## Farm to Market Program For Briscoe County

The following story was re-  
sented to the News by Jim Potts,  
resident Engineer, of Floydada:  
  
We have our fingers crossed and  
el things look too good on the  
arm to market future. Of course  
othing is positive at this early  
ate but with the commissioners'  
urt doing all they can and the  
ghway department working with  
em we feel the future is quite  
right.  
  
This past week Mr. Alton Steele  
his way to Lubbock found  
assing through Floydada that Mr.  
m Potts, resident engineer for  
e highway department, was  
ady to leave for Lubbock. He  
ent with him for what ever  
eral support he could give, as  
otts was taking the plans on the  
aseline Job, and the plans on  
e Quitaque South job. These  
ans are slated to go to Austin  
review and although Mr. Potts  
grets that all of the red tape  
olved in the bridge location  
d the type of structure to be  
uilt has not completely been  
minated, he did feel that the  
ne was near. The completion  
the plans and advertising of  
e project would then start so  
at the projects could be put  
nder contract. The money on  
e Quitaque job is Federal money  
d the time necessary for their  
approval takes longer than when  
e projects that come from state  
nds. The Gasoline project has  
en ready for letting for some  
ne, but in order to get lower  
s and more efficient operation  
s being held to be let with the  
er project.  
  
The Commissioners' Court are  
o working with the highway  
partment on trying to obtain  
approval for funds to construct a  
m to market road east of Sil-  
erton into the Antelope commu-  
y. The highway engineers  
ve spent some time working to  
if a location can be made and  
cost of same. Mr. Potts also  
med in his report to Mr. Mc-  
ety, district engineer for the  
ghway department in Lubbock,  
his work. Mr. McCarty ex-  
essed that if this road can be  
ilt within reason that he is go-  
ng to try to obtain approval for  
unds to construct it. The funds  
farm to market roads has  
ssed the House and is before  
e Senate. We feel that they will  
s and become available this  
ar. This road is being located  
that a connection to Quitaque  
n be built at a later date.  
  
Mr. Steele and Mr. Potts re-  
med to Floydada with the blue  
nted plans and paper work on  
e three projects being adver-  
ed now for letting. These pro-  
cts are: San Jacinto School  
th three and a half miles;  
ate Highway 86, four miles west  
Silvertown, north five and a half  
les to the canyon, and San  
ancis School south two miles.  
e road clearance on one of  
ese jobs became involved and  
ld the other two up, but this  
ow has all been cleared up and  
e jobs will be let this month.  
We know how badly we need  
ads and know they are never  
ilt as soon as we would like.  
e must realize though all ex-  
nditures must be justified and  
at takes time. Even though the  
lay is trying, it is also necessary  
d often means plans are worked  
to save enough to build many  
re miles of road each year.

## 70 Inches of Rain Falls in Silvertown Over Week End

Silvertown received 70 inches of  
moisture during the week end.  
The north and east part of the  
county reported more rain, some  
farmers received as much as one  
inch. West and south part of the  
county rain was spotted, reports  
indicate that some communities  
received as much as one-half inch,  
others only one-fourth to a trace  
of rain.  
  
No hail or high wind damage  
was reported.

## "Twelve O'clock High" at Palace Theatre Sunday

"Twelve O'clock High" with  
Gregory Peck, Hugh Marlowe,  
Gary Merrill, Millard Mitchell,  
Dean Jagger, Robert Arthur and  
Paul Stewart.  
  
You'll be spellbound by this  
stirring story of heroes and cow-  
ards, braggarts and fighters, whose  
daring deeds amid the horrors of  
war will long be remembered by  
a grateful nation.  
  
In the fateful days of 1942 when  
men and material were scarce,  
the morale of the Eighth Air  
Force's 918th bomber group is at  
a low ebb. Losses of men and  
planes are heavy in the over-  
whelming task of daylight bomb-  
ing of Nazi positions and the  
commanding officer, Gary Merrill,  
is near the breaking point when  
he is replaced by Gregory Peck.  
Peck is a powerful, dynamic and  
tough leader, basically as sym-  
pathetic toward his men as was  
his predecessor, but on the surface  
he is a man of iron discipline,  
following orders blindly without  
regard to human frailties. Unre-  
lenting, he leads his men to de-  
vastating raids on German targets  
and, although ultimately suffering  
a nervous collapse, has the satis-  
faction of a job well done.  
  
Next week's program appears  
on page two.

## Missionary Program For Monday, June 12th

The Missionary program for  
Monday, June 12 will be given in  
the auditorium of the First Baptist  
Church, Elizabeth Truly Circle  
leading the program, and Mrs.  
Bud McMinn in the chair.  
  
Subject—On the Rock or on  
the Rocks.  
Song—O For a Thousand  
Tongues to Sing.  
Devotional—Arise Lift Up the  
Load—Mrs. R. E. Stephens.  
Building on the Rock—Twenti-  
eth Century Young People—Mrs.  
Don Garrison.  
A great time to be Alive—Mrs.  
G. R. Dowdy.  
Hymn—O Zion Haste.  
Do Growups Lead to the Best?  
—Mrs. W. H. Tension.  
Young People of Your Church—  
Mrs. Alvin Jackson.  
W. M. U. Training School and  
Margret Fund—Mrs. J. W. Lyon.  
Hymn—Christ For the World  
We Sing.  
Responsibility of the American  
Home—Mrs. J. H. Burson.  
Solo—Rock of Ages—Mrs. O. C.  
Allard.

## F. F. A. BOYS WILL MEET ONCE A MONTH

The F. F. A. Boys will hold their  
meetings the last Tuesday in each  
month throughout the summer, at  
8:45 p. m. The next meeting will  
be Tuesday, June 27. The last  
meeting was Tuesday, May 30.

## Miss Pat Baird becomes Bride of Carl Tidwell

Miss Pat Baird, daughter of Mr.  
and Mrs. Snook Baird, and Carl  
Tidwell, son of Mrs. Dave Ziegler,  
are united in marriage at the  
First Baptist Church at Clovis,  
New Mexico, Saturday afternoon,  
June 3.  
  
The bride wore a blue dress  
with white accessories.  
Mr. and Mrs. Tidwell will make  
their home in Silvertown.

## Attend Brotherhood Meeting at Crosbyton Monday Night

Among those who attended the  
Brotherhood meeting in Crosbyton  
Monday night were: Rev. G.  
A. Elrod, Johnny Burson, Mr. Ed-  
wards, Buster Wilson, J. E. Wheel-  
lock, Sam Brown, Bill Tension,  
Elbert Stephens and Bud Mc-  
Minn.

## Miss Jean Swinney Wed to Cecil McCain in Clovis, New Mex.

Miss Jean Swinney, daughter of  
Mr. and Mrs. R. E. Swinney and  
Cecil McCain, son of Mrs. N. C.  
McCain, of Tulla, were united in  
marriage Saturday afternoon at  
the First Baptist Church in Clovis,  
New Mexico. The single ring  
ceremony was performed.  
  
The bride wore a white dress,  
white accessories.  
Mr. and Mrs. McCain will make  
their home in Silvertown.

## L. T. D. Club Met With Mrs. Dee McWilliams

The L. T. D. Club met with  
Mrs. Dee McWilliams Tuesday,  
June 6. Guess What's were given  
to Mrs. L. D. Griffin and Mrs.  
Arnold Brown.  
  
Refreshments were served to:  
Mrs. Arnold Brown, Mrs. L. D.  
Griffin, Mrs. Conrad Alexander,  
Mrs. Carl D. Bomar and Mrs. Ware  
Fogerson.  
  
The next meeting will be Tues-  
day, June 20, with Mrs. Lem  
Weaver.

