Edge to Health Happiness W. Movement

Run by Request. Fund being built by the Auxiliary Insures Maintenance of the V. F. W. National for Orphans. Health and Happiness which was re-established by Donat F. Monaco, the National Auxiliary President in her address in Miami on September 3, 1949, as a major objective of her year's program, has to be exceedingly popular auxiliary members.

Fund is designed to insure maintenance of the V. F. W. Home for Orphans and of Deceased and Totally Disabled War Veterans. Through in the past the Auxiliary contributed huge sums erecting and equipping of buildings at the National Home which was generally recognized and now needed which their maintenance and of the facilities they for for many years.

Community Center, which was remodelled and equipped and Hospital Wing, Nursery Cottage, and the Marjorie Armstrong Guest Lodge Memorial Chapel are visible and enduring credit to the Auxiliary's interest in the V. F. W. National Home.

Activity of the national organization is quite so close to the heart of every member as the children and the children cared for. It is a bond of real affection between the children of "the home" and the comfort, protection and of the children living there latter of genuine concern to membership.

These facts are reflected in the health and happiness fund. It is interesting to note that every member represented in the convention to this fund, which total of \$116,122.93 in 1949. The sum is exclusive of every contribution which is made in support of the V. F. W. National Home, such as the Mas seal fund, the life memberships and endowments, contributions to the various Departments, the regular maintenance of hospital and improvements.

A fine contribution made to the health and happiness fund is the perpetuation of the V. F. W. National Home as a place for orphans of our nation's veterans can receive normal care, love and affection. It is that the Ladies Auxiliary pledged not only to "Honor" but by helping the living will work to insure health and happiness for every child who be sheltered and reared at the V. F. W. National Home.

Silvertown Owls Will Play Lakeview Here Friday Night

Silvertown Owls will play Lakeview Eagles here Friday night at 8 o'clock. The Owls will make this game their day conference victory. Bleachers will be ready to receive Friday night's game, but work will not be complete, Brown stated.

Griland and Long Solidate Their Businesses

Griland and Long has moved his smith equipment to Bill's Welding Shop on the Highway and the two businesses will be operated together.

Preaching at Presbyterian Church Sunday

J. L. Aldridge, of Tullia, will preach at the Presbyterian Church Sunday, October 15, at 3 o'clock. Everyone is cordially invited.

Nice May, of Vigo Park, was a visitor in Silvertown Friday.

Oil Test Well in Briscoe County Is Drilling Below 2,000 Feet

It was reported Wednesday that the W. J. Weaver No. 1, Adair Estate in Section 50, Block E-2, D. & S. E. Survey, northeast of Silvertown was drilling below 2000 feet in lime and shale. Installation of rotary rigging was completed last week following the spudding in of the well by Jeff Davis local water well driller.

Our informant said that some time had been spent in straightening the hole which showed 5 degrees out of plumb. It is understood that the surface casing will be set at about 3400 feet.

Sgt. W. A. (Billy) Self Wounded in Action

Word has been received by Mr. and Mrs. M. B. Self from their son, Billy, that he is in the hospital somewhere in Japan. Their first news of his being wounded in action was written September 27, but no details were given at that time. The family has received no word from the war department as to where it happened.

Tuesday his parents received a second letter, in which Billy told them that both of his legs were broken below the knee and one leg hurt above the knee. He is in a cast from the hips down. He also has a shrapnel in the left chest. He said a mortar shell exploded in front of him. As to how he is no further word has been received by his parents. Billy enlisted in the Marines about two years ago, and has been in action in Korea for sometime.

ROCK CREEK CLUB NEWS

The Rock Creek Club met in the home of Mrs. Margaret Frizzell Tuesday afternoon, October 3. The sewing project for this meeting was a set of tea towels and pot holders were embroidered.

Tea and cake were served to Mrs. W. W. Reid, Mrs. Marie Garrison and Jerry, Mrs. Florence Fitzgerald, Mrs. Ruth West, Mrs. Marjorie Turner, Douglas, Mrs. Guinn, Mrs. Ruby McWatters, Mrs. Verna Allison, Mrs. Frizzell.

The next meeting will be with Mrs. Garrison. Mrs. Earl Simpson won the club quilt on Saturday, September 30.

1,021 REGISTER FOR FREE CHEST X-RAY

Response to the chest X-ray drive recently held here was most gratifying, according to Mrs. Mallow, publicity director. 1021 reported to the office and were X-rayed during the two days the health department was set up in Silvertown.

Mrs. Mallow expressed her belief that the publicity that was given was the major cause of the big turnout. For several weeks before the scheduled date for the X-ray the News carried from one to two stories telling the people just what it was all about.

Mr. and Mrs. Wylie Bomar made a business trip to Lubbock Thursday.

Mr. and Mrs. Tom Blessingame and little daughter, Nancy, of Clarendon, were shopping in Silvertown Saturday.

Mrs. Eva Ponder, of Fort Worth, visited her brother, Mr. and Mrs. C. D. Wright last week.

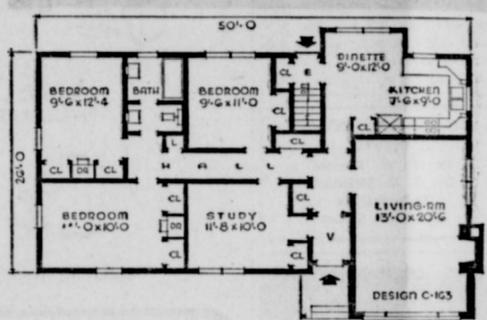

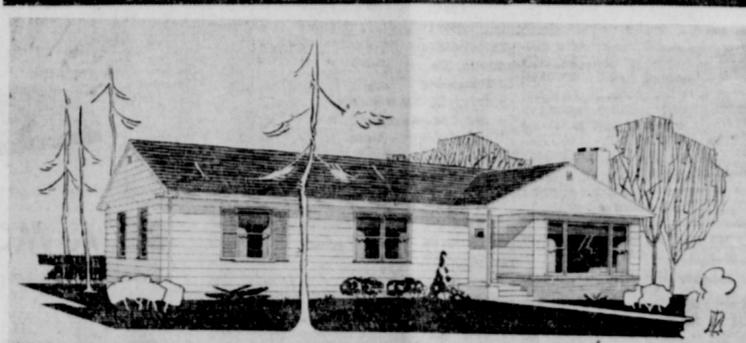

Mr. and Mrs. J. D. McGavock and son, visited one day last week in the home of Mr. and Mrs. Leo Comer in Amarillo.

Mr. and Mrs. Leo Comer and children, of Amarillo, visited Sunday and Monday with Mr. and Mrs. Wylie Bomar.

Hudie McClendon and son, Hugh Ed, of Lubbock, were business visitors in Silvertown Saturday.

Mrs. C. O. Allard was a visitor in Tullia Friday.

A HOME TO LIVE IN

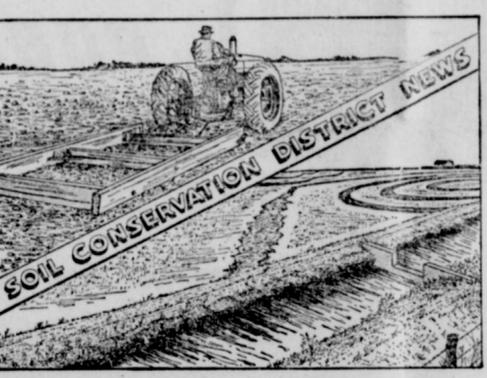

SMALL HOUSE PLANNING BUREAU ST. CLOUD, MINNESOTA

DESIGN C-163. Bedrooms are separated from the balance of the house by the entrance vestibule and entrance hall. Actually there are four bedrooms but the front bedroom can do double duty as an office, den or study. It is reached from the vestibule before entering the house proper. Twin wardrobe closets with built-in drawers between, are provided for the corner bedrooms. Other closets include coat closets for both entrances, linen in the hall, single wardrobes in study and rear bedroom and closet in the kitchen.

In the combination kitchen-dining the sink is under the side window, refrigerator and stove on the right and work counter on the left under the rear window. Dining space overlooks the garden to the rear. There is a full basement.

Exterior finish is frame with wide siding and a touch of color in the brick under the picture window. Dimensions are 50 feet by 26 feet. The area is 1407 square feet with cubage of 26,664 cubic feet.

For further information about construction details, see your local lumberman.

The Supervisors of The Cap Rock Soil Conservation District are:

Chairman, Earl I. Cantwell; Vice Chairman, Bray Cook; Secretary, Chester Burnett; L. A. McJinsey and Glynn E. Morrison.

President Truman has proclaimed October 8 to 14, 1950 as National Fire Prevention week. This is done each year in order to focus attention on fire hazards and try to get people to eliminate those hazards. National Fire Prevention Week usually includes the date October 9, 1871, in which the great Chicago fire started.

Fire prevention is emphasized because of the great damage fires have caused in the past. During 1949 over 10,000 Americans lost their lives due to fires. Farm fire losses alone amounted to \$95,000,000 besides the lost savings discouragement, privation and deaths. It is estimated by insurance companies that on an average 1-5 of the property value of a farm is destroyed each time a fire gets out of hand. The thing we need to be highly concerned about is the fact that 9 out of 10 fires are due to carelessness. Most of them can be prevented by elimination of fire hazards. There are many fire prevention practices that can be carried out with very little effort. Some frequent causes of fires are: storing wet hay; smoking in the barn; in bed, or near flammable liquids; fueling tractors while running or not; using gasoline or kerosene to hasten fires; defective electrical wiring; defective chimneys; and many others. We may get by with most of the things I have listed for a number of years without accidents, but when a fire does occur, one time is too many.

Most fire hazards can be easily removed with very little expense or effort. It is each person's responsibility to protect his own property and family, not only this week, but every day of the year. The next time you see a fire just remember that fires are costly and deadly but can be prevented.

Guests in the home of Mr. and Mrs. J. S. Watson Sunday were, Mrs. Una Burson, of Dallas, Mr. and Mrs. O'Neal Watson and children, of Amarillo; Mr. and Mrs. Obra Watson and Mr. and Mrs. Sid Richards.

