Milton Dudley Announces Candidacy For Re-Election

Commissioner of Precinct No. 4 Milton Dudley, authorized the News to announce his name as a candidate for re-election to the office which he is now serving, subject to the action of the Democratic Primary.

Mr. Dudley's announcement is as follows:

"To the People of Precinct No. 4 and Briscoe County:
"In offering myself as a candidate for re-election to the office of county commissioner of Precinct No. 4, I do so with full realization of the duties and responsibilities involved.

"With the experience I have gained and a continuation of the fine cooperation I have had in the past I believe would enable me to serve you better in the future.

I want to thank each and every one of their support and cooperation in the past, and any consideration given me in the coming election will be greatly appreciated.

Sincerely yours,
MILTON DUDLEY.

Out-of-Town Relatives Here for Whiteside Funeral

Among out-of-town relatives here for the funeral services of T. R. Whiteside were the following:

Mrs. T. W. Whiteside, Mrs. Maurine Stewart, Mr. and Mrs. Elmer Jordan and J. B. Buckner, of Blackwell, Texas.

Mrs. W. O. Whiteside and daughters, Len and Billy Jo, of Longview, Texas.

Mr. and Mrs. Joe McWilliams and children, of Amherst.

J. D. Finley, of Bryans Mills, Texas.

Mr. and Mrs. R. E. Douglas and Rex; Mr. and Mrs. Cecil Terrell, Mr. and Mrs. Byron Terrell, Mrs. M. A. Terrell, Mr. and Mrs. R. E. Finley, all of Lubbock.

Douglas Finley, of Tahoka.

Among the out-of-town friends were: Mr. and Mrs. Jack Reeves and Mr. and Mrs. Clyde Jones, of Lubbock; Judge and Mrs. O. R. Tipps, of Wichita Falls, Texas; Mr. and Mrs. Homer Sanders, Muleshoe, Texas; Judge Alton B. Chapman and John B. Stapleton, Floydada; Mr. and Mrs. Bland Burson, of Channing; Frank Bain and Arch Keys, of Plainview.

Mrs. Verne Haggart, Blackwell, Texas; Mr. and Mrs. R. N. Melton, Memphis, Texas.

Mr. and Mrs. Maurice Foust, Mr. and Mrs. J. W. Foust, Mr. and Mrs. J. R. Foust, Mr. and Mrs. A. C. Donnell, all of Amarillo.

Mrs. Emma Flowers Dies at Perryton

Mrs. Emma Flowers of Perryton died in a Perryton hospital Monday, following a recent stroke. Funeral was held in Perryton Wednesday at 2 p. m. Mrs. Flowers is a sister of Ed and John Vaughan of Silvertown.

Among those attending the funeral from Silvertown were: Mrs. Bud McMinn, Ed Vaughan, Eural Vaughan, Mr. and Mrs. W. A. Stephens, John Vaughan, Veral Vaughan, Elmer Vaughan and Mrs. Mrs. M. L. Welch.

Veterans Farm Loan Is Slow and Draggy Business

Information from the Veterans County Service Office indicates that a great number of veterans attempting to buy farms under the Veterans Land Program are due for a long wait—some are doomed to disappointment—the blame for that can be placed to a great extent on the popularity of the project.

According to the Veterans Land Board, more than 4,000 applications already have been filed and are still pouring into the office at a lively clip, almost twice as fast as they can be processed. It all boils down to a matter of time.

The clock will strike midnight for veterans holding options to buy before their applications can be acted upon. The fact that the veteran loses no money in such situations is one of the better points of the program and if he can obtain an option renewal he may get his farm after all.

Veterans are advised to get the longest term options possible and to hope that they will be able to get renewals. In view of the above facts it does not appear to be wise to put up any earnest money on these deals.

Local F. F. A. Boys Win First in Steer Judging Contest

Four F. F. A. Boys from the local chapter went to Kress Saturday, February 25, where they entered the livestock judging contest. The boys judged sheep, gilts, barrows and fat steers and were in competition with Tulia, Plainview, Cotton Center, Hale Center, Lockney and Kress.

In the contest the boys won first place in judging of the fat steers; second place in judging of the hogs, and eighth place in judging sheep. In adding all the points together Silvertown was beaten only thirty-one points by Tulia. The boys are very proud of the pennant they won by getting second place.

Attend Brotherhood Meeting at Lockney

Silvertown was represented at the Associational Brotherhood meeting in Lockney Monday night by the following men: Rev. G. A. Elrod, Johnny Burson, Lee D. Bomar, Ewing Edwards, J. E. Wheelock, C. G. McEwin, Elbert Stephens, Bill Tennison and Alvin Jackson.

Howard Hunt's Condition Reported As Improved

Mrs. Sam Hunt and son, Alfred, left last Friday for Los Angeles, California, to be at the bedside of their son and brother, Howard Hunt, who was critically ill.

Mrs. Hunt called her husband Sunday and reported that their son was much improved. No further word has been received.

Mr. and Mrs. Bob Trout and daughter, of Roswell, New Mexico, spent the week end with Mr. and Mrs. Dee McWilliams. Mrs. Trout is Mrs. McWilliams' sister.

In 1946 these boys won the first Opportunity Awards at the A. and M. College of Texas—four-year scholarships for outstanding Texas high school graduates who would otherwise be unable to attend college. This year they are graduating from Texas A. and M. with college records which prove they took advantage of the opportunity.

Honor graduates of Texas high schools in 1946, the boys were selected for Opportunity Awards by the college Scholarships Committee on the basis of scholarship, leadership, character and need.

Each of them received \$200 to \$300 a year plus a job to pay college expenses. The jobs they have held during school include those of waiter in the mess halls, fry cook in a cafe, stable boy, yard man, laboratory assistant, printer's devil and baby sitter. During summer vacations they have worked on farms and ranches, in offices, on the highways and as roughnecks in the oil fields.

Required to make above-average grades in order to hold their scholarships, they have ranked high in their classes. One has an almost perfect A average for his four years. The average of all grades made by the entire group in four years is above B.

They have won their share of honors in other campus activities. One was president of their Freshman class, another outstanding in intramural athletics, while another won a summer fellowship for leadership in campus religious activities. Five were elected to the top military honor organization, the Ross Volunteers, and six to top scholarship honor societies. Nine will graduate as Honor Military Students.

Since this "pilot" group entered school in 1946, the Opportunity Awards program has grown. There are now 148 boys enrolled at Texas A. and M. College on these scholarships, with sixty or more expected to be granted opportunities next September.

Hollywood Hillbilly Jamboree in Person At Palace Theatre

Sunday and Monday, March 5 and 6, in person on the stage at the Palace Theatre, will be Hollywood Hillbilly Jamboree.

Also on the screen will be "Top of the Morning" with Bing Crosby and Barry Fitzgerald.

In person will be Ramblin' Tommy Scott and his talking doll, Luke McLuke direct from Nashville, Tennessee; Mississippi Valley Quartet with fiddlin' Eddie Williams.

Comedy, Horse-fly the funny man; Clarabelle, that gal from the mountains.

Dancing, Frankie Scott, Doyle Price, Pete Potter and Baby Sandra.

Regular Meeting of Lions Club Will Be Thursday Night

The Silvertown Lions Club will meet Thursday night in regular session at 7 p. m. The district supervisor of American Red Cross will be a guest of the club. Also local entertainment has been arranged for.

At the last meeting it was agreed that one Lion bring another Lion, or a new member. A Lion may bring a paid guest if they like.

Keep this date in mind and plan to attend.

Red Cross Drive to Start Monday, March 6

Carl S. Crow, chairman of Briscoe County Chapter American Red Cross, announces that the Red Cross drive in the county will start Monday, March 6, to raise funds for 1950 work.

