Texas Farm Bureau Federation to Hold Sub-Dist. Meeting

Texas Farm Bureau Federation will conduct a series of sub-district meetings throughout the state during September according to announcement today by J. Walter Hammond, Federation president. A meeting is scheduled for Plainview, Thursday, September 14 in the Hilton Hotel, and another will be held in Lubbock, Friday, September 15 at the Lubbock Hotel. Mr. W. R. Tilson of Meadow state farm bureau director, will preside. Meetings will start at 10:00 a. m. and will be concluded at 3:00 p. m. State and national farm bureau officials will be in attendance, Hammond said.

Farm Bureau policies are developed by the membership, Hammond asserted and the series of meetings has been scheduled so that state and national officials may have the benefit of the thinking of farmers and ranchers throughout the state, and at the same time for officials of the organization to give farm people more needed information on the program of the Farm Bureau, its aims and accomplishments. Every day the business of farming becomes more complicated, Hammond declared, and the need for a stronger Farm Bureau more necessary. If rural people want a democratic government, fair prices, good roads, a fair tax program, improved educational facilities for their children, and a better rural health program, then they want a stronger Farm Bureau in Texas and the nation, he concluded.

All farmers and ranchers of the area are urged to attend their nearest sub-district meeting.

U. S. Navy Recruiting Substation at Amarillo, Texas

The local navy recruiting station announces that the navy desires additional applications from naval reserve women officers and enlisted women on a voluntary basis for recall to active duty for an obligated and guaranteed period of one year. Applications for active duty from wave reserve officers in grades of Lieutenant Commander and below in line and staff corps (including those with no prior active duty or indoctrination) are desired. The navy wants applications from enlisted women in all classes of pay grades E 4 through E 7 in general and emergency service ratings.

The rating groups in which women are specially desired are teleman, radioman, communications technician, yeoman, personnelman, machine accountant, storekeeper, disbursing clerk, aerographer, training devices man, aviation storekeeper, and dental technician. In addition to the foregoing women are desired in pay grade E 3. Please check with the navy recruiting station at Amarillo, Texas for additional information.

Attending the wedding of Billy McClendon, son of Dr. and Mrs. Wells McClendon Thursday, at Childress, Texas were: Mesdames T. C. Bomar and Mary Tom, Clay Fowler, Emma Frieze and Pearl Simpson.

Rev. and Mrs. Arvil Richardson and daughters, of Wichita Falls, Texas, spent a few days the first of the week with her parents, Mr. and Mrs. C. C. Garrison.

Scientists Predict Healthy Age of 100 For U.S. in Future

NEW YORK—America's old folks will be healthier and happier in the next generation.

That's the report from Dr. Charles E. Dutches, medical director of Schenley laboratories and one of the nation's experts on geriatrics, the new medical specialty concerned with diseases of the aged.

"Medical science has added years to the human lifespan," says Dutches, "and now is in the process of adding life and vigor to the added years."

Modern medicine has made the age of longevity a reality, raising the average life expectancy nearly 20 years. Today there are over 11 million Americans in the 65-and-over age group, as against only 3 million in this category in 1900. Present estimates are that there will be at least 20 million Americans 65 and over by 1980.

This striking increase in life expectancy has been accomplished by a combination of new and potent medical weapons — such "wonder drugs" as penicillin and streptomycin, better care and treatment methods, and preventive medicine as practiced by the geriatricians.

According to Dutches, the next generation will see increasing numbers of healthy men and women of 100 matching the economic and social accomplishments of today's 40-year-olds.

"The chief threat to the aged at the present lies in the so-called degenerative diseases," explains Dutches, "which cripple and strike down people of 40 and over."

"Recent research indicates that arteriosclerosis, coronary thrombosis and degenerative diseases in general are caused by nutritional deficiencies. There is reason to believe that new drugs will soon be available to combat this disturbance of cellular nutrition."

But the Schenley executive does not believe the entire problem of happier and healthier aged can be solved by drugs alone.

"Old people must have a sense of participation and continued purpose in life," he says. "They must feel that they are useful citizens, not a burden on their family, friends and country."

Dutches believes that the experts in human and industrial relations must help the aged "in making a successful emotional adjustment to the oncoming years."

He feels, too, that a way must be found to employ the able-bodied aged in useful economic services.

"When we solve these problems," adds Dutches, "we will begin to realize the full potential of our longer lifespan."

Army Chaplain Gets DSC For Valor in Korean War

TOKYO, Japan — A chaplain has been awarded the distinguished service cross for his work in the Korean war.

Chaplain Herman G. Felhoelter, of Cincinnati, voluntarily stayed behind to give spiritual comfort and aid to seriously wounded men who could not be evacuated in the face of an overwhelming night attack by superior North Korean forces on the Kum river north of Taejon.

"When I last seen, Chaplain Felhoelter was still administering to the wounded," the army said. "He is believed to have been killed. His valorous deed was an inspiration to every member of the regiment."

Girl Wins Fight to Stay in Malay With Foster Mother

SINGAPORE — Thirteen-year-old Bertha de Hartogh, who grew up in the jungle, won a high-court appeal against a decision to return her to civilization in Holland.

The Singapore court of appeal reversed an earlier decision that the girl should be handed back to her parents, who left her with a native governess when they fled from Japanese invaders in 1942.

Bertha, one of six children of a Dutch army sergeant and his wife, grew up in a Malay jungle village with her foster mother, Aminah, after her parents were interned by the Japanese.

Released in 1945, the parents were unable to find the child. However, a traveler in northern Malaya saw her running naked with brown-skinned village children and reported her presence to authorities.

Man, Mule, Dog on Pulaski Skyway Cause Traffic Jam

JERSEY CITY, N. J.—Clarence Hornback wanted to go back home to Galesburg, Ill., and so he took the best highway he could find and caused the worst traffic jam in history.

Nobody told Hornback the Pulaski skyway, main road from New York to Philadelphia, wasn't for mules. So he started down it with his mule and dog.

Police found him shuffling along the elevated highway being trailed by a long, long line of cars. While police were escorting him off the road, the strap holding the pack on the mule let go. Assorted bundles scattered around clearing up the debris. By the time the situation cleared, traffic had backed up about four miles.

Better Sight BY THE CARTON

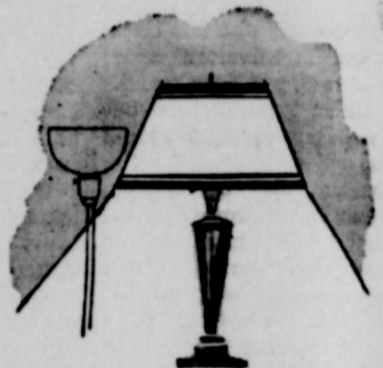

Lamps with empty sockets are about as handy as a ship without a sail! No matter how efficient... or how many lamps you may have around the house... they're so much excess baggage if your supply of lamp-bulbs is down to the bottom of the carton.

Good light is so necessary to good sight. And a carton of bulbs always on hand is insurance against "bulb snatching"... being without... or inconvenient rushing to the store.