Miss Doyce Breeding spent the week end in Petersburg.

Rev. and Mrs. G. A. Elrod made a business trip to Snyder last Thursday.

Carroll Gunter, of Tullia, was a business visitor in Silvertown Saturday.

Mr. and Mrs. J. V. Adcock, of Plainview, visited in the home of Mr. and Mrs. George Seaney Sunday.

V. F. W. Auxiliary Met October Fourth

The V. F. W. Auxiliary held its regular meeting October 4, in the home of Mrs. Jeanie Riddlehuber.

Plans were discussed for purchasing playground equipment for the Park and also for having a joint hallowe'en party for the Auxiliary and V. F. W. members.

The meeting was adjourned with prayer and refreshments were served.

The next meeting will be October 18, in the home of Mrs. Johnny Weaver.

Reporter. Otis Hardin, of Plainview, is visiting his sister and family, Mr. and Mrs. Hugh Stodghill.

Jett Mason and Joe Mercer who are attending West Texas State College spent the week end in Lubbock with Stanley Price.

Among those who attended the Baptist Workers meeting at Caprock Tuesday were: Rev. and Mrs. G. A. Elrod, Mrs. C. O. Aillard, Mrs. Shelby Haynes and Miss Eunice Cox. Mrs. G. R. Dowdy, Mrs. W. A. Rowell, Mr. and Mrs. Sam Brown.

Mr. and Mrs. Charlie Norrid, of Matador, visited friends here the past week.

Mr. and Mrs. Tom Howard, of Fort Worth visited Mr. and Mrs. Ray C. Bomar.

Mrs. T. C. Bomar and daughter, Mary Tom, made a business trip to Plainview Monday.

Little Lynda Mercer, daughter of Mr. and Mrs. Clyde Mercer, was a patient in the local hospital most of this week.

Congressman Ben Guill to Speak Here October 14

Congressman Ben Guill will speak in Silvertown Saturday, October 14, at 4:00 p. m. in the county court room. Invitations are being sent out to people of Briscoe County to attend this meeting, and hear Ben Guill's report to the people of what is taking place in Washington.

This is not a political meeting, the invitation sets out. It is simply a means of welcoming a visitor to our midst and our opportunity to express our views and ask questions about the affairs in Washington.

The meeting is open to anyone who cares to attend and your presence will be welcome.

"Comanche Territory" At Palace Theatre Oct. 15-16

The stirring Saga of a rugged frontiersman, Jim Bowie, who wrote Western History with the flashing blade of a knife, and set the badlands aflame with his exploits.

At the request of President Andrew Jackson, Jim Bowie (portrayed by Macdonald Carey,) famed frontiersman, hits the trail in the 1830's into Comanche Indian territory and finds that a gang of western outlaws is planning to rob the redskins of their lands in a rush for silver. Bowie befriends the Comanches and introduces his celebrated Bowie knife to them. When the outlaws, led by Charles Drake and aided by Drake's sister, Maureen O'Hara, launched an attack, Bowie and his Indian-scout buddy, Will Greer, join in the battle on the Comanches' side. Then Maureen, in a last-minute switch of devotion, realizes her brother is in the wrong, takes sides with Bowie, Greer and the out-numbered Indians, and is instrumental in putting the outlaws to rout.

Next weeks program appear on page two.

SUNDAY DINNER GUESTS IN W. A. McJIMSEY HOME

Dinner guests in the W. A. McJinsey home Sunday were: Mr. and Mrs. Earnest Noblett and Sid Noblett and Bobbie, all of Duncan, Oklahoma; Rev. and Mrs. G. A. Elrod, and Miss Patricia Ann Edwards. Those calling in the afternoon were: Mrs. Jim Bomar, Eddie and Eunice Cox, Mr. and Mrs. A. H. Chappell. They held church in the afternoon for Mother Noblett.

PUBLIC WARNED NOT TO PARK IN FRONT OF SCHOOL BUILDING

School authorities are calling the attention this week of patrons and the general public to the parking space in front of the school building, which is supposed to be reserved for the school buses to park and unload the children each morning, and in the afternoon to park so the children may board the buses without crossing the street.

This is being done for safety of the school children and the public is requested to keep this in mind and park either north or south of the front of the school building.

Rev. and Mrs. G. A. Elrod, Mr. and Mrs. W. H. Tension and Mr. and Mrs. J. S. Fisher went to Tullia Baptist Church Tuesday night to hear Rev. Rex Ray, a missionary from China, speak. Rev. Ray accompanied them home and spent the night with the Fishers. Rev. Ray is an old friend of Mr. and Mrs. Fisher.

Mr. and Mrs. Shultz, of Garland, spent the week end with Mr. and Mrs. Hugh Stodghill. Mrs. Shultz is a sister of Mrs. Stodghill.

Mr. and Mrs. Roy H. Stodghill, of Birmingham, Alabama, arrived Sunday to be with his mother, who is seriously ill.

Selective Service System Local Board No. 20, Childress

Second Floor City Hall Childress, Texas.

State Selective Service Authorities today awaited announcement of Texas' quota following a national call for a draft of 922 doctors, 500 dentists, and 100 veterinarians in November, December and January. A spokesman at state headquarters said no quota had been received.

The defense department said that the Navy and Air Force have indicated their present plans do not call for similar doctors drafts.

Those who are to register in the Childress area are all medical doctors, dentists, veterinarians, optometrists, pharmacists and osteopaths who were deferred from the draft or served less than 21 months during World War II because they were training in government programs of at their own expense. Registration will take place Monday, October 16, at the local board office on the second floor of the City Hall.

President Truman last Friday set October 16 as registration day for all medical men who were deferred from the draft or served less than 21 months during World War II because they were training in government program or at their own expense. He said the rest of the doctors under 50 years old, veterans and non-veterans, must register at a still-undetermined date not later than January 16, 1951.

The draft registration does not apply to doctors already on armed forces reserve lists.

Selective Service Headquarters said it is ready to draft the medical men on schedule. The call came just one month and a day after the new law allowing a draft of doctors became effective.

FARM NEWS From the County PMA Committee

Cotton acreage allotments and marketing quotas are off for 1951, according to an announcement made by Charles F. Brannan, secretary of agriculture, this week. Cotton growers can produce all the cotton they can in 1951 with no restrictions, and still have the assurance of price supports. The present law says cotton prices must be supported at between 80 and 90 percent of parity next year. The level of support will be announced later.

The announcement does not alter the marketing quota program in effect this year. Producers who have overplanted their 1950 farm cotton acreage allotment must pay the penalty on the excess cotton regardless of when the cotton is marketed. Even if the excess cotton is held over and marketed next year, the penalty must be paid.

Questions continue to come in to the Briscoe county PMA office as to whether wheat acreage allotments will be in effect for the 1951 wheat crop. According to PMA chairman Wheelock, the program is in effect and there is no change from the announcement made by the secretary of agriculture July 14, 1950.

You may receive your cotton marketing cards by coming by this office after their if your farm is not overseeded.

METHODIST LADIES TO HOLD BAKED FOOD SALE

The ladies of the Methodist Church will hold a baked food sale at Tunnels Grocery Saturday, October 14. A variety of food will be on display. Keep this date in mind and plan to attend. 41-1tp

Mr. and Mrs. Floyd B. Williams and daughter, of Portales, New Mexico, spent the week end with their parents, Mr. and Mrs. H. P. Howard.

Mrs. Hugh Stodghill who has been critically ill the past two weeks is reported to be slightly improved.

SMITH-DOXEY COTTON CLASSING SERVICE POPULAR WITH TEXAS FARMERS

Texas cotton farmers are taking advantage of the free cotton classing service and the cotton market news service as provided for under the Smith-Doxey Act. The program in Texas is handled by the Smith-Doxey State Review Committee cooperating with the U. S. D. A.'s Production and Marketing Administration.

The members of the State Review Committee are F. E. Lichte, cotton gin specialist, chairman; Fred C. Elliott, cotton work specialist and E. A. Miller, agronomist, all of the Texas Extension Service headquarters staff at College Station.

This committee in 1950 processed and approved 1,083 applications from 165 counties. A farmer to be eligible for the free services must be a member of an organized cotton improvement group. Lichte says that 108,871 Texas cotton producers are members of the cotton improvement groups. They planted one or more of the 15 approved upland cotton varieties on 6,488,263 acres of land. Included for the first time in 1950, are the acreages for the varieties that produce fibers with staple lengths of 1-2 inches or more. Cooperating with the farmers through their organized groups, are the owners of 1,452 cotton gins.

The market news service provides the farmer with the latest prices that are being paid on the various cotton markets for the different grades and staples of cotton. With this information plus the official grade and staple classification, the farmer is in a position to know just what his cotton is worth, says Lichte.

PLAN HOME GROUNDS FOR COMFORT, CONVENIENCE AND BEAUTY

The best time for planting shrubs and trees isn't far away and plenty of planning should be done beforehand. Adequate planning, says Sadie Hatfield, specialist in homestead improvement for the Texas A. and M. College Extension Service, will enable the home owner to derive the most from the plans made. Comfort, convenience and beauty are the three things to work for when the home grounds planting is done.

Now is a good time to plan for the shade trees that are needed around the home and farmstead. Perhaps a tree is needed to shade the west porch from the hot summer sun or maybe one on the east side is needed for the morning shade. Make a note, says Miss Hatfield, of the places where trees are needed or better drive a stake into the ground at each place. The stakes will serve as reminders and also as guides when the actual planting is done this winter.

Miss Hatfield suggests visits to the homes of families who have well-planned home grounds. She says such visits will materially aid the families that are searching for information on landscaping and suggests that county extension agents can furnish demonstrations.

When homestead improvement plans are made, the owner should remember that the home grounds naturally fall into three divisions: the public area, which is the front lawn; the service area, where necessary conveniences such as the woodpile, clothesline and the garbage can are located and the private area, which is commonly referred to as the out-door living room. The proper arrangement of the three areas, adds Miss Hat-

Millionaire Says It Takes a 'Ham' To Make a Million

NEW YORK — The best way to make a million dollars is to be a "ham" according to a frustrated song and dance man. He should know, because after he flopped in show business he went out and made a million.

