THURSDAY FEBRUARY 22, 1951

Jubilee Minstrels at Auditorium Friday, February 23

Under the sponsorship of the Silverton Lions Club, E. E. Minter, president of the local club, has announced that they have secured the Lubbock Lions Club Jubilee Minstrels to appear in Silverton on the evening of February 23, 1951, at the high school auditorium at 8 p. m.

The Lubbock Lions Club Jubilee Minstrels is a local talent show produced annually by the Lubbock Lions Club. The first show was produced in 1948, and it was such a success that it has been made an annual affair.

This show has been put on in 15 or 18 towns in and around Lubbock. The highlight of the year is a trip they made to Ruidoso, New Mexico.

The cast this year is composed of some fifty people on the stage at all times, with others appearing in the various acts and in addition, some twenty workers behind the stage are required to put on this production. Every act in the show is presented by Lubbock people who are amateurs in the entertainment field. The Lions Club has never used any professional talent in this show, although the show is of professional quality.

The stage lighting is a beautiful blending of spotlights and "blacklight," using fluorescent painting on the costumes that make the show outstanding in this respect. The thirty man chorus, under the direction of Richard Richards, has won acclaim throughout the country for its singing.

The proceeds the local club derive from the show will be used by their club in local charitable activities, President E. E. Minter said.

VISITORS IN T. J. HODGES HOME FROM ARIZONA

Mr. and Mrs. Loyd Hodges and children, James Boyd and Diane, of Seligman, Arizona, have been visiting in the home of his parents, Mr. and Mrs. T. J. Hodges for several days. They left Tuesday for Arinaea, Arizona, where they will visit a brother before returning to their home on a ranch near Seligman.

Fire Department Purchases Respirator For Emergency

The Silverton Fire Department purchased a respirator to be used in emergency cases where accidents occur and the victim needs oxygen immediately.

At a meeting of the fire department Friday night this equipment was demonstrated to the fire boys and several outsiders and the doctors from the local hospital.

The respirator is automatic and has four small bottles and one big bottle of oxygen, and it takes only a few minutes to change bottles.

This equipment represents an investment of \$600.00, by the fire department, and in case of an accident and someone needs oxygen they are ask to call the fire department.

Methodist Youth Fellowship Banquet Held Tuesday Night

The Methodist Youth Fellowship held their annual sweetheart banquet in the basement of the church Tuesday night, February 20. After grace was sung the young people sat down to a tastefully decorated and prepared plate of chicken and spaghetti that was topped by a delicious cherry tart.

A short sing song was followed by two numbers by Mrs. Jackie Wingo, "Play Fiddle, Play" and "Always."

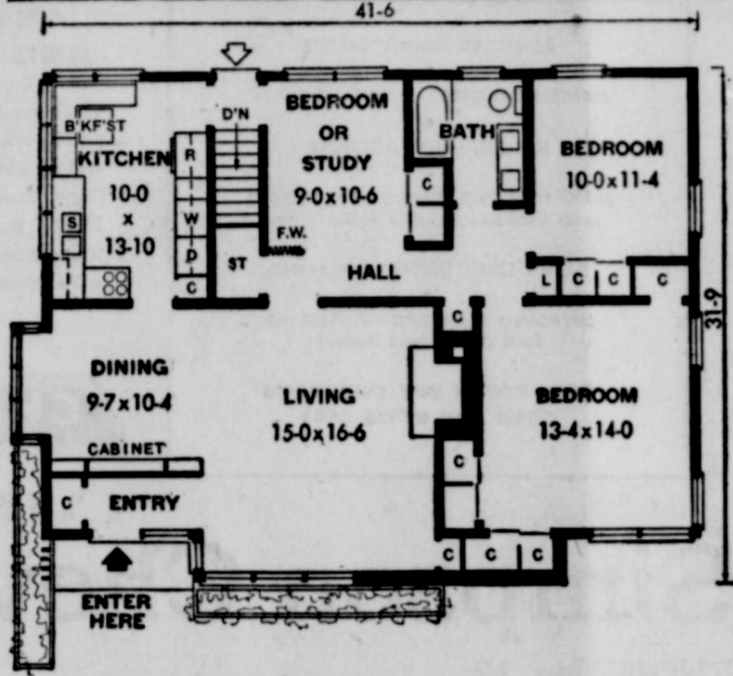

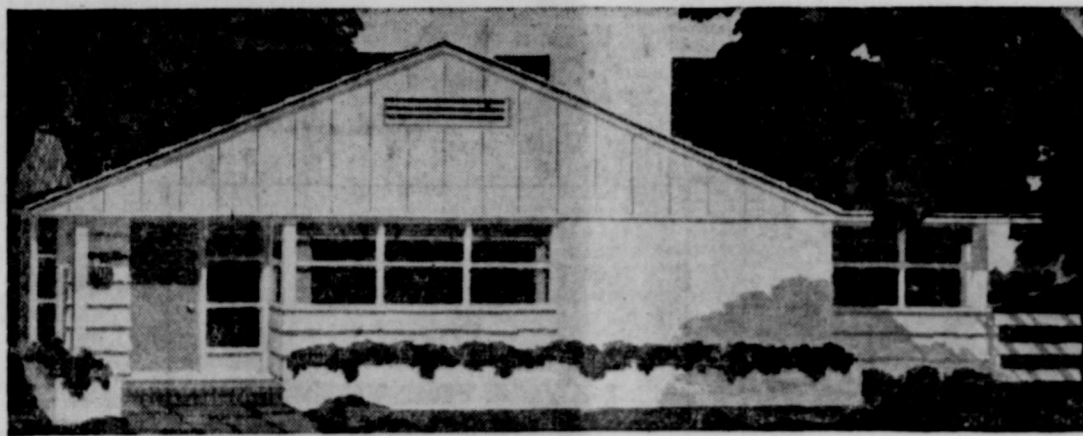

Rev. Marvin Boyd the district superintendent of the Plainview district brought us an inspirational address on the M. Y. F. motto "Christ Above All."

Afterward the group stayed at the church and played the various games provided.

The following attended: Pat Redin, Donald Ledbetter, Valettra Weaver, Milton Thornton, Millie Marshall, Carl Lewis, Janice Turner, Henry Evans, Eddie Jasper, Chestina O'Neal, Ray Tiner, Doyle Tiffin, Jonett Reynolds, James May, Jo Ann Hollingsworth, Jaye Turner, Francis Ely, Janet Turner, William Earl Martin, Argie Lynn Turner, Jackie Hammit, James Young, Lillian Young, Mrs. Jackie Wingo, Mary Dudley, Rev. Marvin Boyd and Rev. H. M. Secord.

A good time was had by all.

Small House with Large Assets

Here's a classic example of the type of house most American families look for. It's Good Housekeeping magazine's "Small House of the Month" for February. Features include: 1,250 feet of floor area; full basement; 12 closets; and fireplace. The exterior is brick veneer, vertical siding, and wood shingles. Note the abundance of windows, twin wash-basins in bathroom, and the folding wall which converts the extra bedroom or study into a second living room.

Fat Stock Show To Be Here Friday, February 23

Mrs. Skaggs, 78, Dies In Colorado, Springs, Colorado

Funeral services for Mrs. Frances Lenora Skaggs, 78 years old, widow of H. E. Skaggs, Plainview, was conducted at 2:30 o'clock Monday afternoon at the Plainview First Baptist Church.

Dr. A. Hope Owen, the pastor, officiated. Mrs. Skaggs died Saturday at St. Francis Hospital in Colorado Springs, Colorado, where she had made her home with a daughter the past year.

H. E. Skaggs, pioneer Plainview business man, died in 1936. A native of Cook County, where she was married, Mrs. Skaggs and her husband came to Plainview in 1901. He engaged in real estate business and in 1928 built the Skaggs Building, Plainview's principal office building.