The County's quota is \$900.00, \$445.00 of this amount will go to the National Red Cross fund and the remainder will remain in Briscoe County for local emergencies which may arise.

Mr. Crow is anxious that all workers be ready to start work the first day of the drive and push until their quotas are reached.

Anyone in Briscoe County who may be missed in this drive are requested to mail their donation direct to Carl S. Crow, county chairman, and he will see to it that their donation will be immediately placed in the fund.

Mrs. R. E. Brookshier and Mrs. Ola Mills were in Plainview on business Tuesday and while there they visited Mrs. Pearl Simpson and Mrs. John Vaughan at the hospital.

Mrs. Clifford Allard visited with her mother, Mrs. J. E. Jackson, in Plainview Friday.

Last Rites Held For T. R. Whiteside at Methodist Church

Funeral services for T. R. Whiteside, prominent business man, were held at 2:30 o'clock Thursday afternoon in the Silvertown Methodist Church. Rev. Grady Adcock, pastor of the church, assisted by Rev. G. A. Elrod, pastor of the First Baptist Church. Interment was made in Silvertown Cemetery under the direction of Douglas Funeral Home.

Temple Rufus Whiteside was born May 7, 1897, to Mr. and Mrs. T. W. Whiteside, at Sipe Spring, Comanche County Texas. He died at 2:15 p. m. Tuesday, February 21, 1950, at the age of 53, in Baylor Hospital, Dallas, Texas.

His death was attributed to a blood clot arising from injuries received in an automobile accident near Lockney three weeks ago.

Following the accident, in which Mr. Whiteside received a broken hip and ankle, he was flown to Dallas for special treatment.

Deceased moved with his parents to Blackwell, Texas in 1898. He was married to Miss Naomi Finley, July 15, 1922, in the home of her sister, Mrs. N. A. Terrell, Blackwell Texas.

Mr. and Mrs. Whiteside moved to Silvertown in January, 1924, where he established a drygoods business. He sold the business in 1946 and since that time had been engaged in stock raising and farming. He served his country in the U. S. Navy during World War I.

Mr. Whiteside was converted and joined the Blackwell Methodist Church in the summer of 1923. He was a member of the Silvertown Methodist Church at the time of his death. He was also a member of the Silvertown Masonic Blue Lodge, and the Lockney Chapter and Council.

He is survived by his wife, two sisters, Mrs. Elmer Jordan and Mrs. Maurine Stewart, of Blackwell, Texas; his mother, Mrs. T. W. Whiteside, of Blackwell, Texas; two nieces, Len and Billy Jo Whiteside, of Longview, Texas.

Important P. T. A. Meeting Coming Up March Nine

At the P. T. A. meeting on March 9, there will be an interesting movie on "Safety". This program is free. Everyone is urged to come. There will also be an election of officers at this meeting instead of April 13, since an entertainment for all titled "Gay Nineties" is scheduled for that date. Mark these two dates on your calendar—they are important. Do not miss it.

New Texas Almanacs at News office, \$1.00 each.

Freeland Bingham Moves House to South Main Street

Mr. and Mrs. Freeland Bingham, who lived 500 or seven miles east of town on the highway, recently sold their farm and moved their house to Silvertown to a location on South Main street. They have been busy re-decorating their house and will soon have it finished. Mr. Bingham has bought a farm near Dalhart, Texas, and the land is sowed to wheat.

Among those who attended the Baptist District Convention at Hereford Tuesday were: Rev. and Mrs. G. A. Elrod, Mrs. G. W. Dowdy, Mrs. J. E. Wheelock, Mrs. R. C. Bomar, Mrs. C. R. Badgett, Mrs. C. O. Allard, Miss Eunice Cox.

Premiums For Junior Livestock Show to Exceed \$300.00

Fifteen 4-yr and FFA calves will receive premium money in the Junior Livestock Show here Friday which totals \$287.50. The calves placing lower than seventh place will receive \$2.50 each. The first place calf in each of dry lot classes will be paid \$25.00. The second place animal will get \$20.00 and the others are scaled down until eighth place receives \$2.50. The Grand Champion calf gets an additional \$25.00 and the Reserve Champion gets \$20.00.

In the fat pig division, the first place animal in the light and heavy classes gets \$5.00; second place, \$4.00; third place, \$3.00; fourth place, \$2.00 and the remainder gets \$1.00 each. The Grand Champion pigs gets an additional \$15.00 and the Reserve Champion will receive \$10.00.

Six of the calves are entered in the Amarillo Fat Stock Show which begins Monday and they will leave for Amarillo as soon as the County Show is over. Those taking their calves to Amarillo are: Don Cornett, Bill Mayfield, Pat Northcutt, Billy Tennison, Joe Lee Bomar and Melvin Hamilton.

Mrs. Scott Dunham and sons, spent the week end in Amarillo visiting Mr. and Mrs. Bill Ford, and while there Mrs. Dunham attended the Texas Beauty Convention. They returned home Tuesday, night.

Mrs. L. Wilkinson, of Hereford, visited friends in Silvertown Friday.

CORRECTION !

The News erroneously stated in its issue of February 16, that the body of Capt. Joe Haynes would arrive in Amarillo, March 6. It should have read, Sunday, March 5, 1950 at 6:45 a. m.

The train will make a twenty minute stop. Several relatives and friends plan to make the trip to Amarillo and be on hand when the train arrives. A short service has been planned by the group who are expecting to make the trip.

VISIT IN ELECTRA

Mrs. Mollie Stone and her sister, Mrs. Emma Waller, of Kress, went to Electra a few days ago to visit their brother, Isaac Cooper and wife, Rosa, who were spending the winter with their daughter and family, Mr. and Mrs. Dave Eaken, Mrs. Pearl Culpepper, a daughter of Mrs. Stone, and a granddaughter, Miss Loretta Culpepper came to Electra and brought Mrs. Stone and Mrs. Waller home and spent a day in Silvertown visiting with relatives.

Rex Douglas, of Lubbock and Douglas Finley, of Tahoka, visited recently with Mrs. T. R. Whiteside.

Mr. and Mrs. G. R. Dowdy spent the week end in Amarillo with their son, Ross Dowdy.

Dee Ann Lyde, of Lubbock, is spending this week with her grandparents, Mr. and Mrs. Wylie Bomar.

Mr. and Mrs. Paul Webb, Paul Howard and Gracie Fink, of Tulia, were Sunday guests of Mr. and Mrs. Dee McWilliams.

"THE BROTHERHOOD OF MAN under the Fatherhood of God is our only guarantee of the preservation of the blessings of Democracy," Governor Allan Shivers says in an official memorandum designating February 19-26 as Brotherhood Week in Texas. Governor Shivers, far right, issued the memorandum at the request of Protestant, Catholic and Jewish leaders. Shown with the governor from left to right are W. F. McNamara, Joe C. Carrington and Dr. H. J. Ettinger, Austin leaders of the National Conference of Christians and Jews, sponsors of the 17th annual national observance of Brotherhood Week. In issuing the call to observe Brotherhood Week, Governor Shivers urged all to rededicate themselves to the principles of our government that recognizes "the dignity and worth of every citizen" and guarantees those rights through the Declaration of Independence and the Bill of Rights.

MIDLAND HALL—Architect's drawing of Midland Hall, a \$50,000 addition to the seven building plant of the Gonzales Warm Springs Foundation for Crippled Children. Funds for the new building, a one-story fireproof Spanish-type structure, were donated by seven residents of Midland: Mrs. Ruth Scharbauer, Clarence Scharbauer, Jr., O. C. Harper, Ralph Lowe, R. B. Cowden, John Y. Francis and J. P. Gibbons. Midland Hall will be located adjacent to a new kitchen and dining hall also scheduled to be erected at the Gonzales institution. Midland Hall will be used as a reception, recreation and entertainment center.