Walter Shirley, who made \$10,000,000 as a real estate man, says from his observations all top flight successes are "hams".

Bernard Baruch heads his list, he says, and he does not mean it in any disrespectful sense. "The way I figure it, that's a compliment," he added.

Shirley said the nation's elder statesman exposed his sense of the dramatic by preferring a park bench for a conference room.

In politics, Shirley offers former Mayor William O'Dwyer as a consummate example of what he calls the "slow smoked ham". He said, "I first met Bill when he was just thinking about running for office and I told him he ought to let his emotions show more."

Shirley added: "He must have taken my advice. That farewell to New York city—with tears coursing down his cheeks—was a beauty. In the amusement world, Shirley sees Sherman Billingsley as a ham "with reverse English."

"That man acts shy as a mouse, but try to take a picture in his joint without Sherman or one of his ash trays in the camera's path."

In the dignified field of labor relations, Shirley said it's practically impossible to name leaders without also mentioning hams. "It's a toss up between half a dozen, but I'll take Caesar Petrillo as my favorite."

Shirley says he doffs his hat to Gen. Douglas MacArthur as the No. 1 free style Virginia ham in military circles. Says Shirley, "I know for a fact that the guy dyes his hair and then loves to get in a group picture with a bunch of white haired generals."

No one can be a success, Shirley says, unless he has a strip of ham running through him.

No Ordinary Fence Stays A Small Boy, Court Rules

ST. LOUIS—As every mother knows no ordinary fence can thwart a small boy who wants to climb over it. The U. S. court of appeals has finally decided the same thing.

The tribunal upheld dismissal of a \$100,000 damage suit filed on behalf of 9-year-old Daniel Nolle of Minneapolis, against the Chicago, Milwaukee, St. Paul & Pacific railroad.

The child's mother charged the railroad with negligence after Daniel lost a leg under a freight train in 1948. The suit claimed the railroad should have fenced in its Minneapolis yard.

But the court ruled that "no fence, other than a wholly insurmountable one like a castle wall", would have kept the child out of the rail yards.

Jet Drops Heavy Bombs At 500 Miles Per Hour

LOS ANGELES — For the first time in history, heavy bombs have been dropped safely and accurately from planes traveling at speeds of over 500 miles an hour.

North American Aviation company said bombs weighing from 500 to 4,000 pounds were dropped at altitudes varying up to 20,000 feet from jet-propelled bombers.

The company said that heretofore the highest speeds at which heavy bombs had been dropped successfully from an operational airplane were 350 to 400 miles an hour.

Engineers said the value of high speed bombers was nullified if bombs tumbled or fell erratically, because then accurate bombing was impossible. In the B-45 from which the tests were made the problem of air turbulence, causing bombs to act erratically, is overcome by folding or overlapping bomb-bay doors that slide upward inside the plane. Thus the bomb falls almost directly into the air stream.

In tests as many as twenty-seven bombs were dropped at a time, in fast or slow successions or in salvos.

The four-jet B-45, first flown in March, 1947, will carry more than ten tons of bombs, has a service ceiling of 40,000 feet and a combat radius of more than 800 miles, which can be extended with drop fuel tanks.

New Light Process Found In Secret Luminous Agent

PASADENA, Calif.—Dr. Erwin F. Lowry, chief engineer of the Sylvania Electrical Products company, New York, reports a new electric light process by which glass can be illuminated has been developed.

The specially treated glass, he said, becomes lighted by attachment to two electric wires.

Of the two other basic light processes, he said that the incandescent lamp produces light by means of heated filaments inside a glass bulb, while the fluorescent process utilizes an electronic reaction in a gas-filled tube.

Wives Should Design Home With Hubby's Needs First Thought

NEW YORK—At last men are to have a say in the design furnishings of the home—that Harriet Sherry, a New York designer, has her say.

The designer advises brides to design their homes around their husbands. "Let the old boy put his hands on the furniture if he wants it," she says.

So many women try to design homes to suit themselves and ignore the needs and desires of their husbands. It's a good way for a newly married woman to get off on the wrong foot, she observed.

There are no two men alike when it comes to the way they want their homes, Miss Sherry warned. Every man, before designing and decorating her home, should try to learn what her husband's needs would be.

Her objective is to please her husband, not to try to arouse the envy of her friends, or to keep up with the current vogue.

First it must be decided just what functions the home furnishings are to perform. The bride should ask herself whether—in addition to living—the home is to be used for entertaining or business.

Many men, especially attorneys, bring work home after office hours," she said. "In that case, there must be a place for them to work in. It should be a place furnished practically and one that is separated in such a way as to cause the least amount of distraction."

Other men have hobbies. They must have room to practice their hobby. It does no good for a wife to laugh them off or to try to suppress them.

There's a warning about a man with a hobby," she said, "don't try to attack him in the basement or in the garage, where the lighting and heating probably are poor. Give him a room he'll be proud of."

There's a warning about a man with a hobby," she said, "don't try to attack him in the basement or in the garage, where the lighting and heating probably are poor. Give him a room he'll be proud of."

Life Expectancy Gains Half a Year in U.S.

NEW YORK—A national life insurance company reports American wage earners and their families gained half a year of life expectancy in 1949.

The company said a survey among millions of industrial policy holders showed that life expectancy in that group rose to a new high of 67.7 years.

That was five years more than the 1949 figure, the company reported. The average length of life now is about double that of the period from 1879 to 1899.

17-Year-Old Girl World's Youngest Big Game Hunter

DAYTON, O.—Elaine Monesmith, 17-year-old Dayton bobby soxer, is the world's youngest big game hunter. She has made three expeditions to Africa with her father, James, a machinery dealer turned explorer. Another trip will begin in November.

The first hunting trip for the other-daughter combination was in 1946 to the Belgian Congo. Since then the two have traveled through nearly every part of Africa.

They usually hunt as a team, with her father lassoing the animals and Elaine standing guard with a gun.

Her first jungle kill was to save her father's life. He was shooting a herd of elephants when he was charged. Elaine's deadly aim with an "elephant gun" stopped the animal in time.

She weighed 105 pounds when she started her last trip. She came home weighing 88. "The life is rugged, she says. "Sometimes our party will cover 25 miles a day. Often we are gone for two weeks from our headquarters. That means camping out every night in the jungle."

Her ambition is to lead her own expedition.

Rocking' Rocking Chair Finally Taking It Easy

MUSCATINE, Iowa—The old rocking chair has stopped rocking. Remember the chair of Mr. and Mrs. Floyd Holladay that got all the publicity because of what seemed a self-propelled marathon?

It rocked for four months, but lost its restlessness when Mr. and Mrs. Holladay moved and took the chair with them.

The Holladays said there evidently are fewer vibrations in their new home, for the chair is now at ease most of the time. Once in a while it takes off on a temporary rocking spree.

Briton Must Take Name Of Great-Uncle for Legacy

CHALFRONT ST. GILES, Eng.—Charles Crossman can have a sizeable fortune—that is, if he changes his name.

The 22-year-old youth was named one of the principal beneficiaries of a \$100,000 will if he changes his name to Stratton. An aged great-uncle died recently and left him two-thirds of the estate if he changed his name.

Friends said the aged man was anxious to perpetuate his name and they thought the nephew would agree to the condition.

Shawl-Famed Cashmere Wool Accents Its Timeless Vogue

In 1950's fast-rising market for fine-quality wools, Asia's cashmere—the "wool of emperors"—accents its timeless popularity by running in extra heavy demand.

Cashmere wool is the soft winter underfleece of the small, semi-wild Tibetan, or cashmere, goat. Never shorn, it is plucked or combed out painstakingly by hand during the spring molt of this frugal denizen of Himalayan heights. The wool is collected, also, from shrubs and rocks against which the animal rubs when its downy undercoat becomes too warm.

Comparatively few of these goats live in Kashmir, northern Indian state which gave the wool its name. They range in thin air and on thin diet from the Caspian sea to western China, and their wool is finest in regions of perpetual snow near the eastern limit of this range. Cashmere endures as the wool's name because of the long renown of scarfs and shawls handwoven from it at Srinagar, capital of Kashmir.

There in the storied and beautiful Vale of Kashmir, shawls known to the Caesars were loomed. Of matchless softness, they were hand-elaborated on the loom into masterpieces of blended color. Superb examples are displayed in Srinagar museums.

The collapse of the Roman empire disrupted the cashmere trade with the West, but early in the 16th century, Europe "rediscovered" Srinagar's exquisite shawls. Josephine and Eugene, consorts of two Napoleons, multiplied the vogue. Shawl weaving in the Vale burgeoned into an industry of 25,000 workers and 16,000 looms a century ago.

Six New American Liners To Be Safest Ever Floated

America's six new passenger liners now under construction will be the safest liners to sail the seven seas. Specifications of the owners and designers call for the highest standards of safety that will produce ships that have little chance of burning or sinking.

Through the combined use of materials that are either incombustible, fire-resistant, flame-proof, or fire-retardant, along with other fire-prevention and fire-fighting devices, a conflagration of any consequence on American passenger liners will be virtually impossible. The new liners will be divided into several fire-tight zones bounded by steel bulkheads or decks, insulated to prevent passage of fire and extreme heat.

Stairways and stairhalls out of these zones are to be enclosed by fire casings. Doors in the fire zone bulkheads are of fire-resisting material and are thermostatically operated. Automatic fire detectors are to be installed in areas containing combustible materials, including storerooms and lockers. Cargo spaces, holds, storerooms, carpenter shops, paint and lamp rooms will be protected by an audible and visual smoke detector combined with a carbon dioxide extinguishing system.