Mrs. Skaggs' greatest interest was her home, which has occupied the same site for 40 years, her family and church.

Survivors are a son, Jack Skaggs, Plainview, and a daughter, Mrs. W. S. Freeman, Colorado Springs.

Other survivors include one sister, Mrs. F. M. Autry, and one brother, John Lemons, and sister-in-law, Mrs. Fred Lemons, and niece, Mrs. Marvin Thompson, all of Silverton.

Hearts Will Be Picked Up March 1

The plastic hearts that were placed in each business house at the beginning of the heart fund campaign will be picked up March 1, and the funds sent to headquarters, as the campaign drive ends on this date. If you have not contributed, try to do so before the hearts are picked up.

Mr. and Mrs. Troy Cox and daughter, Latrice, visited Mr. and Mrs. Andy Chappell in Amarillo Wednesday.

Mrs. C. D. Wright is visiting a few days with her daughter and family, Mr. and Mrs. Harold Ownby, in Phoenix, Arizona.

"The Next Voice You Hear" Showing at Palace Feb. 25-26

"The Next Voice You Hear," is a picture you can't afford to miss, so tremendous in theme, as absorbing in its dramatic power—here is a milestone in screen history, utterly different and compellingly courageous.

Joe Smith, his wife and son lead the life of an average family. Joe, an aircraft worker, heartily hates both his foreman and his wife's meddlesome, religious aunt, whose company he connives to avoid.

The family's routine existence is upset one evening when at 8:30 their radio goes dead for a moment and then brings them a message from God. It develops that the message is heard at the same time by all people, in all languages.

Next week's program appears on page two.

Lions Club Announce Speakers For Next Meetings

On Thursday night, March 1, Rev. Leon Hill, of Amarillo, will be guest speaker at the regular meeting of the Lions Club.

Thursday night, March 29, ladies night, David Rasco, of Amarillo News Globe, will speak to the Lions in the auditorium of the Methodist church. Mr. Rasco spent three months in Korea as correspondent for the News Globe. The public is invited to attend the meeting and hear Mr. Rasco.

Mr. and Mrs. Oner Cornett visited friends in the Plainview hospital Tuesday.

Mrs. Minniebell Montague and son, Jack Snowden, of Amarillo, visited relatives and friends here Monday afternoon.

Joe Lemons, of Los Alamos, New Mexico, is visiting his mother, Mrs. Fred Lemons this week.

Mrs. Durward Schmidt and son, Gene, and Blanche Thompson, of Lamesa spent last week end in the home of their parents, Mr. and Mrs. J. M. Thompson.

J. A. Scofield, of Vernon, will be the judge of both pigs and calves at the Fat Stock Show here Friday.

Judging of the pigs will begin at 11:00 a. m. in the basement of the old school building near the rodeo grounds. The beef calves will be judged at 1:30 in the rodeo arena. Forty seven calves are expected to be in the show which will make four classes. Ten or twelve pigs will compete at the show.

Some of the livestock will be moved on to the Amarillo Fat Stock show as soon as the local show closes.

American Legion Will Meet Monday, February 26

The American Legion and the Ladies Auxiliary will meet Monday night, February 26, at the basement of the Methodist church. This will also be a district meeting, and five counties will be represented. Speakers from Amarillo will also attend. The meeting will start at 7:30 p. m.

DINNER GUESTS IN VERNON GARRISON HOME SUNDAY

Mr. and Mrs. Vernon Garrison gave a dinner Sunday in honor of Mr. and Mrs. Loyd Hodges and family of Seligman, Arizona, at their home near Tulia. Attending were: Mr. and Mrs. T. J. Hodges, Mr. and Mrs. Loyd Hodges and children; Miss Jewel Hodges, of Lubbock; and Mr. and Mrs. Arnold Turner and children.

Mrs. A. C. Arnold, of Melrose, New Mexico, is visiting her children this week, Mr. and Mrs. Arthur Arnold and Mr. and Mrs. A. D. Arnold and other relatives and friends.

Rev. and Mrs. Porter Arnold, of Elliott, Texas, are visiting their daughter, Mr. and Mrs. Roy Mack Walker.

Dinner guests in the home of Mr. and Mrs. Perry Thomas, Jr., Sunday were: Mr. and Mrs. Arthur Thomas, Tulia; Jo Ann Clark, of San Antonio, and Jim Fenwick, of Honolulu.

MRS. MELVIN WATKINS

Miss Fayree McMinn Becomes Bride of Melvin Watkins

Cupid scored another victory on February 15, 1951, when Miss Fayree McMinn, daughter of Mr. and Mrs. Bud McMinn became the bride of Melvin Watkins, son of Mr. and Mrs. L. A. Watkins of Plainview, in the home of the bride's parents. Rev. Travis McMinn of Brownwood, brother of the bride, read the impressive double ring ceremony.

Helen Vaughan and Don Ledbetter served as ushers and candle lighters. Vows were exchanged in the presence of a few relatives and friends before an arch of white carnations entwined with white satin ribbon and greenery, with a white satin kneeling bench at the altar. Flanking the altar on either side were silver candelabra, also entwined with white satin and greenery.

Proceeding the ceremony Mrs. Travis McMinn, sister in law of the bride sang "Because" and "I Love You Truly" assisted at the piano by Mrs. Charles L. Record.

The bride was given in marriage by her father. She wore a magnolia street length dress, with navy accessories. She carried a white Bible, topped with an orchid. For something old and borrowed she carried a white embroidered handkerchief, some twenty years old belonging to Mrs. J. S. Fisher.

"Through the Years" and "O Perfect Love" was the musical background for the exchange of vows, played by Mrs. Travis McMinn.

Mrs. Sidney Rogers, cousin of the bride, attended as matron of honor. She wore a brown crepe dress. Her corsage was of white carnations. Mr. Sidney Rogers was best man.

For her daughters wedding Mrs. McMinn chose a navy blue gabardine suit with a corsage of white gardenias.

Mrs. Watkins, mother of the groom was unable to attend because of illness.

By Mrs. Paul Ledbetter.

Mr. and Mrs. E. J. Duncan Injured in Crash at Kress

Three persons were injured, one critically, in a traffic accident east of Kress last Thursday morning.

Most seriously injured was Mrs. E. J. Duncan of Silverton, who suffered a broken leg and arm, and serious head injuries. Mrs. Duncan's condition is described as critical at Plainview Hospital and Clinic Foundation where the injured were taken.

Mr. Duncan suffered a broken knee cap and minor chest bruises. He has been moved to the home of his sister, Mrs. Will Vaughan, at Tulia.

Mrs. Earl Traylor, Jr., of Kress, driver of the other car, suffered a fractured knee cap, serious facial bruises and lacerations.

The cars skidded on the slippery road, according to state highway patrolmen who investigated. Both cars were badly damaged.

Mrs. Duncan is a sister of Geo. Seaney of Silverton. Her parents, Mr. and Mrs. P. J. Seaney, and a sister, Mr. and Mrs. Darwin Johnson, of Erick, Oklahoma, have been here this week with their daughter and sister. Also a son, Mr. and Mrs. Raymond Bradley, of California, are with his mother.

Mrs. Duncan's condition is reported slightly improved by relatives.

Mr. and Mrs. Bruce Womack visited her mother, Mrs. W. J. S. Russell in Sherman from Thursday until Sunday.

Lee Deavenport was in Amarillo Tuesday on business.

Mr. and Mrs. Geo. West made a business trip to Amarillo Tuesday.

The dismissal was "The Lord Prayer" sang by Mrs. Travis McMinn.

A brief reception was held after the ceremony in the home of the bride's parents. A two tiered wedding cake topped with a miniature bride and groom was served by Mrs. Paul Ledbetter. Miss Margaret Stephens poured assisted by Mrs. Sidney Rodgers and Mrs. Elbert Stephens. Appointments were in crystal.