Yes, BULBS ARE MIGHTY IMPORTANT... cleanliness, too! Your lamps and fixtures should be kept clean. Dust and dirt can rob you of half the light you pay for. Reflector bowls can be washed with soap and water... bulbs wiped clean with a damp cloth. Shades may be dusted, washed or dry-cleaned... depending on the type fabric. Light-conditioning your home is economical, too... low cost, dependable electric service makes it so!

40-60 watt—Strictly decorative... such as boudoir lamps, brackets, etc.
75-100 watt—Decorative and functional where the seeing task isn't too demanding.
150-300 watt—Reading, sewing... where good, strong light is needed for proper "see-ability."

Low Chemical of Value Controlling Garden Pests

Advice for gardeners, now in the midst of their annual battle with bugs and worms, is given by Wayne C. Colberg, North Dakota agricultural college extension service entomologist.

Colberg says that the new poisons are generally the best—DDT, rotenone, methoxychlor, chlordane and toxaphene, for example.

He offers this reminder, too. Most preparations that kill bugs in the garden will also have harmful effects on the gardener. Be sure to handle them carefully. Read the directions that come with the poison you buy for use in your garden.

Here are some definite poisoning recommendations from the entomologist: For flea beetles—these are the little, fast-moving insects that leave "buckshot" holes in the leaves of your garden plants—use a spray or dust of DDT, methoxychlor or rotenone. The Colorado potato beetle is bigger than the flea beetle and generally is troublesome only on potato plants, but the same poisons will give control. The cabbage maggot, a worm-like pest that makes life tough for cabbages, can be controlled with DDT or rotenone. For the corn earworm, dust or spray the tops of your corn plants at silking time with DDT or rotenone.

The webworm, distinguished by the web it makes around the plants, can be killed with toxaphene. Chlordane will handle the white grub cutworms, that do much of their damage at night. The cutworm can be killed by spraying or dusting the ground completely with DDT late in the afternoon.

Colberg adds that "those pesky grasshoppers can be taken care of with either toxaphene or chlordane."

Urges Basic Shopping Rules Be Made Part of Education

The bargain-hunting housewife has long been due for praises, and she is finally getting them. An authority on applied economy declares that she is a jewel—not only to her husband—but also to Uncle Sam.

Her shrewd shopping methods may appear nerve-racking to the average male, but they make a big contribution to both family and national economy.

The nation needs more thrifty buyers. Buying principles should be made a part of the school curriculum.

Careful spending is based on systematic study. Education is not adequate until it teaches basic shopping rules and the use of information services designed to help the consumer. Only through this knowledge of how to make the most of our consumer dollar may we become happy and adjusted in our modern industrial society.

It is a wise housewife who, knowing this, looks for happiness on the bargain counter.

Why Wool Shrinks

What makes wool shrink when it gets wet? The wool fibres are both kinky and scaly, and the scalliness ordinarily prevents them from sliding over each other. When wool is wet the scalliness is greatly increased and during the washing process the fibres may slip over each other and become more kinked. This may result in a new arrangement of the woolen yarn and a shorter length. If the garment is dried in this condition the scalliness again becomes important and it cannot be stretched back to its original size. This is the reason for "blocking" a sweater, drying it on a frame that stretches the fibres so that the original shape is resumed. Shrinkage may also be caused occasionally by the action of alkalis in strong soaps, which cause actual chemical changes in the fibres and make them shorter.

Settling of Hawaii

Hawaii, which may someday be our 49th state, was originally settled by Polynesians, the romantic "South Sea Islanders," about 300 A.D. They brought to the uninhabited islands many of their own plants and animals, including hogs and poultry. Strange as it seems, the next emigration took place about 1300 years later, when a group of New Englanders landed there to settle and convert the natives to Christianity. In the century following 1819, many varied groups settled the bountiful islands, including Chinese, Japanese, Koreans, Polynesians, Portuguese, Spanish, Americans, Germans, Puerto Ricans, Filipinos, and others.

"Static" in Dry Cleaning

The friction of the clothes and the solvent as they are agitated in the washer is the cause of static electricity in dry cleaning. The solvent is a poor conductor of electricity, so electrical charges may accumulate until they reach quite a high voltage, and hazardous sparks may result. Serious fires have been started in this way. If the metal washing machine is connected by a wire to the ground such charges may leak away before they become dangerous. Sometimes commercial filter powders are added to the solvent, in order both to absorb the dirt from it, and to make it a better conductor, and thus help carry the charge away.

Candidates for Compliments

1. Get your Fall fashion campaign off to a good start with this wonderful dress of 100% worsted wool jersey! Special features: a shawl collar, one pretty pocket to use and one "for show", an easy skirt. Rose, beige, olive green, royal blue. Sizes 12 to 20, 38 to 40. Also half-sizes 12½ to 20½ in grey, brown, green, navy, rose. **\$17.95.**

2. Be in line for flattery every time you wear this slim-lined dress of 100% worsted wool jersey. Reasons why—the stitched tucks in front, club collar, cuffed slit pockets and velvet flower and belt. Brown, sunray beige, green, Bali red, navy. Sizes 10 to 20. **\$17.95.**

3. You're your own best booster when you appear in this gay young dress with its starched white pique collar and under-cuffs, its silver-dotted artist's bow of rayon crepe, its stitched hip-tucks. Rayon crepe in black, green, red, cocoa. Sizes 10 to 18. **\$14.95.**

4. The compliments will start pouring in once you're seen in this charming shirt-dress of rayon crepe! All because of its graceful sleeves with the inverted pleats, its club collar and satin belt, its pleated skirt-front. Flame, turquoise, luggage, black. Sizes 10 to 20. **\$17.95.**

5. Here, and sure to get your vote for all-winter wear, L'Aiglon's attractive coat dress of crease-resistant rayon gabardine. With a notch collar, bodice pockets and a double tuck on either side of the buttons. Grey, blue, rust, black, shrimp. Sizes 12 to 20, 38 to 44 and 12½ to 24½. **\$14.95.**

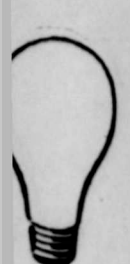

6. The competition will be nil when you turn up in this smart looking dress of fine-checked wool and rayon. With detachable collar and cuffs of starched white pique, cuffed hip pockets—one in front, one in back—and off-center bone buttons in back. Black, navy, brown, red. Sizes 10 to 18. **\$17.95.**

MISS NORMA THOMPSON HONORED WITH SHOWER AT TULIA

Miss Norma Thompson, bride-elect of E. J. Webb, was complimented with a shower September 5, 1950, in the home of Mrs. R. F. McCasland, of Tulia. Orchid, pink and green, chosen colors of the honoree were featured in the decorations. The dining table was laid with a white linen cloth centered with asters. Miss Dejah Cowan presided at the punch bowl and Miss Rosemary Sharp served cake. Mrs. Faye Henthorne registered the guests. The couple will be married September 14, and will make their home in Tulia. Attending from Silvertown were: Mrs. Dee McWilliams and Mrs. Arnold Brown. Mrs. W. T. Haley of Plainview, visited in the home of her daughter and family, Mr. and Mrs. Robert Hill over the week end. She returned to her home Tuesday accompanied by her daughter, Mrs. Jack Green and children.