Best Humidity for Home

Air conditioning engineers consider that the range from 35 to 50 per cent relative humidity is the most healthful for the home and that this will not have a harmful effect on furniture. Thus air conditioning equipment for use during summer months is often designed to maintain 40 per cent, or sometimes as much as 50 per cent, relative humidity. In the winter, however, the humidity must be continually lower. With 40 percent, in a home maintained at 75 F and with singly glazed windows, as soon as the outside temperature dropped to 36 F, there would be condensation of moisture which might damage. In order to protect the house, it is usually considered that 20 per cent is as high as one should go in the winter in northern climates.

U.S. Shoe Production

Nearly two million pairs of shoes are made each day in the 1,200 shoe factories of the United States, according to the latest figures released by the U. S. government, and nearly one-half of the world's shoes are made and worn in America. The approximately 500 million pairs of shoes which skilled craftsmen will turn out this year in this country—actually one billion footwear units—will consume some 22 million hides of cattle for leather soles and other vital shoe parts, and many millions of hides and skins of other foreign and domestic animals, such as goats, sheep, horses and reptiles.

Knitting Industry

During the period 1939 to 1948, the volume of cotton consumed by the knitting industry increased 180 per cent, from 81,000 bales to 228,000. The consumption of materials competing with cotton declined 18 per cent during these years. Cotton scored its biggest percentage gains in men's and boys' sweat shirts, women's, misses', and children's polo and "T" shirts. Volume-wise, gains in men's and boys' polo, "T" and basque shirts and men's and boys' sweat shirts were chalked up amounting to more than 100,000 bales annually.

THE CENTURY OF PROGRESS STUDY CLUB

October 11 found the Century of Progress Study Club in its regular meeting. The business session began with each member present answering roll call with the title—Constructive Reading. Old and new business was brought forward. A report was given by the treasurer on the sale of tickets and profit made on our book review.

Mrs. Willie Amel Smithee was elected as a new member. Fourteen members were present.

For the days program—Family Growth and Development, as our theme the following titles were discussed.

Character development—Mrs. Geo. Long.

Developing and establishing family relationship—Mrs. Jack Loudermilk.

Family Attitudes for constructive growth—Mrs. L.D. Griffin, Jr.

Houses are for Children too—Mrs. Roy Mack Walker.

Hostess for the afternoon was Mrs. Edwin Dickerson.

Adjournment.

Mrs. Cullen Campbell, of Monday, visited Sunday in the Hugh Stodghill home.

Mr. and Mrs. H. C. Mercer were business visitors in Tullia Monday.

Mr. and Mrs. W. R. Humphrey, of Tullia, visited Mr. and Mrs. J. S. Fisher Sunday afternoon.

Mrs. Ola Mills is in Tullia for medical treatment.

Mrs. Ira Woolery, of Hereford, and Mrs. V. R. Gardner, of Amarillo, spent the week end with their sister and husband, Mr. and Mrs. R. E. Brookshier.

Mr. and Mrs. J. M. Thompson were in Dallas over the week end on business. They also attended the Dallas State Fair.

Mrs. Ella Fay Hubbard, of Fort Worth, visited Friday with her parents, Mr. and Mrs. W. L. McMinn, and brother, Mr. and Mrs. Bud McMinn.

Mr. and Mrs. Homer Howard, of Seal Beach, California, and Mr. and Mrs. Roy Howard, of Lewisville, Texas, visited Friday night with Mr. and Mrs. Bud McMinn, Mr. and Mrs. W. L. McMinn, and Mrs. J. W. Bragg. Home Howard's son, Joe, married Miss Opal McMinn. Mrs. J. W. Bragg being an aunt to Mrs. Howard.

James Tennison, son of Mr. and Mrs. Bill Tennison was a patient in the local hospital the first of the week.

Mr. and Mrs. M. K. Summers spent Wednesday night with their daughter and family, Mr. and Mrs. J. E. Estes, in Amarillo.

Legumes are fine soil building crops if they are properly inoculated and fertilized. Inoculated legumes may well be called nitrogen factories for they have the ability to take nitrogen from the air and store it in nodules on their roots.

A loose fitting jacket aids in disguising the bulk of a large man and hides the slimness of a man who is too thin.

Chicago Man Earns Country's Gadget King Title

From behind a desk in a Chicago office that combines the chaos and quaintness of a toy shop, hock shop and antique shop, Robert Kahn reigns as the country's gadget king. Surrounded by a display of gadgets and novelties that overrun his office's filing cabinets, book shelves and window sills, 41-year-old Kahn helps chart the course of the nation's multi-million dollar gadget industry.

Kahn, whose gadget interest stems from his youth, has had a long-time flair for designing and marketing items that usher in the nation's fads and crazes. It was Kahn who flooded the country a few years back with the tiny Swiss weather houses that found their way into millions of homes.

The popularity of the weather forecasting house had long languished in this country. During the war when the government restricted weather reports, Kahn figured people were still interested in information on the elements. On a hunch he purchased some rejected rifle sights from the government and contracted with a manufacturer to fashion them into weather houses. Kahn's clairvoyance paid off more than a million dollars.

New Drug Cuts Treatment Cost Of Arthritis

NEWARK, N. J.—What is proving to be a revolutionary new development in the treatment of rheumatoid arthritis was disclosed in a report just published in the Journal of Clinical Endocrinology.

Five scientists discovered that when insulin, the drug used in diabetes, is given simultaneously with cortisone, very much smaller doses of cortisone than heretofore used may be effective. This combination was reported to produce the same degree of relief in arthritis as when cortisone is used alone in the customary large doses.

The new treatment reduced the quantity of the scarce new "miracle drug" used. Thus, the method enables the doctors to cut the cost per day for treating hospitalized arthritis patients with cortisone from \$12 to as little as \$3 each, the report said.

Cost of Drug Cut

Cortisone is the adrenal compound reported by Drs. Hench and Kendall, of the Mayo Clinic, a little more than a year ago as producing spectacular improvement in rheumatoid arthritis. Its use in medicine has been handicapped, the scientists explained, by its potential dangers and the extremely high cost of treatment.

The principle of using insulin together with cortisone was developed by Dr. Edward Henderson, director of the clinical research division of Schering Corporation, Bloomfield, N. J., and by Dr. Marvin Weinberg, his associate, on the basis of animal and laboratory experiments conducted at the College of Physicians and Surgeons of Columbia University by a third member of the Schering team, Dr. Harry Seneca.

The work was done through the cooperation of Dr. George C. Schicks, Director of St. Barnabas Hospital, Newark, N. J., and Dr. John W. Gray, distinguished rheumatologist and Director of the Arthritis Clinic at St. Barnabas, and his associate, Dr. Evelyn Z. Merrick.

Intense interest has focused on the cortisone treatment of arthritis for over a year since it was first announced at the Mayo Clinic, but physicians have been handicapped by the limited supply of the drug, its prohibitively high cost, and certain unfortunate side effects which develop incidental to the treatment, when large doses of cortisone are used. Many efforts have been made to produce the drug in larger quantities and at lower cost, but prior to the St. Barnabas research nothing had been done to make smaller quantities of the drug serve the purpose.

12 Patients Studied

The research workers have stated that the new method does not merely cut the cost of treatment to one-half or less, but also offers a means of avoiding some of the dangerous actions of the drug, very familiar to physicians who have had experience with cortisone. In addition, it the cost of treatment finally within reach of the majority of arthritis sufferers.

Twelve patients with typical rheumatoid arthritis were hospitalized in the St. Barnabas Hospital for this study. Some were early cases and some were chronic cases of 20 years standing with far advanced arthritis.

PERSONALS

Mr. and Mrs. T. C. Cherry and sons had as their guests Sunday, Mr. and Mrs. Cherry of Clarendon.

Mr. and Mrs. E. R. Grigg, of Alvarado, visited her brothers and family, Mr. and Mrs. Stanton Crown and Mr. and Mrs. Carl S. Crow.

Mr. and Mrs. Merle J. Montague left Wednesday for Fort Collins, Colorado to visit Mrs. Montague's parents. Miss Nellie Bryant, sister of Mrs. Dan Montague, accompanied them to her home in Denver, Colorado. Miss Bryant has spent several weeks with her sister, and plans to return for an indefinite stay.

Mrs. T. W. Davenport and Bernice Weich, of Wellington, visited here Tuesday and Wednesday.

Mrs. Avis Cowart and mother, Mrs. Raymond Sanders, spent the week end in Amarillo with relatives.

Ross Wayne Dowdy, of Amarillo, spent the week end with his parents, Mr. and Mrs. G. R. Dowdy.

Mrs. J. T. Gilkeyson underwent surgery Wednesday morning at the local hospital.

Otis Tidwell spent several days last week with his parents, Mr. and Mrs. Joe Tidwell and other relatives at Goree, Texas.

Mr. and Mrs. W. C. Smithee transacted business in Plainview Tuesday.

Mr. and Mrs. George Seaney made a business trip to Lubbock Tuesday.

C. A. TUNNELL, OWNER

BEN GUILL

Can Serve the Panhandle BEST Because

BEN GUILL is NOW a member of the House Agriculture Committee. Only through his reelection can the Panhandle retain this important committee assignment.

BEN GUILL has gone to the people of the Panhandle to find out what they want and expect from their Congressman.

BEN GUILL has introduced legislation . . . which would give the farmer a chance to write his own farm program.

BEN GUILL has supported legislation to outlaw Communism in this country.

BEN GUILL, according to Bascom Timmons, veteran Washington newspaper correspondent, "HAS GOT OFF TO THE BEST START OF ANYONE I HAVE EVER SEEN." BEN GUILL HAS VOTED PANHANDLE! His vote will never be dictated by a party boss or an individual boss.

LET'S RE-ELECT
BEN GUILL
 TO CONGRESS
 TUESDAY, NOVEMBER 7

(Paid for by Democrats for Ben Guill; Mickey Ledrick, Chairman.)

Inkless Straight Pen

Before the weather house venture, Kahn invented a straight pen that proved a bonanza to students. It wrote with water and eliminated all mess and smudge that went with ink pens.

Surrounded by several dozen other gadgets on a window sill in his office, where he is owner of a Chicago advertising agency, Kahn displays one of the most amazing of present day toys, a talking doll. The doll, with an internal phonograph mechanism, repeats a child's prayer as articulately as an actress. Talking dolls have been on the market for years, but they have not reached the level of articulateness attained by Kahn's.