External Parasites Of Swine Can Be Controlled

Lower prices have put the squeeze on swine profits and it is now more important than ever to produce hogs at the lowest possible cost. There is no profit in feeding hogs that are infested with external parasites, says extension entomologist.

They point out that the three most common external parasites of swine in Texas are sarcoptic and demodectic manges and hog lice. All three can be controlled. Sarcoptic mange is caused by a small yellowish mite which is scarcely visible to the naked eye. The mites burrow into the skin, and form tunnels within which the eggs are laid. The burrowing causes lesions which usually are noticed first near the head but if control measures are not used, will spread over the entire body of the animal. The skin becomes thickened and is thrown into wrinkles or folds. It may become yellowish or pinkish in color and appear raw. The infested animals may lose their hair.

According to the specialists, the demodectic or follicular mange is caused by a small worm-like mite about half-the-size of the sarcoptic

tic mite. These mites penetrate the hair follicles and cause small, hard nodules or pimples to form. These nodules may grow to an inch in diameter and they first appear about the head and spread backwards over the body.

The hog louse is bluish-gray in color and can be seen without difficulty. They feed mainly on the tender areas of the skin but may be found over the animal's entire body. They are blood-suckers, says the specialists, and severe infestations cause serious flesh losses, poor feed utilization and general unthriftiness.

Deer says sanitation is a most important factor in controlling hog mange. The mites can live in the litter of the house or pen for at least a month so a control program must include a thorough clean up job along with the use of an insecticide. The demodectic mange is not easily controlled, it is not commonly found in Texas.

A good insecticide for sarcoptic mange control is benzene hexachloride wettable powder used at a strength of .12 percent gamma. Lindane which is the pure gamma isomer of benzene hexachloride may be used at the rate of one-fourth pound of 25 percent to each 25 gallons of water.

YOU CAN'T MATCH A Frigidaire. Simpson Chevrolet Co. 7-14

Music Stores May Replace Druggist Shops

NEW YORK — The time isn't here just yet, but it may not be too long before you can get your doctor's prescription filled at the music store instead of the drug counter.

Something like a symphony or sonata for sinus, some Debussy for that feeling of debility and a little Rachmaninoff for that restless Mozart for measles or mumps?

Naturally, music won't set a broken leg or pull a tooth, but some of it will help you digest food better, quicken your breathing, give you more energy and lower your pulse and blood pressure.

The army spent money on the study of the curative and psychological effects of music at Walter Reed general hospital in World War II. Out of that venture has come the music research foundation.

Not Entertainment It is not in any way an entertainment project. Indeed, the idea came as a rebound from an agonized scream from a wounded World War I soldier forced to listen to "Over There" . . . Over there where he had suffered terribly.

His scream was heard by Miss Frances Paperte, then star of the Chicago Opera Co. Her eventual response was to decide that "all music is not good for all people." In World War II she tested out this belief among hospitalized soldiers, and later founded the Music Research foundation at a New York meeting in the home of Mrs. Benjamin Harrison.

Fritz Kreisler is honorary President, Charlotte Wilkie Pihl is Treasurer; directors include Jaromila Novotna of the Metropolitan Opera and Dr. E. C. Williams, U. S. assistant surgeon general; among advisers are Edwin Franko Goldman, Deems Taylor and Fred E. Ahlert, president of ASOAP, which was the first large contributor to the foundation's funds.

Melodies Classified Musical classifications are "stimulating," "soothing," "happy" and so on. Among the listings, prepared by musicologists, are Chopin's Waltz No. 6 in D-flat ("minute") and the "Peer Gynt" Suite No. 1, by Grieg, "gay"; Chopin's Mazurkas, op. 50, "stimulating"; Chopin's Prelude No. 7 in A major, and the Bach-Gounod "Ave Maria," "soothing"; the Dance of the Spirits, from Gluck's "Orfeo And Euridice," "happy."

Some neuropsychiatric patients, submitted to some curative music, were found to be less tense, to cry less, to "socialize" better, to have an improved emotional tone. New York medical men testify to the utility of music in the treatment of cardiac diseases and the administration of anesthetics.

The doctor defines the patient's need; the musician selects and applies the appropriate number; the approach is primarily medical rather than musical, says Miss Paperte. She sums it up this way:

"The Music Research foundation is attempting to make a reproducible science of the present haphazard application of music to various uses." The greatest present need, she says, is a "standardized procedure."

New Fields to Be Invaded By Science, Chemists Hear

The next hundred years will bring tremendous advances through extension of scientific methods to fields now considered outside the realm of science, a distinguished New York chemist predicted in an address to the American Chemical society at Meadville, Pa.

Deploring the efforts of laymen, philosophers, and even some scientists to "erect boundaries circumscribing the domain of science," Dr. Henry B. Hass, manager of research and development of the General Aniline & Film corporation, said the techniques of science are so new that no one can possibly know what limits, if any, there are to potential scientific achievement. It was little more than a half century ago, Dr. Hass pointed out, that pioneers who tried to introduce scientific thinking into psychology were "sneered at by all of our best people" for advancing the theory that sex problems were involved in mental disturbances. Today, he noted, psychology is generally accepted as a useful science, although still in its "early evolutionary stage."

Dr. Hass, whose subject was "The Unfinished Task of Science," also forecast revision of some of the basic aspects of man's view of the universe, explaining that "we do not know, for example, whether we live in an expanding, a stationary, or a pulsating universe."

"New textile fibers will compete with present ones," he said. "The further diminution of infectious disease as a major cause of human death appears nearly certain as newer antibiotics bring under control whole families of microorganisms. Now that effective chemical agents are known for the control of diabetes, pernicious anemia, and arthritis, we may even regard the degenerative diseases with more hope. Atomic research will make wars more terrible and alleviate the problems of peace."

Milk Industry in Europe Subjected to Regulation

Milk production and consumption are greater in most European countries than ever before, according to Dr. Leland Spencer, professor of marketing at Cornell university. He also notes that the food situation is generally good in most countries of western Europe except Germany and in England where the diet is "somewhat monotonous and unappetizing."

The marketing specialist represented the United States at the world dairy congress in Stockholm, Sweden, last August, and also studied agricultural and economic conditions in 10 other countries from Norway to Italy.

"The milk industry in western Europe is subjected to a surprising amount of regulation and control," Spencer added. "In some countries such as Norway, Sweden, and Switzerland, the controls are exercised largely by farmers' cooperatives. In Great Britain and Holland, government agencies have a lot to say about the distribution of milk."

The payment of subsidies from the national treasury in order to satisfy farmers and consumers, is a common practice, he said. In Britain about one-fifth of the total cost of food is paid by the government.

In most countries of western Europe Professor Spencer found only one milk plant in each market. The farmers have no choice of outlets and the consumers have no choice of milkmen.

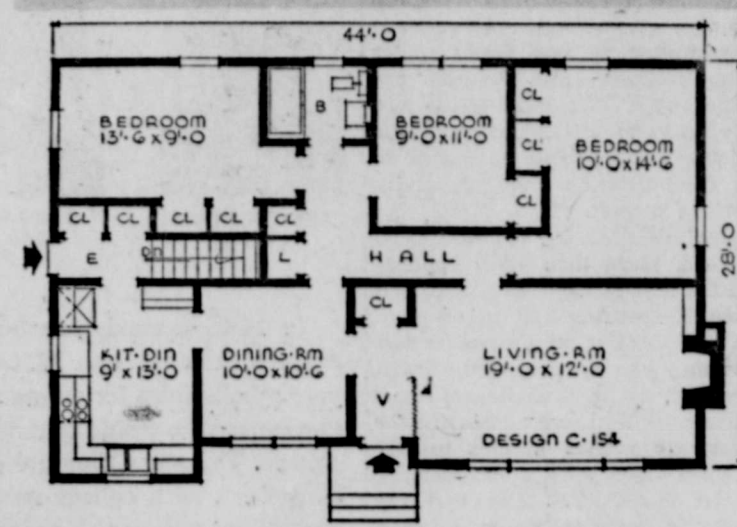

Freshman Height-Weight.