Mrs. H. L. O. Riddell called in the Milton Perry home Sunday afternoon. Mrs. J. H. Bradley and daughter were in Plainview Saturday. Betty Jean who is attending school in Plainview accompanied them home for a week end visit. Mrs. Jack Green and children, Jack Bennett and Deanna, of Fort Flagner, Washington, came Thursday to visit her sister, Mrs. Robert Hill and Mr. Hill. Miss Ida Smith was carried to the local hospital Sunday where she is being treated for pneumonia. Her condition is reported improved. Mr. and Mrs. Jodie Ziegler, Mr. and Mrs. Dave Ziegler, attended a primitive baptist meeting in Tulia Sunday. Mr. and Mrs. Charles Yates returned to their home in Lubbock Monday after visiting with Mrs. Yates' parents, Mr. and Mrs. E. E. Minter over the week end. Mr. and Mrs. Festus Elrod, of Lubbock, visited in the home of his parents, Rev. and Mrs. G. A. Elrod over the week end.

Miss Jeanne Dudley and Miss Jett Byerly, of Farwell, spent Friday night in the home of Mr. and Mrs. Milton Dudley. Pat Redin is visiting relatives in Lampasas, Texas, this week. Mr. and Mrs. Harley J. Redin and son, Kenneth Lee, of Plainview, visited his parents, Mr. and Mrs. Alvin Redin Sunday. Mrs. Glenn McWilliams attended a branch meeting of the Stanley Products last week in Lubbock. Mr. and Mrs. J. M. Schmidt and daughter, of Venice, California, mother, Mrs. H. E. Curtis. They plan on making their home here. Mrs. A. P. Dickerson returned Saturday from Blue Springs, Missouri, where she has been for several days. Mr. and Mrs. Bob Trout and daughter, of Vernon, spent the week end with her sister and family, Mr. and Mrs. Dee McWilliams. Genuine Frigidaire Refrigerators at Simpson Chevrolet Co.

World's Largest Treasure Lies On Sea Bottom

WASHINGTON—Of all the treasure in the world—that hidden in the treasure houses of potentates of the east and the rich men of the world, a greater treasure lies at the bottom of the sea in rotting ships. Billions of dollars worth, probably, but only the tiny sum of \$600,000,000 seems to be accounted for by the historians. This figure is based upon a survey of 70 old treasure ships, now fathoms deep, whose names, approximate locations, and cargoes have been authenticated. Apparently only Davy Jones has full information about other rich vessels, notes the National Geographic society. Staggering Losses For instance, records are fragmentary concerning the gold laden Portuguese galleons which were sunk off the coast of Brazil. Many must have been lost because there is a discrepancy of \$2,000,000,000 between official records of gold and the amounts received in the home country. The Spanish, too, had staggering losses. Their lumbering galleons were often easy prey for British and Dutch ships and the swift vessels of the ruthless Caribbean pirates. Half of the \$600,000,000 in known lost treasures consists of sunken Spanish loot from Latin America. The Spanish lost the largest shipment of precious metal they ever transported. Archives of Spain and England set the value of the treasure \$150,000,000 which stuffed the holds of a 17 ship armada. British and Dutch men of war sank all but one of these vessels in an action at Vigo Bay, Spain, in 1702. The attackers got \$10,000,000, and salvage companies of half a dozen nations have since recovered an additional \$20,000,000. The rest is 70 feet deep in the bay.

\$65,000,000 Lost Raging storms probably claimed more Spanish gold than did the freebooters. There are scores of authentic instances where galleons with rich cargoes are known to have floundered. A noted example is the fleet of 14 treasure ships which went down in a hurricane in 1715 off Long Cay, Fla., taking along \$65,000,000 in gold and silver. The Spanish salvaged \$1,500,000—only to have it hijacked by a British raider lurking near by. The coastal waters of the United States hold plenty of treasure. One famous trove of \$4,000,000 went down with a British frigate in New York's East river in 1780.

Cotton Cloth Treated With New Compound Resists Dirt DALLAS, Texas.—A new compound known as "CMC," or carbonylmethyl cellulose, is going to be good news for laundry-conscious mothers. Treated with the compound, cotton clothes in the future will resist dirt. And, once they are soiled, getting them clean will be easy, requiring little scrubbing and less soap. James A. Kime of the U. S. department of agriculture told the Cotton Research Congress of experimental results obtained with CMC, a low cost derivative of cellulose. "About three level tablespoons of CMC per gallon of rinse water gives cotton goods improved oil resistance without changing the feel of the fabric," he declared. Kime said CMC applied as a rinse, appears to coat cotton fibers with a smooth film that keeps dirt from coming in close contact with the fabric. Cotton cloth treated with CMC and uniformly soiled with carbon black, Kime said, washed easily to its original color. Untreated cottons similarly soiled could not be washed cleaner than a dull, dirty gray. Kime also reported development of a process to make cotton bags insect repellent. The paper industry, he noted, had cut heavily into this important field because multiwalled bags of paper were more resistant to insect penetration. But cotton bags treated by the new process have "successfully resisted insect penetration and prevented spoilage of contents for as long as seven months under condition of heavy insect population," Kime said.

Airmen Decorate Barracks With Rugs, Shades, Curtains ENID, Okla.—It's just a regulation GI barracks on the outside but inside enlisted men of Vance air force base live in private rooms with curtains on the windows and rugs on the floor. With permission of the commandant, the airmen closed a wholesale deal with a lumber company, borrowed \$220, and partitioned the floor into 11 two-man rooms with knotty-pine walls and closets. The venetian blinds, curtains, and other finer points of interior decoration came out of each individual's pocket but one satisfied resident said his new quarters "are nicer than my brother's in college."