The happy young couple left immediately for a short wedding trip, after that they will be at home at 109 Beech Street, Plainview, Texas.

Out-of-town guests attending were: Leroy McKee, Mr. and Mrs. Sidney Rodgers, Mr. and Mrs. R. E. Stephens, Wilbur Anderson, all of Plainview; Mr. and Mrs. Bailey Henderson and Deanie, Mrs. Charles L. Record, Nova Jean Cox, Marlin Anderson, Lockney; Mr. and Mrs. Howard Watkins, Lone Star; Mrs. Walter Brian, San Angelo; Mr. and Mrs. Roy Osthus, Littlefield; Mr. and Mrs. Travis McMinn, Brownwood, Texas.

By Mrs. Paul Ledbetter.

A Governor Approves the 'Texas Star'

Square-dancing Governor Allan Shivers says "Yes" with a smile to an invitation from Lee Bedford, Sr., of Dallas, right, to attend the Southwestern Square Dance Festival to be held March 23-24 at Dallas. In typical Texas style, the Festival will be the largest of its kind ever held and will attract dancers and callers from all parts of the United States. Bedford is chairman of the Festival from which all proceeds will go to charity.

Texas Venture
In Education • 1876-1951
Our first state college—Texas A. and M. is now in its seventy-fifth year

DAVID F. HOUSTON

The man who first saw the true mission of the A. and M. College of Texas as a major technological institution and raised the scholarship level of the faculty and entrance requirements for students to real college level was Dr. David Franklin Houston, president of the college from 1902 until 1905. In his short time as president, Dr. Houston changed the entire course of the college's history. In 1905 he left Texas A. and M. to become the president of the University of Texas, and later became president of the University of Maryland. During the administration of Woodrow Wilson he served with distinction first as Secretary of Agriculture and later as Secretary of the Treasury.

BUY ROSE BUSHES WITH CARE SADIE HATFIELD ADVISES HOMEOWNERS

The unusual weather, very dry and the early freeze, that has existed in Texas for many weeks has been very hard on roses. According to Sadie Hatfield, extension specialist in homestead improvement of Texas A. and M. College, roses have been killed or badly damaged in many areas of the state, and replanting will be necessary.

She offers the following suggestions to those who will be purchasing rose plants. First, she says, select the grade 1 plants. These plants will have at least three strong canes or branches, 18 inches long, growing from the main crown of the plant starting at the ground level. Grade 1 1/2 plants are her second choice and they should have at least two strong canes about 14 inches long starting at the ground level. Plants of these two grades will bloom more and fewer will die from transplanting for in addition to the strong top growth, they also have good root systems.

She says the root systems and underground stems should be checked on all plants for dark rough galls. Also look for nematode knots on the small roots. If diseased roses are planted, they'll prove very unsatisfactory and will foul up the soil in your garden.

Next she says to examine the tops and roots of the plants to see whether or not they have been allowed to dry out. If the stems are a dull green color and show shriveling, avoid them. If not already dead, they may be stunted.

Then check on the age of the plants. She says it is sometimes possible to buy one year old budded roses and generally they are satisfactory. It is well to know

whether the roses are on their own roots. Many hardy varieties such as Cecille Brunner or Radiance roses thrive on their own roots, but generally, budded roses give better results. Then last but not least, she says, buy from a reliable nurseryman, one that you know.

The best plants will not thrive if they are not handled properly. She says they should be planted in well-drained, moderately fertile soil. They should be protected from strong winds but should be in the sunshine most of the day. Roses will not thrive in soils that are high in lime, in tight soils which do not drain well nor in poor white sand.

Set the plants the same depth they were growing in the nursery and avoid planting in old rose beds. Planting in soil that has been in grass for at least five years is a measure of protection from diseases, she says. And don't plant them where they must compete with shrubs and trees for plant food and moisture.

PERSONAL

Mr. and Mrs. Chester Burnett, of Vigo Park, were business visitors in Silvertown last Thursday.

Mrs. Edith Morgan, of Kress, visited her daughter and family, Mr. and Mrs. Ollis Chitty, and sister, Mr. and Mrs. Fulton Gregg last week.

Mr. and Mrs. Bob Mooney visited his mother, Mrs. W. E. Mooney in Plainview Sunday.

Mr. and Mrs. Jimmy Tidwell and little son, Mike, of Hobbs, New Mexico, spent Sunday in the home of her parents, Mr. and Mrs. R. C. Hutsell.

Woman of Year Award Received By Perle Mesta

NEW YORK, N. Y.—Editors of U. S. newspapers voted Perle Mesta, Oklahoma born "hostess with the mostest" who is now U. S. minister to Luxembourg, as 1950 "woman of the year".

Mrs. Mesta, famed as Washington's greatest party giver at the time of her appointment in 1949, has surprised critics by settling down to a serious job in her diplomatic post and winning the apparent respect and affection of the Luxembourgers.

The season's smash musical comedy hit on Broadway concerns the doings of a lady ambassador and thus focuses the attention of the public on Mrs. Mesta. The show's star, Ethel Merman, was named the year's outstanding actress of the legitimate state.

Last year's "woman of the year" was Mary Martin, star of the Broadway success, "South Pacific".

Actress Is Named

Other outstanding women of the year as voted by the editors included Gloria Swanson as the most outstanding movie actress for her sensational comeback in the motion picture, "Sunset Boulevard", which won critical acclaim throughout the nation.

Pearl S. Buck, first American woman to win the Nobel prize, was named outstanding woman in the field of literature for 1950. Her moving article, "The Child Who Never Grew," written about her own daughter, caused nationwide comment and was reprinted in book form. A new novel will be published in April.

Dr. Irene Corey Diller of the institute for cancer research, Philadelphia, was named by the poll as outstanding woman scientist of the year. She discovered tiny fungi present in all cancers. The fungi are of the common variety found in soil, food, plants and trees. Her discovery was hailed as one of the most startling of the century in cancer research.

In the field of sports, Gussie Moran, the "lace pants tennis player", was named woman of the year. At present she is on a cross-country professional tennis tour for which she reputedly is receiving \$75,000.

Mary Margaret McBride was named outstanding woman in radio and Vivien Kellems of Westport, Conn., was named tops among women in business.

Smith Tops in Politics

Margaret Chase Smith, Republican senator from Maine, who was the first woman to win a seat in the U. S. senate on her own merits, was once again named the outstanding woman in politics. She has raised her voice frequently in the senate this year and has made her presence felt in all sessions.

In the field of education, the outstanding woman of 1950 is Millicent Carey McIntosh, dean of Barnard college, N. Y., and mother of five children. Mrs. McIntosh is notable among college deans because she had managed to raise a large, happy, healthy family while charting a top flight career.

Tops in news interest in the field of music for the year is Margaret Truman, the president's daughter, continuing her concert career amid wide fanfare.