## Mr. and Mrs. W. G. Byrd have returned from a several days visit with relatives and friends in Robert Lee and Bronte, Texas.

Mr. and Mrs. W. G. Byrd have  
returned from a several days visit  
with relatives and friends in Rob-  
ert Lee and Bronte, Texas.

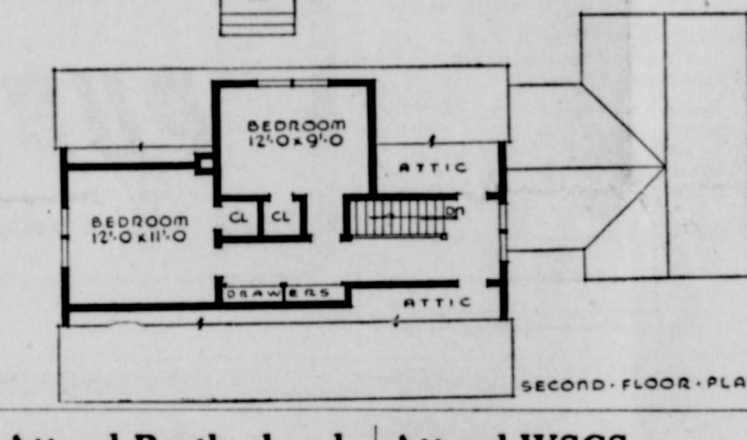

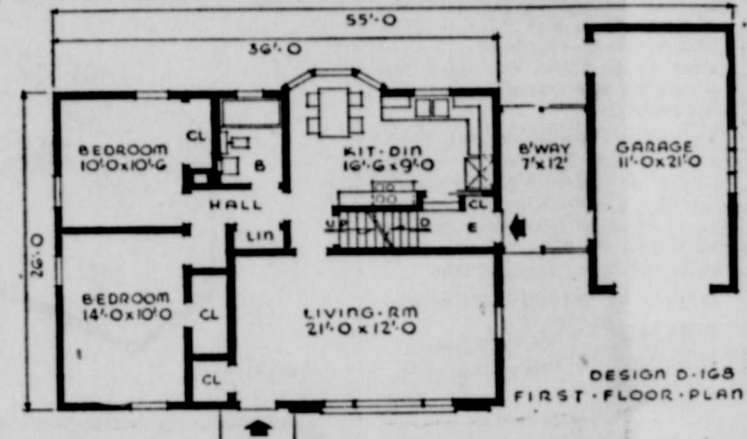

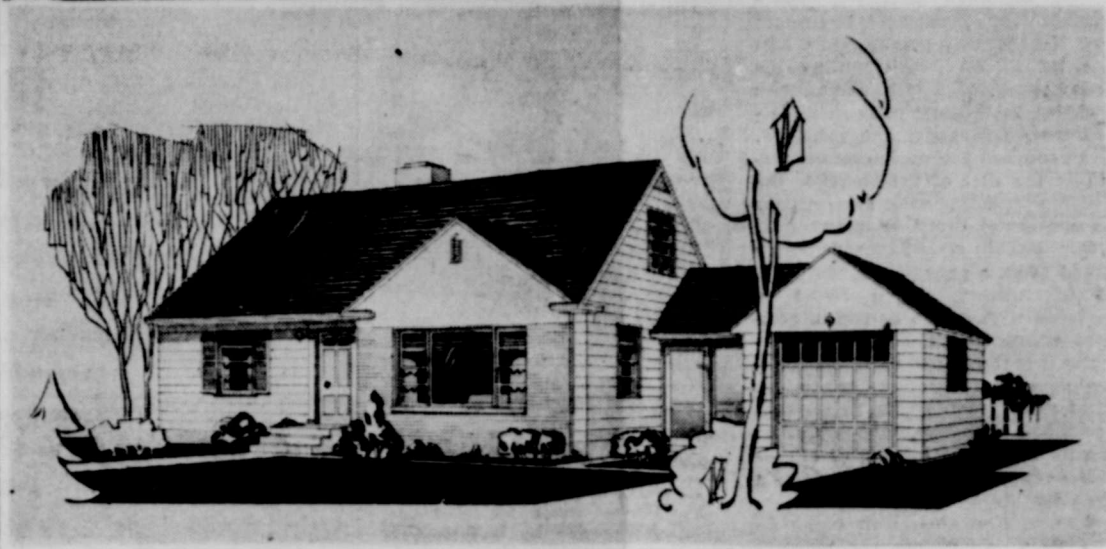

## Bud McMinn and Travis McMinn, of Plainview, went fishing at Buffalo Lake Friday night and had a very enjoyable time.

Bud McMinn and Travis Mc-  
Minn, of Plainview, went fishing  
at Buffalo Lake Friday night and  
had a very enjoyable time.

## Mary Beth and Glenda Rae McMinn, of Plainview, went fishing at Buffalo Lake Friday night and had a very enjoyable time.

Mary Beth and Glenda Rae Mc-  
Minn, of Plainview, went fishing  
at Buffalo Lake Friday night and  
had a very enjoyable time.

## A HOME TO LIVE IN

## Lt. Charles E. Yates, Jr., on Duty at Lubbock

Charles E. Yates, Jr., a first  
lieutenant in the Air Force Re-  
serve, reported Thursday to Reese  
Air Force Base, Texas, to begin a  
15 day tour of active duty under  
the Air Force's mobilization pro-  
gram.  
  
Lieutenant Yates was commis-  
sioned as a bombardier May 24,  
1944. He flew 49 missions as a  
bombardier with the 15th Air  
Force in the European Theatre.  
  
The lieutenant attended high  
school and Junior College at Cisco,  
Texas, and has been a student at  
Texas Technological College in  
Lubbock, Texas, since 1947. He  
now is employed by a Lubbock  
News agency.  
  
Lieutenant Yates is the son of  
Mr. and Mrs. Charles E. Yates,  
727 Cornelia Circle, Corpus  
Christi, Texas, now reside at 1613  
6th Street in Lubbock.

## School Supt. Moreland is Building New Home in Silvertown

J. E. Moreland, of Petersburg,  
newly elected school superinten-  
dent of the Silvertown school, has  
under construction a new home,  
located on the highway just east  
of Dick Garvin's residence.  
  
The building is four rooms and  
bath with attached garage. Jess  
Brannon is contractor on the job  
and Fogerson Lumber Company is  
furnishing the material.

## Helping Hand Club Met With Mrs. Jowell Thursday, June 1

The Helping Hand Club of the  
Francis Community met June 1,  
with Mrs. J. E. Jowell.  
  
Rol call was answered with a  
frozen food hint. The afternoon  
was spent visiting and playing  
games. Refreshments of angel  
food cake, strawberries and cream  
and punch were served to Mes-  
dames Scott Smithee, Charles  
Francis, Clyde Mercer, J. D. Mc-  
Gavoc, Norman Strange, Frank  
Fisch, U. D. Brown, Wade Steele,  
Edwin Crass, Jack Harris, Aubrey  
Rowell, Lowell Calloway, Alva  
Jasper and the hostess, Mrs.  
Jowell.  
  
Children present were: Glenna  
Kay Strange, Charla Francis,  
Mary Linda Mercer, Riley Harris  
and Johnny Jowell.  
  
The next meeting will be with  
Mrs. J. D. McGavoc June 22. Club  
members are to answer roll call  
with a sewing hint.

## Badgett's Pharmacy Adds Rexall Line to Stock of Drugs

C. R. Badgett owner of Badgett's  
Pharmacy, announced this week  
that he has added the Rexall line  
of merchandise to his large stock  
of drugs.  
  