PERSONALS

Mr. and Mrs. Ware Fogerson and children, Mrs. Florence Fogerson and Mr. and Mrs. E. A. Day, of Matador, spent from Thursday until Sunday on a fishing trip to Conchous Dam near Tucumcari, New Mexico. A very enjoyable time was reported. Mrs. C. L. Wilson and son, Bradley and Jimmie are visiting relatives in Clarendon this week. Mrs. W. L. Ferry, Mrs. Elizabeth Lynn, of Fort Worth, visited in the home of Mr. and Mrs. Milton Perry recently. H. C. Mercer and sister, Mrs. Lucy Hinton, of Greenville, Texas, and Mrs. J. E. Abney, of San Marcus, Texas, left last Monday for Palmer, Texas, where they were called to the bedside of their brother who is seriously ill. Mrs. Hinton and Mrs. Abney had been visiting here for the past several weeks. Billy Jones returned Monday afternoon from Lawton, Oklahoma, where he has been visiting his sister, Mrs. Hubert Jett. Mr. and Mrs. Kenneth Cates, of Levelland, visited her parents, Mr. and Mrs. W. L. Messimer Sunday. Rev. and Mrs. Grady Adcock and daughters, attended a pastors fellowship meeting in Plainview Friday evening. Mrs. N. A. Shackelford and children, of Amarillo, spent a few days last week with Mrs. H. E. Curtis. Miss Eunice Cox and Eddie Cox visited Mrs. Wise in Floydada Sunday. Mr. and Mrs. Harold Hall, of Tulia, visited Mr. and Mrs. George Jones Monday. Mr. and Mrs. George Seaney spent the week end in Erick, Oklahoma, with relatives. Mr. and Mrs. J. P. Cogdill, of Liberal, Kansas, spent the week end with their daughter and family, Mr. and Mrs. Arnold Brown. Mrs. H. C. Mercer and brother and sister, Mr. John Baker and Mrs. J. H. Mardie, visited another sister, Mr. and Mrs. C. C. Primm and family in Lubbock last Thursday. Visitors in the J. E. Minyard home Sunday night were: Mrs. H. C. Mercer, Mr. and Mrs. J. V. McCarty and children, of Phillips, Texas. Mr. and Mrs. Frank Mercer and family and Mrs. H. C. Mercer left Monday to o to Palmer, Texas, to be with Mrs. Mercer who had been called there because of the illness of her brother. Mr. and Mrs. Frank Mercer and children went to Carlsbad last Monday and made a tour of the caverns.

Sue Gibson and Bill McClendon Wed at Childress

The First Baptist Church of Childress was the scene of a candlelight wedding ceremony Friday evening, September 1, uniting Miss Sue Gibson, daughter of Mr. and Mrs. V. T. Gibson, and Billy Wayne McClendon, son of Dr. and Mrs. L. W. McClendon. Out-of-town guests attended from Silverton, Wellington, Clarendon, Fort Worth, Dallas and Goodnight.

LEGAL NOTICE

Mrs. Willie Smithee and Gordon Montague visited with Mrs. Smithee's sister, Mrs. Kenneth Bain, at Floydada Saturday. They also visited Mrs. John Stevenson who is critically ill in the Lockney hospital.

Mr. and Mrs. George Thomas, of Sherman, spent the week end with his mother, Mrs. Perry Thomas, Sr., and other relatives. Mrs. Thomas accompanied them home for a visit of two weeks.

Mrs. T. C. Bomar, Mary Tom and Mrs. Pearl Simpson made a business trip to Floydada last week.

Mr. and Mrs. L. H. McMurtry and family, of Dalhart, spent the week end in Silverton with friends and relatives. They spent Friday night with Mrs. McMurtry's parents, Mr. and Mrs. Cowser, near Happy.

Mr. and Mrs. Bernice Welch, of Wellington, spent the week end in Silverton with relatives.

Mr. and Mrs. Peter Hoyt and family moved recently to Fort Worth where they will make their home.

Mr. and Mrs. Jimmie Holland, of Eugene, Oregon, visited with his four cousins here recently: Mesdames M. P. Stone, R. E. Campbell, T. L. Anderson and Emma Waller, of Kress.

Mr. and Mrs. Billy Mac Biff and daughter of Levelland, visited over the week end with her parents, Mr. and Mrs. Mike Mason and family.

Mr. and Mrs. C. E. Anderson and children, and Miss Bill Haynes, went to Plainview Thursday to take Mrs. Haynes where she will remain to visit her sister, Mrs. Mary Daniels.

Mr. and Mrs. Floyd Turner, of Chicago, Illinois, visited in the home of Mrs. Jeff Simpson Thursday.

Mr. and Mrs. G. R. Dowdy and son, Ross, left Sunday morning for a short vacation to points in New Mexico.

Dr. and Mrs. V. C. Spen, of Tulia, and Mrs. B. H. Turner, of Turkey, visited in the home of Mrs. Jeff Simpson last week.

Mr. and Mrs. Alga Turner and son, Jan, of Turkey, visited his father, T. D. Wallace last week.

Dwain Lemons, of Floydada, spent Saturday with old friends in Silverton.

Guests in the home of Mr. and Mrs. Roy Mack Walker Sunday were: Mr. and Mrs. Porter Arnold, Mr. A. C. Arnold, Mr. and Mrs. D. A. Arnold.

Mrs. Lilly Wofford and Mrs. Jackie Wingo and little daughter, who have been living in Canyon this summer, returned home last week end. Mrs. Wingo attended summer school at Canyon.

Miss Doris June Brown, who spent the summer in Fort Worth returned home last week.

Mr. and Mrs. Olen Yocom and W. C. Yocom, of Tucumcari, New Mexico, visited relatives and old friends in Silverton Saturday.

Mr. and Mrs. Oscar McGavock and son, of Tulia, visited relatives here Saturday.

Mr. and Mrs. D. H. Davis made a business trip to Amarillo Friday.

Mrs. Edwin Davis took her baby to Tulia Thursday for medical treatment.

Mr. and Mrs. Jack Billingsley spent last week end in Lubbock visiting relatives.

Genuine Frigidair Refrigerators at Simpson Chevrolet Co.

Corn Yield of 100 Bushels Per Acre Goal of Science

COLUMBIA, Mo.—How would you like to harvest 100 bushels of corn per acre on the average? Sounds impossible, but C. H. Woodruff of the soils department at Missouri university believes not.

In fact, he says it may be possible to push those yields up to 150 bushels per acre during some of the best years. Other years, the yield may drop considerably below the 100-bushel mark because water shortage may be the limiting factor.

There's no secret to these high corn yields, says Woodruff. The key is a relatively cheap source of nitrogen. In the past, crop yields have been limited to the amount of nitrogen supplied through legume fixation. But legumes do not have the capacity to fix nitrogen for record yields. Woodruff believes that the best anyone could expect from that system is 50 bushels of corn to the acre.

Woodruff has been working with the idea of 100-bushel an acre corn crops since 1946. On the soils and crops experimental fields at Columbia, more than 100 bushels of corn per acre have been harvested for the past three years. And this has all been done on one field.

Former ammunition plants are fixing synthetic nitrogen. And it is easy to get nitrogen to do the job. Indications are that anhydrous ammonia will supply nitrogen to the soil cheaper than other forms of nitrogen carriers. And he says that anhydrous ammonia can be applied rather easily.

Experimental results at Sanborn field at Columbia show that two pounds of nitrogen are required to grow a bushel of corn—one pound to grow the stalk and one pound to grow the ears. Therefore, Woodruff says that 200 pounds of nitrogen must be available to the plants for 100-bushel-an-acre yields.

Boy Puts Pail Under Cow; Talented Animal Milks Self

FINDLAY, Ill.—Blondie, Herbert Bricke's cow, has learned to milk herself.

"All I do is set the pail under her," the 11-year-old boy said. "She does the rest."

Herbert said that, like other farmers, he milked only half the cow at a time when he got her as a present from his father. He noticed that Blondie produced from the other half with no help from him.

"I tried just putting the pail under her," he said. "Sure enough, she milked herself."