Despite dietary changes caused by two world wars and a major depression, America's young men and women continue to grow taller and heavier, a University of Cincinnati researcher reports. Dr. Laurence B. Chenoweth, professor of hygiene and director of the university's health service, reveals that over the past 33 years, freshman men entering the university have grown 2.74 inches in height and 22.41 pounds in weight and freshman women have added 1.24 inches and 4.33 pounds. With the continuing increase in height and weight of this university's freshmen, the soaring curve does not yet appear to have reached a plateau, he feels. In fact, he expects the increases to continue "for some years."

Care of Cat's Teeth

When cats live easy lives, as they do in most city homes and on some farms, their teeth become encrusted with tartar. If the tartar is not removed, they may eventually lose all of their teeth. For this reason, a cat's teeth should be cleaned at regular intervals, in some cases as often as two or three times a year. Veterinarians say it is sometimes necessary to pull all of the teeth of cats suffering from chronic dental infections, especially if their teeth have been neglected for several years. Marked improvement in general health, with probable extension of life, has been noted in many cats having all their teeth extracted. The explanation is that they are much better off without teeth than to have their bodies constantly absorbing poisons from chronic infections, as is the case in extensive pyorrhea.

A HOME TO LIVE IN

DESIGN C-154. For those who like their meals away from the kitchen and living room, a separate dining room is provided. Space is also made available in the kitchen for more informal dining.

There are also three bedrooms and bath, a large living room, 10 closets and a full basement. The closets include wardrobes in the bedrooms, linen and clothes closets in the hall, coat closet in the vestibule and coat and supply closet in rear entry.

In the kitchen the work counter, under the side window, has the range on the left and refrigerator on right. The sink is under the front window and storage cabinet on inside wall. A corrugated glass partition forms the vestibule and the living room has a double glazed picture window and a fireplace with book shelves.

Exterior finish is siding and asphalt shingles. Dimensions are 44 feet by 28 feet. The floor area is 1214 square feet, the cubage 23,673 cubic feet.

For further details about construction see your local lumberman.

Black walnuts can be grown from seed. Supplies of planting seed may be obtained from the Texas Forest Service, College Station, Texas for a small charge. It covers the cost of mailing and handling.

PART OF THE PICTURE

When you picture your Public Service Company, perhaps you think of a power plant, a transmission line, or maybe the Public Service business office in your community. We like to think about another part of the picture . . . the many folks we work for — our stockholders. Southwestern Public Service is owned by people from many walks of life . . . you, your neighbor, your friends, and many others. Each one of them has an interest in the company, and no one of them owns more than 2% of the total stock.

That's the way free, private enterprise works. Everyone has the opportunity to share in the ownership of sound, business-managed companies like your Public Service. That's the American Way . . . the secret of how we have become great and strong and free!

SOUTHWESTERN
PUBLIC SERVICE
COMPANY

35 YEARS OF GOOD CITIZENSHIP AND PUBLIC SERVICE

**DON'T YOU WISH
YOU COULD SEE AROUND
 THE CORNER?**

Just about everyone would like to know what's heading in his direction—today, next year, ten years from now.

No one can know, but the wise man prepares for tomorrow's troubles, *today*.

One safe, sure, easy way for you to anticipate tomorrow's troubles—and to plan for the things you've always wanted—is the Payroll Savings Plan of U.S. Savings Bonds.

The Payroll Savings Plan is *safe* because Uncle Sam stands behind every Bond.

It's *sure* because money is saved automatically—before you have a chance to spend it.

It's *easy* because you just sign up, get your Bonds, and wait for the profits to start climbing.

What better way is there to take care of the future, *now*?

Join your company's Payroll Savings Plan today. Or, if you're not on a payroll, drop in and sign up for the Bond-A-Month Plan at your bank.

Remember: \$3 today mean \$4 ten years from now—when you may need them more!

Mrs. Wylie Spoke to Local Women February 20

Plainview Daily Herald

Mrs. C. N. Wylie of Dalhart was program leader for the Presbyterian Women's Auxiliary when it met in Fellowship Hall at the First Presbyterian Church Monday afternoon, February 20. Mrs. Wylie, president of the Amarillo Presbytery of the Women's Auxiliary brought a discussion on "Every Woman—a Fulfiller of God's Design." Said Mrs. Wylie, "Every person everywhere should know the way of Jesus Christ and put this way into practice."

The program was presented in dialogue form with the following local women participating: Mesdames E. C. Nicholl, C. A. Robinson, F. J. Spuhler, L. M. Frogge, Blake Bolton and Everett Bryan. Special music was rendered by Miss Alice Yates accompanied by Miss Frances Laas. Selections given were, "Prayer," "We Give Thee but Thine Own," "O God of Love," and "O King of Power."

The program stressed the needs in various mission fields and records from the various fields were played. Records from a woman in Korea, in Europe, from a youth in Westminster Fellowship, an Indian woman and a hymn from a negro choir were featured.

Mrs. Reuben Foster, president of the local auxiliary, gave a welcome address and a short introduction to the program. The opening prayer was given by Mrs. A. B. Haynes of Canyon.

An offering was taken to be distributed to the board of national missions, of foreign missions and of Christian education.

Mr. and Mrs. A. P. Dickerson were dinner guests Sunday of Mr. and Mrs. O. C. Allard.

Seven Step Cotton Program Steps 9th

College Station — The south-wide 7-step cotton program, because of the reduction in cotton acreage, will receive even more consideration than in the past, says Fred C. Elliott, extension cotton work specialist of Texas A. and M. College. The reduced acreage, he says, means a greater concentration on better methods for greater production from fewer acres, for now, it will be the efficient producer who will continue to make a profit from his cotton operations.

The seven steps include: fitting cotton into balanced farming; taking care of the soil; using the best variety; making your labor count; controlling insect and diseases; picking and ginning for high grade and selling for grade, staple and varietal value. Basically, says Elliott, this is just a good farming program that individual farmers can carry out on their own farm. It is not new but it does emphasize the basic practices and methods that can lead to greater and cheaper production per farm and at the same time the soil can be improved and built up.

Elliott says the Texas Extension Service has had the active support of all allied cotton interests in the state and this cooperation on the county and state level has been responsible for making the program successful.

Last year, more than 7,000 farmers in 87 counties cut their losses from root-rot by planting legumes, principally sweet clovers. In 146 counties, farmers planted cotton following phosphate and legumes and barmyard manure was used on nearly 8,000 other farms in 124 counties in the state. Elliott says cotton farmers are planting better seed. Higher yielding varieties of superior fiber are being bred by the Agricultural Texas Experiment Station and the seed breeders of the state. In 1949, nearly 600 one-variety associations produced better cotton on approximately 5 million acres.

Mechanization has saved labor and has cut the cost of production for the cotton farmer. The rotary hoe, the stripper and mechanical picker have been widely and successfully used. He reports that farmers last year really went after the bugs. Cotton farmers used more than 50 million pounds of insecticides, as dusts and sprays, on 5 million acres of cotton. This insect control program was a contributing factor to the high state average yield in 1949. The best per acre yield since 1894.