In making the announcement  
Mr. Badgett said that he had  
handled this line of merchandise  
for over 25 years and is sure it's  
the nicest, fairest line on the  
market today.  
  
Silvertown and the community is  
fortunate in having this complete  
stock for their convenience.

## Wayne McCutchen Injures Foot Friday

Wayne McCutchen suffered a  
painful accident Friday when he  
caught his right foot in a plow he  
was demonstrating, crushing it  
and breaking two bones. He was  
brought to the local hospital where  
he received medical aid, and is  
up and about on crutches this  
week.

## HONORED ON 82nd BIRTHDAY

Mr. and Mrs. Willie McJimsey  
honored Grandpa Myers with a  
surprise birthday dinner Wednes-  
day, May 31. He was 82 years  
old. Grandpa's daughters, Ellen  
and Nell assisted Mrs. McJimsey  
with the dinner. They all wished  
him many more "Happy Birth-  
days."

## Mr. and Mrs. W. J. Hyatt, Mrs. Brubs Bomar and children and Roy Hyatt visited in the Luther Bivens home at Vigo Park Thursday afternoon.

Mr. and Mrs. W. J. Hyatt, Mrs. Brubs  
Bomar and children and Roy  
Hyatt visited in the Luther Bivens  
home at Vigo Park Thursday  
afternoon.

## Mr. and Mrs. C. E. Anderson, Jr., of Quitaque, spent the week end with her parents, Mr. and Mrs. Austin Bailey. Other visitors Sunday were Mr. Bailey's nephews and families, Mr. and Mrs. Otis Maner and daughter, Marlyn and Mr. and Mrs. Dalton Maner and daughter, Donna, of Lubbock.

Mr. and Mrs. C. E. Anderson,  
Jr., of Quitaque, spent the week  
end with her parents, Mr. and  
Mrs. Austin Bailey. Other vis-  
itors Sunday were Mr. Bailey's  
nephews and families, Mr. and  
Mrs. Otis Maner and daughter,  
Marlyn and Mr. and Mrs. Dalton  
Maner and daughter, Donna, of  
Lubbock.

## Mrs. Johnnie Roberts and daughter, Muriel Dean of Amarillo, spent Saturday night with Mrs. Roberts' mother, Mrs. R. L. McKinney. They were Sunday guests of Mr. and Mrs. P. H. McKinney.

Mrs. Johnnie Roberts and daugh-  
ter, Muriel Dean of Amarillo,  
spent Saturday night with Mrs.  
Roberts' mother, Mrs. R. L. Mc-  
Kinney. They were Sunday  
guests of Mr. and Mrs. P. H. Mc-  
Kinney.

## 1951 Wheat Acreage Allotments For New Farms Given Below

According to information re-  
ceived by the Briscoe County PMA  
Office, a farm owner or operator  
of a farm that did not have wheat  
seeded on the farm in the years  
1948, 1949 or 1950 and on which  
wheat will be seeded in 1951,  
must make a written request in  
terms of a specific acreage, in  
order that a 1951 wheat allotment  
may be set up on the farm. This  
must be filed before June 26, 1950.  
No applications will be taken  
after the above date.  
  
The following eligibility factors  
will be used in determining the  
allotments for "new farms."  
(1) The land for which an al-  
lotment is requested is suitable for  
the production of wheat.  
(2) One of the following con-  
ditions is met:  
(a) The producer has estab-  
lished the fact that the farm op-  
erations have changed, and that the  
extent, the system of farming to  
be followed by him in 1951 will  
require wheat, or  
(b) It is known that an estab-  
lished rationing system on the  
farm in 1951 will include wheat.

## CONTRACTORS' NOTICE OF TEXAS HIGHWAY CONSTRUCTION

Sealed proposals for construct-  
ing 11,019 miles of Gr., Strs.,  
Flex. Base & 2-Crs. Surf. Treat.  
from end FM 146 at San Jacinto  
School, S. to R.D. int.; from SH  
86 N. & W.; From Francis School  
south on Highway No. FM 146 &  
598, 1304 covered by S 1501 (1),  
R 970-1-3 & R970-3-1, in Briscoe  
County, will be received at the  
Highway Department, Austin, un-  
til 9:00 A. M., June 20, 1950, and  
then publicly opened and read.  
  
This is a "Public Works" Pro-  
ject, as defined in House Bill No.  
54 of the 43rd Legislature of the  
State of Texas and House Bill No.  
115 of the 44th Legislature of the  
State of Texas, and as such is  
subject to the provisions of said  
House Bills. No provisions here-  
in are intended to be in conflict  
with the provisions of said Acts.  
  
In accordance with the provi-  
sions of said House Bills, the State  
Highway Commission has ascer-  
tained and set forth in the pro-  
posal the wage rates, for each  
craft or type of workman or me-  
chanic needed to execute the work  
on above named project, now pre-  
valing in the locality in which  
the work is to be performed, and  
the Contractor shall pay not less  
than these wage rates as shown  
in the proposal for each craft or  
type of laborer, workman or me-  
chanic employed on this project.  
  
Legal holiday work shall be  
paid for at the regular governing  
rates.  
  
Plans and specifications avail-  
able at the office of James F.  
Potts, Resident Engineer, Floyd-  
ada, Texas, and Texas Highway  
Department, Austin. Usual rights  
reserved.

## Mr. and Mrs. Heckman Honored with Party

Friends and neighbors of Mr.  
and Mrs. Henry Heckman honored  
them with a surprise party at their  
home Wednesday night before  
they left for Umbarger where they  
will make their home. The couple  
was presented a beautiful bed-  
spread and wool blanket. The  
hostesses carried refreshments of  
lemonade and cookies.  
  
Mr. and Mrs. Heckman are long  
time residents of Silvertown, and  
for a number of years both had  
been employed at the Clay Pro-  
ducts Company.  
  
Those attending were: Mesdames  
Ben Martin, Billie May, Freeland  
Bingham, Albert Rowland, Will  
Smithee, Ware Fogerson, M. P.  
Stone, Tommie Anderson, Annie  
Lee Anderson, Emma Freize, El-  
zie Yancey, George Jones, T. D.  
Wallace, Melvin Heckman, Riley  
Yates, Ashel Cross, Bobbie Ed-  
wards, Clay Fowler and Sam  
Thompson.

## John Wilmoth Elected Supt. of Kelton Consolidated School

Mr. and Mrs. John Wilmoth and  
family moved Friday to Kelton,  
near Shamrock, Texas, where Mr.  
Wilmoth has been elected school  
superintendent of the Kelton Con-  
solidated School and Mrs. Wil-  
moth also will teach in the school.  
The school district owns their  
teachergage for their superintendent.  
  
Mr. Wilmoth was principal in  
the Silvertown school the past term  
and Mrs. Wilmoth was primary  
teacher.

## Lions Club Announce New Members

New members of the Lions Club  
of Silvertown in the past few days  
are: A. L. Deavenport, W. H.  
Steele, Fred Mercer, Fred Gar-  
rison, Edwin Crass, J. Lee Francis,  
Chick Northcutt, and John E.  
Arnold.

## GOOD RANGE IS MIGHTY IMPORTANT FOR GROWING PULLETS—SAVES FEED

A good range for the growing pullets is mighty important for plenty of good tender grass will reduce the feed bill and at the same time permits the poultryman to raise a flock of clean, healthy birds. Pullets on the range, says J. C. Williams, assistant extension poultry husbandman of Texas A. and M. College, can be separated from the older birds on the farm and this is very important from the standpoint of disease and parasite control.