Much Less Coddling Please, Youngsters Advise Adults

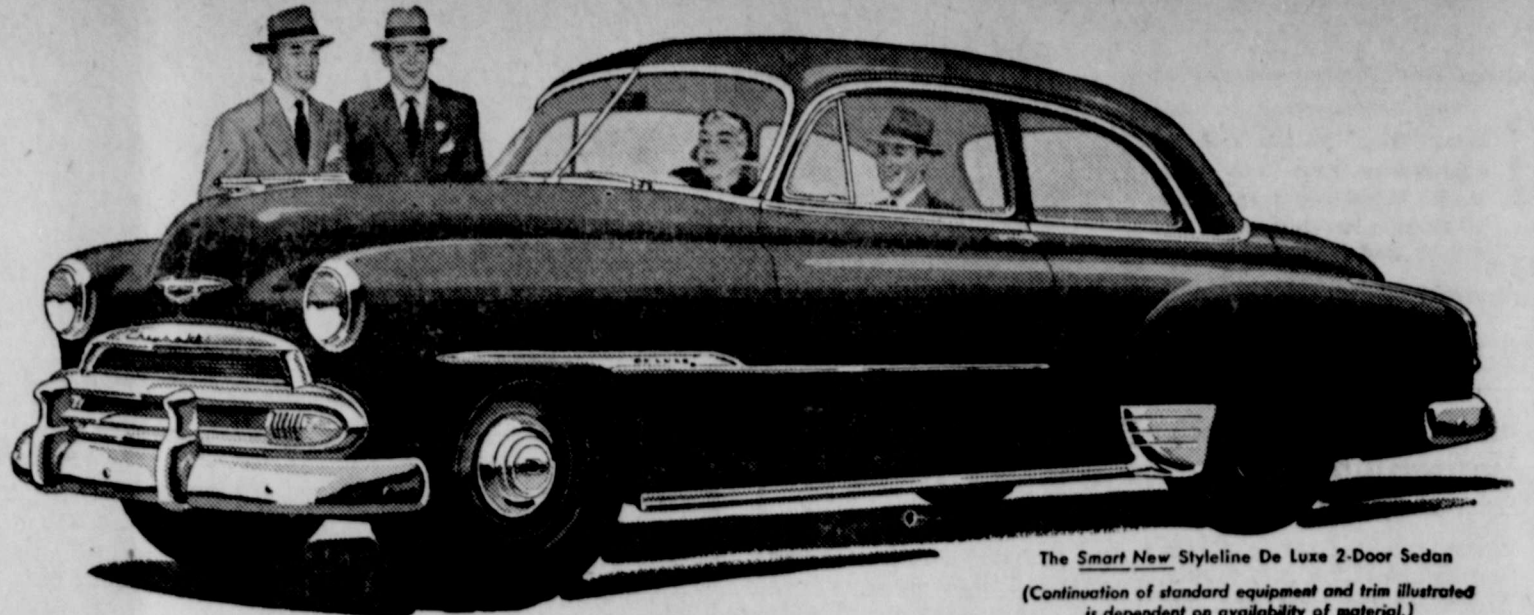

WASHINGTON, D. C.—The mid-century White House conference on children and youth held recently in Washington got something of a shock.

Three teenage high school pupils and a college student put their case bluntly to adult delegates of the conference. They demanded less coddling and more responsibility.

"Our aims are simple," said Arnold M. Pins, Columbia university student and chairman of the youth advisory council. "We want to work for responsible citizenship and individual happiness. We want the opportunity to share the total concerns of our society and to begin now to share them as full citizens."

Other youths attending the conference emphasized that young people need the "practical experience" of working with their elders. The

"The bonds Esther and I bought for our country's defense have made the down payment on our home!"

HOW U. S. SAVINGS BONDS HAVE PAID OFF FOR MR. AND MRS. GEORGE KING OF DETROIT, MICH.

"It's the U. S. Savings Bonds Esther and I bought during the war that made the down payment on our new home," says George King. "Now we know that grand feeling of owning the roof over our heads. And we have bonds to thank for it!"

"I joined the Payroll Savings Plan in 1941," says Mr. King. "In 1942 I went into the army continuing to buy bonds. Esther worked and put 10% of her pay into Savings Bonds too."

"We've saved about \$3,500 in bonds altogether, leaving a nice nest egg even after putting \$1,500 of it into the down payment on our new home. Bonds are a wonderful saving method!"

The George Kings' story can be your story, too - Start saving now!

You, too, may reach your goal, as the Kings did, and easily. *Start now!* It takes only three simple steps.

1. Decide to put saving *first*, before you even draw your pay.
2. Save a regular amount *systematically*, week after week or month after month.
3. Sign up *today* in the Payroll Savings

Plan where you work or the Bond-A-Month Plan where you bank. You'll be providing security for yourself, your family and our free way of life.

FOR YOUR SECURITY, AND YOUR COUNTRY'S TOO, SAVE NOW— THROUGH REGULAR PURCHASE OF U. S. SAVINGS BONDS!

Injured Mike Finds Friends Did Not Forget

PITTSBURGH, Pa.—This story seems almost like a Christmas story because it is about a little boy who had his faith restored. It began some six months ago when a can of cleaning fluid exploded and horribly burned 14-year-old Mike Calfi. Ever since then the youth has been in a hospital. Recently Mike became discouraged over his condition. He said he wanted to die because no one cared about him any more and no one came to see him. But within two days Mike was laughing at himself because he had learned that nowhere else in the world are people so fond of children. Now he knows that everyone cares—apparently the whole country. An incessant stream of humanity has been pouring into the West Penn hospital where he has lain since the explosion.

Receives 5,000 Letters

They started coming to see Mike as soon as the story got out that he didn't want to live anymore. Now the hospital has to turn his friends away because there are so many of them.

Mike has received 5,000 letters from all over the United States. The correspondence became so large the hospital had to reroute the mail to Mike's Oakmont (Pa.) home.

Movie actress Celeste Holm sent him a wire telling him that she and others in Hollywood were pulling for him. Rich folks have thrown open their doors to Mike for an expense free rest cure as soon as he is well enough to leave the hospital.

Movie comedians Bud Abbott and Lou Costello chose him the "brave boy of 1950" and offered him "any Christmas gift he wanted". Mike picked a television set.

Pittsburgh Steeler backs Joe Geri and Howard Hartley gave Mike a football autographed by the entire national football league team.

Home running Ralph Kiner of the Pittsburgh Pirates sent an autographed bat from his Alhambra (Calif.) home.

Faces a Long Fight

And still the letters from every part of the country continue to swamp Mike. His seven brothers and four sisters are kept busy opening and sorting mail, all letters from pals Mike never knew he had. And Mike has found that people everywhere do care.

A former newsboy, Mike still faces a long fight. Doctors report he needs more skin grafts—he's had three already. His family has neared the end of its financial resources to pay medical expenses.

Doctors have set up the Michael Calfi fund to help meet the cost of from \$2,000 to \$10,000 still needed to get Mike well again. As for getting well, Mike no longer has any doubts.

Export Vicious Machines Taking White-Collar Jobs

NEWARK, Del.—Within a decade electronic calculators might take over the tasks now done by millions of white-collar workers, Dr. Robert F. Jackson, associate professor of mathematics at the University of Delaware believes.

According to the professor one of the major reasons why these electrical brains have not been put to widespread use has been the cost. An electronic calculator, built by hand, now costs about \$500,000. In mass production, however, they would cost from \$10,000 to \$20,000.

The electric brain, he says, can turn out as many and as good results as hundreds of payroll clerks, hand-computers, shipping clerks, job-routing clerks—almost any type of clerical help.

"They are not built for a single, narrow, specialized job," he said. "They are sufficiently versatile to do almost any type of job, so long as no imagination or originality is required."

Dr. Jackson is a consultant to the ballistics research laboratory of the army's Aberdeen proving grounds.

New Hair Growing Hormone Being Tested on Humans

PHILADELPHIA, Pa.—There is still hope for men with bald heads.

The United-Research Laboratory in Philadelphia reported recently that a hog hormone has been developed that grew hair on white rats. The hormone is due for a test on humans.

Albert Roberts, 34, president and technical director of the laboratory, is credited with developing the hormone. It cannot be purchased by private citizens.

Extensive clinical tests on humans will be conducted by several of the nation's leading dermatologists and endocrinologists.

Roberts calls his discovery the dermatotropic hormone. He said it was taken from the pituitary gland near the hog's brain.

Roberts said that every hair in a human has a life span of between two and six years, then it falls out.

When new hair fails to grow in, you're bald. The new dermatotropic hormone activates the hair follicle and produces new hair.

