PUBLISHED EVERY THURSDAY AT SILVERTON, BRISCOE COUNTY, TEXAS

THURSDAY, APRIL 26, 1951

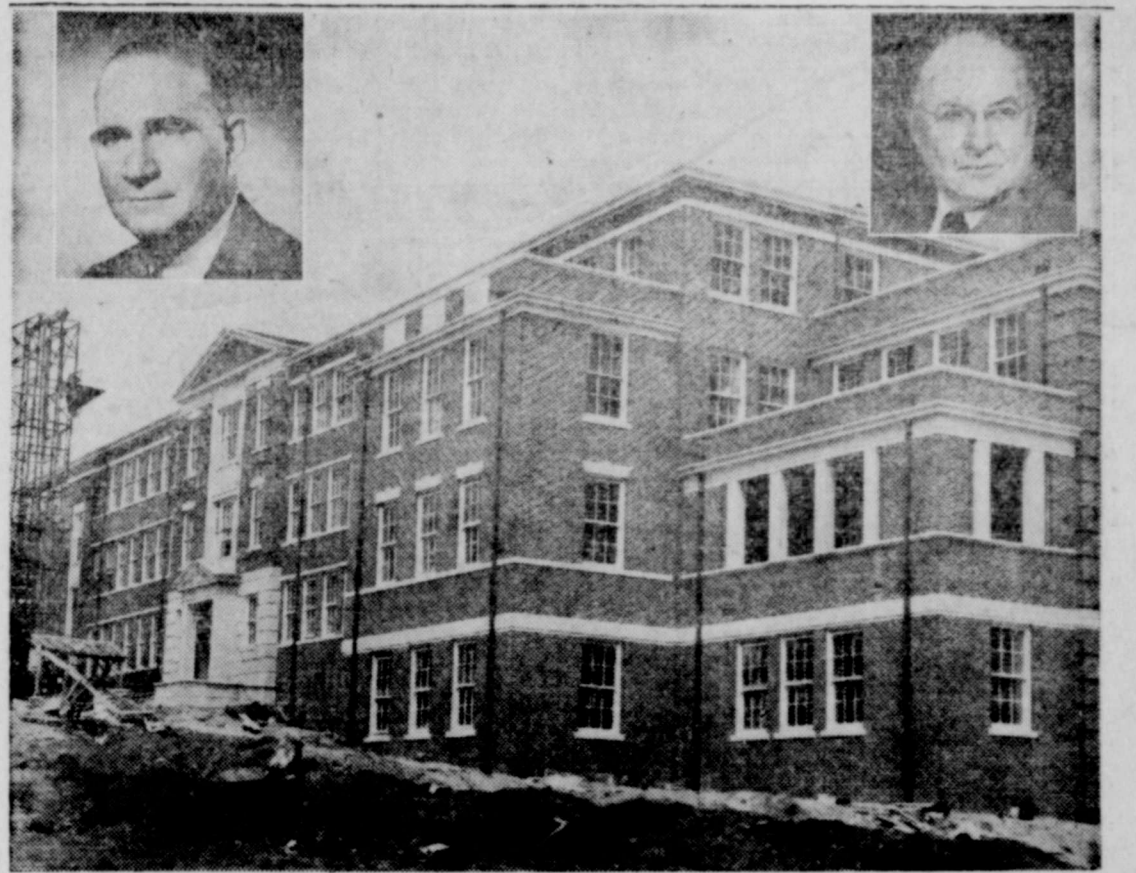

VFW BIBLES ACCEPTED—Lt. Gov. Ben Ramsey, left, and Speaker of the House Reuben Senter, right, accept on behalf of members of the Texas Senate and house 183 bibles from J. T. Rutherford, commander of the Department of Texas, Veterans of Foreign Wars of the United States. The bibles become permanent property of the state's legislative bodies. Commander Rutherford also presents a bible to Governor Allan Shivers.

Last Rites Held For Mrs. Lucy Jane Bingham Friday, April 20

Last rites were held at the Silvertown Methodist Church Friday, April 20, 1951 at 3 o'clock p. m. for Mrs. Lucy Jane Bingham, wife of J. D. Bingham, conducted by Rev. H. M. Secord, pastor of the local church, assisted by Rev. G. A. Elrod, pastor of the First Baptist Church of Silvertown. Interment was made in Silvertown cemetery under direction of Douglas Funeral Home.

Mrs. Bingham had been in failing health for more than a year. She passed away Thursday, April 19, 1951 at the Briscoe County Clinic Hospital where she had been a patient for several days. Mrs. Bingham was born August 19, 1874, in Parker County, Texas. She moved with her husband and family to Briscoe County in 1925. Survivors are the husband, J. D. Bingham, seven sons: Arthur, Freeland, Boyd, Alton and Ben of Silvertown; Curtis, of Kress and Harvey of Canyon. Three daughters: Mrs. Viola Hopkins and Mrs. Essie Hopkins, of Chillicothe, Texas; Mrs. Ellie Hall, of Lubbock; one sister, Mrs. Mary Land, of DeLeon, Texas; one brother, Mr. John Welch, Comanche, Texas; twenty-four grand-children; sixteen great grand-children; one grandson, Man Bingham, son of Mr. and Mrs. Arthur Bingham, who is in the navy and stationed at San Diego, California, was unable to attend the funeral.

Dr. John A. Guinn, left insert, who will be inaugurated sixth president of Texas State College for Women April 27, and President Doak S. Campbell of Florida State University are pictured above, with the new home economics building, now nearing completion on the campus. Dr. Campbell will be principal speaker at the inaugural ceremonies.

Dr. and Mrs. Shy are Attending Convention at Houston, Texas

Dr. and Mrs. Jim Shy, accompanied by Dr. Tedford of Plainview, left Wednesday to attend the Texas State Convention of Osteopathic Physicians and Surgeons at Houston, Texas. The convention will be held at the Shamrock hotel where prominent men in the profession will attend daily lectures. Dr. Shy will attend a special meeting where plans are being framed whereby the Blue Cross and Blue Shield plans can be extended. These plans now only recognize Osteopathic hospitals approved for intern training.

Mary Tom Bomar Selected Queen of Local Lions Club

Miss Mary Tom Bomar, daughter of Mr. and Mrs. T. C. Bomar, of Silvertown, has been selected queen to represent the lions club at the District Lions Convention to be held at Hereford, April 29, 30 and May 1. As many of the club members as possible are urged to attend the convention. The local lions club are working on plans for all business firms to display the flag on Memorial Day, May 30. Last Thursday night's meeting of the club was devoted to business matters of the club, President E. E. Minter stated.

Monday, April 30 Is Deadline for Filing Compliance Records

Three groups of retail establishments: restaurants, groceries and consumer goods outlets which are subject to Ceiling Price Regulation 7, face deadlines for compliance with office of price stabilization regulations by Monday, April 30. The reminder came from C. J. Taylor, acting district price executive in the Lubbock district office, which includes Briscoe county. The 66-county district reaches south and west to the Rio Grande, El Paso and the New Mexico state line, north to the Oklahoma line and east to the eastern boundaries of Lipscomb, Hemphill, Wheeler, Collingsworth, Childress, Cottle, King, Garza, Borden, Howard, Glasscock, Reagan, Pecos, and Terrell counties. Here is the way each of these types of establishments is affected: Restaurants, soda fountains and other food and drink establishments—by April 30 must file base period statements of food cost per dollar sales with their district OPS office. Grocers under CPR 15 and 16—Must have their ceiling prices in effect by April 30. Also, by April 28 they must notify OPS what category, based on 1950 gross sales volume, they are in: Independent store with less than \$75,000, independent with \$75,000 to less than \$375,000, non-independent with less than \$375,000, or a retail store, independent or otherwise, with \$375,000 or more. Sellers of CPR 7 items—Must file pricing charts by April 30. Many merchants not originally affected by Regulation 7 are now affected. About 15 new items were placed under the regulation two to three weeks ago. Sellers of the new items must be in compliance by April 30, along with those originally affected, Taylor said. Items under regulation 7 now include musical instruments, radio and television sets, phonographs and records, housewares, garden tools, light hardware, some paper products, silverware, chinaware, glassware, jewelry, watches, clocks and other items. Wearing apparel, floor coverings, furniture, specialty shop items and certain other merchandise have been under the order since it was first issued. Merchants should send their price lists to the District Office of Price Stabilization, Broadway Building, 1202 Texas Avenue, Lubbock, Texas. Businessmen needing additional information regarding their compliance should direct their inquiries to the district price executive in Lubbock.

ES. H. T. HOTCHKISS LEFT SUNDAY TO BE WITH MOTHER

Mrs. H. T. Hotchkiss and son, Edward, left Sunday evening for Des Moines, Iowa, to be at the bedside of her mother, Mrs. C. M. Hotchkiss, who suffered a stroke recently. Mrs. Hotchkiss called her husband after their arrival and said her mother's condition was changed. Mrs. Hotchkiss said they were in the high water district and all transportation had stopped, due to the Mississippi flood waters.