Older birds, says Williams, are often carriers of diseases and parasites and unless the developing pullets are kept segregated from them, they may be affected. He points out that the ideal range is one that provides plenty of good green grass and shade for the birds. Chickens do not like to get out in the hot sun any more than is necessary, therefore shade should be provided if shade trees are not available. The range shelter is the answer. They are easy and economical to build and besides furnishing shade also provide safe housing where the birds can be protected at night.

The growing pullets on the range should receive a good growing mash, oyster shell and plenty of water. The care that the pullet receives on the range may determine whether or not she develops into a profitable layer. Williams says one hundred pullets actually need a minimum of 10 gallons of water per day. He says it is a good rule to provide at least two five-foot feeders and one barrel-type fountain for each 100 growing birds.

The range shelters, feeders, and waterers should be moved frequently to make sure that the

birds are on clean ground. The shelters should be built on runners so they can be easily moved. Using this practice, he says, will help keep down the parasites and diseases that often are picked up by the birds as a result of ranging on contaminated soil.

The poultryman who does a flock will have birds that are in good condition and about 20 percent of the pullets should be in production by the time they are four to five months old, depending upon the breed and strain.

Williams says plans and blueprints of range shelters, waterers and feeders are available at your local county extension agent's office. He suggests that you visit your county extension agents and discuss with them any problems involving the poultry or turkey flock. They can supply bulletins on many other subjects and practices that are recommended for Texas poultrymen.

Growing pullets on good range will help to reduce feed costs; permits the poultryman to develop a flock of clean, healthy birds and keeps the young birds separated from the older birds on the farm.

The good poultry range should provide the flock with plenty of good green feed and shade and the poultryman must provide the feed and water.

Three new grain sorghum varieties, Combine Kafir-60; Redbine-60 and Redbine-66 have been developed by the Texas Agricultural Experiment Station. No seed is available at this time, however multiplications are now being made.

## Substitutes for Steaks May Require Strong Stomach

Annoyed by the price of steak? Then why bother with it—there are a lot of substitutes.

Of course, the substitutes, such as grasshoppers, lizards, and sheep's eyes, do require a practiced palate and a tolerant stomach; but to some of our European and Asiatic gourmets they are better than filet mignon.

Grasshoppers and other members of the locust family have been a delicacy for centuries. Shakespeare uses the eloquent expression, "luscious as locusts," and the book of St. Matthew cites locusts and wild honey as the fare of John the Baptist.

The Chinese relish their locusts whole and candied, while in the Arabian desert the insects are dried, ground, and mixed into a tasty flour for bread.

By the way of variety, the Australian bushman adds rat cutlets to his meal of locust hors d'oeuvres; and the African pygmy goes him one better by supplementing his grasshopper, or locust, dinner with a choice assortment of beetles, caterpillars, field mice, and monkeys. Grasshoppers are an important staple in the diet of the Negro, the Filipino pygmy, who also enjoys an occasional lizard or snake.

Our pallid, mild-flavored butter would seem a poor product in parts of Afghanistan, where bread is buttered with a slab or two of pungent sheep-tail fat.

But it is the Persian and the Eskimo who probably have made the most exotic contribution to the dinner table. Both like their caviar in the form of eyes instead of eggs—fish eyes for the Eskimo, sheep's eyes for the Persian.

Well, it's an idea. How badly do you want to balance the budget?

## Sea Spiders of Antarctic Spend Lives in Cold Seas

Sea-spiders swarm in Antarctic waters.

The cold seas which lash the southern continent seem to be the natural habitat of these strange little creatures, ancient and remote relatives of crabs, lobsters, spiders, and scorpions.

A representative collection of these tiny-bodied, long-legged water animals was made by the 1947-1948 navy Antarctic expedition and turned over to the U.S. national museum for study.

The little creatures of the cold seas have somewhat the general appearance and habits of spiders, and it is generally agreed by zoologists that the two forms come from a common ancestor. Most of them spend their lives crawling over seaweed and lower marine animals, from which they suck the juices.

One hitherto undescribed form, listed as a new species, was found by Joel W. Hedgpeth, who made a taxonomic study of the collection. The collections were made from Marguerite Bay, site of one of Admiral Byrd's base camps on the western coast of the Palmer Peninsula, and from the offshore waters of Peter Island. Mr. Hedgpeth also included in his study small previous collections from South Georgia and the Falkland islands.

## Retired Street Cars

Forty-two 10-year-old streetcars retired a year ago in New York's Bronx are now among the finest in Vienna. The war took heavy toll of the Austrian city's 3,000 trolleys, then already past their prime. Another 25 comparatively new Bronx cars were shipped last March to Bombay. Throughout Europe and Asia in general, cars are overaged and overworked. Most South American city streetcars are U.S. built. Lima, Peru, and Sao Paulo, Brazil, have bought 10 New York city veterans since World War II. In Sao Paulo, the red-painted, closed cars are called "shrimps." They carry peak loads four times a day because Paulinos like to dash home for lunch.

## How to Lose Weight

You can lose weight and at the same time enjoy appetizing meals. If you want to lose weight, nutritionists recommend, a sane, well-balanced diet that includes all the foods necessary for good health. This is described as a sensible diet liberally sprinkled with patience and will power. It's the sum total of everything you eat that counts. Don't blame the potatoes, bread or dessert. You gain weight when you eat more food calories than your body needs and uses. Eat plenty of vegetables, but go easy on butter, rich sauces and salad dressing. Skim-milk will supply calcium as well as whole milk, and fruits should be eaten with little or no sugar.

## Home Storage Problem

Homemakers dream about storage space—and more space, in new homes and old. But there are ways to make those dreams come true. Plan what you need in storage space in your home, considering the needs of every member of the family. Have a specific plan in black and white before the carpenter or builder arrives to start work. It's even better if you have worked out a plan, laid it aside for awhile and then reworked it. If you have done this you will be more satisfied with closets and cupboards after they are constructed.

Penny for penny, potatoes have more energy giving value than any other vegetable. When eaten daily, potatoes supply as much as one-fourth of the vitamin C quota as well as starch and some of the important minerals.

New Texas Almanacs at News office, \$1.00 each.

# ENJOY THIS JUNE

## Next JANUARY

How? It's easy! An electric home freezer makes a perfect "food bank" for all the fresh, seasonal delights you gather from your own garden... that you buy from the market at low summer prices. Fruits, vegetables, meats, fowl... pastries... all on hand when you want them. You can cook and bake ahead... have complete meals... stored and ready when you want them... thanks to this wonderful electric store house!

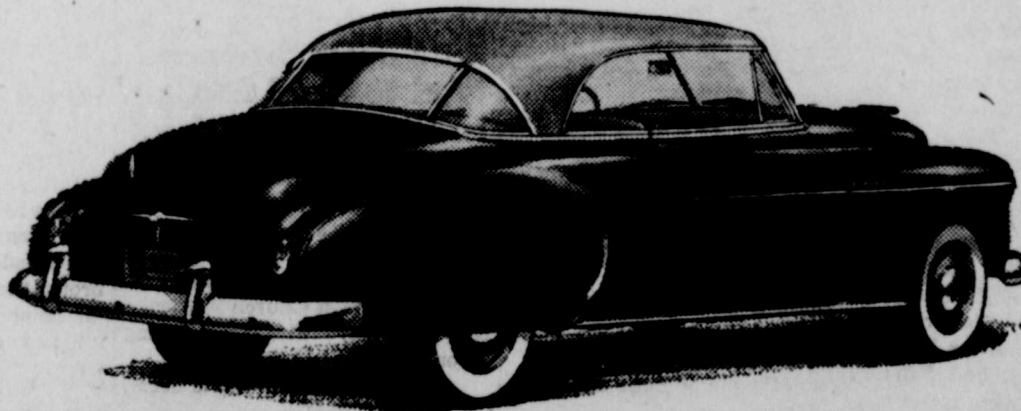

If you haven't invested in an electric home freezer, now's the time to see your dealer. He can show you how food purchased in time-and-money-saving quantity will prove to be a real boost to your budget. So very economical, low cost, dependable electric service makes it so!

