a satisfyingly sharp flavor. Almonds and chopped sweet pickles provide interesting texture. Make this spread for both hearty and dainty sandwiches. Collect the glasses for cheerful breakfast service.

Cheese Spread and Almond Sandwiches
 1 5-oz. glass sharp cheese spread
 1/4 cup chopped sweet pickles
 1/4 cup chopped blanched almonds
 1/4 cup mayonnaise
 12 slices bread, crusts trimmed

Blend the cheese spread, almonds, pickles and mayonnaise. For each sandwich, spread a generous portion of this mixture between two slices of the bread. Cut each sandwich into three strips and arrange on a chop plate.

RAIN THIS WEEK TOTALED .48

Rain this week amounted to .48 of an inch, most of which fell Tuesday afternoon and night. In parts of the county the rain was heavier, and the dirt roads are reported to be in very rough condition.

Clear weather is needed on the row crops, and some of the farmers have maize ready to harvest as soon as weather will permit.

Mr. and Mrs. H. P. Ledbetter, Sr., Mr. and Mrs. L. M. Ledbetter and son, of Amarillo, spent the week end with Mr. and Mrs. Irving McJimsey and Mr. and Mrs. Paul Ledbetter.

NOTICE!

TO OUR CUSTOMERS:

We wish to announce that we have about completed remodeling and rearranging the interior of our lumber office and are placing a stock of shelf hardware, paints and varnishes as rapidly as they arrive.

We also have on display a good stock of hot water heaters and plumbing materials.

We especially invite our friends and customers to visit our store and let us discuss your building and supply needs.

We are doing our repair work as we can get to it and at an early date we hope to begin work on finishing the outside of the building.

We wish to express our appreciation to the people who have been so patient with us while we have been torn up.