CALL MEETING OF LIONS CLUB TONIGHT (THURSDAY)

The Silvertown Lions Club has called a meeting for tonight, (Thursday) at 7 p. m. for the purpose of presenting the Boy Scouts Troop Charter. Charles Wendt, field scout executive, will make the presentation and will also be the guest speaker for the evening. He will also present cards to the Scout Committeemen. All members are urged to attend. Parents of the Boy Scouts are invited to attend.

AND MRS. BERLE FISCH ENTERTAIN WITH DINNER SUNDAY

Mr. and Mrs. Berle Fisch and daughters entertained a group of the Fisch's relatives at a dinner Sunday. Guests were: Mr. and Mrs. J. N. Haun, Mr. and Mrs. Frank Stultz, Mr. and Mrs. Howard Burt and daughter, Cheryle, and Mr. Hubert Burt, all of Plainview; Mr. and Mrs. C. O. Hart, of Littlefield and Mr. and Mrs. Geo. K. Burt and daughter, Edna Ann, of Levelland. Mr. and Mrs. Haun are parents of Mrs. Fisch, Mrs. Stultz is her sister, and Hub, C. O., and Geo. Burt are her uncles, and Howard Burt is a cousin of Mrs. Fisch.

Wayland Ex-Students Will Hold Annual Meeting May 1

The annual meeting of Wayland Ex-students will be held in the Wayland College dining hall at 7 p. m. on Tuesday, May 1, according to an announcement made here today by the Rev. Vernon Shaw of Lubbock, president of the Ex-student Association. Kearnie Keegan of Nashville, Tennessee, Southwide student secretary of the Southern Baptist Convention, will be the speaker for the evening. Ruby Burton of Plainview is acting secretary of the association, and Frank Baker of Plainview is vice-president.

Silvertown Vs. Turkey Today 2 p. m. Will Play at Turkey

Coach Hank Brown announces the local school baseball team will play Turkey team at Turkey today afternoon at 2 p. m. to determine who will play Matador following week for this half of the district.

J. L. Nelson, of White Deer, is visiting his daughter, Mr. and Mrs. E. E. Minter this week.

Mr. and Mrs. Ben O. King returned home last week from Florida where they visited Mrs. King's sister who was ill. They reported her sister as much improved. Ben O. said fishing was very good the last few days of their stay in Florida.

Mr. and Mrs. Tommy Tate and Mrs. W. C. Tate, of McAdams, spent Sunday with their father, Mr. and Mrs. Freeman

Mr. and Mrs. Tommy Tate and Mrs. W. C. Tate, of McAdams, spent Sunday with their father, Mr. and Mrs. Freeman

Doc Burleson, of Matador, and Mrs. W. C. Price, of Lockney, spent Thursday night visiting their sister, Mr. and Mrs. Roy McMurtry.

Doc Burleson, of Matador, and Mrs. W. C. Price, of Lockney, spent Thursday night visiting their sister, Mr. and Mrs. Roy McMurtry.

Mr. and Mrs. J. C. Morton and Buddy Moore, were Sunday dinner guests of Mr. and Mrs. Lee D.

Pagan Love Song At Palace Theatre April 29, 30

"Pagan Love Song" in technicolor at Palace Theatre April 29 and 30, with Esther Williams, Howard Keel, Minna Gombell, Charles Mauu, Rita Moreno, Philip Costa, Dione Leilani, Charles Freund.

Attend Golden Wedding of Parents Sunday

Mr. and Mrs. Pat Pavlicek spent the week end in Bomarton where they attended the golden wedding celebration of Pat's parents, Mr. and Mrs. Adolph Pavlicek on Sunday. Mr. and Mrs. Pavlicek had their eight children and their families home to help them celebrate. About 50 relatives were there for the occasion, and in the afternoon many friends and neighbors called. Mr. and Mrs. Pavlicek returned Sunday night.

March of Time Study Club Met April 19

The March of Time Study Club met in regular session on April 19 in the club room. Mrs. J. W. Lyon, Jr., presided during the business session and was acting hostess for Mrs. Theron Cross. Roll call was best book I have read this year. Mrs. Dee McWilliams reviewed "Bells On Their Toes," sequel to "Cheaper by the Dozen," by Frank B. Gilbreath, Jr., and Ernestine Gilbreath Carey.

Lions Club to Play Seniors Volley Ball Game April 30

On Monday night, April 30, at 8:00 p. m. the Silvertown Lions Club will engage the senior class of 1951 in a series of three volleyball games. This will be the first time for these teams to play and you may expect most anything to happen. Fred Mercer and Ralph Glover are managers for the Lions Club and you may expect that they will be out to win and will use the best players available. They have a large number trying to make the team. We have only a partial list of prospective players as follows: George Seaney, Keith Tiffin, Lee Deavenport, Edd Minter, Bro. Secord, Bro. Elrod, Carl Crow, Ed Cox, Doc Minyard, Bill Tennison, Gordon Montague, Raymond Bomar, Edwin Crass, Milton Dudley and several others. We understand that if they get far enough ahead they will let Coach Brown, Mr. Porter and Mr. Moreland play some. Mr. Lowrance is not eligible because he is a sponsor of the senior class. Mr. Ellis is the head official of this game. We understand that the ladies will play the senior girls in a series of games also. So far we have not been able to get any line up of these players but we have been assured that there will be a good strong team out. Let us all go out to see these games. Proceeds will go to the senior class. Admission is 35c and 20c. Players and all will be expected to play.

E. C. Smithee Passes Away in California

On Tuesday of this week Mrs. W. A. Sedgwick, of Tulia, received a telegram notifying her of the passing of her oldest brother, E. C. Smithee, of Los Angeles, California, who had been gravely ill for sometime with leukemia. Mr. Smithee is survived by his wife, Alice, and two daughters, Maurine, of Decatur, Illinois, and Inez, of Los Angeles, California. Five sisters, Mrs. Esther Sedgwick, of Tulia; Mrs. Cora Donnell and Mrs. Rilla Dickerson, of Silvertown; Mrs. Ollie McMurtry, of Vigo Park and Mrs. Edith Meeker, of Medford, Oregon; two brothers, Will and Scott Smithee, of Silvertown. Mr. Smithee was 75 years of age and the son of the late Mr. and Mrs. W. C. Smithee, Sr., early settlers of Briscoe County. He married Miss Alice Matthews, daughter of W. A. P. Matthews, an early day business man of Silvertown. They lived in Silvertown several years after their marriage, but had been living in Los Angeles for a number of years. Mr. and Mrs. H. Roy Brown were week end guests of their son and family, Mr. and Mrs. Durward Brown, of Plainview. Mr. and Mrs. Johnnie McClendon and son, of Texas City, visited her parents, Mr. and Mrs. D. N. McGavock and other relatives. Mr. and Mrs. Geo. Edmons, of Happy, visited her sister, Mrs. A. G. Stevenson and mother, Mrs. J. W. Bragg, Sunday.

Study Club Will Hold Open Meeting May 3 at Church

On May 3, at 3:30 the March of Time Study Club will hold its open meeting in the First Methodist Church. Members of the ladies organizations of the local churches, The 1925 Study Club and the Century of Progress Study Club are invited to hear Mrs. Elrod review "Shannon's Way."

Century of Progress Club Entertained with "Tacky Party"

Members of the Century of Progress Club and their husbands were entertained with a "Tacky Party" at the home of Mr. and Mrs. George Long on Friday night, April 13. Hostesses were: Mrs. O. C. Rampley, Mrs. James Davis and Mrs. Long. Prizes were given to the "tackiest" man the "tackiest" woman. The evening was spent playing "42". Refreshments of sandwiches, cakes and popcorn balls were served by the hostesses. Attending were: Mr. and Mrs. O. C. Rampley, Mr. and Mrs. James Davis, Mr. and Mrs. J. W. Brannon, Jr., Mr. and Mrs. Billie Wood, Mr. and Mrs. L. S. Youngs, Mr. and Mrs. Fred Garrison, Mr. and Mrs. Edell Hutsell, Mr. and Mrs. Willie Amel Smithee, Mr. and Mrs. Edwina Dickerson, and Mr. and Mrs. George Long.

Visit in Hereford

Mr. and Mrs. Clyde Wright returned Friday night from Hereford where Mr. Wright, moderator, presided at the Spring session of the Amarillo Presbytery, and gave the opening address. Mrs. Wright visited her sister, Mrs. Harry Seed, who entertained with a "family party" in her honor. Mr. Wright was elected chairman of the Men's Council of the Amarillo Presbytery.

Rev. and Mrs. Roy Riley and Mrs. Geo. Owen and daughter, of Quitaque, attended the revival at the Baptist Church Tuesday night.

Rev. and Mrs. Roy Riley and Mrs. Geo. Owen and daughter, of Quitaque, attended the revival at the Baptist Church Tuesday night.