# SOUTHWESTERN PUBLIC SERVICE COMPANY

25 YEARS OF GOOD CITIZENSHIP AND PUBLIC SERVICE

Now see the style-star of an all-star line... the new Chevrolet

# Bel Air

It's the only car of its kind in the entire low-price field!

Here is the most beautiful Chevrolet ever built—here is the magnificent new Chevrolet Bel Air! Here, for the first time in the low-price field, is a car that combines all the dash and jaunty-ness of a convertible with the comfort and safety of an all-steel body by Fisher. The new Chevrolet Bel Air combines fresh breath-taking beauty of design with all the traditional Chevrolet advantages... makes it possible for you to

own the liveliest-looking, loveliest-looking car on the road! But come in and find out all about the Bel Air for yourself... its low-lined, youthful silhouette... its wide side windows unobstructed by any post... the exceptionally generous vision from its sweeping rear window... its sparkling color harmonies... the rich blendings of its luxuriously appointed interior.

Combination of Powerglide Automatic Transmission and 105-h.p. Engine optional at extra cost.

As any woman knows, even the best perfume will evaporate into thin air if the stopper isn't replaced properly.

It's the same way with money. On payday, you feel so wonderfully wealthy — but suddenly, if you don't watch out, your cash seems to be vanishing into thin air.

There's one good way to put a stopper on money-evaporation. All you do is sign up for the Payroll Savings Plan where you work (or if you work for yourself, join the Bond-A-Month Plan at your bank) and a certain amount is deducted automatically from your salary.

It's painless — you'll never miss the money. It's safe — you've got Uncle Sam backing up your investment. It's profitable — \$4 for every \$3 after ten years.

And what a happy feeling to know that a part of your salary is tucked away for the future!

**Food Glue to Mortality Among Baby Calves, Pigs**

Nobody knows definitely why many newborn calves and pigs die shortly after they begin to nurse, but a theory advanced by research veterinarians is winning acceptance because it seems to be the most logical explanation yet offered.

Picture a starving man who eats food that makes him violently ill, only to die from the illness rather than from starvation, and you will have an idea of what is believed to be happening to countless pigs, and calves too, on the nation's farms. The main difference is that the newborn animals die after consuming their mothers' milk—the very thing upon which they depend for life.

This is how the trouble starts: While the cow or sow is pregnant, she is attacked by a virus disease that may or may not be apparent to the owner. Her natural body forces produce substances called antibodies that fight off the infection, and at the same time some of these antibodies find their way to the unborn calf or pig.

Large amounts of them also go into the colostrum or first milk, that will nourish the youngster after birth. These disease-fighting substances have a sensitizing effect on the unborn animal. Then, after birth, when the youngster starts to consume colostrum, it gets a large dose of the antibodies and dies from shock.

Prevention of such losses is a problem now confronting veterinarians. While the colostrum from affected cows and sows is obviously harmful, it also has many properties vital to the survival and health of calves and pigs. Ordinary milk and other feedstuffs do not contain all of these essential properties, and so far satisfactory artificial foods have not been developed for practical farm use.

**Veterinarians Tell Ways To Prevent Pig Scours**

These five suggestions for keeping scours out of the spring pig crop are offered by swine disease authorities of the American veterinary medical association:

1. Set up a definite schedule for feeding the sow. Irregular feeding results in an uneven flow of milk that causes nursing pigs to go hungry at one feeding and then scour from overeating at the next.
2. Don't overfeed the sow. Newborn pigs often scour because the brood sow is being overfed. Give her only warm water and no solid feed the first day after farrowing and a small amount of bran or oats the second day. After that, the ration can be increased a little each day so that she is on full feed within two weeks.
3. Feed a balanced ration. If the sow gets too much corn, her litter is almost sure to scour.
4. Keep sows away from mud holes, manure, and filth. Many cases of pig scours are traceable to filth consumed while nursing.
5. Protect pigs against sharp changes in temperature. Failure to keep pigs warm when the weather suddenly turns cold will cause outbreaks of digestive trouble.

**Saws Used in Home**

The saws commonly used in the home are the hacksaw and the handsaw. The hacksaw is used to cut metal and the handsaw to cut wood. There are two types of handsaws, the rip saw to cut with the grain and the crosscut to saw across the grain. All saws should be kept sharp. In starting a saw cut, the thumb of the left hand should be used to guide the blade until the cut is started at the desired location. The first stroke of the saw should be in the up direction. Sufficient pressure should be used when starting the cut so that the saw immediately begins to bite into the wood.

**Warning to Cattlemen**

Stock owners who use grazing land that adjoins oil lines and tanks are warned to watch out for crude oil poisoning in their herds. A bulletin from veterinary medical authorities cautions that the lines and tanks occasionally spring leaks, leaving pools of oil, and cattle may consume enough of it to be fatally poisoned. Animals on poor grazing land seem to have a special liking for crude oil, the bulletin adds. Cattlemen also are advised to keep their animals off pastures fronting recently oiled roads, particularly during rainy weather. The reason is that rain may wash enough oil onto the pasture to poison all or part of a herd.

**Early Days of Indiana**

Indiana territory's initial 1,000 settlers came from Kentucky, Virginia, and the Carolinas. They built their cabins in the south, along the Ohio and lower Wabash. They found the farm land rich, and when, in 1813, they moved their capital to Corydon, 20 trail miles west of Louisville, their number was 30,000. The total had jumped to 75,000 by late 1816, when statehood was won. There were a million and a half Hoosiers in Civil War days. By that time, the state's "naturals" in crops—corn, wheat, and hogs—had been found. Hominy and hogs continue to be good Hoosier fare.

**DIGGING AND STORING IRISH POTATOES**

Home gardeners will soon be digging and storing their spring Irish potato crop. The length of time they can be stored will depend upon where you store them and the condition they are in when they are dug, says J. E. Hutchinson, associate extension horticultural specialist of Texas A and M College.

He says let the potatoes mature before digging them. Potatoes can be dug before the tops die, but they should be mature if you expect to keep them in storage for any length of time. Here is a simple and easy method for checking maturity. Press the thumb against the skin of a few potatoes, if the skin is tough and doesn't break easily, the crop is ready for harvesting.

If excessive rainfall has occurred just prior to harvest, you are likely to find the potatoes covered with water blisters (small elevated white spots) on the skin. Hutchinson says harvesting should be delayed until these blisters have dried. If the potatoes are harvested when they are "sappy" or "blistered" heavy losses may result from rotting.

Mr. and Mrs. Judd Donnell made a business trip to Lubbock Monday.

**PERSONAL**

Mrs. Cecil Joslin and daughter, Linda Ann, of Plainview, are spending several days this week with her sister, Mrs. Judd Donnell.

Mrs. A. C. Arnold, mother of A. D. and Arthur Arnold, moved to Silverton recently and is living in the home of Mrs. W. A. Rowell.

Mrs. Katie Young, of Turkey, is visiting this week with her son, Mr. and Mrs. C. B. Young.

Mrs. Dean Allard and Mrs. C. O. Allard spent last Wednesday and Thursday with Mrs. Roy Allard at Brice.

Using the home freezer or freezer locker box for freezing and storing surplus vegetables for later use is one sure way to have them when they are needed by the family.

One of the secrets of producing high quality hay is getting rid of the moisture in the hay as fast as possible and at the same time retain in the hay a bright green color.