Now, to add to this hodgepodge of wizardry and wonderland known as the gadget industry, Kahn has concocted the ultimate in gadgets. The "Telzall," as he calls it, is truly a Rube Goldberg device. Worn on the wrist like a watch, it combines nine utilitarian items that for years individually have been stock pieces in scouting and camping paraphernalia.

The "Telzall," in addition to telling time by a sun dial, predicting weather and providing users with a magnifying glass and compass, contains a ball point pen, tape measure, signaling device, and charts of the Morse code and the constellations. This fantastic compact ensemble is little larger than an ordinary wristwatch.

In all, Kahn has marketed about 200 gadgets. "Telzall" and the inkless pen are inventions of his own. Kahn's other items come from old ideas which he has polished up and renovated. Kahn dusts off old ideas with a Midas touch that turns them to gold. Such was the phenomenal success of his weather houses, that five million of them were sold.

Sells His Ideas

Kahn doesn't manufacture novelties himself. He sees the possibilities in an item and then endeavors to sell it to a manufacturer. He tussled with more than a half dozen companies before he could convince one of them of "Telzall's" utility.

Most of Kahn's gadgets are sold by mail order. In 1948, Kahn handled three million dollars worth of auto seat covers by direct mail. The previous year he mailed 150,000 "friendship" rings at \$2.95 apiece. And last year's mail orders on 24-inch dolls exceeded the number of similar dolls sold by Sears, Roebuck and Company.

Affable Bob Kahn, who is to gadgets what Henry Ford was to the automobile, maintains there is always need for something useful. If a push button novelty saves time and effort and gets a few laughs, it serves a purpose, says Kahn.

Increased Use of Tobacco Noted in United States

WASHINGTON—The agriculture department reports the recent jump in cigarette prices may cost smokers in the U.S. an extra 125 million dollars in the year started July 1.

The department also reported that a record probably would be set in tobacco purchases of all kinds because of high employment and income levels. It said the nation's smokers consumed 335 billion cigarettes in the year ended June 30, a new record. That was some three billion more than in the previous year.

Despite the record consumption, total manufacture of 383 billion cigarettes was about seven billion less than in the previous year, due to the smaller output for export, the report said.

The department said five and a half billion cigars were smoked—about 3 1/2 per cent fewer than in each of the two preceding years. It added, however, that the cigar demand is expected to pick up in the last half of this year.

Shamefaced Detroit Plans Memorial to Young Soldier

DETROIT, Mich.—The city of Detroit, ashamed of itself for forgetting to honor the first American soldier brought home from Korea for burial at home, got busy and planned a perpetual memorial for him.

The soldier, Pvt. John Marruso, 19, died of wounds received in Korea. Only 20 persons attended his funeral and there were no proper honors, only a makeshift tribute.

Ashamed of the slight, Mayor Albert E. Cobo immediately ordered the city's flags at half staff. The park superintendent offered to dedicate a new recreation site to Marruso. And plans for a permanent memorial were started.

Mrs. Lena Marusso, Johnny's mother, was not offended by the slight. She said, "Johnny, he was awfully young to go. It would be nice if Detroit would do something to remember him."

4,000-Year-Old Stone Axe Factory Found in England

LONDON—An archaeological society reports that excavations in England have uncovered a stone-axe factory that existed nearly 4,000 years ago.

The society said that a large factory, which produced weapons and instruments that were traded all over the country and across the Irish sea, once existed in the Langdale valley.

Because of the altitude of the factory, 2,500 feet, it is presumed that the hewing of the rock took place in the late spring or summer, the rough material being carried away to be finished sometime during the winter at a more permanent settlement beyond the valley.

THE OWLET

EDITED BY STUDENTS OF THE SILVERTON PUBLIC SCHOOLS

NEW BLEACHERS

By Gloria Pebsworth, guest editorial

Have you noticed the progress of the bleachers that are being built at the football stadium? The days of running around the side lines and standing up will soon be a thing of the past for the football fans. A good job is being done and they are working as fast as possible. They are supposed to be completed by the next home game. Let's all show our appreciation and help keep them in good shape so that we will have an added reason to be proud of our school.

COWBOYS TAME OWLS, 26-0

The Happy Cowboys got off to a rambling start running seven points in the first three minutes of the game. Silvertown then held their ground until the first minutes of the second quarter. Then the Cowboys broke through for a 30 yard run going over for seven more points. The Happy team pushed down the field in the last part of the second quarter for the point making the score 20-0 in the first half.

The Owls held the Cowboys back some better in the second half allowing them to score only one touchdown in the third quarter, when one Owl, in a desperate attempt to block a pass, knocked the ball into one of the Cowboy's hands.

The Silvertown eleven held the Cowboys scoreless in the last quarter.

SOPHOMORE VICE PRESIDENT

By Dean McWilliams

Gay Merrell was elected Sophomore class vice president. Gay was pep squad leader last year and secretary-treasurer year before last.

Gay has lived in Silvertown ever since she was four months old. She was born at Flomont, Texas.

Gay said that she was glad she was elected to this office and that she would do her best in this office.

WHAT WOULD HAPPEN

If Mrs. Porter let Glen sit at the back of the room in English.
 If Gay learned to like milk.
 If Dick went steady.

If the Senior boys couldn't have invited girls to their party.
 If Dottie had gone with Billy Jones.

If Dick got a hair cut.
 If Helen didn't go with Buddy.
 If Joe settled down.

If Millie didn't go steady.
 If The Journalism Class didn't have to have an excuse to leave class.

If Mr. Porter coached basket ball.
 If Gay, Bonnie, and Mary really quit basket ball.

If Sandy didn't stand Jaye up.
 If Joe Wayne didn't go with Ruby.

If Norman learned to like the Quitaque girls.

MUSIC NOTES

Joe to Glen—"I'll Walk Alone."
 Beth to Daddy—"Papa Don't Preach to Me."
 Buford to Edna—"I Love You Because."

High school boys to girls—"Love Bug Itch."
 Freshman girls to O'Coner—"Remember Me, I'm the One Who Loves You."

Joe Wayne to Ruby—"I'll Never Let You go Little Darling."
 Beth to Dick—"I'll Never be Free."

Millie to Carl—"I'll Love You Truly."
 Gay, Joe and Glen to Gloria—"Detour."

Everybody to Sam—"Third Man Theme."
 Donna Jean to Dean—"Swing Wide Your Gates of Love."

Carroll to Edna—"Take Me Back and Try Me One More Time."
 Freddie to Ann—"Give Me a Hundred Reasons Why I Shouldn't Love You."

Lettie to Amarillo friend—"Missing You."

Who was Beth and Bonnie running up and down the side lines with, the night Kress played Silvertown Jr. High?

JUNIOR CLASS CO-SPONSOR

Miss Doyce Breeding, new teacher on the Silvertown faculty, was chosen co-sponsor of the Junior class. Miss Breeding attended school in Petersburg, Texas where she graduated from high school. After graduation she enrolled in Wayland Baptist College for two years. In 1948 she transferred to West Texas State College in Canyon. She received her Bachelors Degree with an English major in May, 1950. She minored in Spanish and history. This is Miss Breeding's first year to teach. She teaches sophomore and freshman English and 6, 7 and 8th grade English and reading.

JUNIOR CLASS SPONSORS

The Juniors chose as one of their sponsors, Mr. Bunch. Mr. Bunch attended high school at Lenora for two years and spent his remaining two years at Stanton. He graduated in 1942.

After graduation, he entered South Texas State College. While there he played freshman football. In 1943 he volunteered for the Marine Corps. When he was discharged he entered West Texas State College, at Canyon. A war would prevented him from continuing his sports activities. He majored in Agriculture and minored in Science.

In May, 1948, he began work on his master's of Education in Agriculture at Texas A. & M. He plans to complete work on his degree next summer.

NOSEY

Who was Bufford with Tuesday night. We think she is very cute. You have a new one every night don't you Beth?

Gay and Bonnie really rated Tuesday night. How does a 50 Pontiac ride. Girls and Boys?

O'Conner, from now on wash the jam off of your face before you come to town and ride around with Faith and Patsy. Of course we didn't notice the jam until afterwards.

Wanda Rea has been looking so hard for a single boy that she's strained her eyes, and has to wear glasses. We think that they are very becoming. Good luck in the near future.

Eudean, Gay, Beth, and Sybil have quite a line with the cowboys. Girls let's make sure that they don't have on wedding bands. 50 Pontiac ride. Girls and Boys? tract you?

What happened? The only couple at the farewell party was Carrol and Edna.

Joe Monday is just taking turns about with the high school girls lately. If he hasn't gotten around to you yet, just be patient, your time will come.

Are there any cupids in school? If so why don't some of you get busy and find Sam a girl.

Why was Gloria so down-hearted when the sophs. decided not to ask outsiders to their class party. Could it be her latest heart-throb isn't a soph?

Have you heard Sam's new nickname has been hearing the foot ball boys calling him "Bless his heart". We wonder why.

Could romance be blooming around S. H. S. lately. We've seen Willie Wade with Joy Nell lately.

SMILE AWHILE

Little Boy—Mother, I'm not going to school any more.
 Mother—Why not?
 Little Boy—Well I can't read, can't write and they won't let me talk so what's the use?

Grandmother—Harry, what do you want to be when you grow up?
 Harry—A Vitamin.
 Grandmother—You can't be a vitamin, dear.
 Harry—Yes I can. There's a sign in the window at the drug store that says: "Vitamin, be one" (Vitamin B1)

I'm crazy about your daughter, McTavish, and if you'll let me have her, I'll give you her weight in gold.
 Let me have a few days first.
 To think it over?
 No, to fatten her up.

The following poem was written by Billy Charles Wilson's mother, Mrs. Buster Wilson, in memory of her son and it should prove to be an inspiration to the boys who were his teammates and the entire school:

HIS LAST RUN

By His Mother

He made his last run for us, boys—
 The thing he most wanted to do;
 And he wouldn't want us to grieve so—
 Or become too discouraged and blue.