He reports that more than 100,000 cotton farmers in 167 counties were members of groups that received free classing service under the Smith-Doxey Classing program. Elliott expects even greater achievements for the coming years, for he says the program is now well organized and all interested groups and individuals know and recognize the value of the program to the cotton industry. He believes that per acre yields can be increased even above the 1949 figure if farmers will continue to use the best known production methods and practices on their farms.

Alvin Redin and Clifford Allard were business visitors in Amarillo Tuesday evening.

Circle Two Womans Society of Christian Service Met

Circle two of the Womans' Society of Christian Service met February 22, in the home of Mrs. Bob Hill with ten members present.

The program opened with the devotional led by Mrs. Travis Marshall. After a prayer, Mrs. Glenn Bunch gave chapter one of "Great Prayers of the Bible," which was a very interesting lesson.

Members present were: Mesdames Glenn Bunch, Bailey Hill, Hugh Nance, Curtis Bingham, Grady Adeock, Homer Stephens, Glenn McWilliams, Travis Marshall, Imer May, the hostess, Mrs. Bob Hill.

CARD OF THANKS

If it were possible I would like to take each person by the hand who helped me either by a kind word, or deed in my recent sorrow and say "thank you." But since I cannot, please accept this from my heart. I do sincerely appreciate every kindness.

And when sorrow comes your way my prayer is that you have the same kind hands to minister to you. May God bless all of you.
MRS. T. R. WHITESIDE.

Mrs. J. S. Fisher fell Tuesday and broke the small bone in her ankle. She has it in a cast for the time being.

Doctor Keeps Body of Wife In Glass Case

LONDON. — Dr. Martin Van Butchell, a distinguished London doctor, was a man of wide learning and skill, but he could not bear to be parted from his wife. When she died, he was stricken with grief—but he thought out a scheme by which he might continue his day-to-day life with her.

Mrs. Van Butchell alone had seen the soundness of the reasons underlying her husband's eccentricities. Other people were inclined to laugh when the doctor rode a pony painted with brilliant green and blue spots. But Mrs. Van Butchell agreed that since her husband had first learned to ride on a rocking horse, it was wise for him to keep as close to the original as possible.

Dr. Van Butchell detested buttons and designed a garment of white elastic wool, stretching from ankles to neck, which served the purpose of coat, trousers and waistcoat all in one. His wife appreciated its convenience in saving a busy doctor's time.

Poured Drugs in Lake
Even when the doctor visited the Serpentine and by pouring drugs into it turned it into a lake of medicine, Mrs. Van Butchell could never see anything but common sense in the affair.

The doctor made very good medicine, and so prodigious a dose as an entire lake of it enabled everyone to try its qualities, if they felt so disposed.

The doctor realized how well it pays to advertise. When he went riding, he carried a jawbone slung about his waist as a sign of his profession. Once every week he sat on his doorstep with a little tray of cakes, tarts, sweets, apples and nuts, and gleefully dispensed hospitality to the children of the district, making good friends with them, knowing that the children of today can be the doctor's patients of tomorrow.

Now, with all these means of adding to the gaiety of life lingering only in his memory, he looked at his wife's body and considered his scheme for enjoying her company for years to come.

Appearance of Health
He consulted his old friend, Dr. William Hunter, one of the foremost anatomists of the day. Hunter was familiar enough with his friend's queer ways, but he listened in astonishment.

Dr. Van Butchell wanted to embalm his wife, restoring the appearance as nearly as possible to one of health. He dispatched her body to Dr. Hunter's dissecting room, and there a remarkable change took place in Mrs. Van Butchell's appearance.

A mixture of oil of turpentine and camphorated spirit of wine injected into the vascular system gave her an appearance of ruddy health, particularly when her cheeks were suitably padded and stuffed with powdered niter and camphor. In a glass-fronted case, Mrs. Van Butchell was laid and held in place by a bath of plaster of Paris.

Errant-Husband Seeker Has Outstanding Record

NEW YORK.—George H. Lamb is one of the few favored men in the nation who are able to combine business with pleasure to an extent each year which insures them of a nice vacation.

Lamb is chief of the abandonment bureau of the Queen's district attorney's office. Every year, at about the time the season in New York indicates how desirable a warmer clime may be, Lamb hires himself to Florida or California or some other equally attractive setting.

Instead of a rod and reel, however, he takes along a few bench warrants charging abandonment and a lot of addresses and telephone numbers supplied by deserted wives with families to support.

He usually returns with a large bag of errant husbands. His last haul was 24 delinquent husbands and others out of a possible 37. Of these, 21 signed papers agreeing to help support their children. The other three refused to sign. With the aid of local police, Lamb had them arrested and returned to New York.

In his day Lamb has brought back some 3,000 errant fathers. He likes to think of the children who have benefited by his work.

Governor Receives Letter Addressed Only With Photo

ST. PAUL, MINN.—A picture of Gov. Luther Youngdahl pasted on the face of the envelope was the only address on a letter recently received by the governor.

The picture had been clipped from a newspaper and the letter came from Mrs. Elizabeth N. Fischer, postmaster at Streeter, N. D.

She explained that her hobby is collecting personal letters and autographs of persons in the news. She asked Youngdahl for a letter and a picture to add to her collection.

Women's Missionary Society Met February 27

The Women's Missionary Society met February 27 at 1:30 o'clock in the auditorium of the First Baptist Church in business and mission study. Seventeen members were present.

After the business meeting the circle chairman with their group met in separate rooms and enjoyed the mission book "Prophet of Little Cane Creek."

Friday, March 3, at 10:00 the Missionary Society will meet in the auditorium in the Annie Armstrong season of prayer program, with a covered dish luncheon at the noon hour. Leaders for the day Mesdames G. A. Elrod, A. A. Howard and Bud McMinn.

Monday, March 6, at 10:00 the Missionary Society will meet at the church with a covered dish luncheon at the noon hour.

The day is planned for the W. M. S. School of Instruction to be taught and instructed by Mrs. Barton of Cone, Texas. Things we should know concerning the Women's Missionary Union of Texas of 1950. We want to invite not only the members of the Missionary Society, but all the ladies of the church to come and enjoy this school on this day.

The following members were present: Mesdames Ruby Gilkeyson, Charlie Bomar, India McMinn, Minnie Haynes, Winnie Wimberly, Georgia Allard, Mae Bomar, May Tomlinson, Jewell Lyon, Lottie Garrison, Zollie Bomar, Maggie Burson, Eunice Cox, Lydia Arnold Muncy, Clarabell Stodghill, and Rev. and Mrs. G. A. Elrod.

California's Antelope Given Chance to Survive

In the lonely, rugged terrain of south-eastern Mono county, the remnants of California's aboriginal herd of half-a-million antelope are being given another chance to hold their own against the inroads of civilization.

The division of fish and game has announced completion of a trapping and transplanting operation which moved 50 antelope from their Lassen county home to a less crowded area once inhabited by their ancestors. The 230-mile truck trip through Nevada brought the prong-horns to their new Benton Meadows residence in good condition.

Sixty-five of the colorful animals were trapped during one month in the lava bed plains east of Susanville. Of the total, two were earmarked for display in the city of Sacramento zoo, two escaped, five were casualties, and six were rejected because of advanced age.

Assistant game manager Bert F. Knowles, leader of the federal Aid Pittman - Robertson project, reported that the release supplements a similar transplanting expedition effected by the state agency in the winter of 1946-47. At that time, 32 antelope were released in Mono county.

The speedy animals are trapped on over-grazed ranges in north-eastern California with the aid of an airplane. Herded, sorted, and loaded, they are then taken in flat-bed stake trucks for release in more suitable habitat.