Mr. and Mrs. Judd Donnell made a business trip to Lubbock Monday.

Mr. and Mrs. Billy Joe Womack and daughter, of Amherst, spent the week end with Mr. and Mrs. Bruce Womack.

The Supervisors of The Cap Rock Soil Conservation District are: Chairman, Earl L. Cantwell; Vice Chairman, Bray Cook; Secretary, Chester Burnett; L. A. McJimsey and Glynn B. Morrison.

**Try Dancing If Putting Child to Sleep Difficult**

**HOLLYWOOD, CALIF.** — Gene Nelson, movie dancer, started dancing bedtime stories for his baby a year ago. He didn't know what he was getting into.

"Now I have to dance wake-up stories for him," Nelson said, "and also feeding stories, bath time stories and dressing stories. Not to mention putting him to bed with a dance, too."

This is a highly specialized type of child training and Nelson can't recommend it to every parent. But it's very successful for him.

"Other parents envy me," he said. "When I tell them I can get the little guy to sleep just by running through a rehearsal of the dance I have to do the next day."

It gradually took more and more of papa's pas de deux, however, to get baby to sleep. Then he started working in "Rosie O'Grady" and dancing all day.

"I was a pretty tired father by supper time," he said. "I began to wish I'd stuck to something conventional, like singing lullabies."

Mr. and Mrs. Steve Duncan spent Saturday night with Mr. and Mrs. Price Bradley in Happy.

Mr. and Mrs. Bill Bingham, of Canyon, visited from Friday until Monday with relatives here.

Mr. and Mrs. J. A. Henson and children, of Clovis, New Mexico, spent last Thursday with her parents, Mr. and Mrs. Veral Vaughn.

## Campfire Flavors Are Easy to Capture When You Broil Meat Cuts

WHEN YOU LONG for the taste of campfire cookery and still want the convenience of your kitchen, plan some broiled dinners! Broiling gives an irrestible flavor to meats as well as fruits and vegetables to go with the meats. It's a quick method of cooking, too, for, in most cases, the broiler meal takes only 15 minutes to one-half hour to cook. Most homemakers like to plan several broiled dinners for hot weather because they're so quick and appetizing. Furthermore, since meat, vegetables and fruits can be placed on the broiling tray, there's only that single piece of cooking equipment to be washed after dinner, in place of several pots and pans.

To simulate a real out-of-doors supper several times a week, plan to serve on gay gingham cloth out on the porch or in the garden. The main course, hot and sizzling from the broiler, is easily carried outside. Select meats for broiling from this list: chopped beef or lamb, sausage, frankfurters, steaks, chicken (broilers), corned beef hash, leftover chopped meat, small pieces of meat on skewers, bacon, sweetbreads, pre-cooked ham slices, lamb chops, bacon or sausage. Pre-cooked or canned potatoes may be used with the meats, as well as cooked vegetables which need simply to be reheated.

**Broiled Lamb Chops Dinner**  
(Serves 10)  
10 pear halves  
2 tablespoons melted butter  
5 tomatoes, halved  
1/4 cup chopped onion  
Salt and pepper  
Parmesan Cheese  
10 loin lamb chops (about 1-inch thick)  
5 teaspoons mint jelly  
Parsley

Drain pear halves thoroughly. Brush lightly with butter. Brush tomatoes with butter. Spread 1 teaspoon of onion on each half, season with salt and pepper and sprinkle with cheese. Arrange lamb chops on broiler and broil 8 to 10 minutes. Turn, if necessary. Arrange tomatoes and pear halves on broiler, and finish broiling, another 8 to 10 minutes, or until degree of doneness desired is reached. Just before serving, place mint jelly in pear halves. Garnish with parsley.

**Broiled Sausage and Pineapple**  
(Serves 4-6)  
1 pound sausage (links or bulk)  
4-6 slices pineapple  
Leftover potatoes, peas and carrots.

Use sausage links or form bulk sausage into patties. Arrange on broiling pan. Arrange pineapple next to sausage and place potatoes, halved, and peas and carrots in pan underneath sausage and pineapple. Broil until sausage and pineapple are browned. Note: Pineapple

Broiled halves of chicken are delightfully brown and juicy and make a delicious main dish when served with whole, browned potatoes and tomato halves. The vegetables are placed in the broiler just a few minutes before the chicken is done.

**LYNN SAYS:**  
Learn to Use Broiler As Wisely as Possible  
Catch the drippings that come from meat and poultry when broiling and use it to season vegetables so that no vitamins and minerals in the drippings are lost.  
When broiling fowl or cuts of meat or fish that are lean, grease the broiler so that food will not stick to it.  
Do not allow the broiler to become overheated as this will cause smoke in the kitchen.

This broiler meal, featuring beef patties, topped with onion rings with a square of cheese, browned potatoes and tomatoes, will be popular with the young folk. The broiler shown here broils food on both sides at the same time, and requires no turning.

**LYNN CHAMBERS' MENU**  
\*Broiled Steak, Au Gratin Potatoes  
Green Salad, Blue Cheese Dressing  
Heated Rolls Butter  
Strawberry Ice Cream  
Butter Cookies Beverage  
\*Recipe Given

slices may be brushed with butter and sprinkled with brown sugar.

**HOW LONG MEATS** are to be broiled is entirely a matter of personal preference. In any case, the exterior of the meat should be uniformly browned and be plump and full in appearance.

Red steak has a rosy red interior; medium steak is light pink, while well done steak shows no sign of pink.

A minute or two before steaks are supposed to be cooked according to preference, cut a gash near the bone, turn back meat and see if it meets your desires.

**\*Broiled Steak, Au Gratin Potatoes**  
(Serves 4)  
4-5 potatoes, cooked and diced  
1 1/2 cups thin cream sauce  
1/2 cup sharp grated cheese  
1/4 cup fine bread crumbs  
T-Bone steak (1 1/2 to 2 inches thick)

Place potatoes in baking dish and cover with cream sauce. Mix cheese and crumbs and spread over top. Place potatoes in the oven set at 400° and let bake for 20 minutes. Place steak on broiling rack, and broil until done. For a medium rare steak, the broiling time required will be from 20 to 25 minutes for the thickness mentioned above.

**Broiled Ham with Limas**  
(Serves 4-6)  
1 slice ham, 3/4-inch thick  
2 cups cooked lima beans  
Salt and pepper  
2 cups grated American cheese  
2 cups grapefruit segments  
1 1/2 tablespoons butter  
2 tablespoons brown sugar

Broil ham until lightly browned, about 10 minutes. Heat lima beans and pile on top of ham; season with salt and pepper and sprinkle with cheese. To one side of the ham, place grapefruit segments. Brush with butter and sprinkle with sugar. Reduce heat and broil until cheese melts and grapefruit browns slightly.

**Broiled Chicken**  
Clean two-pound chickens thoroughly. Split down the back and flatten out by pressing with the hands. Brush skin and underside with butter, then season with salt and pepper. The chicken may first be placed in a hot oven to cook for 15 to 20 minutes, then in the broiler to complete the cooking, another 15 to 30 minutes, depending upon how done one likes it.

**Broiled Beef Patties**  
(Serves 6)  
1 pound ground beef  
Salt and pepper  
1/4 cup chili sauce  
2 tablespoons fine bread crumbs  
6 onion rings  
Season meat with salt and pepper; blend in chili sauce and bread crumbs. Shape into six flat patties and top with onion rings. Broil until plump, brown and done, as desired.