March of Time Study Club Met With Mrs. Roy Mayfield

The March of Time Study Club met in the lovely home of Mrs. Roy Mayfield Thursday, February 15, at 4:15 p. m. A short business session was presided over by the chairman, Mrs. J. W. Lyon, Jr.

Roll call was answered with hit tunes of the twenties.

The program subject was music and art. A very interesting and enjoyable program was presented by the music students of Mrs. Jackie Wingo, Mrs. C. C. Garrison, Mrs. Charles L. Record and an art student of Mrs. Ewing Vaughan.

Selection of popular songs—Jackie Wingo.

When Love is Kind, Old English Song; Halls of Ivy by Kennedy, was sang by Frances Ann Ely, Shirley Elms and Jo Ann Hollingsworth.

St. Paul Waltz and Chicken Reel—Diane Fogerson.

Piano Solo—Faith Smithee.

Piano Solo—Donna Jean Mayfield.

Mrs. Gene Riddlehuber gave a talk on Art and Youth.

Refreshments were served to the guests by the hostess.

SAN JACINTO NEWS

San Jacinto Community donated \$85.00 to the polio fund.

Mr. and Mrs. Wade Stephens, Mr. and Mrs. Hub Hodges, of Tullia, and Mrs. Nell Holloway, of Marlin, were visitors in the Chester Burnett home recently.

The Supervisors of The Cap Rock Soil Conservation District are: Chairman, Earl I. Cantwell; Secretary, Chester Burnett; Guy Edens, L. A. McJimsey and Glynn B. Morrison.

The Cap Rock Soil Conservation District was voted into existence by the landowners in Briscoe County. Its boundaries are the same as those in Briscoe County. The district is divided into five sub divisions and a landowner in each of these sub divisions is selected to serve on the governing body known as the board of supervisors. Therefore, the board of supervisors of five men. At the present time they are: Earl Cantwell, south of Rock Creek; Chester Burnett in the northwest part of the district; L. A. McJimsey, east of Silverton; Glynn Morrison, southeast of Quitaque; and Guy Edens, north of Antelope Flat. These men are working together to get a coordinated soil conservation program applied in the district. That is, using every acre of land according to its capabilities and treating it according to its needs. These men give their time and energy for the good of the district without compensation other than a few cents for mileage. They serve because they believe through their efforts, in some measures, to keep our land producing or even raise its production.

The Board of Supervisors have come to realize that to fully protect the land a complete conservation system is necessary rather than a one practice program. Each practice has its place in the program, but cannot do a proper job without the necessary supporting practices. Let's take terracing for an example. There has been a certain amount of terracing ever since the district was voted into being and even before that. During the last two years the tempo of terracing has stepped up considerably. The heavy rains during the last two years have shown the need for conservation practices, but they have also shown that a one practice system such as terracing will not cure the erosion. Don't misunderstand what I am trying to say. Terracing definitely have their place in a conservation program but they are not the sole answer. No mechanical practice will fully answer the need.

Let's stop for a minute and consider what is happening to our land. Oldtimers in the district know that more water runs off the higher land and stands longer on the low-lands than it did a few years after the native sod was broken out. They also know that the land is washing worse, blowing more, and crusting over more easily than in previous years as well as falling off in production.

Why are these things happening? Why does water stand in place channels until the crops are gone? Why does the land crust, and wash? This condition exists because the organic matter has been burned out of the soil. Plant food and colloidal matter have leached down to form a hard pan area that restricts root growth and this condition exists to some extent on all soils from the dense clays to the sandy loams.

Terracing, contour farming or other mechanical practices will not eliminate this condition. The land can be deep plowed, or mechanically treated, but this means to break the hard pan and not only a good crop rotation but the needed organic matter back in the soil. Commercial farmers will add the needed plant food, but they will not contribute to the soil to take water and prevent washing and blowing.

A good cropping or land management system will do that. Contour farming, diversions, contour farming and other mechanical practices are important where needed, but a good agronomic program with the proper grasses and legumes should be the first consideration. Mechanical practices should be used as supporting practices for the agronomic program.

The board of supervisors of the Cap Rock Soil Conservation District have begun to realize the importance of a complete program. They are eager to help in getting the proper programs applied, but they can be of assistance only as far as the farmers will cooperate. You have to be the one to decide to treat your land according to its needs and use it according to its capabilities.

BETTER PLANNING MAY BE THE ANSWER

To combat the high costs of living and production and to reduce chances of financial loss, Texas farmers should produce at the highest possible levels in 1951, says C. H. Bates, extension farm management specialist of Texas A. and M. College. Indications are that domestic and foreign demands for raw materials may set all-time records, and this in turn assures farmers of a strong market for their products, he adds.

He points out that our land, labor and machinery resources are about the same as during World War II but adds that farmers do have more "know-how," higher yielding varieties of crops, more effective insecticides and machinery for doing many of the jobs on the farm. The manner in which these advantages and resources are used, says Bates, will greatly affect farm profits in 1951.

Here are his suggestions for getting maximum production and profits in 1951. First plan for the maximum acreage of high-value crops, that is, the maximum acreage that is in keeping with good farm management practices. He doesn't recommend plowing up high yielding pastures and returning this acreage to other crops unless it is a part of the rotation system on the farm.

He says to use the best seed obtainable for cheap seed may prove to be the most expensive. Good planting seed should be free of weed seed and other seed mixtures and should have a high germination test. High yields are generally produced only from good stands. The correct methods of seed bed preparation and chemically treating all planting seed help to insure good stands.

He recommends the liberal use of fertilizers in the sections of the state where they are adapted. Soil tests, research findings and the results from fertilizer use demonstrations should be used as the basis for determining the kinds

and amounts of fertilizers to be applied, says Bates.

A planned program for controlling insects and diseases should be followed on the farm, and crops should be harvested and marketed when their quality is at the highest stage.

Bates suggests that farmers make a study of their routine operations such as feeding the farm's livestock, the milking job on the dairy farm or the many other chores that must be performed daily. Study them, he says, for the purpose of eliminating needless steps and improving the efficiency of the operation. Often as much as one-fifth less time is required to do a job when labor-saving methods are used.

In summary, Bates, says, plan well, plant wisely, and seek the "short-cuts" for bigger farm profits in 1951. More and efficient farm production will also aid in the fight against inflation.

Miss Jewell Hodges, of Lubbock, spent the week end with her parents, Mr. and Mrs. T. J. Hodges.

Always Pay!

History of Eye-Wear Marked with Fumbling

Every normal human has two eyes and a nose, which provide a logical means of holding a pair of lenses before the eyes. What could be more natural than to saddle the nose with a neat, snug-fitting bridge and keep the spectacles in place with a couple of hooks behind the ears?

Oldest Dated Artifacts Reported by U. C. Men

The discovery of the most ancient dated man-made artifacts so far reported in the western hemisphere has been disclosed by anthropologists on the Berkeley campus of the University of California.

If A-Bomb Falls

Neither explosive nor lingering radioactivity has any effect on the operation of most mechanical or electrical devices. Unless the wires are down or there is a power failure, both your lights and telephone should continue to work.

Is It "Colorfast"?

"Colorfast," a familiar term to today's shopper, has different shades of meaning! Just a clerk's assurance that an article is "colorfast" is not enough.

Finish Protects Transformers

Electrical transformers, which are hung on poles, are exposed to extreme weather conditions and must have special finishes to protect them against heat and cold.

Helium Effect on Living Organism Reported at U.C.

Helium, argon and possibly other inert gases—gases which do not combine chemically with other elements—are far from inert in their effect on living organisms. This is reported by Dr. S. F. Cook, professor of physiology in the University of California school for medicine.

Hard Pad Canine Disease Gives Dog Owners Scare

A serious distemper-like infection that leads to hardening of the foot pads and nose is being seen in American dogs, but there is no evidence that it is a new disease or that it is becoming more prevalent.