In the past century, agricultural development has driven the once abundant antelope into the remote lava bed and woodland country behind the high Sierra. Here, on narrowing ranges, the decimated herds have held their own under the watchful eyes of state employees.

New Coiffure for Round-Shape Face

The girl with the round face should avoid wide coiffures and definitely circular curls which accentuate roundness. Here's a hair-do designed for her. It's a simple, brief cut with smart, smooth crown. Hair is combed flat across the head; the ends are fluted up to give height. In back, the hair is lightly waved and ends in an upturning, girlish fringe. This style is from the Master Book of 50 New Hair-dos, featured in the March issue of Good Housekeeping.

New Hair-Do for Oval-Shape Face

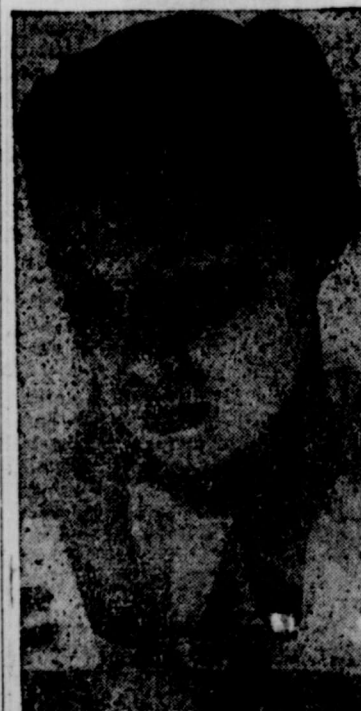

If you are blessed with thick, naturally curly hair and have an oval face, the short cut is perfect for you. This coiffure has a high part at one side of a brief, feathery bang, and is brushed up and away from the face in its own natural wave pattern. It's long enough in back to turn up slightly from the nape. The picture is from the Master Handbook of 50 New Hair-dos in the February issue of Good Housekeeping magazine.

New Coiffure for Square-Shape Face

An appearance of height on top is desirable for the girl with a square face. In this hair-do, short locks on top form a high, softly waved bang. The rest of the hair is medium-long, brought up at the sides, fastened with combs, and then let fall into a cascade of curls from high on the head in back. This coiffure is from the Master Handbook of 50 New Hair-dos, a feature of the March issue of Good Housekeeping magazine.

New Coiffure for Heart-Shape Face

Here is one of the coiffures designed especially for the heart-shaped face. This hair-do, with its curled bang above the brow, waves flowing back from the temples, and wavy loop over one ear, accentuates the pleasing contours of the face. The picture is from Good Housekeeping magazine which features a Master Handbook of 50 New Hair-dos in its March issue.

THE CENTURY OF PROGRESS STUDY CLUB

The Century of Progress Study Club met on February 22, with 13 members present. During the business session, the club voted to act as the other clubs had in regard to the drapes for the club room. A letter will be presented to the District Chairman on plans to Federate in September.

For the program, Mrs. O. C. Ramlly was hostess. She presented the topic—Fabrics and introduced the speakers and subjects as follows:

New and Modern Day Fabrics—Mrs. Donald West.
Plastics in Decorating—Mrs. Jack Billingsley.
Carpet Fabrics—Mrs. Coleman Garrison.
Adjournment was made by the president.

Mr. and Mrs. Grady Wimberly spent the week end in Frederick, Oklahoma, visiting Mr. Wimberly's mother, Mrs. J. T. Wimberly.

Tanning Industry Foresees Exceptionally Busy Year

Some 465 million pairs of shoes will be bought by Americans during 1950, indicating that despite automobiles, airplanes and other means of getting places fast, shoes remain our number one transportation system.

And to quote additional statistics, five and a half million prime cattle hides plus a small sprinkling of horsehides will be required for the tanning of the strong and resilient leather soles which will be the foundation for these 465 million walking machines.

Tanning is, perhaps, the oldest industry known to mankind. Chances are, it originated when a prehistoric caveman came back late from a clambake and stubbed his bare toes on a rock. Next thing, he thought of protecting his feet against such painful hazards by wrapping an animal hide around it. Things have come a long way since then, but only in modern times have costly and time-consuming tanning methods been improved to place flexible and long-wearing leather soles within the reach of all.

During the middle ages and even during the early days of this country, all-leather shoes were a great luxury that only the very wealthy could afford. Today, this is still true in many parts of the world. In some countries a pair of new shoes constitutes the equivalent of two or more months wages for a skilled worker, but here in the United States an average of more than three pairs of shoes will be bought this year by every man, woman and child.

Reduce a la Bike

Walking is one simple way to reduce; but perhaps there are faster and better ways. Whereas one must walk seven miles, to lose a single pound, one can bicycle a much shorter distance in less time and accomplish the same result. In favor of bicycling too are the arguments that so many parts of the body are benefitted. Leg muscles, for instance, will soon lose their flabbiness and tone down into good firm, useful, shapely muscle. American women are prone to think that exercise will make leg muscles bulgy. But American GI's returning from Europe long since dispelled this theory, citing that feminine European cyclists (and nearly everyone in Europe is) had the most shapely ankles and calves they had ever seen, many of them comparable to our American bathing beauties!

Night Safety Beacons

Traffic safety markers that would save lives after sundown with "bottled" sunlight were forecast today. These would be highly efficient versions of present phosphorescent materials that glow for several hours after being "charged" with light. Such "storage batteries of light" would be road markers or paving blocks treated with special paints or dyes which would cause them to leap to life at night.

Bananas and Refrigeration

Only the banana is harmed by sleeping in the refrigerator. The best temperature for banana storage is about 57° F. About 62° to 65° F. is the best for ripening them. Since most refrigerator temperatures are in the range of 35° to 45° F, they would be too cold for banana storage.

Enliven Lent With This "Ring of Plenty"

You'll earn cheers from the family for this delightful treatment of old favorite Lenten foods. This easily-prepared "Ring of Plenty" whets every appetite, first with its lovely looks, then with its delicate, zesty aroma. And the taste—ah! You're not likely to have any leftovers from this delicious serving for six! Here's how you make it:

- 1 six-ounce link Hickory Smoked Cheese Food
- 1/2-pound spaghetti, broken into small pieces
- 1 can red salmon
- 2 eggs
- 1/2 teaspoon salt
- 1 cup milk
- 1 small can each of peas, green beans, shoestring beets and diced carrots, buttered and heated.

Cook spaghetti in boiling salted water until tender. Drain, rinse and mix with Hickory Smoked Cheese Food, grated or cut into small bits. Flake salmon and pack it tightly into the bottom of a greased ring mold. Cover salmon with the cheese and spaghetti mixture. Beat eggs and milk and salt and pour over spaghetti and salmon. Set in pan of hot water and steam for 45 minutes.

Remove from ring mold to heated chop plate; put buttered peas into center of ring and alternate carrots, beets and beans in small amounts around ring. Garnish with parsley.

Hold It, Chum

Don't worry about Junior rough-housing with these new Flexfit sunglasses. They bend to fit any face, and that makes them extra durable!

Brain Specialist Says Top Authors Often off 'Beam'

LONDON.—A London brain specialist has declared that great authors—to say the least—are sometimes "off the beam."

This analysis was made in an article in the British medical journal. The author is Dr. Russell W. Brain.

On the doctor's list of writers who have shown some mental aberrations were some of the great names of English literature: Boswell, Bunyan, Burns, Dickens, Johnson, Lamb, Ruskin, Shelley and Tennyson.

Some were insane, Dr. Brain said, in the sense that they could be certified as such and placed in institutions. Others, while not ready for the asylum, were classified as manic depressives, alcoholics, drug addicts, schizophrenics or "just plain nuts."