Keep broiler pans washed after each use as the fat and drippings from meat, fish and fowl will easily turn rancid and make your cleaning greater if you let it go.  
Plan broiler meals for a time when you have leftover, cooked vegetables on hand that can be heated with the meat; otherwise, use canned or freshly cooked vegetables.  
The thicker the cut of meat broiled, the further away from the heat of the flame it should be placed.

Elves and Leprechauns Took Blame for Everything

It may not be on the official unemployment records, but the fact is that there are hundreds of shees, leprechauns, and elves out of a job. Since each one of them has a long history of diligent service to humanity, it seems a real shame they can't be put back to work.

According to the Childcraft reference library, our ancestors refer to the little people to full advantage. They let them take the responsibility for souring the milk, rattling the windows and creaking the stairs, and breaking Aunt Nellie's best china.

A nice feature of the little scamps, too, is their wide range of nationality.

Did your parents come from Scandinavia? Then you will want to select an elf. This pint-sized creature will live in your home and help keep the kitchen neat. If he occasionally cracks a dinner plate or burns the toast, you can't very well complain. That's what you want him for, to take the blame, isn't it?

Pixies are your choice if you have British ties, and there is a fine assortment of shees for you Scottish folks. If you are Irish you may select between the revelry-loving shees and the rather dour leprechauns, who, incidentally, are apt to ignore you as they spend most of their time making shoes for the shees.

If you favor France you will have to get along with a goblin. But maybe he's better than a German poltergeist, who is downright rowdy. He will cause no end of commotion until someone bakes him a spice cake.

Just a word of warning before you adopt one of these little chaps—they believe in people, and definitely expect people to believe in them.

Life Expectancy for Man Reaches 65-Year Average

Man once shared the life expectancy of a pack-donkey, but over a 2,000 year period has attained a 65-year average—almost rivaling the 70-year expectancy of the whale, the longest-lived mammal in the life chart.

But this increased age has drawbacks in the form of cancer, diabetes and heart disease.

The average Roman of about 50 B.C. lived only 25 years. Modern medicine and sanitation now give man at least 40 more years—and a greater chance of having one of the diseases usually associated with the aging of the human body.

Human progress up the life-expectancy ladder is something of a triumph for man, who is not too well endowed with protective equipment. He is the only mammal in the higher brackets who is without some form of protective armor. For example, he ranks with the whale, 70; the elephant, 60; the hippopotamus, 40; and the alligator, 40 years.

Domesticated mammals range in life expectancy from the dog, 10 years, to the cow and horse, 20 years, and the burro, 25. Lowest mammal in the chart is the mouse, who lives from 2 to 6 years.

"Breaking Up" Water

Water, which consists of hydrogen and oxygen, can be broken up into these elements by electrolysis. If two wires, carrying a direct electrical current, are placed in water, bubbles of oxygen form around the one connected to the negative side of the battery or generator, while oxygen forms around the wire connected to the positive terminal. Usually a small amount of acid must be added to the water to make it conductive of electricity. Also, if water, in the form of steam, is heated to a very high temperature, around 3500 F, it separates into hydrogen and oxygen. These recombine to form water as the temperature is lowered again.

Longer Life for Sheets

To lengthen the life of sheets follow these suggestions. Reverse sheets every other time by putting a bottom hem at the top. Cover bare springs with heavy sheet or sheeting to avoid snagging bed linens. And check all beds for needed carpentry. Put a mattress pad between the sheet and the mattress to avoid the abrasive action of the rough ticking against the sheet. Loosen the edges of the sheet all around before stripping the bed. Use mild solution of bleaches and rinse thoroughly, or better still, let the sunshine do your bleaching. Always rinse thoroughly to remove traces of soap and soap powders.

Study Premature Babies

An instrument corresponding to a miniature iron lung has been used by University of Michigan researchers in studying premature babies. Object of the studies was to find out why premature babies breathe irregularly—in gasps or jerks. The research has shown that the cause of this irregular breathing is that oxygen is not reaching the tissue of the brain center which controls respiration.

Reaction to Tumors in Mice Studied by Yale Scientist

A Yale scientist, engaged in cancer research, has discovered that the length of time mice can survive after developing malignant tumors is related to the age of the mother of the mice.

Dr. Leonall C. Strong, geneticist of the Yale University school of medicine, has found that litters of mice, all born of the same parents, show significant differences in their reaction to the tumors.

His experiments indicate that the survival period is shortest in mice born in the first litter, and longest in mice born of the same parents but who already have produced six or more litters.

The survival period tests are the latest discovery in Dr. Strong's cancer research with mice that extends back more than a decade. He has for years produced mice having a strong resistance to malignant tumors and has shown that this resistance mechanism is transmitted to the next generation by some means other than through the germ plasma.

Resistance of mice to tumors is significant because it may possibly provide a means of controlling cancer.

In his work on survival periods, Dr. Strong used eight litters of mice born of the same mother. Each mouse received an injection of methylcholanthrene, a powerful tumor-producing chemical. As soon as the tumor developed in the mouse, observations were made to determine the number of days the mouse survived.

Dr. Strong found that mice of the first litter survived an average of 52.4 days, with the survival period gradually increasing with succeeding litters until the average survival time for mice of the eighth litter is 130 days.

Nerve Impulses Go Faster Following Initial Stimulus

The first in a series of nerve impulses may act as a motorcycle escort, clearing the way for those that follow and enabling them to go faster in their hasty travels over the networks of the nervous system.

This is indicated in the results of a study of fundamental mechanisms of the nervous system by Dr. Theodore H. Bullock and Lillian R. Berkowitz of the University of California.

The study shows that in many cases when a nerve receives an impulse, subsequent impulses travel at a faster rate through the nerve fibers for a short time. This acceleration continues until fatigue slows down conduction.

An investigation was made at the rate at which impulses are conducted through the single nerve fibers of sea worms, earthworms, and whole nerves of frogs. The rate of conduction was actually increased after a "conditioning" impulse in all these cases up to 20 per cent.

Until these results were observed, it had been thought that an impulse slows down subsequent impulses until recovery to a normal rate is complete.

These observations may greatly simplify the search for the basic mechanism of nervous function. The study was made under a U.S. public health grant.

Honey Substitute for Bees

If feeding is necessary, the best substitute for honey, as a food for bees, is a heavy syrup made of white granulated sugar and water. For winter stores, the syrup should be made by dissolving two parts of sugar in one part of water. In feeding the colonies in cold weather, increase the ratio of sugar to two and one-half parts of water, adding one teaspoonful of tartaric acid to every 20 pounds of sugar to keep the syrup from granulating. In making this heavy syrup, use boiling water to dissolve the sugar, and add the tartaric acid to the boiling syrup. Stir constantly until all sugar is dissolved. Sugar syrup that has fermented, especially in tin or iron containers, should not be fed to bees, for it is often poisonous to them.

E-Bond Series Leads

Purchases of Series E savings bonds since the war seem to have stabilized into a pattern in which the largest denomination certificates, those of \$500 and \$1,000 face value, have been contributing more to the annual dollar totals than the smaller denominations combined. The \$1,000 bond alone has been averaging about 42 per cent of all E-Bond purchases in dollar totals in the last three years and the \$500 bond approximately 14 per cent. Thus the two together represent an average of around 56 per cent of all E-Bond sales since 1947.

Handles Carefully Finished

Ever notice the finish on the handle of your paint brush, screw driver, penholder, paring knife, saw, hoe, rake, or umbrella? It had to be carefully formulated so that it would be hard, glossy, smooth, resistant to moisture, perspiration and abrasion. It must not soften or become sticky when it's in use. Lacquers and hard-drying varnishes fill all these specifications to a high degree and are frequently used for such purposes.