Fearing Blondie was sick, the boy's father called a veterinarian.

"There's nothing wrong with her," the veterinarian reported. "She's just talented."

Last of Chinese Emperors Held Prisoner by Russians

TOKYO—The last of the emperors of China, who has been without a throne since the 1912 revolution which transformed the celestial empire into a republic, is being held prisoner by the Russians at Khabarovsk in eastern Siberia.

General Mitani, former Japanese governor of eastern Manchuria, home from Soviet captivity, said he met the former emperor in Siberia. Suan Tung Khan was the "boy emperor" when he was overthrown. He is now 44 years old.

This is the same man who was set up by Japan as puppet ruler of Manchuria under the name Henry-Pu-yi.

The Russians never have informed the western nations that they hold the former monarch nor have they given any indication of what role they intend for him.

Woman Bank Teller Chases And Captures Holdup Man

SEATTLE, Wash.—The bank robber just didn't have a chance. The lady was determined to get her money back.

Mrs. Mae Natori, teller in the Seattle First National bank, obeyed when a man poked a pistol under her nose and demanded that she "put all the money in a paper bag."

She did, but stepped on the burglar alarm at the same time.

Then, screaming that she had been held up, she chased the fleeing bandit. With two bank customers at her heels, she chased him into a hotel half a block away and cornered him.

He offered to swap the bag of money for his freedom, and although he still waved the gun, she refused. She kept him cornered until the police arrived.

Switzerland Using Alpine Lakes as 'Deep Freezers'

NEW YORK—A dispatch from Switzerland reports the people of that country are again using their icy Alpine lakes as huge "deep freezers" to store food against the possibility of a new war isolating the mountainous little republic.

The dispatch said the first batch of reserve staples—1,000 tons of coconut oil in metal drums—has been lowered 40 feet below the surface of one lake.

The drums are laid upon a foundation of cement and are tied to each other with steel cable.

HOW LUCKY CAN YOU GET?

WELL, YOU MIGHT find a gold mine, providing you know where to look. Maybe you'll inherit a fortune from a rich uncle, if you've got a rich uncle.

But, in the final analysis, it's usually the guy who looks ahead, who plans and works and saves for the future, that ends up with all the marbles.

Here, as in no other country in the world, you've got a chance to do just that. Experts predict that during the next ten years this country will experience the greatest economic boom in its history and . . .

There's no time like the present for you to start salting a little something away—each month—in U. S. SAVINGS BONDS!

Backed to the hilt by Uncle Sam, Bonds pay you 4 dollars for every 3 dollars invested. At the same time, Savings Bonds are one of the safest, surest places to invest your money.

And here's the pay-off! Savings Bonds can be purchased under either of two entirely automatic plans. Signing up for either plan makes saving, for you, a positive certainty!

Automatic saving is sure saving U.S. SAVINGS BONDS

This is an official U. S. Treasury advertisement—prepared under auspices of Treasury Department and Advertising Council.

Say Executives Take Care Of Autos, Neglect Selves

The average business executive gives his automobile a periodical check-up but neglects the working machinery in his body for which there are no replacement parts.

This conclusion was expressed in a joint report of Drs. Sidney A. Portis, Irving H. Zisman and Charles H. Lawrence of Chicago.

The Chicago physicians reported on an analysis of the last 50 business leaders under 50 years of age who came to them individually and of 55 sent to them by corporations as a part of a management check-up program. They paid particular attention to fatigue complaints.

They found that at least 60 per cent of the patient group complained of being tired and that approximately two out of every five in the fatigued group showed a rapid disappearance of sugar from the blood when studied from a standpoint of sugar tolerance. In 10.9 per cent of the patients referred by corporations, fatigue conditions were encountered.

"The brain is very highly susceptible to changes in nutrition," they pointed out. "The most important food that the brain uses is sugar. Our studies in fatigue states reveal that when there is an inadequate amount of glucose circulating in the blood, the brain does not function properly."

"The patient becomes highstrung, easily fatigued and the body goes on a 'sit-down strike'. The tired young business executive experiences a loss of zest, boredom, he exhibits antipathy for his job, business superiors and fellow associates. This disturbed life situation was a more or less constant feature in most of our patients."

Our Steel Furnaces Pour 1,900,000 Tons Per Week

During a great surge of output in April and May, steel companies for the first time in history were pouring more than 1,900,000 tons of steel a week. They held their production at that high level for over six consecutive weeks.

That was more steel in a week than many countries make in an entire year. For example, it was more than the 1949 output of Australia, Sweden or India individually.

Steel's unprecedented feat, made possible by the companies' huge programs of expansion and improvement in recent years, reflected general business activity. Automobile production was running ahead of 1949, the record year. A boom was underway in the housing industry. Household appliances were being turned out at a record rate. Numerous other lines of business were unusually active. Total national employment rose sharply until nearly 59 million persons were at work. The United States generally was enjoying one of the greatest production eras in its history.

More steel was made in May than in any previous month. The May output exceeded 8,500,000 tons. It was the fourth month in history in which more than 8,000,000 tons had been made, the others being January and March, 1949 and April, 1950. In April, steelmaking furnaces, operating at 100.2 per cent of capacity, made 8,196,000 tons.

Early Indian Traders

When Lewis and Clark made their historic expedition into the wilds of the Missouri and Columbia rivers just after the beginning of the nineteenth century, the limitations of primitive transportation kept their baggage to bare essentials, one of which was iron. "The Indians were so eager for iron," said one historian, "that they would give six or seven gallons of grain for a piece four inches square." This meant that in making axes the Indians were suddenly lifted from the Stone Age to the Iron Age. For this great advancement they were willing to trade almost a bushel of corn, of which they had a meager supply. A corn grinding mill, which the explorers left with the Indians when the first winter camp was abandoned, was soon broken up by the Red Men so that its iron could be made into arrowheads.

Real Bar-B-Q Flavor

Barbecued Chicken is a delicious, easy-to-fix summer meal that takes no fancy revolving spit or extra cooking gadgets. It's easier to do than fried chicken, and has a chef's flavor touch. You can bake it in your range oven. Here's how: Halve two to two and one-half pound broilers or cut a three-pound chicken in serving pieces. Blend one-half cup enriched flour, one-half cup fat, two teaspoons salt, pepper, and one tablespoon paprika. Spread this coating over chicken pieces. Arrange in shallow pan and pour Barbecue Sauce over them. Bake in a moderately slow oven (325 degrees) until tender, about one hour.

Bikini's Natives

Bikini, where the first postwar atomic bomb tests were conducted, is Eniwetok's neighbor 190 miles to the east. Both lie not quite 12 degrees north of the Equator. Their now-displaced natives, like all Marshall Islanders, were good fishermen and navigators, and lived by fishing, raising pigs and chickens, and picking coconuts. The soil-less sand gave them little chance at vegetable cultivation.

PERSONALS

Mr. and Mrs. J. S. Fisher, Mr. and Mrs. Joe Brooks, M. K. Summers and Dutch Tidwell, Beverly Jefferies, visited in the Leo White home Tuesday evening. The occasion was Marsha Kays sixth birthday. Birthday cake was served the group.