We cannot say we're not sad, boys—
 That our hearts are crushed, we confess;
 Yet we know in the darkest hours
 Our Father will comfort and bless.

Bill was doing his best for us, boys—
 And he wanted to reach the goal—
 But the touchdown was made in heaven
 For the Great Coach called for his soul.

So take new courage and fight boys!
 Play the best game you can today;
 Know the signals of Jesus, your Savior;
 When, like Bill, you've made your last play.

FRESHMAN VICE PRESIDENT

By Ted Vardell

Riley Joe Ziegler was born in 1933 in Silvertown, Texas. He has lived in Silvertown all of his life. He graduated from grade school in 1949. Riley is assistant manager of the football team, and vice-president of the Freshman class.

QUESTION OF THE WEEK

By Darrell McWilliams

What improvements have been made in our school system this year?

1. The lunchroom is being redone.
2. The agricultural building is being repainted.
3. We have some new speaking devices in the auditorium.
4. Some new rooms are being added to the grade school.
5. The homemaking department has been enlarged and new equipment installed.
6. The typewriters have been repaired.
7. The halls are not always full of students who are skipping class.
8. We have some new and efficient teachers.
9. We have some new bleachers on the football field.
10. We have some new athletic equipment, such as the new plastic football helmets.
11. The students don't go around

with their mouths full of bubble gum all the time, for it means a point off your grade.

All in all there have been many improvements in our school system already this year; and we hope there will be many more.

Seems like Melvin is getting fan mail from girls at Lockney. Melvin why don't you introduce us to "Deep Freeze Dinah?"

We have a new couple in school Gay and Beth have gone back together.

Has everyone noticed the ring Gloria is wearing. Whose is it Gloria. Would Darrell know anything about it.

Dick tells us that he has twenty more days before that green folding paper appears. Then girls, maybe he'll ask you for a date.

It surely did take the Pep Squad Girls a long time to eat Friday night. I'll bet they were hoping the football boys would stop there. But no such luck.

Another Sunday night Church couple: Margaret and G. W.

Who was that cute blonde Glen was with Saturday and Sunday night. Do you know anything about this Gloria?

Why does Lettie go to Amarillo so often lately. Could it be there is a certain boy there she especially likes?

Well Kids, I guess your wondering the names of the couples who

went to the Senior party. They are Dick and Beth, Billy T. Mary Tom, Buford and Edna, L. and Jackie, John and Edna, Pat and Mary Lou, Donald, Dottie, Ray and Chestina, and and Pee Wee.

Well? We're receiving couples here lately. Gay was with Gale Saturday night, in Quitaque that is.

Have you all noticed that we never see Carl and Millie anymore unless they are together, at Lubbock last Sunday.

Well, look at this! Seems as if Jaye is getting ahead of Tom. He was with Sandy Saturday and Sunday afternoon. Jaye and William, who were with the looked as if they were having fun also.

Guess who we saw at the Sunday night? Did you enjoy the other's company, Joe Lee and Dottie?

Joe is still popular. We saw him with Bonnie and Beth.

The eternal triangle! Edna was with Carrol last Sunday? Who was her other admirer?

Nosey wonders if Donald has heard from Joann lately.

We heard that Faye didn't have well Sunday noon. Could have been because he was with Frances.

Who Runs America?

the Congress? the President?

OR YOU AND THE MAN NEXT DOOR?

RUNNING AMERICA is the joint job of 150,000,000 people. It's the biggest job in the world today—keeping it running for liberty and for freedom. And the whole world's watching to see whether Americans can do it!

IN MUCH OF THE WORLD today, the people have resigned from running their own countries. Others have been quick to step in—first with promises of "security"—and then with whips and guns—to run things their way. The evidence is on every front page in the world, every day.

FREEDOM COMES UNDER ATTACK. The reality of war has made every American think hard about the things he's willing to work and fight for—and freedom leads the list.

But that freedom has been attacked here recently—just as it has been attacked in other parts of the world. One of the most serious threats to individual freedom has been the threat of Government-dominated Compulsory Health Insurance, falsely presented as a new guarantee of health "security" for everybody.

THE PEOPLE WEIGH THE FACTS. In the American manner, the people studied the case for Socialized Medicine—and the case against it.

They found that Government domination of the people's medical affairs under Compulsory Health Insurance means lower standards of medical care, higher payroll taxes, loss of incentive, damage to research, penalties for the provident, rewards for the improvident.

They found that no country on earth can surpass America's leadership in medical care and progress. They found that able doctors, teachers, nurses and scientists—working in laboratories where Science, not Politics, is master—are blazing dramatic new trails to health for Americans—and for the world.

THE "GRASS ROOTS" SIGNALS CONGRESS. In every community in the Nation, people stood up to be counted on this important issue. Thousands of local women's clubs, civic groups, farm, business, religious, taxpayer, medical, educational and patriotic organizations spoke out—giving the great United States Congress its unmistakable Grass Roots signal from home!

And ever watchful, ever sensitive to an alert people, The Congress saw that signal, and heard the people speak out, loud and plain. That's democracy in action. That's the American way!

Today among the 10,000 great organizations on militant public record against "Compulsory Health Insurance" are:

- General Federation of Women's Clubs
- American Farm Bureau Federation
- National Grange
- Veterans of Foreign Wars
- National Conference of Catholic Charities
- American Protestant Hospital Association

- American Legion
- National Association of Small Business Men
- United States Chamber of Commerce
- National Association of Retail Grocers
- National Retail Dry Goods Association
- American Bar Association

Doctors of this Nation are grateful that the people refused to be wooed by the fantastic promises of this un-American excursion into State Socialism. Doctors of America are dedicated to serve their fellow citizens at home and their comrades in uniform, wherever service to this Nation may take them. And the thing they stand ready to fight for—to sacrifice for—to die for—is not the alien way of life of Socialism, but the proudest security of a free and self-reliant people!

THE VOLUNTARY WAY IS THE AMERICAN WAY!

Throughout the Nation, free men and women, working and planning together, are finding the American answer to every question of medical service, care and cost. Hundreds of Voluntary Health Insurance Plans are in healthy competition—sponsored by doctors, insurance companies, hospitals, fraternal organizations—by industry, agriculture and labor.

in America—70 million people are protected by Voluntary Health Insurance! Throughout the Nation, families are insuring themselves against the major costs of illness—at reasonable, budget-basis prices. Voluntary Health Insurance takes the economic shock out of illness. Protect your family now. For information, ask your doctor—or your insurance man.

An American's greatest heritage is the right to learn the facts—and to speak his mind. Maintained with honor and used with sincerity—that right will guarantee forever that

You and Your Neighbor Run America!

 ONE NORTH LA SALLE STREET, CHICAGO, ILLINOIS

**Educator Offers
Care of Teeth**

Healthy gums can best be maintained by regular, thorough and daily toothbrushing. Dr. Maynard H. Hine, of Indianapolis, dean of the Indiana University School of Dentistry, reports that brushing three to five minutes each day at a time, Dr. Hine advised the firm healthy gum as a seal pink with a well-stippled orange peel surface. He said effectiveness of dental treatment for gum disorders can be short-lived unless the patient carries out good toothbrushing procedures at home carefully and persistently. Indiana dental educator recommended as an effective kind of brush one with an inch-long containing medium one-half long bristles brushes that are in tufts about one-eighth of an inch apart and mounted in two of six tufts each. Long toothbrushing techniques, Hine said that "it is generally held that the brushing should follow the ends of the bristles irritate the gingival (gum) tissue said the sides of the bristles should be pressed against the gums as much pressure should be as can be tolerated. He asserted, however, that there is one universally preferred method for toothbrushing and that individual should follow the advice of his dentist in a procedure to his individual needs. A toothbrushing procedure for children, Dr. Hine suggested that brush be pressed against the teeth and gums and revolved in a circular motion as large a diameter as possible. For dentifrices, he quoted a formula: "Equal parts of water and elbow grease."

**Swine Raisers Warned
of Rhinitis in Pigs**

Pigs sneeze frequently and their eyes later become "pushed in" and watered, swine raisers should be on their guard. They may have a virus disease problem in their herds. Excessive sneezing, coughing and a peculiar look to pigs' faces may indicate an outbreak of infectious rhinitis. The malady appears to be spreading, authorities say. Infectious rhinitis does not kill animals outright, a bulletin states, "but it may stop gains to point where hog raising is no longer profitable. Even well-fed pigs fail to put on weight. In many instances, farmers mistake infectious rhinitis for 'bull nose.' The two conditions are similar, but bull nose starts on an injury, and infection with the virus. It is not contagious. Infectious rhinitis, however, is caused by a disease organism, usually a virus, which stays in a herd season after season.

Bigger Egg Cases

Larger egg cases have been calling for larger eggs to carry them. Marketing methods however are well established and standardized. A standard egg case has been cut to strict dimensions so that a case from one manufacturer will pile beside or upon a case from another maker and make a uniform stack that stows easily and firmly in a truck or broad car hauling the eggs to market. As a result of scientific breeding and selection on one hand, and of market premiums for larger eggs on the other, poultrymen have been supplying eggs that now average larger than they used to. The result has been increased breakage of eggs moving to market, says the U. S. Department of Agriculture.

Baby Pig Disease

For the past two years a relatively new disease of baby pigs has been encountered in various areas of Kansas. The disease has been diagnosed as infectious gastroenteritis of pigs. Sows may also be affected. The disease usually makes its appearance within a few hours to a few days after farrowing. Sows stop off feed, milk production, and scour. Recovery occurs within a few days but they remain off milk production. Newborn pigs go off feed, the hair becomes rough, they scour and may or may not die. Death usually follows in a few hours. To date no preventive immunization or curative treatment has been found. The best method of prevention seems to be in the late separation of sows some weeks before farrowing and following farrowing. However, this is debatable.