Mrs. Jack Coffee, of Las Anamos, New Mexico, spent the week end with her parents, Mr. and Mrs. W. T. Davis. Mr. Coffee stopped off in Amarillo to visit his father.

Mrs. Jack Coffee, of Las Anamos, New Mexico, spent the week end with her parents, Mr. and Mrs. W. T. Davis. Mr. Coffee stopped off in Amarillo to visit his father.

Mr. Earl Malone, of Vigo Park, visited Mrs. Gid Mayfield Saturday.

NATIONAL 4-H SUNDAY

The importance of prayer will be emphasized by Texas 4-H members in their observance of National 4-H Sunday, April 29. Programs throughout the state are being planned around the 1951 4-H theme, "Working Together for World Understanding."

"As each 4-H member attends the church of his choice, it is the hope that there will be awakened a new realization of the power of prayer," says M. L. Wilson, national director of Extension Work.

4-H Sunday occurs the fifth Sunday after Easter. It is closely linked with Rogation Days, celebrated for centuries in the Christian Church during the three days preceding Ascension Day. It is an outgrowth of Rural Life Sunday, which was first observed in 1929.

"4-H Sunday emphasizes the H that stands for heart," declares Erma Wines, assistant state 4-H leader. She says it presents an opportunity for 4-H Club members to give expression to the character development that takes place through 4-H activities.

Miss Wines reports that Director Wilson and Gertrude Warren, national leader of 4-H Work, stressed the factors that contribute to the moral steadiness of youth in speeches before a meeting of Southern Regional State 4-H Leaders and Directors at Lakeland, Florida, during the week of April 1.

ROTARY HOE REDUCES LABOR COSTS

Many Texas cotton growers are cutting their production costs by using rotary hoe attachments on their tractors.

Chester Huddleston of Crosbyton says, "By using rotary hoes

on 300 acres of cotton in 1949, I saved 75 percent of my chopping bill."

W. R. Kimbrough, county agricultural agent, reports that there were 1000 rotary hoes owned by 700 farmers in Crosby county.

In 97 Texas counties, there were 10,004 rotary hoe-equipped tractors in 1950, says F. C. Elliott, Texas A and M College extension cotton specialist.

Elliott emphasizes that the rotary hoe equipped tractor must be operated at high speeds—at least four and one-half miles an hour. Five or six miles an hour is better.

He cautions against setting the rotary hoe too deep. While the depth of setting will depend on soil and plant conditions, the spoke points should not be run more than two inches deep.

Use of the rotary hoe allows earlier planting in areas where a crop of weeds is usually killed before planting. Elliott points out that the rotary hoe can also be used to cultivate peanuts and corn.

He suggests that farmers who are not familiar with this piece of equipment ask their local farm machinery dealers for a demonstration.

S. T. Bingham, of Commanche, Texas, is visiting his brother, J. B. Bingham this week.

Mrs. Conrad Alexander and daughter, Marcia, visited over the week end with her father, Mr. Rempley at Clarendon. Mrs. Alexander's mother is a patient in Amarillo hospital, and she visited her mother last week.

Mr. and Mrs. Wayne Crawford and daughter, Mary, visited her parents, Mr. and Mrs. J. C. Morton in Goree Saturday. Mrs. J. C. Morton and grandson, Buddy, accompanied them home for a visit.

Hobbyist Grows Pearls; Clams Used in Tests

ST. LOUIS, Mo. — Andrew C. Heckenkamp wouldn't believe that salt water oysters had a monopoly in the pearl growing industry, so he went to work. Now he and some Missouri clams are busy making pearls in big fresh water tanks in his basement.

He started the project back in 1944. He had a little knowledge of pearls and heard that some fresh water mussels had yielded gems of value. After consulting scientists he began his experiment with Missouri clams.

The pearls he has grown have real commercial value, he says, but he won't give details.

The first experiments were on the Black river in the Missouri Ozarks. Heckenkamp and associates began the tedious task of agitating the clams—inserting sand-like particles under their shells.

First Tests Fail

This is done with an instrument similar to a hypodermic needle, the rough particle irritates the clam and causes it to emit a milky substance which cloaks the irritant and hardens into mother-of-pearl. He put in long hours on his Black River experiments, but they produced no results.

If the clam is forced open for an inspection it often dies. The problem was how to keep a watch on the pearl growth and keep the clam healthy.

At the first Heckenkamp and his helpers coated the irritating particles with a lead type metal which would show up in rays. This proved ineffective. The clams quickly covered the metal or disposed of it.

At this point, Heckenkamp decided to move the clams into tanks in his basement so that he could keep closer watch. New techniques were developed. Heckenkamp finally learned just how and where to insert the irritant so that it wouldn't be expelled.

He says he has produced a number of pearls. Only recently he opened a clam that had lived undisturbed for more than four years in his aquarium. In it were four small pearls.

100 Clams at Work

"Now we know we can produce here," he observed. "The hobbyist of tomorrow will probably concentrate on shell fish. Think of producing a \$1,000 or even \$10,000 pearl in your parlor goldfish bowl."

Heckenkamp says it isn't the size, but the quality of the pearls which determine its value. He sends his pearls to a New York jeweler.

Today Heckenkamp has about 100 clams in his basement and in outdoor tanks. The clams' diet is supplemented with occasional feedings of honey and brewers' yeast.

Heckenkamp likes the idea of clam pearls because they can be grown in shallow water where the harvest can be reaped without diving. Yes, perhaps even in goldfish bowls.

Pay for Shepherding Is Highest in History, Report

WASHINGTON, D.C. — There are plenty of jobs available these days for men who can live alone and like it while chaperoning thousands of strong-minded but misguided females.

For such a job applicants must have plenty of common sense, more than a little knowledge of psychology, and a capacity for endless walking. Their prospective charges are among the most unpredictable of their sex, belonging as they do to the sheep family.

Today, the wages offered for shepherding are the highest in the occupation's long and colorful history—about \$250 monthly and found (food and sleeping equipment). Yet a shortage of competent herders in the United States is so acute that late reports blame it for an "alarming" decrease in the nation's wool production.

In an attempt to remedy this deficiency, efforts are being made to bring to this country groups of the finest shepherders in the world, the Basques of northern Spain.

They are reputed to have not only the necessary experience but— even more important—the indispensable temperament for the job.

Vast School Outlay Needed, Citizens' Committee Says

WASHINGTON, D.C. — The Citizens Federal Committee on Education, an advisory group of the Federal Office of Education, estimated recently the nation will need more than \$14,000,000,000 in new school construction in the next decade. The committee said there will be needed in the next 10 years:

270,000 more classrooms—with 20 pupils to the room—"just to take care of the population increase." Estimated cost: \$1,290,000,000.

150,000 more classrooms to replace "all those firetraps and other school structures which should be abandoned." Cost: \$4,050,000,000.

60,000 more classrooms in the reorganization of school districts.

40,000 more for anticipated 1,200,000 new enrollments in kindergarten and junior-collect programs.

"In other words, over the next 10 years we will need at least 50 per cent more classrooms than we have now," the committee said.

PERSONALS

Mr. and Mrs. W. G. Byrd left Monday on a business trip to San Angelo. They were accompanied by a granddaughter, Esther Quantstron, of Happy, Texas.

Misses Jeanne Dudley and Maxine Ford, of Farwell, visited Sunday with Miss Dudley's parents, Mr. and Mrs. Milton Dudley.

Mr. and Mrs. Earl Brock and son, Bobby, and Mr. and Mrs. Glenn Merritt, of Dimmitt, visited in the home of Mr. and Mrs. L. K. Gilkeyson Sunday afternoon.

Mr. and Mrs. John Arthur Arnold were business visitors in Plainview last Wednesday. They visited Buddy Stalcup, who is a patient in the Plainview hospital. Mr. Stalcup is slowly improving.

Mr. and Mrs. Jim McNeese, of Turkey, visited last Sunday in the Lee D. Bomar home.

PERSONALS

Mrs. W. L. Messimer visited Saturday afternoon in Quitaque with friends.

Mrs. Lane, of Slaton, visited Sunday and Sunday night in the home of Rev. and Mrs. H. M. Secord.

Mr. and Mrs. Leo White and daughter, Marsha Kay, visited in Floydada Sunday afternoon.

Mr. and Mrs. Billy Self, of Corpus Christi, are visiting his parents, Mr. and Mrs. M. B. Self, and Mr. and Mrs. Otis Honea, of Quitaque.

Mrs. W. Allard made a business trip to Tullia Saturday.

Rev. and Mrs. H. M. Secord and Mrs. Lane, are spending this week at Ceta Canyon, making arrangements at the camp for the encampment which will be held soon.

Mr. and Mrs. Carl D. Bomar and Mrs. W. C. Burleson visited Mrs. Bruce Burleson in Amarillo Thursday. Mrs. Burleson's condition is unchanged.