Mr. and Mrs. Lee D. Bomar and Patsy and Mr. and Mrs. Wayne Crawford visited with Mr. and Mrs. Jim McNeese in Turkey one night last week.

Mrs. Annie Stevenson and daughter, Gloria June, left Thursday for Happy where they will visit a few days with Mrs. Stevenson's sister, Mr. and Mrs. Geo. Edmons.

Mr. and Mrs. Luke Thompson and children were in Amarillo Sunday, and visited Uncle Jay and heard him read the funnies. They also visited the Palo Duro canyon on their return home. A very pleasant day was reported.

Rev. and Mrs. Porter Arnold, of San Jon, New Mexico, arrived Saturday afternoon to visit their daughter and family, Mr. and Mrs. Roy Mack Walker and other relatives. They plan to return home Friday.

Mrs. N. A. Lyde and daughters, Dee Ann and Mary, of Lubbock, visited her parents, Mr. and Mrs. Wylie Bomar Wednesday night and Thursday. Mrs. J. S. Brookshier returned with them. She will be in the home of Mr. and Mrs. Lyde during the school term.

AGRICULTURAL FILLERS

When corn or sorghum grain are fed to hogs, the grain produced is slow and costly, but when the grain is supplemented with the correct protein and mineral supplements, the rate of grain is speeded up and the cost of grain is reduced.

Grade B eggs are equal in food value to eggs of higher grade, and at this season of the year, they are a few cents less per dozen than grade A eggs.

Don't neglect summer orchard cultivation, because the trees need all of the moisture and plant food that is available, particularly during the late summer.

Thorough cleaning of grain bins is necessary to prevent the infestation of the new crop with insects.

Freedom from blood and meat spots in eggs is a factor which is governed mainly by breeding.

On-the-farm grain storage space gives the farmer insurance that his crop can be taken care of and enables him to qualify for government loans.

Pullets which retain their ability to produce eggs with a high percent of thick albumen are the ones to keep for breeding purposes.

Low moisture content is necessary for long, safe storage of grain, especially of grain sorghum, which should not test over 12 percent.

For spraying grain bins four insects before filling them with grain, a water suspension of DDT can be prepared by mixing ten and one-half pounds of 50 percent wettable DDT powder in 25 gallons of water.

Qualifications for a government loan require that grain be stored in bins or granaries where it will not be subject to damage from moisture, insects, rodents, or other causes.

DRIVE-IN THEATRE 50¢ PER CAR

for Saving Money

You're in for a real "double feature" when you OIL-PLATE your engine with new Conoco Super Motor Oil: (1) new-car gasoline mileage . . . (2) new-car power and performance.

Proved by 50,000-Mile Road Test! In a 50,000-mile road test, engines lubricated with Conoco Super Motor Oil showed amazing economy of operation. Average gasoline mileage for the last 5,000 miles of the test-run was 99.77% as good as for the first 5,000 miles. This means that—with proper crankcase drains and regular care—Conoco Super Motor Oil can keep new-car gasoline mileage year after year!

Come in and let me tell you about "50,000 miles no wear!"

Locomotives Scrapped Gains Popularity

Playing a leading role in progress for about 125 years, steam locomotives are disappearing in number. Many of them are being cut for scrap. The increased use of diesel locomotives is one of the dynamic aspects in mechanical development. Some railroads are scrapping worn-out engines, instead of reporting large quantities to be cut up soon. Built in the early 'thirties, their life in comparison with modern diesels is short. In the scrap yard most of them reach a steel mill. After careful inspection, they are saved to repair engines of the same type. However, a diesel locomotive, including tenders, yields as much as 360,000 pounds of scrap if little were salvaged. Most of this scrap is of high melting grade. So the scrap giant that swaddled the world with its whirling rods may, via junk yard, steel locomotive shop, be used in a gaily painted diesel. The contribution of many locomotives to the scrap supply, as well as old freight cars and many other things, has increased. Stocks in the supply of steel scrap has increased. Stocks in the hands of consumers (steel mills, scrap yards, at the end of the line) were less than 5,000,000 tons, equal to slightly over 100 days' consumption at the rate prevailing in the nine months prior to the steel strike, according to bureau of mines data estimates.

Rotating Astronomers Galaxy Structure

Scientists can visualize a large spiral galaxy—100,000 light years across and made up of 100 billion stars surrounded by clouds of dust and gas. They have a picture of our galaxy commonly called the Milky Way. Stars visible to the naked eye are part of our galaxy. It is an immense sphere surrounded by other galaxies in space. Because the stars are located within and on one side of this great spiral pin wheel, astronomers have had difficulty in determining the structure of the galaxy. The method of studying it, is to observe galaxies of similar type. Baade of the Mount Wilson and Palomar observatories in California, followed this procedure in studying the Andromeda galaxy, among the closest of all to our own. Baade reported that the Andromeda galaxy seems to be of the same type as our own and is rotating like a model of our galaxy. The Andromeda galaxy has also been studied by Nicholas U. Mayall of the Lick Observatory in California. He reports that it is rotating similar to our galaxy. The outer stars of the Andromeda galaxy are rotating about the center like the stars of our galaxy, but rotate around the center of the galaxy. There is a massive concentration of stars in the center of the galaxy. Evidence of this concentration is given by R. Minkowski of the Lick and Palomar observatories in reporting on planetary nebulas in the vicinity.

Word Blindness

Word blindness is a condition that causes word blindness. It is not mental dullness. Many of the victims have a high intelligence. Some school children who have reading difficulty may be suffering from word blindness. It is not poor reading ability always connected with word blindness. The eyesight specialist does correct visual errors. Causes of word blindness are looked for elsewhere. It is generally believed that these causes are psychological. During the first four or five years of life, a child may be subjected to fear, rivalry, inferiority complex, or loneliness. As a result, the "door" may fail to open.

Needs of Flowers

Every gardener may bring disaster to his young plants by disregarding their special needs as to moisture and plant food. Plants are placed outdoors. Some plants tolerate full sunlight. Some require it. Too often plants become crowded before they have developed into specimen plants. Plants which are overwatered, especially in their early stages of growth. Don't forget the effect of hot weather much of the year on round corn cobs, or rotten corn and manure, to conserve water and reduce the soil temperature for the growing roots.

Use of Forgings

The use of forgings is increasing steadily and it is conservatively estimated that about 100,000 tons of pre-war forgings were produced in 1949. The increase is due to the many new forging techniques and methods. These advanced methods include increased strength, reduction of porosity such as is characteristic of many sand castings, and reduction of machining operations, and perhaps most important, the ability of holding forgings to uniform precise dimensions, whenever required, to very close tolerances.

Ever looked at it this way?

Unless you're a child actor or a professional athlete, your peak earning period will probably come between the ages of 30 and 50.

Now that's only 20 years. And those 20 years can go faster than a \$10 bill at the Stork Club, leaving you holding a bag full of worries at 50!