New Course in Science

A revolutionary approach to the teaching of science which combines all the sciences in a single course emphasizing their relationship to man was described to the 118th national meeting of the American chemical society held in Chicago, by Dr. John Xan, head of the department of chemistry of Howard college, in Birmingham, Ala.

"Candling" Eggs

Candling is used on practically all eggs before they reach the stores. An electric light is placed inside a box with a hole about the size of an egg, in which the egg is placed.

Changing "Hand-Me-Downs"

Giving "hand-me-downs" a new and different color via the dye-bath is one sure way of getting little sister or brother to wear them without resentment.

WASHINGTON'S BIRTHDAY

In memory of George Washington, the first president of the United States, a legal holiday is declared, by the banks and the U. S. Mail on his birthday, February 22.

Washington was called by his people, "Father of His Country." He loved his county and his country-men.

He was born February 22, 1732 which is 219 years ago this month. George Washington became the first president of the United States in 1789 and stayed as president until 1797.

A famous fable told on George was about him cutting down the cherry tree and his father ask him who did it. George replied: "Father I can not tell a lie, I cut down the cherry tree."

IT IS NECESSARY TO GO TO COLLEGE

Some people disagree with the title of this article but there is a lot of truth in it.

A person without a college education very seldom becomes a success in this world today. The better jobs and the highest wages is paid to those with a college education.

You hear a lot of the boys saying: "What's the use to go to college I'll be in the army soon anyway."

ford to go to college lets try to go.

IS IT NECESSARY TO GO TO COLLEGE

No! It is not necessary to go to college, at least most girls don't think so. The majority of the girls say, "Some people may think it is necessary but it is not going to be for me."

If a girl starts to college, she seldom finishes, and if by accident she does her career is ended after two or three months, because a girls real ambition is to get married.

BASEBALL NEWS

As of now no preparations have been made for the coming baseball season. Coach Brown says, "There will be a called meeting on baseball in the near future to iron out some details."

We will keep you posted on how things work out. Mr. Brown says that we should have a good baseball team. He states that pitchers are his weakness; and that he is looking for two good pitchers.

The F. H. A. has purchased more utensils for the home-making room and has finished the curtains and machine covers. We have donated about \$50.00 in utensils and other things to the room.

THE NEW SCHOOL BUILDING

The little building is beginning to look pretty nice now. They have it painted a cream-color and it looks mighty good.

The freshman group is studying breakfast and table service. The second year classes are studying dinners and we have lab when we finish each unit.

THIRTY STATIONS WILL BROADCAST CHAMPIONSHIP BASKETBALL TILTS

The championship games of the thirty-first annual state championship basketball tournament will be carried by at least 30 stations on March 3.

Broadcasts of AA, A and B championship games in Austin and March 10, of the city conference championship game, from Dal-Hi Field House, Dallas.

The first game to be broadcast will be the conference B finals, beginning at 2 p. m. March 3.

Conference A championship game will follow immediately upon the conference B match, and the broadcast will run straight through until 5 p. m.

The class AA final game is scheduled to begin at 9:15.

The city conference final game broadcast will begin at 9 p. m.

MEET THE SENIORS

Billy Tennison, Billy was born at Anton, Texas. He started to school there in 1940.

He came to Silvertown with his family and started to school here in 1942. He graduated from grammar school in 1947.

Since entering high school Billy has been in the F. F. A. for four years. He was reporter for the F. F. A. for two years.

He has come out for football for four years and lettered two years out of the four at a end position. He has played basketball for three years and lettered two out of three years.

He has come out for baseball for three years and lettered two years. Billy plans to go to college after graduation.

F. H. A. NEWS

The F. H. A. has purchased more utensils for the home-making room and has finished the curtains and machine covers. We have donated about \$50.00 in utensils and other things to the room.

The freshman group is studying breakfast and table service. The second year classes are studying dinners and we have lab when we finish each unit.

The second year girls do not have any text books

and none will be available to the school until next year. The books were not requisitioned last year and that is the reason for not having any.

We have planned on ordering F. H. A. Jackets and have ordered one as a sample. We are hoping it won't be too long until we get them.

Please bring your dues for this semester as soon as possible.

GRADE SCHOOL NEWS

The seventh grade had a skating party Friday February 16. They gathered at the school house at 6 o'clock. Their room mothers then took them to the Playview skating rink. They stayed until 10 o'clock. They all had a good time.

FIRST GRADE NEWS

We have three new pupils. Levena Meeks, Joy Morrison, and Roy Morrison.

We are glad to have the pupils back who were out with the chicken pox. We still have two pupils out who have been out for some time, Ray Hill and Joe Carroll Kellum.

Only twenty three were present to enjoy the valentine box.

SECOND GRADE

Due to bad weather and sickness several second grade children were absent last week.

In spite of the bad weather several of the room mothers and about thirty second grade children were present to enjoy the valentine party.

THIRD GRADE

The third grade is very proud of some new windows in their room. These are steel casement windows and they increase the light and help to ventilate the room more adequately.

Wednesday afternoon the third grade had a small valentine party. Approximately one third of the pupils were absent.

FOURTH GRADE

We have one new pupil, Markietta Meeks, from Hollis, Oklahoma.

James Archer has moved to Quitaque. Our room enjoyed the valentine party very much. We wish to thank our room mothers for the lovely valentine box and the refreshments.

James Albert Jacobs is ill and having to stay at home. We hope he has a speedy recovery.

FIFTH GRADE NEWS

We had the fifth grade valentine party Wednesday, February 14. Our room mothers served us refreshments of cookies, and ice cream sticks.

There were only three of the room mothers here. They are as follows: Mrs. Mercer, Mrs. Hill and Mrs. Weaver. Mrs. Autry didn't get to come for she was ill.

We have a new pupil in the fifth grade, she is Bobby Carol Ferguson from Arkansas. We also lost two of our pupils. They were Velma June McIntire and Wallace Archur.

Woman Wills U. S. Bonds and Her Ashes To Red Army Chief

NEW YORK—Miss Agnes Smedley, the Missouri born newspaperwoman and well-known writer on China, bequeathed her ashes and her residuary estate to Gen. Chu Teh, commander of Red China's armies.

Miss Smedley, who won a retraction of charges that she spied for Russia, died last May 6 at the age of 56 in Oxford, England.

She willed her bank accounts and cash to her niece, Mary Smedley. Chu Teh was named heir to U. S. government bonds and royalties and "anything else of value included in my estate."

The will was dated April 27, 1949. It directed that her personal possessions, such as clothes, typewriter, and furnishings, be sent to China for relief or other purposes.

The will also ordered her body cremated and directed that the ashes "be shipped to China for Gen. Chu Teh, commander in chief of the peoples' liberation army or his heirs, and there be laid to rest at any place designated by General Chu or his heirs."

It was in February, 1949, that a United States army report named Miss Smedley as a Soviet spy in Shanghai. Miss Smedley called this "despicable lie" and the army soon retracted the charge, saying she had no proof.

She served as a correspondent with the Chinese armies fighting the Japanese and her magazine and newspaper articles on that conflict were widely read. She wrote five books, including an autobiography, "Daughter of the Earth."

Mounties Are Mechanized, Now Have Only 153 Horses

OTTAWA, Canada—The Royal Canadian Mounted Police have only 153 horses, it was disclosed recently.

In its annual report, the R.C.M.P. revealed the force of 3,400 uniformed members is gradually going mechanized, with 17 fewer horses than the year before. It added an airplane to its equipment and is seeking a helicopter.

But its members in the vast northland patrolled 539,000 miles, 46,860 of them by dog sled last year.

Activities included everything from recovering a lost wallet to getting its man—43,000 convictions.

TV Show is Sparkler on 27,000-Volt Hookup

SOUTH BEND, Ind.—Ernest Kolesiak's television antenna fell across a 27,000-volt power line with these results:

The plumbing began throwing off sparks and pipes melted around the kitchen sink.