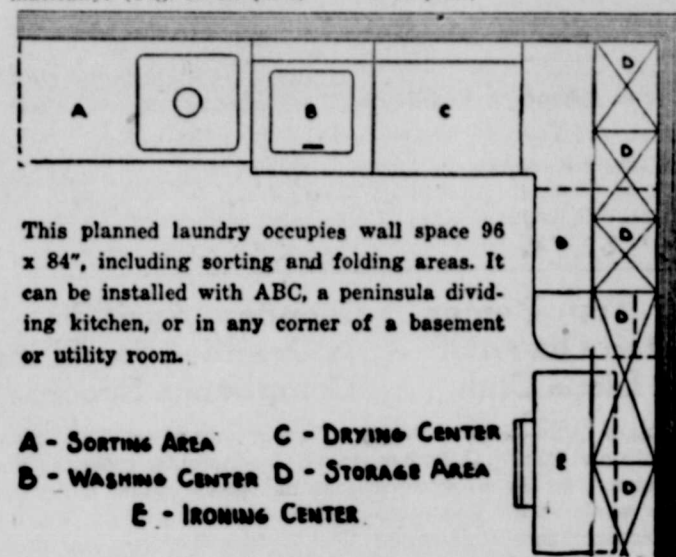

Streamlined Home Laundry Fits Any Place—Basement, Utility Room or Kitchen

The first step in a streamlined home laundry is filling the machine, adding the soap, inserting the clothes and starting the machine. Machine washes and spins clothes dry and stops automatically. (Fig. A on plan)

Here a young housewife has removed damp dried clothes from washer and places them in adjacent dryer without taking a single step. Nine pound washer load makes one dryer load. (Fig. B on plan)

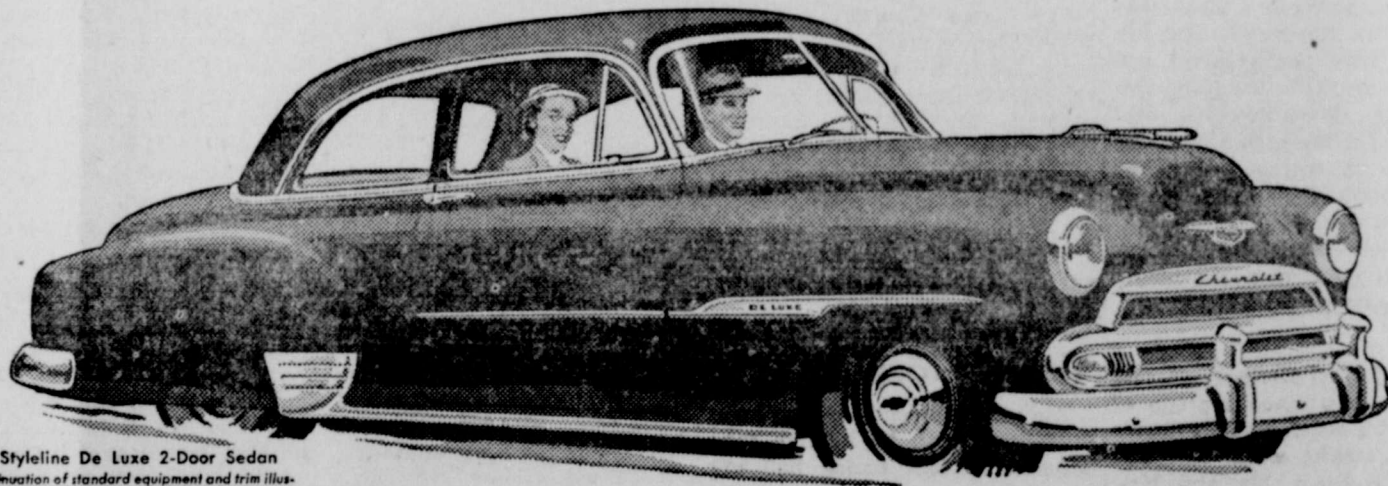

Towels and several other items in average family wash are fluffed by tumbler dryer and folded for storage. Overhead cabinets in planned laundry give storage space for items used nearby. (Fig. C on plan)

This planned laundry occupies wall space 96 x 84", including sorting and folding areas. It can be installed with ABC, a peninsula dividing kitchen, or in any corner of a basement or utility room.

Washer to dryer to ironer is modern "production line" way this young housewife does her family laundry. Her automatic equipment gets job done in fraction of time required by old-fashioned hand methods, and she can keep an eye on other household chores while washer and dryer operate "hands off" at setting of dials. In first step, she puts soiled clothes in washing machine, and selects water volume and temperature so she won't waste water, soap. Then damp-dry clothes go into new dryer that fits beside washer. Dryer has ingenious mechanism that drains off moisture and lint into drain, keeping steam and lint out of room. Clothes come from machine fluff-dried; she folds towels without ironing. Then she sits down to flat work, shirts, using rotary ironer. L-shaped home laundry plan was designed by specialists at Hotpoint, newest leader in production and planning of automatic laundries. Note arrangement of centers equipped with cabinets for storing supplies where they are used. All equipment shown here operates at a few cents a day.

America's Largest and Finest Low-Priced Car!

The Styleline De Luxe 4-Door Sedan
(Continuation of standard equipment and trim illustrated is dependent on availability of materials.)

LARGEST!

Only Chevrolet in the Low-Price Field Can Say

IT'S LONGEST!
197 1/2 inches

Line up all the cars in the low-price field, and you'll find Chevrolet the longest. Looks longest, is longest.

IT'S HEAVIEST!
3140 lbs.*
(shipping weight)

Chevrolet is a solid value. Outweighs all others in the low-price field. Greater weight gives that big-car feel.

IT HAS THE WIDEST TREAD!
58 1/2 inches
(rear wheels)

Full measure in every dimension... Including the widest tread in the low-price field for exceptional roadability.

Ask for More Trained Men For Animal Disease Study

Solution to some of the nation's most costly animal diseases is being slowed by lack of highly trained research men.

There is urgent need for giving promising young scientists an opportunity to learn the techniques of animal disease investigation.

The only way this can be done is by a long range fellowship program. Such a program has been sponsored by the AVMA for the past six years.

Under this program, which will be expanded as funds permit, research-minded graduates of colleges of veterinary medicine get financial aid to engage in animal disease studies at leading scientific institutions.

This gives them background and experience needed for unraveling highly complex diseases.

Many livestock and pet owners who ask for "more research to solve disease problems" have given too little thought to how the job might be done.

Finding out what causes a perplexing animal disease isn't much different from tracking down a dangerous criminal, and neither is a job for anyone but a well-trained person.

The Federal Bureau of Investigation would not put a man on any of its cases without first training him in FBI methods.

The same advantage should be given to people interested in disease investigation.

Funds for expanding the fellowship project should come from private sources rather than the federal government "because the nation already has gone too far toward dependence on federal hand-outs."

Mastitis Germs Live 5 Days on Broomstick

Harmless though it may look, that broom in the corner of the barn might be the means of starting a new case of bovine mastitis.

The germ responsible for most cases of bovine mastitis can stay alive for as long as 20 days on objects around the barn, and for as long as 26 days anywhere on a cow's skin.

From these jumping-off places, the germ may eventually get into a cow's udder, where it starts the disease known as mastitis.

Survival time of the germ was observed after mastitis-infected milk was poured on manure, hair, wood, bricks, udder cloths, and other materials commonly found or used around dairy barns.

The germ stayed alive for 4 days on rubber boots, 5 days on a broom handle, 7 days on an udder-washing cloth, 8 days on a bucket, 13 days on hair, and 20 days on hay.

However, when some of these objects were treated with a disinfectant before being smeared with infected milk, the germ didn't do so well.

Enough of the disinfectant lingered to cut down the survival time to a day or less.

This research emphasizes the need for clean barns, clean cows, clean attendants, and prompt disinfection of any object that gets splattered with milk.

Use of Columbium

John Winthrop, Jr., who supervised the construction of America's first successful blast furnace at Saugus, Massachusetts, in 1643, found an unidentified rock fragment near his home.

About 150 years later, an English chemist, Charles Hackett, saw this fragment in the British museum, analyzed it, and thus discovered the element columbium.

Today, this element is playing an increasingly important part in the manufacture of stainless and heat resistant steels for such uses as jet aircraft engines.

Columbium is one of the most recent elements to find use in the steel industry. It was used commercially as an alloy in the 1930's, although experimental work had been done with it as early as 1920.

Last year \$23,000 pounds of columbium metal was consumed in the manufacture of steel.

Origin of Camouflage

The origin of the word camouflage has, it seems, been lost in the shuffle. One of the stories told in connection with it is that, during the Indian troubles in the Southwest, one Jacques Camou built a circular mud fort.

This fort had large square openings at regular intervals around the walls. Through these, the garrison of the fort would fire. As the Indians' shots also found their mark through these openings, Camou painted the entire fort like a checkerboard.

With large black squares on a white field. This confused the Indians so they were unable to determine at which dark squares to aim.