For those peak-earning years are also the expensive years (educating the children, buying a house, furniture, cars, etc. Unless you start a planned

savings program now, you'll never have a peek at those earnings when you need them.

Play it smart! Sign up for a Bond a month on the Automatic Payroll Savings Plan. \$3 invested in U. S. Savings Bonds today brings back \$4 in ten years.

If you're not on a payroll, buy a Bond a month at your local bank. It's automatic, painless and sure. And it's a wonderful, wonderful feeling!

FORMERLY FARMERS GRAIN CO. West of the Railroad Track, Silverton, Texas

A HOME TO LIVE IN

SMALL HOUSE PLANNING BUREAU ST. CLOUD, MINNESOTA

DESIGN D-136. The garage attached to a screened breezeway gives a wide appearance to this otherwise small house. If the garage were omitted the plan would fit on a fifty foot lot. There are two bedrooms on the first floor and space for a dormitory room and attic storage on the second floor, without the use of dormers. The kitchen cabinets line two walls and the range separates the kitchen from the dining space in one end. Coat closets are provided for the front and side entrances, a linen closet in the bedroom hall, a walk-in closet in the front bedroom.

PERSONAL

Mr. and Mrs. Bud McMinn went to Plainview Monday evening to meet Fayree that she might remain home to attend the funeral of Mr. Dan Montague.

Mr. and Mrs. Travis McMinn, of Brownwood, spent Thursday night with Mr. and Mrs. Bud McMinn.

Mr. and Mrs. Mike Thompson, of Arlington, returned from a vacation trip in Colorado Springs Thursday and spent the night with Mrs. Thompson's uncle, Ed Vaughan. Mrs. Thompson's father and mother, Mr. and Mrs. Moten Vaughan, of Weatherford, who have been visiting here returned to their home Friday with the Thomasons.

Miss Maude Skeen of Lubbock, visited Monday night with friends in Silvertown.

Mr. and Mrs. Virgil Balwin and children visited Mr. Balwin's parents, Mr. and Mrs. Frank Balwin, in Sentinel, Oklahoma, last week. His parents accompanied their son home for a visit.

Mrs. Ethel Williams, of Bellview, Texas, and nephew and family, Mr. and Mrs. Edd Williams, Jerry and Ray, Mr. and Mrs. C. G. Willis and Denny, of Amarillo, were guests of Mrs. W. E. Redin over the week end.

Mr. and Mrs. Cliff Jones and son, of Hooker, Oklahoma, were the guests of her sister and family, Mr. and Mrs. Henry Price Thursday and Friday of last week.

Mr. and Mrs. Henry Price were in Floydada on business Monday. Recent guests in the home of Mr. and Mrs. Mart Norris were: Mrs. Eric Malone, and Mrs. Hyatt, of Tullia; Rev. and Mrs. Edwin Norris and baby, of Plainview.

Toothpick Goes Glamorous With Colors, Flavor

MERRILL, Wis.—The toothpick has gone glamorous, taking on colors and flavor.

The Merrill Woodenware Co. was in need of greater market. The answer was found in red, green and blue toothpicks and mint flavors added.

They were first exposed to a market in the south and were such a success they will appear nationally. To all appearances the firm is going to have the biggest year in its 45 year history, thanks to the new twists on an old stand-by.

Since the firm was purchased by W. D. Brown, Jr. in 1948, the emphasis has been on more toothpicks. The firm has spent \$50,000 in developing and constructing in its own shops the intricate machinery required to produce 15 to 20 million toothpicks a day.

Largest Manufacturer

In 1950 the firm will stamp out 125,000 cases of toothpicks (30,000 to a case) for the world market, compared to 20,000 cases last year. The big production gain will make the firm the nation's biggest toothpick maker. One reason, and probably the main one, is the firm's new and unique machinery which can stamp out toothpicks hundreds at a time from clean, straight basswood "ribbons."

Buying only top class basswood, the firm cuts it into two foot lengths which are then shaved into "ribbons" a little thicker than a toothpick and a little wider than a toothpick is long. The ribbons are fed in to dies on the stamping machines, which punch out flat toothpicks. These are cleaned and polished, then dried before coloring and flavoring.

Flavor is Added

As the toothpicks move down the drying platform, they are jigged and bathed in moving air until they are dry enough to set off a delicate tilting mechanism. This drops them into a sorting and rejection machine.

Flavor is added in a separate soaking and drying operation. In addition to the packaged retail toothpicks, the company also packs large cartons of loose toothpicks for carload sale. Four such cartons this year were sent to markets in China, Japan and other eastern countries.

"You'd be surprised how many people still use toothpicks as toothpicks," said Frank Schuster, manager of the firm's Tomahawk plant. "But a great deal of them are used for food preparation and handling, such as at parties. People like the colored models. They help to brighten up a table."

Powerful X-Ray Reduces Cancer Inside Bodies

LONDON—Cancers growing inside human bodies are being reduced or wiped out by a powerful new X-ray, medical scientists report.

The X-rays are 2,000,000 to 23,000,000 volts in power, the strongest ever used medically. They come from super X-ray machines of various kinds.

They can reach deeper into the body, with more punch. They don't affect all cancers, for some tumors resist X-rays or at least have not been affected by less powerful rays.

One machine, a Van de Graaf generator, produces 2,000-volt X-rays. This means X-rays with double the power of all the medical radium in the world, said Dr. John G. Trump of the Massachusetts Institute of Technology.

The rays can deliver 60 percent of their tremendous energy to cancers three or four inches deeper inside the body, he said. They speed through the skin, bone, and other tissues without doing much damage to these healthy tissues. They don't slow down enough for damaging work until they have gone a few inches.

A rediscovered trick of treatment makes the beam even more potent, Dr. Trump said. This is to put the patient on a turntable, revolving slowly, to change the angle of the X-ray bombardment.

The cancer then gets the X-ray from all sides. There is far less chance of injuring the skin where the beam enters, or other healthy tissue. This rotating idea was first tried in England nearly 40 years ago, but at a time when there were no X-ray beams that would concentrate in 100 patients treated since last October, the cancers have shrunk each time, and some still are shrinking, Dr. Trump said. These included cancers of the head, neck, breast, lungs, and pelvic organs.

It still is too early to know whether anyone has been cured, but "we are hopeful the results will show more cures than by conventional methods of X-ray treatment," Dr. Trump said. The patients are far less likely to suffer from radiation sickness, he added.

Shrinking of deep cancers with 23,000,000-volt X-rays was described by Dr. Roger A. Harvey of the University of Illinois. These rays come from a betatron, a doughnut-shaped atom-smashing machine.

In 23 patients, all with advanced cancer, the cancer has shrunk each time, so far as can be observed, Dr. Harvey said. Whether any of the 23 will recover can't be predicted.

FRANCIS NEWS

BIRTHDAY PARTY

Patsy Crass was surprised Tuesday evening when a group of her friends gathered at the Scott Smith home to help her celebrate her birthday.