What's Doing in Churches

THE METHODIST CHURCH Rev. Grady Adecock, Pastor Sunday School 10:00 Morning Service 11:00 Children and Young People's Meeting 7:00 Evening Service 7:30 WSCS every other Monday at 3:00

RINGWORM IS PREVALENT AT THIS TIME OF YEAR SAYS HEALTH OFFICER

Austin, June 8.—It is a 50-50 bet that you have some sort of ringworm infection. Check to see. Chances are it will be in your scalp hair, on your groin, or on your feet—either on the soles or between the toes. If you don't find it, you're lucky, because while it isn't serious, its itching and persistence is very annoying. A fungus—the same one that causes food to mold—causes ringworm. It's one of the world's

most common ailments, with authorities estimating that half of the world's population is affected. It is more common this time of year than any other. Animals get it too. As a matter of fact, cats, dogs, rabbits, mice, and fowls are frequently the source of infection in man. A child plays with an infected dog, the dog's hair brushes the child, and the child stands an excellent chance of ringworm infection. Swimming pools, locker rooms, and gyms are potent sources of infection.

Bit of Wyoming's Wild West Retained in National Parks

"Away out west" in Wyoming, something not yet old has been added to Uncle Sam's Jackson Hole national monument and Grand Teton national park.

The Rockefeller family's gift to the U.S. government — covering more than 33,000 acres of land lying within these two areas—is new by recent presentation. It is old because it includes a bit of the pioneers' "Wild West," to be held untouched for nature lovers amid the cultivated fields, ranches, and expanding communities of modern America.

In northwest Wyoming, just south of Yellowstone, the Jackson Hole and Teton regions recall scenes of natural grandeur which greeted the first explorers and fur trappers to push into the Rocky Mountain country of Indians and wild game. Then vast numbers of elk, moose, bison, black and grizzly bears, deer, and beaver populated these mountains and valleys.

Many wild animals still haunt the western Wyoming region. Visitors report that antelope race their cars along open-range roads; beavers often annoy farmers by damming irrigation ditches, and Jackson Hole ranchers have built high fences to protect their haystacks against marauding elk.

The first white man to see the majestic Teton Range rising west of the lush green valley now known as Jackson Hole is believed to have been John Colter. In 1807-8, this woodsman and trapper, previously on the Lewis and Clark expedition, crossed and recrossed the mountains. Traveling alone, with a 30-pound pack and gun, Colter also penetrated the northern wilderness on this trip, discovering Yellowstone.

Tastier Drinking Water Promised by New Technique

City drinking water free from unpleasant odors and tastes has been made possible by a new technique which for the first time can isolate and analyze the water's minute organic contaminants.

The water supply of key cities along the Ohio river will be investigated by using the new test as the first step in removing the impurities.

In the course of a year the average adult will consume less than a quarter teaspoonful of organic matter present as impurities in the water he drinks. Yet this small amount of organic matter can and frequently does impart a wide variety of unpleasant tastes and odors to a year's quota of water for an adult.

Big strides forward are being made in successfully handling the taste and odor problem this minute quantity of organic material causes. However, the exact nature and chemical properties of the trace amounts of organic matter in the water have remained almost completely unknown. What has long been needed is a method for recovering the extremely dilute dissolved organic matter from the water so that its composition and properties might be investigated.

**Enemies of Lemming**  
The most dangerous natural enemies of the lemming are the snowy owl, the arctic fox and ermine, who depend almost exclusively on the lemming as their winter fare. The snowy owl—white except for sharp, black bars across the body—is a born and trained hunter, equipped with ice-pick sharp claws for seizing a victim. Though the owl travels south during a season of lemming migration, he rarely breeds outside his home in the arctic circle. The ermine, thin and sinuous, is more successful than the fox in hunting down the lemming in the rodent's years of scarcity. The ermine can travel the lemming roads—built in the winter under a heavy blanket of snow—while the fox must smell and search and dig for his food.

**Bandaging Dog's Tail**  
A long-time problem of veterinarians—how to keep bandages in place on monkeys' and dogs' tails—may be solved in the future by use of stainless steel tubes. English veterinarians are experimenting with stainless steel tubes as surgical dressings for injured tails. Dogs and monkeys are noted for tampering with bandages, often biting or pulling off dressings meant to protect wounds. Steel tubes promote healing by protecting the wounded tail from further injuries resulting from biting or scratching, allow free ventilation of the wound and make it easy for veterinarians to observe how healing is progressing.

**Test New Cancer Method**  
Scientists in the University of California medical school are testing a method of treating cancer by injecting anticancer drugs directly into arteries serving tumor areas. They hope thereby to cause maximum damage to cancer tumors and minimize the toxic effects of drugs on the whole system. The research, supported in part by the American Cancer society, is being conducted under the direction of Dr. Michael B. Shimkin, director of the laboratory of experimental oncology, a joint venture of the university and the National Cancer Institute.

IN MEMORY

By Glenna Wilson  
Dear Master, you know how we loved him  
You know how we'll miss his dear smile  
Yet Father, we humbly thank you That he stayed in our midst for awhile.

Since Bennett was just a small boy When together we'd laugh and play  
He has been to us all a great joy So we thank you for each happy day.

We thank you for sparing him, Master,  
Through sickness, trials and war. Surely when he reached heaven You placed in his crown a star.

We know it must grieve you, dear Master,  
To take our dear loved one away But you've given the promise of heaven  
Where we know we shall meet some day.

You must have needed him, Father,  
To make heaven a little bit dearer So I pray that each one who loved him  
To Thee may be drawn a bit nearer.

May his wife, his children, his mother  
His sisters, his friends young and old  
Be there to meet Bennett in heaven  
On the streets that are paved with gold.

CARD OF THANKS

We wish to extend our heartfelt thanks and appreciation for the acts of kindness, messages of sympathy and beautiful floral offerings received from our many friends during our sad bereavement.

Mrs. Bennett Haley, Charlotte and Bill; Mrs. W. T. Haley, Mr. and Mrs. Ernest Davis, Capt. and Mrs. Jack Green, Mr. and Mrs. C. L. Wilson and Mr. and Mrs. R. L. Hill.

Dr. and Mrs. G. R. Burk and sons, Jimmie and Don of Littlefield, Mr. and Mrs. E. C. Jackson of Plainview, Mrs. G. Salmon and Mrs. R. C. Allard of Clarendon were week end visitors of Mr. and Mrs. C. O. Allard.

Mrs. James M. Tidwell and son, of Hobbs, New Mexico, is visiting her parents, Mr. and Mrs. R. C. Hutsell.

Mr. and Mrs. Frank Hunt and children, Frankie Lou and Gary, were visitors in Plainview Monday.

Mr. and Mrs. Dean Allard left Monday for several days visit in Canyon and White Deer.

Mr. and Mrs. J. A. Windom, of Amarillo, and Frank Bankston, of Greenville, spent Sunday with Mr. and Mrs. Ray C. Bomar.

**Dollar for Dollar— you can't beat a PONTIAC**

**A Wonderful Performer — at a Wonderful Price!**

**COME IN AND SEE FOR YOURSELF!**

Almost everybody has a good word for the immensely popular Pontiac. The most enthusiastic spokesmen are those who own this great car. The facts behind this admiration of Pontiac are very simple—

Pontiac is America's lowest-priced Straight Eight. Pontiac is the lowest-priced car with GM Hydra-Matic Drive. Pontiac is the most beautiful thing on wheels. And Pontiac is famed everywhere for its dependability and economy.

Those are the facts, and they are impressive. But they are a lot more impressive to the person behind the wheel of a Pontiac. He knows for sure that dollar-for-dollar, you can't beat a Pontiac!

**Bomar One-Stop Pontiac**