Thermal Snow Removal Thermal snow removal from sidewalks and driveways by means of embedded piping is a new and interesting development in the heating industry.

The snow is removed automatically and without effort by the heat from pipe coils installed under the surface of the pavement.

Hot water, circulated through the coils, transfers its heat to the pavement, thus melting the snow and keeping the surface dry.

Automatic snow removal is economical. There is no necessity for using snow shovels or chemicals. All the owner does is to turn the switch to start the system in operation when it snows.

Cabbage Being Studied For Medicinal Property

Jiggs—the pebelean new-rich of comic strip fame—is due these coming months for many a feast on his favorite dish of corned beef and cabbage.

The 1950 autumn cabbage crop exceeded 760,000 tons, 30 per cent above last fall's output and 36 per cent larger than average.

Such production indicates increased use of a vegetable long considered humble but, in fact, popular since before the birth of Christ.

From the time of the early Egyptians (who are reputed to have worshipped the cabbage) down to the present day, this vegetable has been cultivated not only for its food value but also for its alleged medicinal properties.

The Greeks believed it had the happy property of keeping a man clear-headed through banquets where wine flowed freely.

The Romans, in 300 B. C., advised the use of mashed cabbage in the healing of wounds.

According to modern scientists, the Romans may not have been far wrong. New studies of a germ-killing substance in cabbage indicate that it destroys, to some extent, staphylococci, common germs in wounds.

It also is believed to have a beneficial effect on some intestinal bacteria.

Despite its long use, no one is quite sure where the cabbage originated. Most evidence points to the eastern Mediterranean and Asia Minor, although the known ancestor of cultivated varieties—the wild or sea cabbage—is found today primarily along the chalk cliffs of England, and on the coasts of Denmark and northwestern France.

Shot Gun Shooters' Faults Outlined by One Who Knows

The difference between a hit and a miss in wing-shooting often lies in that very slight distance between the shooter's cheek and the stock of his gun.

There should be no distance at all between the cheek and the stock. The expert wing-shot makes sure that the gun stock is against his cheek before he pulls the trigger.

This, with practice, becomes an instinctive movement that is one of the prime essentials in good shooting. Raising the stock to the cheek allows the shooter to quickly gain a true "sight-picture" and helps him to refrain from making the all-too-common error of raising his head just before firing.

Raising the head causes the gunner to shoot high, the most common fault among shotgun shooters. "Keep your head down" is one of the cardinal rules in good shooting and its strict observance must be practiced if the charge of shot is to strike the object at which the shooter thinks he is pointing.

Most gunners realize immediately upon touching off the trigger whether or not the gun was properly pointed. In trap shooting a few sketchy breaks will warn the shooter that he is not holding right and that he is "scratching" 'em down with the edge of his pattern.

The fellow who shoots with both eyes open (and this is the proper method) is more apt to raise his head a bit and shoot high than the chap who closes one eye for the latter is more inclined to "sight" his shotgun rather than "point" it.

Kinds of Christmas Plants

In the United States it may be noted that each section of the country has its own favorite Christmas plants, depending upon the species that grow conveniently at hand or that have been shipped in long enough for the people to become accustomed to them.

By and large, the conifers, as a class, supply us with most of our Christmas trees, true firs (Abies), Douglas fir (Pseudotsuga), and spruce (Picea) being preferred to all others.

Although balsam fir (Abies balsamea) at one time led in popularity as a Christmas tree and is especially prized at present in the north-eastern states, it has in recent years been supplanted in various sections of the country by Douglas fir (Pseudotsuga taxifolia), a relative newcomer to the scene.

To Fight Radiation

Although an atomic explosion in the air does more immediate damage, the ground or water explosion creates radioactive clouds of spray or dust which are carried by winds to surrounding areas.

These airborne radioactive particles contaminate whatever they touch. If you are near an area damaged by a ground or water explosion, keep calm. Do not touch anything. Keep your mouth and nostrils covered to avoid breathing in radioactive dust or spray.

As soon as possible, wash with soap and clean water. Change to uncontaminated clothing. Bury contaminated clothing. If you must leave the area, take nothing with you that might be contaminated.

Flying "Trees"

In aircraft manufacture, the woods most commonly used are American mahogany, hard maple, persimmon, black walnut, African mahogany, Douglas fir, birch, sweetgum, western hemlock, noble fir, sugar pine, spruce and yellow poplar.

These are, naturally, carefully finished. Where the wood is selected for its beauty of grain, the finish is chosen to enhance it as well as to protect the surface and facilitate its maintenance.

FREEDOM OF THE PRESS

Last week we discussed the religious freedom that exists in the United States and the obligations that parallel that freedom.

This week, on examining another freedom we find that that same rule holds true. In delegating to posterity the freedom of the press, our forefathers automatically delegated to us rigid obligations that in all cases should be observed.

Freedom of the press guarantees a paper the privilege to print any thing they so desire. But in order not to abuse that privilege journalist should observe the rule not to print anything but the facts as they can be obtained.

In the past many journalists refused to do that and so necessitated the institution of the libel law, that provides for the prosecution of any one or paper that deliberately mis-represents the facts or leads to the detriment of any person's character, un-necessarily.

At times it seems difficult for a newspaper writer to get all the facts and at times are tempted to make-up some of their own. This is true in only a few cases, because any one who is in the newspaper business usually so love their work that they will not do anything to hurt its prestige.

To the contrary, the majority of journalists will go to great lengths to get a story—and get it right. Because they know that in order to respect their heritage of the press's freedom they must observe the first rule of journalism and always get it right!

LIONS CLUB VS. SENIORS IN VOLLEYBALL GAME

The members of the lions club will play the senior boys in volleyball, Monday night, April 30, 1951, at 8:00 p. m.

The lions club team is managed by Fred Mercer and Ralph Glover. The game will start at eight o'clock. The best two out of three games will state the winner.

SIXTH GRADE A AND B HONOR ROLL

James Ross Alexander, Roy Deavenport, C. L. Dunn, W. L. Messimer, Jimmy Whitfill, Gay Callaway, Rose Ann Dennis, Barbara Grabbe, Evelyn Jones, Carolyn Martin, Carlye Monroe, Gevelyn Paige, Doyle Clark.

FIRST GRADE HONOR ROLL A AND B

Eddie Black, Robert Hughes, Rob Renfro, Nancy Jane Brooks, Barbara Kay Fisch, Carolyn Garrison, Becky Mallow, Mona Kay Mayfield, Sandra Kay Mercer, Joyce Thomas, Ann Wingo, Marsha Kay White.

SECOND GRADE A HONOR ROLL

Dale Francis, Norma Faye Rowland, Celene Lanham. A AND B HONOR ROLL Joe Anderson, Freddie Scott, Dunham, David Schott, Doris Ann Estes, Cleatrice Miller, Joy Ann McCutchen, Darla Diane Peugh.

THIRD GARDE A HONOR ROLL

Frankie Lou Hunt, Marsha Monroe. A AND B HONOR ROLL James Clemmer, Bobby Crass, Elaine McDaniel, Dickie Mayfield, Sydney Mills, Joyce Thornton, Rita Weldon.

WHAT THE STUDENTS PLAN TO DO WHEN SCHOOL IS OUT

Zephyr Bingham, go to work. Sam Lusk, go to work. Billy Wayne, go to work. Red Stephens, go to work. Norman Jasper, go to work. Joe Brooks, go to work. Buford Clemmer, go to work. Jack McFarlin, go to California.

Mary and Carol, Kay and Darrell were all together Sunday afternoon and night.

MAY DAY

The first day of May is celebrated as May day and is very interesting and beautiful. Flowers are decked in churches and the may pole with its streamers are attached to it.

The May queen that is chosen is very beautiful and must fit in with the glow of the day and its happiness. Her court is set up in a little flowery bower which she leaves at times to dance. Her loyal subjects are with her around the maypole.

It is hardly ever celebrated in the United States but in England and other countries it is very popular.

SEVENTH GRADE

Jean Shy went to Possum Kingdom, near Fort Worth Saturday evening. With her parents of course. Jo Ann Rowland and Sue Smith went to Church at Tulia Sunday.

Mr. Ellis wants all the kids of the school to know that he would rather not be called "Moe."

FIFTH GRADE HONOR ROLL

Janice Donnell, Marjorie Autry, Sharon Eddleman, Abbie Self, Kay Garrison, Carson Grabbe, Leah Dare Kellum.

F. F. A. NEWS

The FFA teams in crops, grasses, and livestock will go to Lubbock on Saturday, April 28, to enter the area contest which is held annually at Texas Tech.

The teams have been studying hard and expect to place in the higher bracket. The livestock boys seem to be exceptionally good this year as they have already won a first place at Canyon. The other teams have not had a trial yet so it remains to be seen as to what they can do.

MOTHER DAUGHTER BANQUET

This is the week for the Mother-Daughter banquet and invitations have been sent out to the mothers of the homemaking girls.