The doctor said Dickens' "A Tale of Two Cities" bears marks of the author's preoccupation with violence and cruelty, and described this feature as a form of masochism (finding pleasure in pain suffered by one's self).

"Oliver Twist," on the other hand, was helped along by Dickens' hardening of the arteries, the doctor believes. Summing up his case generally, Brain said:

"The genius of literature has higher intelligence, more intense and differentiated feelings, a better memory, and a greater capacity for words than the rest of us. These, presumably, depend upon a quantitatively richer organization of his nervous system. He also has dynamic quality which often seems to raise even his madness to a higher power."

Study of Weather Effect On Stone May Take Century

WASHINGTON.—Federal government workers have gone to work on an experiment which may go on for as long as 100 years. They want to find out how various stones will weather the capital's climate.

To determine that, they have assembled 2,000 rocks from 47 states and 16 foreign countries and built them into a masonry wall 15 feet high, 38 feet long, and 2 feet thick.

The big rock heap is in a field at the national bureau of standards which tests all sorts of things for the government.

German Paddles Small Kayak 30,000 Miles to Australia

SYDNEY, AUSTRALIA.—For seven years and four months Oscar Speck, a local opal cutter, paddled an Eskimo kayak 30,000 miles up rivers and across oceans from Germany to Australia.

But war had come while he made his way down the Coral Sea and Speck was a German. So, with the end of his odyssey almost in sight, he was arrested and spent most of the next seven years in confinement.

Speck's amazing quest began at Ulm, on the Danube, in May, 1932. He was 25, canoeing was his pastime, and Germany was in the depths of a depression. It seemed to him a good time to get out of Germany for awhile.

He loaded his collapsible 18-foot kayak with a prismatic compass, charts, water containers, lots of condensed milk, chocolate and cheese. There was no room for a sextant, and anyway, squatting so near the water his horizon was only two and a half miles.

With two strong arms and two square yards of sail, he took off down the Danube, to Bulgaria, to Turkey, to Cyprus. He had meant to stop there. But he went on—to Syria; down the Euphrates to Iraq, and then along the Arabian coastline to India, thence to Ceylon.

Still he went on. He had a new goal now: Australia.

The years passed. Kayak after kayak wore out and replacements ordered three months ahead, arrived from Europe. Speck used up five. He went to Burma, Singapore, Sumatra, Batavia, Sourabaya, Bali and the islands ahead. He capsized 10 times, was blown off his course, taken prisoner by tribesmen. Hitler was almost unknown when Speck left Germany. But Hitler's war stopped him when he was 18 miles from Thursday Island, and he finished his journey in a police launch.

Today, Speck, now an Australian, is comfortably settled in Sydney and has his own opal cutting business. One day, he hopes to revisit Germany to see his 80-year-old mother. But he will come back to Australia.

"I got here the hard way," he says. "I intend to stay."

Motorist Grabs off Mattress Before Van Man Can Recover

ATLANTA, GA.—A moving van transporting the furniture of W. B. Taylor dropped a mattress on a residential street.

The truck driver turned around immediately, but before he could retrieve the article, another vehicle stopped at the scene.

A man jumped out, stuffed the mattress into his car and sped away.

The truck driver was too startled to take his license number.

Annual Fire Losses Drop In 1949 — First Since '42

Fires destroyed an estimated \$667,536,000 in American property during 1949, a figure only 6.1 per cent below the all-time record for destruction set in 1948, according to W. E. Mallalieu, of the National Board of Fire Underwriters.

This represented the first drop in annual fire losses since 1942.

Fire destruction in December, 1949, was estimated at \$67,279,000, an increase of 26.7 per cent over losses of \$53,116,000 reported in November, 1949, and a decrease of 3.1 per cent from losses of \$69,397,000 reported in December, 1948.

After remaining at a fairly steady level during the years 1939 through 1942, American fire losses began climbing rapidly through the war and post-war years.

The 1949 reduction of fire losses resulted from several factors, Mallalieu said. Among them were the intensified fire prevention programs in many American cities, and the slight drop in the general price level, which meant that the replacement cost of burned property was somewhat less in 1949 than in 1948.

"The annual fire loss remains at a very high level," he pointed out. The 1949 total was more than double the 1942 total.

Every American can help reduce this waste of the nation's resources by being careful with cigarettes and matches, which together cause a third of our fires, and by following the simple safety precautions which would make home fires a rarity.

Countless fires during 1949 were caused by faulty chimneys, stoves, and furnaces, by misuse of gasoline and other flammable liquids, and by defective wiring and electrical appliances, he said.

Anti-Histamine Cold Drugs Tested at Naval Hospital

At the Great Lakes, Ill., naval training center, where the apparent ability of anti-histamine drugs to prevent the development of the common cold was first demonstrated two years ago, a new and more ambitious study of the same drugs is getting underway.

The original investigation consisted of a study of 572 patients who passed through a cold clinic at the naval hospital over a seven-month period. The present study will include about 1,500 men and women, exclusive of control groups, who will be under continual observation for three months or longer.

It is being conducted by naval medical research unit 4, located at Great Lakes, which was established in 1946 for research in the field of acute respiratory diseases. NMRU 4 has several other studies in progress at Great Lakes in addition to the anti-histamine project.

The program as planned has three main objects. The first is to amass statistical data on the cold-stopping ability of various anti-histamines.

The second is to determine whether or not they are effective in preventing or hindering the development of streptococcal infections, influenza and virus pneumonia, diseases whose initial symptoms are similar to those of the common cold.

NMRU 4 has laboratory facilities specially designed for rapid and exact diagnosis of these diseases.

Finally, it is hoped to determine which of the many anti-histamines now known has the least toxic action when taken in effective quantities.

Number of Constellations

Before 1930 there was some confusion about the number of constellations and their exact boundaries, but in that year the International Astronomical Union officially defined them and set their number at 88. Of these, 48 go back to ancient times. They include such familiar ones as Orion, Perseus, Cassiopeia, the twins, the lion, the great and small bears, the bull, the swan, etc. The others have been added mostly since 1600. Some of the modern constellations were adopted before 1930 in the far southern sky, not visible from countries in southern Europe and Asia where the older names probably originated. Others were given to areas in the northern sky containing only faint stars, with which the ancients had not bothered.

Cooking in the Future

One big improvement in the electric range will be automatic surface cooking, an appliance manufacturer predicts, which will make possible cooking without watching. Food will be cooked on surface units that will be regulated by the temperature control, just as are ovens in today's ranges. Surface units now are keyed to the rate of heat delivered to the cooking utensil rather than to the temperature which actually cooks the food. Temperature regulated surface cooking will mean vegetables and other foods will continue to cook at their proper rates, and will not be burned even though the water should boil away. Even though water will be initially a means of controlling the degree of heat for vegetable cooking, the temperature will not become excessive in the event the water is all boiled away.

Study of Healthy People Reveals Interesting Facts

Do you want to avoid heart trouble and hardening of the arteries, get rid of that "spare tire" around your middle, throw off that tired feeling and have more pep, feel years younger?

Prof. T. K. Cureton of the University of Illinois school of physical education has some information for you then. It will take time and a proper conditioning program, but many have done it and shown what he terms "good improvement."

While medical doctors have been studying sick people, Prof. Cureton has been studying healthy people. For 25 years he has studied thousands of athletes and people of middle age and beyond. The work is still going on.

In George Huff gymnasium at Urbana he has a roomful of gadgets ranging from treadmills to special calipers for measuring the thickness of fat of your body. But it isn't the gadgets that are important, it's what he and his associates have found out.

Bolled down, that is this: Your cardiovascular system — medical jargon for heart and blood vessels — is all-important. Keep it up to snuff and you avoid a lot of things. And doing this is not so hard.