The group enjoyed the evening. Ice cream and cookies were served to: Wayma Callaway, Margaret Stevens, Faith Smith, Ann Brown, Donna Mayfield, Mildred Bean, Pat Patton, Edna Williams, Carol Welch, Gale McPherson, Joe Ray Stodghill, Riley Zeigler, Keith Wood, Wayne Mayfield, Billy Nye, Fred Hamilton, Jack Mayfield, Patsy Crass, the honoree. Blonsie Simmons, Mr. and Mrs. Edwim Crass and Bobby, Mrs. Roy Mayfield and Mr. and Mrs. Scott Smith and Dwin Davis.

The girls all finished the night with a slumber party at Patsy's house.

CLUB MEETING

The Helping Hand Club met Thursday afternoon with Mrs. Scott Smith.

Mrs. Aubrey Rowell called the roll and Mrs. Jack Harris presided during the business session. It was decided to draw names for "Sunshine Sisters" at the next meeting.

The afternoon was spent visiting and playing games.

Refreshments were served to Mesdames U. D. Brown, Lowell Callaway, Aubrey Rowell, Wade Steele, J. E. Jowell, Frank Mercer, Holie Francis, Clyde Mercer, and little Linda Mercer and Sharla Francis.

The next meeting will be with Mrs. Wade Steele on September 14. Roll call will be answered with hints on getting your child ready for school.

Miss Sue Dickerson Wed to Clinton Willer

On Friday, September 1, Miss Sue Dickerson of Canyon, Texas became the bride of Mr. Clinton Willer of Happy, Texas. Attending the wedding from Silvertown were: Mrs. W. A. Dickerson and Mrs. Sam Thompson, grandmothers of the bride.

George Jones, Melvin and Elza Yancy spent Sunday on the Tulsa canyon fishing.

Mr. and Mrs. Paul Joiner, Corpus Christi, Mrs. S. T. Denton, and granddaughter Dana Sue Roberson, of Houston visited in the home of Mr. Mrs. C. F. Joiner last week.

THE P. T. A. NEEDS YOU

You may ask why you are needed in the P. T. A. and what you can do that millions of other parents and teachers aren't or haven't already done. You may or may not have children in school but you are needed in the P. T. A. You are needed whether you are a mother, father, teacher or any other civic minded adult. Your influence can be a powerful force in determining the kind of education this community will provide for its children.

When the girls' and boys see you working actively in the P. T. A. lending your support and cooperation, using your ideas, your strength and zest—they know you are interested in them and it stamps you in their estimation as a responsible adult who is very much a part of the world in which they live.

So at our very first meeting join the local P. T. A. and raise the standard of mental, emotional and spiritual health.

The first meeting will be Thursday, September 14, at 8:00 p. m. Your P. T. A. membership chairman.

MRS. BUSTER WILSON.

Guests in the home of Mrs. H. E. Curtis Sunday were: Mr. and Mrs. Pete Howard and son, and Mr. Howard's mother, Mrs. Johnnie and Cagle, Mr. and Mrs. Glen McWilliams.

Mr. and Mrs. J. S. Fisher attended the wedding of Miss Elaine Turney at the First Baptist Church in Tullia Sunday.

Three R's Still Being Taught in One-Man Schools

MINNEAPOLIS — Despite substantial school construction and modernization programs in the midwestern states, the little red schoolhouse is far from extinct, a recent study of the nation's public school system revealed.

Some 75,000 one-teacher schools are still in operation, reports R. H. Jacobs, director of the school division of Minneapolis-Honeywell Regulator company, even though an average of 108 new schools were completed in each of 12 midwestern states last year.

"These nostalgic but nonetheless obsolete one-teacher schools actually account for nearly half of the existing public schools today," Jacobs said. "Almost 1,500,000 youngsters form their first impression of school and our educational system in these under-manned, over-crowded classrooms. Small wonder children still frown and wince at the mention of the word school."

Jacobs, however, on the basis of a nationwide poll of city, county and diocesan school administrators, was optimistic about the facilities for the postwar crop of 7,000,000 children who will enter schools next year. He pointed out that the U.S. department of labor, for example, reveals that \$297,000,000 has been authorized for school construction during the first three months of 1950 alone.

Doris Duke to Raise Pigs On Special Diet, No Swill

SOMERVILLE, N. J.—The hills of Doris Duke, tobacco heiress, permission to enter the pig-raising business provided no garbage is brought in to feed her porkers.

The \$50,000 project on Duke Farms, complete with atomizers to keep down odors, had been held up because the sanitary code prohibits the importation of garbage into the township.

The board said Duke farms could engage in as large a hog raising operation as it wished as long as it abided by three regulations. The food must not be imported from the board of health, and the business must in no way constitute a nuisance.

The farm manager said the hogs would be raised on a grain and corn diet and that the operation would be run in accordance with the decisions of the board.

58 Persons Die in Crash of DC-4 in Lake Michigan

ST. JOSEPH, Mich. — About 19 miles northwest of St. Joseph, at the bottom of Lake Michigan, is the remains of a giant DC-4 which crashed and carried 58 persons to their death in the worst air disaster in the nation's history.

It probably will never be known what caused the crash. Debris scattered over the area indicated a tremendous crash or explosion. Most pieces of wreckage were no more than inches square.

Searchers found hundreds of pieces of the foam rubber cushions. Coastguardsmen, using boat hooks, fished wreckage from the lake. They brought up a pair of brown wool trousers, the pockets empty and the buckle ripped from the belt.

There were some flight kits, maps bearing the name of Northwest Airlines, a man's white handkerchief, a bank book of the National City Bank of New York, a green jacket of a woman's dress, a man's shorts and parts of bodies.

Among the debris was a child's shoes and a little girl's rag doll. The doll was one of the few things that came out of the crash complete and intact.

Disintegration must have been complete when the plane struck the water. That was all that remained of a giant, proud airliner.

Prices Irk Cherry Grower; Orders Trees Cut Down

TRAVERSE CITY, Mich.—George Washington, so legend says, cut down one cherry tree. Fred E. Reed of Sutton's Bay did better than that, however. He ordered workers to cut down his orchard of 250 trees.

It all came about when Reed was offered only 4 cents a pound for his crop of Michigan sour cherries. "I'll clear the ground and raise strawberries," Reed declared flatly.

Last year's crop of Michigan sour cherries brought 9 cents a pound. Packers are offering 4 cents for this year's early crop, but promised growers additional payment (possibly up to 3 cents a pound) later if the price of the processed pack warrants it.

But Reed isn't interested in subsidy prices.

"When I can't raise cherries and make a profit without depending on price supports I'll quit growing them," he declared.

The only trees he left standing were a few for his personal use.

Modernize With Tileboard

Brighten your kitchen and bathroom with colorful and easy to clean tileboard. Inexpensive, too.

See us for all your lumber needs. Whether you are only putting up a shelf or working on a major project, you'll find a size and wood to fit your needs. Call us for free estimates.

No matter the type of material you plan to use for panelling we can get it for you.

Let us show you our stock of West-Plak for Cabinet and table tops.

If you need a Mayrath Loader please place your order now.