The girls are planning and working on it this week. This will climax the foods unit for this year. The second year girls are going to make children's garments which will be modeled by the children when they are finished and the freshmen are going to study family relationship and home nursing.

FLOMOT VS. SILVERTON TUESDAY, APRIL 24

A game was played Tuesday, April 24, between Flomot and Silvertown baseball teams. The starting line up was: O'Conner, C; Monday, P; Jasper, 1st B; Bean, 2nd B; Hyatt, S.S.; Brooks, 3rd B; Dean McWilliams, L F; Bingham, C F; Tension, RF.

MUSIC NOTES

Carl to Millie—I Love You Truly. George to Sandra—For Ever and Ever. Carol to Mary—I Love You 1,000 Ways.

Darrell to Kay—Let Me Call You Sweetheart. Buddy to Helen—I Love You Because. Freddie to Ann—Darn It Baby, That's Love.

Junis and Richard, Kay and Darrell were in Plainview Friday night. Genuine Frigidaire Refrigerators at Simpson Chevrolet Co.

GOSSIP

Millie and Carl were in Quitaque Saturday night and Lubbock Sunday afternoon. Junis and Dean, George and Sandra were all together Sunday night.

Nosey heard Eudean stayed at home all week end. What's the matter Eudean. Milton and Valitra, Jackie and Sandy were in Vigo Sunday.

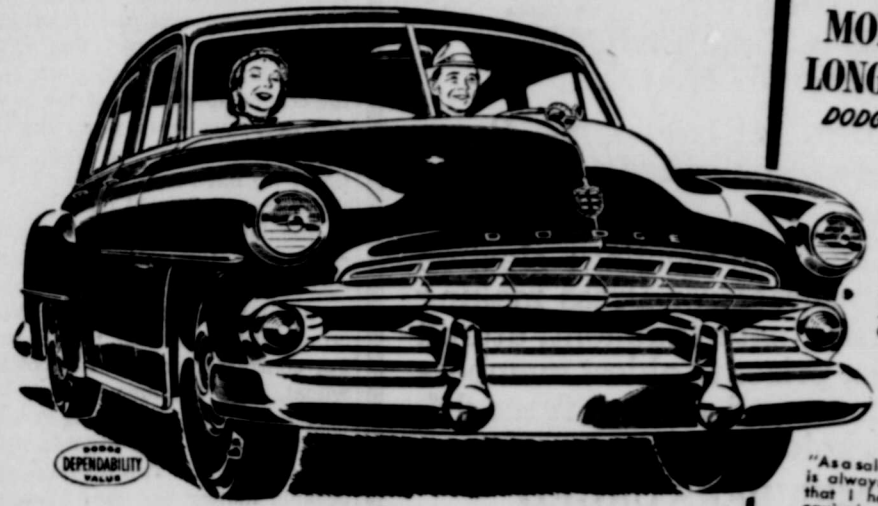

Lettie was in Plainview Sunday alone, we hear.

Mrs. Clyde Mercer and children and Mrs. H. C. Mercer were visitors in Tulia Saturday afternoon.

Mrs. H. C. Mercer returned last Thursday from Abel Hospital, Lubbock, where she has been for medical treatment for several weeks.

DR. JAMES L. CROSS Veterinarian 116 N. Dallas Street TULIA, TEXAS Residence Phone 497-W

Owner after owner...Year after year-says "IT'S DODGE FOR DEPENDABILITY"

MORE MILEAGE LONGER CAR LIFE DODGE OWNERS TESTIFY "NOW DRIVING MY FIFTH DODGE!" "My big 1951 Dodge is more than living up to the Dodge reputation for dependability, ruggedness and low cost of maintenance. It's the fifth dependable Dodge I've owned." -Says Geo. A. Hughes, Grosse Pointe Farms, Michigan "I'VE PUT THE EQUIVALENT OF FOUR YEARS' DRIVING ON MY '50 DODGE!" "As a salesman, my 1950 Dodge is always on the go. I figure it's already put the equivalent of four years of average driving on it—with-out spending any appreciable amount of money for repairs." -Says Harry H. Hurs, Houston, Texas

You could pay up to \$1,000 more and still not get all the extra room, riding comfort and rugged dependability of Dodge

TAKE THE WORD OF OWNERS WHO know Dodge value and dependability from actual experience. "No major repairs in four years' driving" . . . "After driving another make less than a year, I'm back with Dodge again" . . . "Driven my Dodge 150,000 miles and it's still going strong." These are not unusual comments in letters we receive from Dodge owners coast-to-coast. Dodge dependability starts with a heavy, rugged frame, a "Get-Away" engine "speed-proofed" to resist wear, designed to be a miser on gas.

There's a safe, rigid, all-steel body, rubber-mounted to eliminate rattle and squeak. New Safer, Smoother Ride Dodge Oriflow Shock Absorbers "float" you over roads that stop other cars, cushion vital chassis parts against road shocks . . . make them last years longer. Take 5 minutes to check Dodge dependability in long life, extra comfort and safety, low-cost maintenance and gas economy. Come in today for the complete Dodge story.

Specifications and equipment subject to change without notice. 1951 Dependable DODGE Drive It Five Minutes And You'll Drive It For Years

COTTON SEED

There is a great scarcity of good planting seed.

We have a limited supply. Several varieties of Delinted and a few fuzzy seed. They won't last long, see us immediately for your cotton planting seed.

FARMERS GIN COMPANY

PHONE 107 SILVERTON, TEX

The Supervisors of The Cap Rock Soil Conservation District are: Chairman, Earl I. Cantwell; Secretary, Chester Burnett; Guy Edens, L. A. McJinsey and Glynn B. Morrison.

One important conservation practice that has been mentioned little, and used less, in the Cap Rock Soil Conservation District is crop rotation. By having erosion resisting crops in the rotation, soil loss and run-off are reduced to a large extent and the land can actually be built up. The value of the land is increased whereas the cost of application of the practice decreases from year to year.

When we speak of crop rotations, we have in mind the use of those crops that will be beneficial to the land such as close grown crops and legumes. Of course, cotton followed by peanuts would be a rotation but neither of these crops protect or add to the soil. For contrast, in rotation of cotton, wheat, and legumes, the wheat produces stubble for wind erosion protection and adds organic matter to the soil. The legumes add organic matter and also nitrogen. Therefore, the land is being continuously built up for higher cotton production on less acreage. Also, the legumes and close grown crops furnish extra income. If a systematic crop rotation is followed it just adds up to more money for the farmer.

Why do the farmers in the Cap Rock Soil Conservation District object to a systematic crop rotation? Most of the farmers I have talked with object because it will cut down the acreage of their cash crops such as cotton. Of course, this is true, but it is compensated by the fact that higher production will be had on less land, with less labor as the rotation practice is carried out. Would you rather make 20 bales of cotton on 40 acres, or 20 bales on 20 acres? In addition to increasing the production of the cash crop a rotation offers the further advantages of income, from other crops, protection and building up the soil, and greater water intake by the soil. It will cut down on the need of fertilizers, but crop rotations and fertilizers benefit each other.

I think we can readily see that the advantages of a systematic crop rotation far out weigh the disadvantages. When the change is first made, it will mean some

additional expense to the farmer, but in the long run he will be more than repaid for his time, trouble, and expense.

Anemia in Pigs

Blood studies in horses, which revealed the cause of a fatal type of jaundice in foals, offer a new clue to the prevention of baby pig losses. Horses belong to blood groups, much as people do, and the mare and the stallion to which she is mated may be of conflicting blood groups. When this happens, the two kinds of blood do not mix as they should during the fetal development of the foal. Anemia and jaundice develop after the newborn foal consumes its dam's milk, which contains the conflicting properties, and death often follows in a few days unless the foal is transferred to a nurse-mare.

It is highly probable that certain types of anemia seen in baby pigs are caused by blood factors which operate in a manner similar to those found in horses.

Where We Get Pepper

Pepper is native to the East Indies. We import most of ours from India and Indonesia, with lesser amounts from various parts all within a 1000-mile radius of Singapore. Pepper vines are trained to climb poles or other supports like a grape vine. Berries appear within two or three years of planting, although the vine does not attain maturity until the age of seven or eight years. When ready for harvesting, the berries look like clusters of red currants. While spread out for drying they change color and shrivel, finally becoming the black wrinkled berry with which we are familiar.

Cabbage Production

In the United States, New York leads in the production of cabbage for both fresh and sauerkraut markets. Texas and Florida, with winter crops, are close competitors in the fresh market. Wisconsin rates second in the output for sauerkraut. Cabbage—whose name is an Anglicized form of the French word "caboche" (head)—is a member of the Brassica family which includes such diversified types as Brussels sprouts, cauliflower, kale, broccoli, turnip and rutabaga. It is generally classified in terms of head shape and comes in three colors—green, white and red (magenta to purplish).

SAN JACINTO NEWS

Mr. and Mrs. Curtis Latham and sons visited in the Vernon Roper home Sunday.