- Here's the formula:
1. Walk, rhythmically and briskly, at least two miles every day, or go swimming for a half-hour at least every other day.
 2. Along with this, be sure you get a proper diet, with plenty of vitamins, and do not eat too much. Avoid large quantities of animal fats and excesses in starches and sugars. Eat more soy beans and green and yellow vegetables.

That's the nub of it. In walking or swimming, the big muscles, as in your legs, push the blood back toward the heart. Rhythmic exercise gets all the blood in your body going. This helps to make your heart strong. It tones up your cardiovascular system, Professor Cureton explains.

Navy Reports Rapid Strides On Education in Pacific

The goal of one school for each community having five or more children of school age is rapidly being reached by the U. S. navy in the vast Trust Territory of the Pacific, according to the office of Admiral Arthur W. Radford, commander in chief of the Pacific fleet and high commissioner of the territory.

The naval administration now maintains 140 elementary schools in the Caroline, Northern Mariana and Marshall islands, six intermediate schools for grades seven through nine at Saipan, Ponape, Truk, Koror, Majuro and Yap, and four higher-training institutions, including the Pacific island teacher training school at Truk.

The teacher-training program in the Trust Territory, set up two years ago, has progressed so rapidly that 252 teachers, principals, district superintendents and other school officials are now residents of the islands. Previously, it had been necessary to bring teachers from the States.

At the highest level of this educational system, students meeting the qualifications for American colleges are eligible for scholarship aid from the navy and various colleges. Four natives have qualified thus far.

Baldness in Dogs

If Rover starts to look like a half-pickled chicken, the trouble may be a hormone deficiency. Veterinary medical journals report that dogs suffering from alopecia, which means loss of hair, sometimes regrow normal coats following treatment with sex hormones. The advisability of hormone treatment depends upon what the veterinarian's diagnosis reveals. In many cases, parasites, severe and prolonged illness, or skin disorders may account for the loss of hair. Hormones cannot be expected to help in such cases.

Coffee's Effect on Sleep

How much does coffee affect sleep? This depends on the individual. Some can sleep like a lamb after twelve cups, others toss restlessly after one small cup of coffee. The way to test its effect is for each individual to keep a record. Jot down how well you sleep on days when you drink six cups, three, one, or none at all. Sleeping conditions should be identical every night—good bedding which provides perfect support for restful sleep, the same bedtime, etc. Then, if sleep varies with wakefulness one night and not another, coffee can be blamed or exonerated, as the case may be.

Age of Earth Estimated

The earth is most probably about 3,350,000,000 years old. This is the estimate of Dr. Arthur Holmes, professor of geology at the University of Edinburgh and one of the world's foremost authorities in the study of the earth's age. The period since the beginning of terrestrial time has been variously estimated at from two to five billion years. All estimates during this generation have been based on the decay of the radioactive element uranium into lead.

A double decker bed may be the answer to your problem of providing an extra bed for a son's bedroom or for the summer cottage.

Improper roof and ground drainage are chief causes for failure in farm buildings. Keep water away from the foundations and the parts of the buildings near the ground.

Farm buildings require attention along with maintenance and the more uses that can be made of the structures the more profitable they are to the farm business.

Farmall MOLDBOARD PLOWS

• A Farmall Moldboard Plow, direct connected to the Farmall tractor, makes a mighty handy outfit for plowing on the contour and working terraces. Also for plowing irregular-shaped fields or where ditches and obstructions are encountered. Farmall Plows hold close to their work, and can be turned sharply or backed without difficulty. They are available in two basic models—the H90 power-lift plow for Farmall-H, and the 192-series (hand or power lift) for Farmalls-A, AV, B, and BN. All of these plows have long beams for steady running, and ample adjustments for good work.

Ask us to tell you more about these efficient Farmall Plows the next time you are in town.

SPORTS ROUND-UP

The girls basketball team went to Tulia Thursday night to participate in the district tournament. They played Claude and lost by a margin of 15 points. Four of the girls fouled off, and several more nearly did. They had a shortage

of guards and were quite handicapped by that. However, the girls played a fair game considering the competition they were up against. Dimmitt walked off with the district championship and McLean followed with second place.

THE OWL HEARS

Jerry, Donald, Dick, and Dean, and the rest of the bunch sure got a good laugh Sunday night. Bonnie and Beth lost a spark plug and thought that they had run the fan belt through the motor.

Could it be serious? Wad and Bonnie have been seeing quite a bit of each other lately.

Junis and Gay are really strutting around. They both have football jackets now.

Sandra, Mary Lou and Mary were at the show stag Saturday night. Where were your men, girls?

The four girls from Houston didn't meet up with their friends at the tournament Thursday night. It seems Gay, Beth, Eudean, and Bonnie have been misrepresenting where they really live.

Why has Beth been so lonesome in second period study hall lately. Is it because the juniors have been practicing their play (Those Jr. girls are sure devils, eh Beth.) What has happened to Bonnie and her Flomot boy friend. How about that, Bonnie?

Jeannie, Donnie, Eudean and Garland went to Claude Crossing Sunday. It was a pretty place, we heard.

We heard Helen's party turned out pretty nice. Helen was with Buddy, Millie with Jimmie, and Janice with William. How about that girls?

Why are all of the freshman girls so long faced? Could it be because they are not going to the freshman tournament?

Who was in the stray jeep that was in town over the week end? Mary seemed quite interested.

Can't Tresa make up her mind? She takes turn about between Red and Don.

Where was Pat Saturday night? Mary Lou was seen with Dean.

Where did the "gang" get the little Model A? It seems to take the place of a date. Seems they don't have time for the girls and the car both.

What is the excitement in town this week? Could it be a Marine?

The little yellow jeepster looked kind of tired Sunday. Mary Lou, Pat, Teresa, Don, Marian, Ham, Dottie, and Wayne went on a big picnic at Schott Cap Sunday! They all had a big time.

We have a new boy in school this week. Gives the girls more of a choice.

Why does a certain senior girl have to miss play practise all this week? Does anyone know, Teresa?

MUSICAL NOTES

"You Made Me Love You," Mary Lou to Pat.

"Slippin' Around," Flute to Junis.

"No One But You," Dottie to Mc.

"There'll Be Some Changes Made," Bookkeeping class to Mr. Lourance.

"There's Nothing Like a Dame," Darrell to all females.

"Feudin, Fussin, and a Fighting," Jr. girls to Jr. boys.

CARD OF THANKS

I want to thank my many friends for their kind deeds, the lovely flowers, and the many nice cards I have received since I have been in the hospital and may God's blessings be on each and everyone of you.

MRS. JOHN VAUGHAN

Mr. and Mrs. Vaughter Self are the parents of a baby girl born in the Lubbock hospital last week.

Mr. and Mrs. Claudia Welch arrived Friday from California. Claudia has his discharge from the navy. They plan to make their home here.

Mr. and Mrs. Oner Cornett visited their son, Mickey, in Abilene Christian College, Tuesday.

YOU CAN'T MATCH a Frigidare. Simpson Chevrolet Co. 7-46

FERGUSON TRACTOR AND FERGUSON SYSTEM IMPLEMENTS

RUBBER PROGRESS

Prehistoric Indians were the first to tap the rubber tree. They made rubber shoes, bottles and coated fabrics. Columbus discovered them playing with rubber balls. It was not until 1779 that Dr. Joseph Priestly gave it the name of "rubber." He found that the gum removed pencil marks. But Europeans found rubber too sticky in hot weather and too brittle in cold. Charles Goodyear, Yankee inventor, invented the vulcanizing process in 1839. After that the rubber industry boomed. Vulcanization made possible the many rubber products we have today—tires, clothing, insulation, foam rubber.