Bovine Ketosis

The grass-eating cow may lose her rating as the barnyard's Number One vegetarian—but it's all for her own good. A new veterinary medical bulletin reports that practicing veterinarians apparently have been successful in preventing the hastening recovery of many cases of bovine ketosis by adding minimal protein to cows' rations. Ketosis is a complex form of poisoning. It is not related to any poisonous factor in the feed, but to toxic substances produced in the cow's own body. The animal protein treatment will be put to critical tests to see that its value can be judged more fully.

**U.S. Married Population
Reaches All-Time High**

The number of married people in the United States is now at an all-time high of almost 75 million, which is fourteen and one half million more than only 10 years ago. Somewhat more than two thirds of the present population at ages 15 and over is married; throughout the 50-year period of 1890-1940 the proportion was about three fifths. The increase in the married has been greatest at the younger ages. Among women at ages 20 through 24 the proportion married rose slightly from 47 per cent in 1890 to 51 per cent in 1940, and then spurted to about 68 per cent in 1949. For women at every age period under 45 the increase has been greater in the past decade than during the entire half century prior to 1940. Even beyond age 45 the proportion of women who are married is now at the highest point in at least sixty years, and the same is true for men at all but the old ages. The increase in the married population results to some extent from the improvement in mortality and the consequent reduction in widowhood, but of much greater importance has been the remarkably high marriage rates of the war and immediate post-war period. In the country as a whole the proportion of adult males who are single has fallen from 35 to 29 per cent between 1940 and 1949; among women the corresponding decrease was from 28 to 23 per cent.

**Vaccinate Chicks Against
Newcastle by 'Air Attack'**

A new "air attack" method of combating outbreaks of Newcastle disease in poultry flocks is being tried by research veterinarians at the University of California. To protect young chickens against the disease, Dr. R. A. Bankowski and associates on the university research staff made up a fine spray of Newcastle disease virus. This was carried by forced air to a pen full of young chickens. The birds were kept in the virus-laden air for periods of up to an hour. Most chickens develop an immunity to the disease following the airborne vaccination. Ordinary vaccination methods require inoculation of virus under the skin. The virus used in the studies was weakened by growing it for long periods in the laboratory. Grown outside chickens' bodies in a broth preparation, the virus eventually lost most of its disease-producing properties, while still retaining the ability to immunize.

Cotton Insect Control

The bureau of entomology and plant quarantine in its eighth cotton insect survey report for 1950 stated that "while insecticides needed for cotton insect control are in close balance, there is nothing which now indicates that crop losses need to occur because the farmer is unable to secure insecticides that will effect control. 'Farmers are urged to use insecticides wisely and apply any kinds of materials of established value if the kind they prefer cannot be secured.' Producers are warned to watch cotton fields closely for boll weevil migration and to apply insecticides in order to protect what already has been accomplished by the poisoning programs this season.

Protection for Lambs

Widespread use of a new vaccine for prevention of overeating disease in lambs has verified earliest reports on its value. Livestock health leaders regard the vaccine as one of the most helpful developments in recent years and predict that it will play a big part in bringing more lambs to market. Various drugs, including sulfur and bicarbonate of soda, also have been used for the prevention of overeating disease, but none of these remedies is considered as good as the vaccine. This disease, also called enterotoxemia, has long been a top-ranking killer of feedlot lambs, causing heavier losses in some sections than all other lamb diseases combined.

Physical Science Workers

Since the war positions for persons trained in the physical sciences have been readily available. It seems likely that for the next few years there will continue to be a good demand for scientifically trained people, although local conditions and individual circumstances are factors that cannot be assessed in advance. There is some indication that in the near future the supply of engineers may exceed the demand. If so, it may affect somewhat the number of scientific positions available, particularly in physics.

Avoid Skippiness in Paint

Every industry has its own terminology which sometimes seems strange to the uninitiated. The paint industry is no exception. The word "skippy," for instance, refers to a paint that is too heavy-bodied for uniform application and causes the brush to skip on the surface, leaving some spots insufficiently coated and others too heavily coated. Paint, once opened and stored a long while, sometimes becomes overthick. Your dealer, or the information on the label, will tell you how to thin it to avoid skippiness.

**T. E. L. CLASS MET WITH
MRS. GABE GARRISON**

The T. E. L. Class of the First Baptist Church met in an all day gathering in the home of Mrs. Gabe Garrison. One quilt was quilted. At the noon hour a lovely luncheon was served to the following: Mesdames C. O. Allard, C. R. Badgett, Andy Chappell, A. A. Howard, H. P. Howard, Dee Garvin, Shelby Haynes, A. D. Arnold, Pearl Simpson, and the hostess, Mrs. Gabe Garrison. Mrs. W. A. Stephens came in the afternoon. A business meeting was held in the afternoon with the president, Mrs. Gabe Garrison in charge. The next meeting will be November 3, at the church, with Mesdames C. O. Allard, A. D. Arnold and C. R. Badgett as hostesses. Mrs. J. C. Archer was a guest of the class.

**SILVERTON GIRLS ENROLL IN
ABILENE CHRISTIAN COLLEGE**

Abilene, October 12.—Two students from Silverton have enrolled for the 1950 fall semester at Abilene Christian College. They are Joyce Deavenport, daughter of Mr. and Mrs. Lee Deavenport, and Beth Joiner, daughter of Mr. and Mrs. B. E. Joiner.

Mr. and Mrs. Ernest Noblett, of Mangum, Oklahoma, spent the week end in the home of his sister, Mr. and Mrs. W. A. McJimsey and mother, Mrs. M. B. Noblett.

CARD OF THANKS

I wish to thank each and everyone for the cards and letters sent me while I was in the hospital at Lubbock. Your many kind words were greatly appreciated.
GENE HARDIN.

Guests in the home of Mrs. Pearl Simpson Thursday were: Mrs. J. C. Archer, Mrs. H. L. O. Riddell, Mrs. Jim Brooks, Mrs. G. R. Dowdy, Mr. and Mrs. T. C. Bomar, Mary Tom Bomar, Mrs. J. E. Arnold, Mrs. Brubs Bomar and children, Mrs. George Seaney, Mrs. Wylie Bomar and Mrs. W. J. Hyatt.

Among the ones who attended the ball game at Tech Saturday night were: Mr. and Mrs. Henry Price, Mr. and Mrs. True Burson, Mr. and Mrs. Carl D. Bomar, Mr. and Mrs. L. D. Griffin, Mr. and Mrs. Joe Mercer, Mary Dudley, Arthur Arnold, Macei Boelter.

Mr. and Mrs. R. E. Stephens attended the funeral of her sister-in-law, Mrs. Maggie Cowan, at Mangum, Oklahoma, Wednesday of last week.

Mr. and Mrs. Lyle Stodghill, of Munday, arrived Saturday for a visit in the Hugh Stodghill home. Mrs. Jackie Faircloth, of Lubbock, spent the week end in the home of her sister, Mr. and Mrs. Bryan Strange.

Genuine Frigidaire Refrigerators at Simpson Chevrolet Co.

**SILVERTON BOYS ATTEND
HARDIN-SIMMONS
UNIVERSITY**

Abilene, October 11.—Two students from Silverton are among the 1650 students who are enrolled this fall at Hardin-Simmons University. They are Flonoy E. Hutsell and Donald O'Dell Rhea. Opening classes began September 15 and will continue through January 26. University officials report a decrease in veterans, but an increase in non-veteran students. Hutsell, son of Mr. and Mrs. R. C. Hutsell, is a freshman. Rhea, son of Mr. and Mrs. Robert A. Rhea, is a freshman. He is a member of the freshman football squad.

Mrs. J. C. Archer and Mrs. Pearl Simpson were Sunday dinner guests of Mr. and Mrs. R. C. Bomar Sunday. In the afternoon the group had a lovely drive to the Schott Cap and back through Quitaque Canyon.

Mr. and Mrs. D. M. Morgan, of Paducah, visited in the home of Mr. and Mrs. Hugh Stodghill Sunday.

Mr. and Mrs. W. Allred, of Amarillo, were here on business Saturday and visited their daughter and family, Mr. and Mrs. Judd Donnell.

Gene Dickenson, of Dallas, and Mr. and Mrs. Earl Wilbur and Robert Earl, of Higgins, Texas, visited in the home of their parents, Mr. and Mrs. A. P. Dickenson Saturday and Sunday.

**Nice (?) chilling thought
for a hot day:**

**Life expectancy now about
70 years of age**

**1 out of every 3 over 65 have
no cash income**

Were you born today? If so, you've got a life expectancy of 66 years.

If you're an old man of 25, you'll probably live till you're 69½. If you're 35, till over 70. If you're 45, till 71½. (We mean men. Women live 4-5 years longer.)

Isn't that nice? But whoa, there—nearly one-third of the 11,000,000 persons over 65—not counting inmates of institutions—have no cash income at all.

What's to prevent your being one of those 1-out-of-3's? For millions the answer is: United States Savings Bonds—bought through Automatic Savings! It's a safe and sure way to save.

Those on payrolls can buy them through the Payroll Savings Plan. Others, through the Bond-A-Month Plan.

For your own peace of mind, sign up for Automatic Savings today!

**AUTOMATIC SAVING IS SURE SAVING—
U. S. SAVINGS BONDS**

Flower Containers
 Many homemakers may feel that they do not have the right container to use for flower arrangements. Here are a few suggestions that you may not have thought of, for the containers that really interest the flower lover, are very often those not originally intended for that purpose: tea pots, cream pitchers, vegetable dishes, gravy boats, many types of antique spoon holders, large cups and saucers are unique containers. Should your home be early American old pewter pie plates and candle molds would be ideal. These suggestions will fit modern homes, too.

When Dog is Poisoned
 Due to their eating and licking habits, dogs are often poisoned accidentally. All cases of suspected or known poisoning warrant a veterinarian's attention, because death usually can be averted by quick use of specific antidotes and hypodermic injections. If a veterinarian cannot be reached, warm salt water or mustard water can be given by mouth to stimulate vomiting of the poison. Enemas and stimulants also are helpful. A small amount of very strong coffee, warm but not hot, is a good stimulant.