Mr. and Mrs. Woodrow Bice and children, and Theron Culwell, visited in the J. M. Kemper home near Tulia Sunday.

Ret Monroe Latham visited in the Floyd Latham home Saturday night and Sunday. He is stationed at Camp Carson, Colorado.

Mr. and Mrs. Loyd Heim and daughters visited in the Murray May home Sunday.

Mrs. R. T. Darnell was called to Amarillo the past week. Her father, Mr. Enoch was sick.

Mrs. Stanley Cobb and son, Ronnie, visited relatives at Elk City, Oklahoma over the week end.

Miss Vicki Culwell entertained her friends with a slumber and birthday party Friday night and Saturday.

Friday night, April 27, is party night at San Jacinto. Pie and cocoa will be served.

Misses Shirley Elms, Dorothy Langston, Patricia and Fay Culwell visited in the Cilford Flowers home Sunday.

Miss Laverne Dorman, of Dallas, visited her parents, Mr. and Mrs. H. L. Dorman over the week end.

Misses Jeanne Dudley and Maxine Ford, of Farwell, visited Sunday with Miss Dudley's parents, Mr. and Mrs. Milton Dudley.

PERSONALS

Mr. and Mrs. O. J. Seago, of Hartley, visited Mr. and Mrs. A. D. Arnold Saturday afternoon. Mr. Seago is a nephew of Mrs. Arnold. Mr. and Mrs. Melvin Watkins, of Amarillo, visited her parents, Mr. and Mrs. Bud McMinn Saturday night and Sunday.

Mr. and Mrs. Buster Wilson had as their Sunday dinner guests Rev. and Mrs. G. A. Elrod, Rev. Carl Grissom, Geo. Owen, Mr. and Mrs. Albert Rowland and daughters, visited Mr. and Mrs. Harold Hall in Tulia Sunday.

Always Pay!

"The bonds Mae and I bought for our country's defense will provide retirement for us!"

MR. AND MRS. FRED E. DIETRICH OF CLARKS GREEN, PA.
CAN TELL YOU—IT'S PRACTICAL
AS WELL AS PATRIOTIC TO BUY BONDS FOR DEFENSE

"Retirement with financial security is more than just a dream to me," says Fred Dietrich, route man for the Burschel Dairy. "I've a real start toward it now, with 115 U. S. Savings Bonds bought through Payroll Savings."

"Since I joined the Payroll Savings Plan in 1941," says Mr. Dietrich, "I've saved over \$3,000 in bonds out of my \$75-a-week salary. If you don't save regularly, you never save at all."

"I'm planning to continue buying bonds till the day of my retirement. They give me that comfortable feeling that I'm on my way to carefree security in the years that follow after I quit working!"

You, too, can save successfully - just as the Dietrichs do!

You, too, may reach your goal, as the Dietrichs are doing, and easily. *Start now!* It takes only three simple steps.

1. Decide to put saving *first*, before you even draw your pay.
2. Save a regular amount *systematically*, week after week or month after month.
3. Sign up *today* in the Payroll Savings Plan where you work or the Bond-A-Month Plan where you bank.

You'll be providing security for yourself, your family and our free way of life.

U. S. SAVINGS BONDS ARE DEFENSE BONDS—BUY THEM REGULARLY!

Dependent Indian Citizenship Within U.S. Still on the Job

ARRHEN, Pa. — Strange as it may seem, there is an independent Seneca nation within the United States. Every year the congress appropriates \$6,000 for treaty goods for the Seneca Indian nation. This item is included in the annual budget and is required by the terms of a treaty between the Senecas and the United States shortly after the Revolutionary war. The same treaty provided for other relationships between the two countries, including the independence of the Seneca nation.

Their territory covers, roughly, the Allegheny river valley for some 100 miles north of the Pennsylvania border. The Senecas are pure Indians, the most part speaking their own language instead of English. They have their own laws and are subject to the white man's law for seven major crimes. If there are disagreements with their neighbors, they take the matter to Washington, as any other citizen would.

Some U.S. cities built in Seneca territory pay taxes to their nation. Salamanca, N.Y., a thriving town with a center with about 12,000 population. The Seneca - United States treaty gives more than token attention. About 15 years ago United States engineers proposed to build a flood control across the main stem of the Allegheny as part of a project to protect Pittsburgh.

However, it would have flooded the settlement of the Seneca nation, so it was never built. About half the Senecas continue their worship in the manner of their ancestors. And at a long house near Allegheny river, Indians in costume take part in ceremonial dances seen by white persons. The Senecas are so old that no one today remembers what the various means mean.

Gen. Eisenhower Is Rated Nation's Best Dressed Man

NEW YORK, N. Y. — Gen. Dwight D. Eisenhower, rated one of the top military men of modern history, has been rated the nation's best dressed man—in or out of uniform.

The general, now in Paris, headed the National Association of Retail Clothiers and Furnishers poll at their annual convention. He received more first place votes than all the other candidates for honors combined. Eisenhower was chosen for his typical American look—always neat, never flashy. The rest of the top 10: Comedian Bob Hope; Thomas F. Murphy, New York state commissioner; Ed Herlihy, radio and television master ceremonies; Phil Rizzuto, New York Yankees shortstop; Alfred Lynn Vanderbilt; Dan Seymour, TV producer; Gregory Peck of the movies; Edward G. Robinson, carpet manufacturer, and Murray, comedian.

Chemicals Developed to Slow Cancer Growth

BERKELEY, Calif. — Dr. David Greenberg and Dr. E. M. Gal, University of California scientists, announced recently a new group of chemicals which slow the growth of cancer have been discovered. The new compounds soon will be tested on humans in the university's medical center. They are called malononitriles.

The researchers have produced about 30 kinds of malononitriles, of which showed some effect against animal cancer. One of the most was particularly potent. There are scores of chemicals effective against cancer in one way or another, but none has been accepted by medical science generally as the answer to the problem of cancer.

The malononitriles are made by joining together malonic acid, a non-chemical used in making plastics, and hydrogen cyanide, a poison used in gas chambers for putting criminals to death. Greenberg and his associates do not know why some malononitriles are effective against cancer. That is one of the things they are attempting to find out.

War's Joke on Parking Ticket Has a Sad Ending

LITTLE CREEK, Mich. — Last night, Pl. Francis Dailey was issued a parking ticket. At the time he was stationed at Fort Custer, but Dailey had time to do anything about it he was shipped to another post. The ticket was forwarded to him there.

December back came a letter from the good natured soldier to the violations bureau. He believed this is the first time a man received a ticket for parking in a foxhole," he wrote. "The summons states that the officer will be sent for me if I don't answer. Tell him to please go so we will make it home for holiday."

Dailey sent Chinese money to pay the fine and wished everyone a merry Christmas. The hall workers signed a big Christmas card and mailed it to Dailey. The card came back ready to be creased and soiled. Across the envelope where Dailey's address had been printed, someone had written "Deceased."

Dan Cupid Loses Out as a Cause For Jobless Pay

CHICAGO, Ill.—Dan Cupid takes a beating whenever he runs into unemployment compensation laws. He is not considered "good cause for leaving a job," a requirement for jobless pay in most states, according to a commerce clearing house survey.

"When a person quits a job to be married, or to be near a spouse or fiancée, that person is deemed to be withdrawing from the labor market and, therefore, is subject to the disqualification provisions of most unemployment compensation laws," says the CCH report, published in its labor law journal. Recent examples of head-on crashes between Cupid and the compensation boards are cited in the survey.

Claim Is Denied

A Pennsylvania woman quit her job to be married and moved to another state. The state supreme court held that her act was voluntary and added, gloomily, "Marriage is not a surrender to circumstances of the kind and quality that compel a decision to leave one's employment. . . no legal obligation rests upon a claimant to marry or join her fiancée."

Cupid did a little better in Illinois, but the claimant did not. In this case a married man lost his job in a city and went to live with his parents in a small town. His wife quit her job and went with him. The circuit court, more sympathetic than that of Pennsylvania, held that she had left with good cause. This was an empty victory, however, since the court added that she was not eligible for benefits anyway. She had left a large labor market for one with very limited possibilities for employment.

In far-off Hawaii, a radio announcer's wife left him and returned to the mainland with the intention of getting a divorce. He quit work to follow her and try to talk her out of it. The ruling was that while he may have left for "good cause," it had nothing to do with his employment. He received no benefits.

Married Women Lose

Married women have not fared very well, either, in cases where they wanted to spend more time with their husbands. One woman told a prospective employer that her husband was a municipal fireman who got his time off in forty-eight-hour stretches, and on those days she would not be able to work. The employer did not hire her, and the holding was that she had refused work without good cause.

Another woman whose husband's workday ended at 7 p.m., quit after the first day on a job where she started work at 3 p.m. Her claim was disallowed when it was shown that she knew about the hours before she accepted the job.

"While it is undoubtedly true that love will find a way," says commerce clearing house, "on the record it does not seem that the unemployment compensation laws will be helpful."