Mrs. Kolesiak, peeling potatoes, found her spectacles speckled with molten metal.

Balls of fire bounced up and down on the roof with thunderous explosions.

The high voltage burned out the television set and blew off one of the knobs before the Indiana and Michigan electric company shut off the power.

The telephone burned out.

A glove lying in the yard burst into flames.

The house was scorched in three places where wires passed through the walls.

Mr. Kolesiak, who was trying to tighten the antenna guy wires, was only slightly burned.

The family dog ran off. He was found, but refused to go home.

Butch Jungle Girl Refuses Mother's Appeal to Return

SINGAPORE—The "jungle girl", 13-year-old Bertha Hertogh, has refused to return to Holland with her mother.

Clinging to her foster mother, Che Aminah, a Malay who reared her after the Japanese fell upon the Hertoghs' home in Java, the girl defiantly told her mother: "I don't love you and never would and I'll never go with you."

The girl has married a Malay school teacher. A court recently gave custody of the child to Che Aminah, her former nurse.

Mrs. Hertogh called at Bertha's home and saw her for the first time in eight years. It was a tearful scene in which her daughter told her: "You left me and gave me to Aminah. Now all you want is to start trouble. Of course you are my mother. But I am a Moslem. I'll never leave my husband or go to Holland with you."

Mrs. Hertogh left weeping.

Housewife in Second Floor Apartment Injured by Auto

BOSTON, Mass.—It would seem that a person sitting in his own second floor apartment is no longer safe from automobiles.

A 57 year old Boston housewife was sitting in her apartment when John Gintalis, 61, was struck by a car as he was crossing a street. He suffered a fractured left leg.

His shoe was wrenched loose by the impact. It was hurled 35 feet through a window in the apartment of Mrs. Catherine Hovnan.

The shoe hit her on the head. She suffered scalp cuts.

Matterhorn Hard to Climb, Though Cat Has Climbed It

A cat raises a question: Is Europe's mighty Matterhorn, majestically aloof among lofty Alpine massifs on the Swiss-Italian border, so mighty after all?

Hundreds of men have scaled it, the National Geographic Society notes. They include a blind man, and a cardinal who later became pope (Pius X). Scores of women, too, have won its summit. All got there the hard way. But now comes the report in the closing days of the 1950 climbing season, that a stray or truant cat, without benefit of ropes, pickaxe, or human aid, skittered to the top in the van of a party of veteran climbers. Has the Matterhorn lost stature?

The bleak rock pyramid, famous as it is, is a mere 285 feet higher than California's 14,495-foot Mt. Whitney. Most any seventh grader knows that Whitney, tallest in our 48 states, isn't really very high—not half as high as Asia's Mt. Everest, for example.

But there is the other side of the argument, notes the society, and it is the winning side. The Matterhorn is and ever will be mighty, measured by man's ability to climb.

The peak's human conquerors invariably have been seasoned alpinists who have conditioned themselves for months or years on strenuous climbs. Almost as invariably, they have engaged one of the expert licensed guides who live in Zermatt or Breuil near the Matterhorn's base and who take several parties on the hazardous two-day ascent in the course of the short climbing season from mid-July to late August.

Cotton Pests Cut Yield 16.5 Per Cent in 1950

In dollars and cents insect damage to cotton in 1950 was the second highest in history, totaling \$598,565,000, according to a preliminary unofficial estimate released by the national cotton council. Losses this season have exceeded only by the record high of \$817,874,198 in 1949.

The council estimated that the boll weevil, bollworm, leafworm, pink bollworm and other pests reduced the total yield 16.5 per cent—more than two and a half million bales of cotton and over four million tons of cottonseed.

Texas, the largest cotton producing state, led in the value of lint and seed destroyed, with losses amounting to \$107,036,000. The toll in Mississippi was estimated at \$101,239,000, and Alabama was hit to the tune of \$74,031,000.

Yield reduction, percentage-wise, was greatest in North Carolina, where an estimated 35 per cent of the crop was destroyed. Losses in South Carolina and Alabama totaled 28 per cent, and Georgia production was slashed 27 per cent.

An unusually mild winter which favored a high survival of weevils from 1949—one of history's worst insect years—plus unfavorable weather for poisoning during the season, both contributed to the heavy damage this year, the council explained. The council added that cotton farmers in 1950 used a record amount of insecticides and that this program of cotton insect control prevented even more disastrous losses than those which actually occurred.

Speed of Electricity

Does electricity have the same speed as light? The electrons, the charged particles which move in a wire carrying current, travel with an average progress of less than 1/20th of an inch per second. Some of these move in random directions as fast as 60 miles per second, but they make wild excursions in all directions, which balance out to a very slow net motion, vastly less than the speed of light. When an electric charge is started in motion, the kink impressed on the lines of the electric field which accompanies it does travel outward with the speed of light—186,000 miles per second. This phenomenon is electro-magnetic radiation, of which a narrow frequency band is light.

They're "Cooked" with Care

In the finishing of fine furniture, extreme care is taken with air circulation and humidity. Proper circulation and relative humidity are important in the oven-drying. There must be a uniform circulation of moving heated air. A relative humidity of from 30 to 35 per cent is usually satisfactory in most force-drying operations. The moisture content of the wood itself is also an important element. Shrinking and swelling must be guarded against during the bako process.

Body A Coordinated Community

The body is a well organized community of cells with mutually beneficial functions. The alimentary tract receives and processes foods, the blood and lymph serve as a transportation system to cells where processes of energy transfer, tissue building and waste removal are carried out under local as well as central control. These controls are a part of the nervous and hormonal systems. The body is thus a coordinated community with a continuous interchange of raw materials, synthesized products, and waste substances—interchanges which biologists call a dynamic equilibrium.

Venezuelan Iron Adds New Chapter to Baltimore Port

The busy port of Baltimore, where railroads and steel-using plants are expanding facilities for handling increased ore shipments expected from "iron mountain" discoveries in Venezuela, has an event-packed history that goes back to colonial days.

Baltimore was chartered in 1729 as a potential tobacco port. Situated at the head of the Patapsco river inlet of Chesapeake bay, it was handicapped at first by competition with the already numerous shore settlements catering to the shopping needs of near-by planters for their products.

The early traffic in tobacco was disappointing to Baltimore's founders. As late as 1748, the year's record shows only seven ships seeking cargo there. It was on wheat, however, rather than on tobacco that Baltimore was to lay the foundation for its future prosperity.

In 1750, the first shipment of flour was loaded at the port. A gamble at the time, it paid off handsomely on arrival in England, and started a boom in grain and flour exports which are important to this day. The first success led in turn to other traffic, to the expansion of harbor facilities, the establishment of infant industry, and the rapid growth of the young town.

Many factors played a part in Baltimore's development into one of Uncle Sam's top seaports. In the early days, the famous Baltimore Clipper, product of pioneer shipbuilding along Chesapeake shores, brought romance and speed to the port's overseas trade. The railways—initiated in 1827 by the Baltimore and Ohio to meet the challenge of the Erie canal—gave this city overland links with the growing regions opened up by the American surge westward.

"Mountain Sickness" in Cattle Decreasing

A bane of early-day western stockmen, "mountain sickness," which often struck cattle pastured on high altitude ranges, is becoming less common. Heredity is credited with lessening mortality from the disease.

Generations of mountain-raised cattle have built up resistance to the effects of high altitude, while those unable to adapt themselves have been eliminated. Studies reported by Dr. R. F. Bourne, a Fort Collins, Colo., veterinarian, show resistant cattle can survive and even thrive on summer ranges at altitudes of 9,000 to 11,000 feet.

When cattle were first brought into the mountain ranges from the lowlands, many died at altitudes of above 8,000 feet. A shortage of oxygen brought on "mountain sickness," which often terminated in heart failure.