Champion Steers
 Although many race horses are noted for their unusual names, the grand champion steers of the International Live Stock exposition at the Chicago yards have a similar claim to fame. Since 1900, winners names have included Clear Lake Jute 2nd, Peerless Wilton 39th's Defender, Fyvie Knight, Broadus White Socks, Mah Jongg, Brairecliff Thickset, Judge Roy Bean and Loy-al Alumnus IV.

Profit from Pigs
 According to some authorities, twice as much profit is made from saving eight pigs per litter as with six pigs per litter. One rather new method of saving more pigs per litter is the use of electric brooders in each hog pen. The electric brooder is simple and inexpensive to construct. At one experiment station only about one-half as many pigs were lost where the brooders were used.

Fire Destruction Increases
 U. S. fire losses are climbing again. The moderate decrease in fire destruction which occurred in 1949 has not been sustained during the first six months of 1950. Fire losses during June, 1950, were the greatest for that month during the 22 years for which detailed records are available. The \$57,116,000 total for June brought the six months total to \$367,117,000, an increase of 5.2 per cent over the fire destruction during the same period of 1949. During every month except February, 1950, the estimated fire loss was higher than for the same months of 1949.

Oldest Christian Monastery
 St. Catherine's monastery, at the foot of Mount Sinai, is believed to be the world's oldest Christian monastery in the world. Legend says a church was built on its site as early as the fourth century, through the aid of Queen Helena, mother of Constantine the Great. Erected as a refuge for early Christians, it rose at the traditional site of the Burning Bush, from which the Bible says the angel of the Lord spoke to Moses. Diabetes reflects their gains in longevity, and also that, thanks to insulin, few diabetic children now die of the disease, but grow up to become productive members of society.

Cellulose From Short Lint
 Approximately 50,000 bales of short staple cotton are expected to be consumed annually as a source of cellulose. The possibility of utilizing ordinary short staple cotton for this purpose was originated as a wartime project. Under War Production board auspices, a lint cutter was developed to slice regular short staple lint enough to use as a substitute for cotton linters.

Soft-Hearted Marine Adopts 9-Year-Old South Korean Boy

KOREA — Soft-hearted marines have done it again. They have adopted 9-year-old Kim Sun Chung whose mother and father were killed by North Koreans somewhere in the battle area.

A few weeks ago he was found by the marines sitting under a bridge near Pusan. He was dirty and ragged, but he was not crying. Korean children rarely cry.

The marines outfitted him with a green T-shirt, cut-down trousers and got him a pair of shoes but they were too big. So now he goes around barefooted.

At first Kim was fed only rice, the traditional Korean staple, but his diet has been gradually changed to regular marine food. Now Kim won't eat rice any more.

He goes through the chow line and like the other marines eats cereal, grapefruit, bacon and eggs. Then he puts his mess gear through three cans of boiling water, just like the others.

Thousands of Korean boys and girls have been made orphans in the war, but Kim is one of the few who have a new home, a foster father, three meals a day and a place to sleep.

During an interview with a war correspondent he was rather quiet, but when Kim is alone with Private Marvin E. Younger of Dixon, Ill., who found him, he sometimes talks of Tarzan and the jungle boy—evidently he had seen them in the movies when he was living at home with his parents.

Kim likes Americans and Private Younger would like to take him back to the United States when the war is over. But those who know the technical difficulties think it will not happen. It is going to be tough on Kim, they say, when the Marines have to leave him behind.

Stonewall Jackson Scion Rides to Battle in Truck

MIRYANG, KOREA — In the days of the Civil War, Stonewall Jackson rode forth to war on a horse. The modern Stonewall Jackson, however, rides forth in a truck.

A great-great-grandson of the famous general, from Salem, Ore., is a marine now serving in Korea. He saw action in the Kongsachon drive on the south coast but returned to the rear with an infected foot.

When he returned to the front he got a ride on a hard wooden box housing hand grenades. Said the 18-year-old youth, "I'd rather ride a horse."

Youth Trapped Four Days in Strike-Locked Rail Car

CALGARY, Alta. — A Canadian farm youth was trapped in a refrigerator car when that nation's railroads went on strike and was confined 100 hours before rescued.

Jack MacDonald, 19, told police he sneaked into the car in hope that it would take him to some outlying farm community where he could get a job as a harvester. Then the strike began and the car was locked and left standing in the yards.

The youth said he spent his time sleeping and beating on the car door. Children playing near the car heard his weakened cries and called police. The youth was sent to a hospital, suffering from exhaustion and exposure.

"Being in the car almost drove me crazy," he said. "At first I became thirsty and hungry, but there was nothing to eat or drink. Then after a while I didn't care any more."

Death and Taxes Shrink Oilman's 19-Million Estate

NEWPORT, R.I.—If you inherited a \$19,000,000 estate don't think you would get it all. In fact, you would only net about \$2.8 millions.

As an example, the estate of Robert Walton Goellet, an oil magnate who died in 1941, amounted to \$19,000,000.

But federal taxes took \$11,572,448; New York state tax \$2,693,096; Rhode Island state tax \$1,269,859; Utah state tax \$2,717; Province of Quebec tax \$6,633; Province of New Brunswick tax \$7,898; administrative expenses \$966,000; appraisers' fees \$250,000.

Then after other minor expenses the amount remaining to the four heirs was \$2,808,615.

Revenue Department Says Bootlegging Up 25 Per Cent

WASHINGTON—Bootlegging is up 25 per cent over last year. At the end of June 30, the internal revenue commission reported, federal men seized 10,929 illicit stills, compared with 8,008 the year before.

The alcohol tax unit also made 10,209 arrests, 1,294 more than the previous year. Criminal cases terminated amounted to 5,982, with 4,677 cases still pending.

The commission said 140,599 gallons of mountain "moonshine", 21,674 more gallons than during the year before, were confiscated. In addition, 4,802,806 gallons of mash were seized.

Four Out of Five Fatalities Caused By 'Repeaters'

MINNEAPOLIS—Four out of every five so-called accidental deaths and injuries are not real accidents at all, but are "invited" or directly caused by people with death-and-injury-producing habits, reports a study by Northwestern National Life Insurance company.

A new attack is getting underway on America's ghastly annual auto traffic toll of over 30,000 persons killed and nearly one and a half million injured. It is based on startling facts revealed by researchers into the attitudes and habits of the accident "repeater" culprit, now recognized as the cause of most of our so-called accidents, says the study.

A U. S. government survey of Connecticut auto driving records showed that four per cent of the state's drivers had 36 per cent of the traffic accidents reported during a six-year period. More recent surveys in other states have established that between five and ten per cent of the drivers regularly contribute more than half of the total traffic accidents recorded in those states, the study says. British and American researchers going back through thirty years of casualties have demonstrated that about 20 per cent of the population consistently have 80 per cent of all accidents of all kinds.

"Show-off" Causes Accidents

When the persons with the accident-producing habits are removed from any group of people, total accidents for the group nose-dive with startling suddenness, the study says. A large public utility concern employing several hundred truck drivers cut its traffic accident rate 80 per cent by simply taking the drivers with the bad accident records off their trucks and transferring them to other jobs—where they continued to have accidents, but hurt themselves instead of killing and injuring other people with their trucks.

In a driver research clinic conducted in Michigan, 100 accident repeaters studied had had 528 accidents and had been arrested 769 times for traffic law violations in a ten-year period. The typical accident repeater "knew less about highway rules, got upset and "rattled" more easily under trying conditions, and tended to resent rules and authority. A "show-off" streak was also frequently found in such drivers.

A certain number of accident repeaters are found by the various state clinics' extensive testing laboratories to be abnormal personalities needing medical or psychiatric treatment; others reveal defects in eyesight, hearing, or muscular response. The vast majority, however, are simply persons with bad habits and wrong mental attitudes of resentment or contempt towards rules, regulations, and common courtesy.

Recommendation Made

The various state accident clinics have as their number one aim the identification of the potential accident-repeater in advance, or, at least, early in his destructive career. Then, vigorous preventive measures in the form of canceled permits, enforced safety training and future surveillance can be concentrated where they will pay off with maximum life-saving results.

From the numerous research records studied, the company summarizes basic recommendations for reducing our annual traffic slaughter: Set up scientific accident research clinics in all states—not in just a few. Empower them to call in for examination every driver with a record of repeated accidents or of repeated safety law violations. Cancel the driving permits of those persons found physically or mentally unqualified. Educate the safety law violators in traffic rules and try to change their attitude; then "give them the works" and remove them from contact with a steering wheel if they continue to violate safety regulations. With blame clearly focused on the group who cause most of our auto casualties, the public will demand and support far more vigorous traffic law enforcement than now exists in most localities.

Police Bail Out a Sewer As Lost Ring 'Walks' By

NEW YORK—Mrs. Kiki Andrews lost a diamond ring at the corner of 109th Street and Broadway and thought it went down a sewer.

Six policemen and four sewer workers went into action, hauling up bucket after bucket of murch from the sewer and sifting it. They brought up half a ton, but no ring. For three hours they labored, and naturally passersby lingered to watch.

Mrs. Lillian Peyton chanced by and asked what was in progress. Informed, she exclaimed: "Why I found the ring on this corner a couple of nights ago." She produced it and it was identified by the owner.

The bucketeers got up and slowly walked away.

PERSONAL
 Guests in the home of Mrs. Dan Montague Monday were: Mrs. W. E. Redin, Mrs. Alton Steele and Mrs. R. G. Alexander.

Geanie Davis had a tonsilectomy at Tulia hospital last week.

Mr. and Mrs. Norma Harris and Mr. and Mrs. Bertis Hams, of Iralou, visited Sunday with Mr. and Mrs. Luke Thompson.

Mr. and Mrs. Bud McMinn, Fayette McMinn and Billy and Jerry Stodghill visited Sunday in Plainview with Mr. and Mrs. Andrew Boggs. Mrs. Boggs was formerly Miss Arlene Brian.

Mr. and Mrs. Bud McMinn called on Mr. and Mrs. Jess Lovern of Lone Star Monday evening.