Emperor's New Car Reflects Japan's Foreign Leanings

TOKYO, Japan — Emperor Hirohito of Japan has a new automobile. Observers report it is a true indication of the international leanings of that country.

They figure it this way. During the early days of his reign, the son of heaven rode around in an English Rolle-Royce, reflecting the pro-British tendencies of the day.

While the Tokyo-Berlin axis was in gear, the emperor bought himself a maroon Mercedes-Benz. The five-ton German sedan had bullet-proof window glass and a thick body of steel plating specially designed following the "Sakurada incident"—when a fanatic attempted to assassinate the emperor.

Now, after months of high pressure salesmanship by American car manufacturers, the imperial household has bought a gray Cadillac complete with heater, radio and push button windows. On his first ride around town, spotters reported observing the emperor happily manipulating the automatic windows.

Modern Pled Piper 'Leads' Children to Safety With Jig

HOLBROOK, Mass. — A modern piper played an Irish jig and led four children out of the woods near Holbrook recently. The children, cold and wet, were huddled in sleep beside a boulder when the sound of the jig awoke them. Thinking it was a parade, they began to walk toward the music.

The jig emanated from a public address system atop a police car. An officer had been driving on a road near the woods, calling the youngsters' names from the PA system. He picked up a broadcast on his radio and switched it into the loudspeaker.

A short while later, the children, Richard Bates, 6; his brother, Thomas, 8; David Stewart, 9, and David's sister Dorothy, 7, were found by one of more than 400 persons who had searched for them throughout the night.

Spraying Defends Homes Against Disease

CHICAGO, ILL.—Common flies and mosquitos are known to carry and spread more than 30 communicable diseases. Research indicates that a single house-fly often carries up to six million germs on its hairy body. With the approach of the insect season, health authorities are urging consistent spraying as one of the most effective ways to destroy these pests and prevent disease.

Atomic Engine To Run 10 Years On Little Fuel

RALEIGH, N.C. — North Carolina State College plans to run its new atomic reactor for 10 years on four gallons of a green-yellow liquid fuel that is about as heavy as ginger ale.

Even at the end of 10 years of non-stop operations this wonderful four gallons still will be good, but will have to be purified of the new atoms which will have been created by splitting of uranium. Maybe a pint of fresh fuel will have to be added to run it another 10 years.

All the time there will be no smoke, no fumes, no sound except a slight bubbling noise made by the liquid just starting to boil. It will never reach real boiling.

Safest Engine Built

It is probably the safest engine ever built, certainly about the coolest. It won't get hot enough even to start a fire. It can't explode—by atomic, by radioactive or any other internal force. Lightning can't explode it, even an earthquake cannot wreck it sufficiently to create a hazard beyond some escaping radioactivity that can be avoided completely by keeping a short distance away.

The reactor will be about the size of a two-car garage. Even if a saboteur were to blow it sky-high, the only risk, barring falling bits of concrete or metal, would be scattered radioactive fragments. The greatest risk probably would be the souvenir-hunter who put a piece in his pocket and leaves it there a long time.

Construction is expected to be completed this year, along with a building and laboratory. The public will be permitted to look at this reactor, close-up, through a window which is really a goldfish bowl: Plate-glass sides with eight inches of water between.

The atomic engine is a cylinder of stainless steel, one foot in diameter, containing the green-yellow liquid. That is all. There isn't anything else, except the shields of lead, graphite and concrete and pipes for cooling and some rods which start, stop and control the heat and splitting.

New to Education

The little steel cylinder does it all alone. Its atoms split, the splitting creates heat and, along with the heat, neutrons go flying away at speeds of 10,000 miles a second.

The liquid is purified uranium 235. About 80 per cent of the liquid is this bare uranium.

This reactor is the start of something new in education—four-year undergraduate courses in nuclear engineering, plus courses looking forward to graduate degrees. The purpose is to educate professional experts for atomic age.

Already 60 students have started the course. Half are air force officers, a sign that American military planes may be expected to take to the air and stay aloft for weeks, if they wish, flying on atomic power. The others are university students of all classes, including candidates for master's degrees.

The plan is to graduate men and women with nucleonic degrees, but who have well rounded training also in the humanities and the engineering sciences. They can, if they choose, graduate in ordinary engineering, but they will have the additional atomic training. The nuclear part of their courses will take 11 per cent of the time.

Truman Shies at Elephant Gift from Eastern Kingdom

WASHINGTON, D.C. — President Truman has many troubles, and not the least is the gifts people send him. The latest problem is a sacred elephant that the tiny kingdom of Cambodia offered.

Mr. Truman has no place to keep the animal and the Washington Zoo already has enough elephants. So, the U.S. has cautiously suggested that it might be better for Cambodia to send a tiger. The zoo could use one.

The tiger-or-the-elephant problem is one of the first to arise between the U.S. and the Kingdom of Cambodia, which was part of Indo-China until a year ago.

President Lincoln dealt with a similar embarrassing elephant problem back in 1862 in a letter to the King of Siam, politely refusing a herd of elephants.

Saleswoman Halts Runaway Truck at Busy Crossing

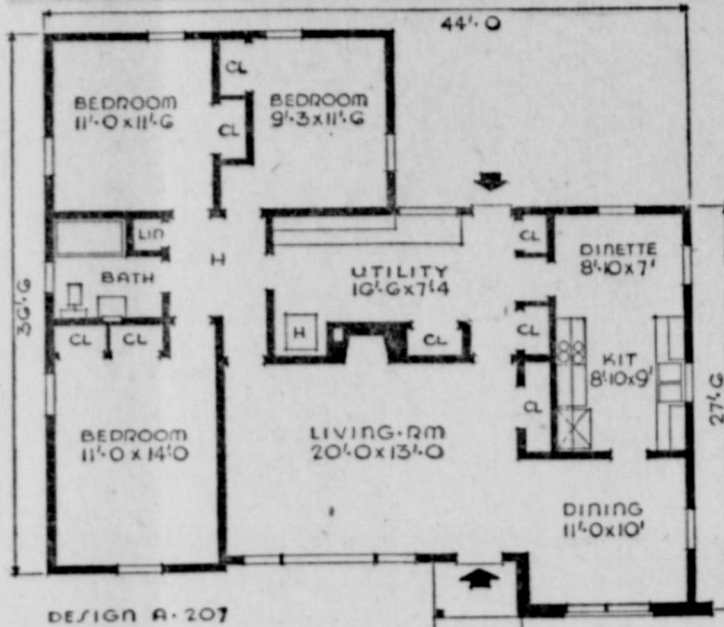

PAWTUCKET, R. I. — Miss Theresa Sullivan, 23, a saleswoman, leaped aboard a driverless runaway truck, stamped hard on the brake, and halted its downhill course barely 10 feet from the busy Main Street.

Afterwards the attractive brunette couldn't account for her deed. "Why did I do it? I don't know," she said. "I just did it. And I'm still shaking."

Miss Sullivan was returning to her job behind a hostery counter, walking down hill, when she saw the truck rolling along beside her without a driver.

Witnesses said the girl leaped on the running board, seized the wheel, slid into the driver's seat, and jammed down the brake pedal.

A HOME TO LIVE IN

SMALL HOUSE PLANNING BUREAU, ST. CLOUD, MINNESOTA

Design A-207. A large utility room, with three closets and a cabinet, substitutes for a basement in this plan and houses the heating and laundry equipment.

A galley-type kitchen with cabinets on opposite walls allows for a large cross-lighted dining space in the kitchen. In addition, there is a separate dining room opening from the living room. There is a double glazed picture window and fireplace in the living room.

Wardrobe closets in the bedrooms, three closets in the utility room, linen cabinet and coat closet provides for storage needs.

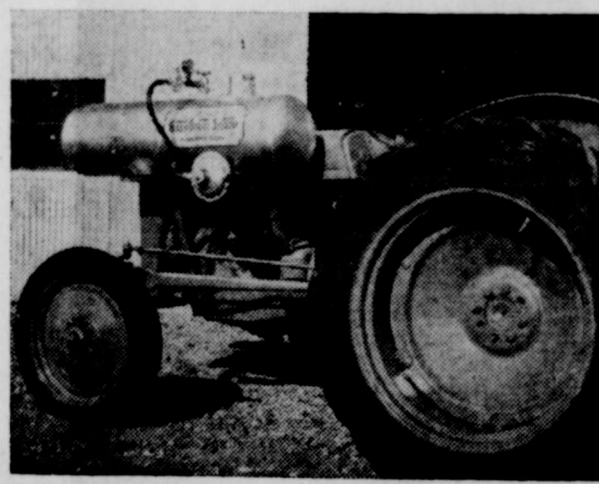

The first floor is an insulated slab on gravel fill. Exterior finish is asphalt shingle roof, wide siding and a touch of brick in front.

Floor area is 1392 square feet and cubage is 16,356 cubic feet. For further information about this plan see your local lumberman.