Many attempts by early stockmen to improve their herds by bringing in high-quality bulls failed when the animals were unable to adapt themselves to the high ranges.

Today, however, some of the finest strains of beef cattle are doing well at altitudes which formerly were considered too high for successful stock raising.

Blink Of An Eye

During the quarter of a second needed to blink your eye, some remarkable things take place. The lower lid comes up very slowly, comparatively speaking. Main action occurs in the upper lid, which in the early part of the blink comes down like the visor of a helmet. But as the slit between the lids narrows a new movement occurs. The two lids begin to come together first at the outer corner of the eye, and the closure proceeds toward the nose as though the lids were being fastened by a zipper. Both eyes blink at the same time, but not always at the same speed. One eye, the weaker one, usually lags behind on the closure, remains shut for a shorter time, and opens sooner than the other.

Visual Communication

Lighthouses have been in use since the 1300s, smoke signals since before the discovery of America, and the "telegraph" since late in the 1700s. (The first "telegraph," invented by a Frenchman, was a machine consisting of an upright post with several pivoted arms which indicated different letters and numbers, depending on their arrangement.) Later there were signal rockets. Today man's eyes are relieved of the need for such visual communication—thanks to radio, telephone, and cable—but the demands on them are increased a hundredfold by the stresses of modern living.

Boxes Storage Space

The cost of any piece of household equipment includes the box in which the manufacturer packs it. Before discarding that box, consider whether it is worth saving to keep equipment in when not in use. Equipment which is used only at certain seasons of the year needs a storage container which fits it conveniently, holds it in best shape, keeps out dust, and is sturdy and thick enough to protect against accidental knocks and jolts. The original box, therefore, may be ideal for storing such varied items as empty jamming jars, egg jelly glasses, linens, portable electric fans and heaters, and electric pads.

DR. N. L. TEDFORD
Osteopathic Physician and Surgeon.

Reddy Writes a Letter...

Reddy's letter went to your mayor and the governing body of your community to tell these officials, who are in charge of Reddy's rates—his wages, so to speak, why he needs a raise in those rates or wages.

Reddy told them that the costs of the equipment necessary to provide you with dependable electric service have gone up and up in the last few years, and that they've reached the point now where his wages must be raised a little to help him meet these increased costs.

Another part of Reddy's letter told them about the expansion program that Reddy has had underway for about seven years. Because of this expansion program, Reddy has spent more money during several years to improve his service to you than he has taken in for his services. To keep this expansion program going, Reddy has had to borrow money from folks all over the country, from insurance companies, fraternal organizations, savings and loan societies, and just plain folks, butchers, bakers, teachers, the 11,000 individuals who are stockholders in this company.

Now, borrowing money is like working, in one sense. When you take a job, you determine with your employer how much you'll work for, and you want to be sure that his business will earn enough to pay you. Reddy goes through pretty much the same process when he has to go out and borrow money. He has to pay interest on the money he borrows—and interest is really a form of wages. And when he goes to borrow money to improve your

service—to bring "new" money into our part of the country, money that creates jobs, taxes, business for stores and shops here—he's asked by the folks from whom he wants to borrow if he's going to earn enough out of providing your electric service to make it a good investment for these folks to loan him money. In other words, Reddy has to convince these folks that loaning him money is a sound investment, just as you want to know that a new job will offer you a sound future.

Up to now, Reddy has been able to borrow this money, and meet his obligations when due, just as you have to meet your bills. But now Reddy has more than \$100,000,000 invested in providing you with dependable electric service, and his earnings on that investment have been reduced to the point where he must get a little more in wages from you.

Reddy is asking for a 10 per cent increase in his wages. He hasn't had a pay hike for many years. Reddy is sure you'll agree his request is a reasonable one for a worker who serves you 24 hours a day.

Reddy wants your area to have plenty of electric power to attract new industries, new people, and new businesses. With this small wage increase, he'll be able to borrow additional money, and be reasonably sure of paying the interest, the wages for borrowing, on the money. And, most important to you, and to Reddy, electric service will continue to be the biggest bargain in your family budget.

Power for Every Need!

Since the end of World War II, we have more than doubled our generating capacity. Additional units totaling more than 100,000 horsepower are scheduled to go on the line in 1951 and 1952. With these vast sources of power we are striving to meet your needs and the nation's needs for the critical days ahead.

VETERANS SERVICE OFFICER EMPLOYED BY BRISCOE COUNTY

To assist veterans and their dependents in all matters pertaining to their rights and benefits: Pensions, compensation, education and training, insurance, hospital care, social security.
In courthouse at Silverton each Friday from 9:30 to 5 p. m. At American Legion Hall at Quitaque each Saturday from 9:30 to 5 p. m. Other days write or phone Paul Miller, Box 596, Tulia, Texas, Phone 348 or 53-J.

C. M. Chappell made a business trip to Canyon Friday.

AGRICULTURAL FILLERS

There are some 900 farmer cooperatives in Texas. About one-third of these are cooperative cotton gins. Local cooperatives with an average of about 200 members each make up 95 percent of the total number.

Texas cooperatives last year borrowed more than 22.8 million dollars from the Houston Bank of Cooperatives and much of it was invested in modern equipment and facilities for handling farmers' crops.
The average dairy cow will consume from 100 to 120 pounds of water daily and if this water is not supplied, milk production drops off rapidly for milk is approximately 87 percent water.

Savings up to 50 percent can be made if the growing boy's shirts, pajamas and shorts are made at home.

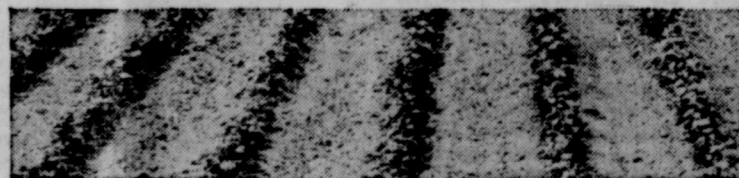

It is not too early to complete the plans for the spring and summer vegetable garden.

Genuine Frigidaire Refrigerators at Simpson Chevrolet Co.

MORE and BETTER COTTON

SEED TREATMENT helps turn thin stands . . .

into thriving yields.

As a cotton planter, you can expect four-way benefits from one simple operation you can perform on your own farm, or have done for you. It consists of planting seed that has been treated with an organic mercury dust. Its results include:

1. Control of most of the seed rot or decay that reduces your stands before the seeds can sprout.
2. Control of seedling blight caused by bacteria in your soil or seeds that attack the tender seedlings.
3. Control of anthracnose or pink boll disease, another germ-caused ailment that results in smaller crops of poor-grade, spotty cotton.
4. Control of bacterial blight or angular leaf spot that kills your cotton plants or stunts their growth.

Experiment Station figures show yield increases of 5% to 40% as a result of seed treatment. This means up to \$12 per acre added to your income. Cost of the chemical amounts to less than 10¢ per acre.

Those who recommend seed treatment stress the fact it should be correctly used—applied to the seed according to directions, and in the right amounts. The cotton planter has too much at stake, they say, to risk cutting corners on the use of less than recommended amounts, or skipping any steps of the fairly simple seed-treating process.

The treatment can be done by many ginners and delinters. Ask your County Agent about the value of seed treatment and where you can get this service in this vicinity.

NOTICE, NEW INVENTION!

If you are a Farmer and own a Hoeme or Chisel Type Plow, I have an automatic turn lift patent pending. Quick assembled. No ropes, no trip dogs. Tractor automatically raises and lowers plow on turns. Saves gas, gear changing, ware on brakes and tires and increases plowing. Invented and manufactured by—

W. N. WEAST,

Located at Edwin Davis Welding Shop on the Y to Floydada and Tulia in Silverton, Texas.
