## Booby Blast Is Fatal To James Hoyt Hill

### Hill Was a Former Resident of Silverton --Burial Here

Childress, Texas, April 15—James Hoyt Hill, 41 year old prominent Childress dairyman, was killed instantly by a blast from a planted bomb as he started the motor of his pickup at 4:55 a. m. this morning.

The blast occurred at Hill's farm, approximately one-half mile southeast of Childress.

Hill apparently had just started his pickup to go to the dairy barn to milk his cows.

Mrs. Lois Fowler, Hill's niece who, with her three children live at the Hill place, generally helps with the morning work and rides in the pickup to the barn also. She was not ready this morning and decided to walk.

Parts of the pickup were scattered over a wide area, one piece tearing through a hog wire fence and tearing into the house approximately 65 feet away.

The blast apparently set the pickup on fire immediately and either killed or knocked out Hill.

Hill's body, burned beyond recognition, was lying on the floor of the pickup.

His body was not torn, which would indicate that the bomb was placed under the seat of the pickup, according to the Newberry Funeral Home.

Two wires attached to the generator with temporary snaps and wires led into the cab of the pickup, indicating that the car had started to produce electricity to set off the bomb.

Hill operated, in addition to his dairy farm, Hill's pasteurizing plant and bought milk from several of the county's milk producers. The plant is located northeast of Childress.

No one had been able to give an explanation of why anyone would want Hill's life.

He was a friendly man and apparently had no known enemies.

"I have known Hoyt and his family for several years and I considered him one of the finest men I have ever known," said Dr. E. E. White, pastor of the Methodist Church.

#### Born at Silverton in 1911

James Hoyt Hill was born May 15, 1911, at Silverton, Texas. He moved to Childress about 10 years ago.

Funeral services were held Wednesday afternoon at 2 o'clock in Childress Methodist Church, conducted by Rev. E. E. White, pastor. The body was brought overland to Silverton and interment was made in Silverton Cemetery under direction of Douglas Funeral Home.

Survivors include one son, James M. Hill, who is attending school at San Marcos; two sisters Mrs. Bertha Burson, of Childress, and Mrs. A. D. Childress, of Silverton; five brothers, W. B., J. C., Bob, Richard and Bailey, all of Silverton, and his stepmother, Mrs. R. M. Hill, also of Silverton.

#### JIM HARDIN IS IN JAPAN

F. A. Jim Hardin, son of Mr. and Mrs. W. R. Hardin, landed at Kobe, Japan, April 5, he advised his parents. Jim's address is: F. A. Jim Hardin, 4609097, USS Constellation Ah-15, c-o of Fleet Post Office, San Francisco, California.

Mr. and Mrs. Bryan Jones and daughter, of Electra, spent the Easter holidays with her parents, Mr. and Mrs. A. A. Dunagan.

### N. L. Powers, M. D. Opens Office in Silverton

N. L. Powers, M. D., formerly of Quitaque, announces this week that he has moved to Silverton and has opened his office in the Smithes place around the corner from the Silverton Hotel.

Dr. Powers, formerly of Scott and White Hospital, Temple, Texas, and until recently practiced in Quitaque.

Dr. Powers' announcement appears elsewhere in this issue of the Briscoe County News.

### Commissioners Steele and Dudley In Car Accident

Alton Steele and Milton Dudley, both commissioners of Briscoe County, were victims of a car accident about 11 o'clock Saturday night in the north edge of San Angelo, Texas. Mr. Steele was driving Dudley's car and as they approached an abrupt corner they met a car that was driving too fast and could not negotiate the turn, causing Steele to pull his car as far out of the way as possible, but did not get out of the way of the oncoming car. Dudley's car was completely wrecked, and he received minor bruises and an injured ankle. Steele was more seriously injured. He received a shattered elbow and a broken rib, and considerable bruises. The other car was driven by a Mexican and several Mexicans were in the car, none were reported injured.

Norlan Dudley was notified here of the accident and he and grandfather, H. Roy Brown, went to San Angelo Sunday and brought Milton home. Mr. Steele remained in the hospital, and Mrs. Steele went down Monday to be with him. He is reported to be doing nicely.

Dudley and Steele were returning from Brownwood where they attended the State Judges and Commissioners Convention Friday and Saturday.

#### FARMERS MONTHLY MEETING

The monthly meeting of the Briscoe County Farm Bureau will be held in the court house Monday night, April 21, at 8 o'clock. The program will be of special interest to farmers who have irrigation and farmers who are interested in building up their soil. All farmers are invited to attend.

Mrs. Ollie Cox, of Amarillo, visited last week in the home of her sister, Mrs. W. W. Reid.

Mr. and Mrs. J. C. Johnson and children, of Tulia, Mr. and Mrs. Leroy Shipman and girls were visitors of Mrs. W. W. Reid and Percy Sunday afternoon.

Mr. and Mrs. Walt Perkins and daughter, Wilma Joyce, have moved to Hereford to make their home.

Mr. and Mrs. D. T. Northcutt, Mary Frances Dudley and Mary Lou Bellinger, spent the week end in Roswell, New Mexico.

Mr. and Mrs. Paul Stanford and girls, of Lubbock, spent the week in the home of her parents, Mr. and Mrs. D. H. Davis.

Mrs. Elmer May, and Mike, Miss Virginia May, were visitors in Floydada Sunday afternoon.

### Last Rites Held For Riley Seay Tuesday Evening

Last rites were held Tuesday afternoon at 3 o'clock at the First Baptist Church for Riley Seay, age 92, conducted by Rev. W. H. Cox, of Amarillo, assisted by Rev. G. A. Elrod, pastor local Baptist church. Interment was made in Silverton Cemetery under direction of Douglas Funeral Home.

Mr. Seay was born June 28, 1860 in Marion County, Alabama, he passed away April 14, 1952. He had been in failing health for sometime. He was married to Miss Loretta Hamilton, November 1, 1883. He moved his family to Briscoe County in 1908. Mr. Seay was a member of the Primitive Baptist Church. Mrs. Seay preceded her husband in death, April 25, 1951.

To this union was born twelve children, nine of whom are still living, three children, Mrs. F. T. Lee, of Quitaque, and two infants, Mittie and Gaither, preceded their parents in death.

Survivors include six daughters, they are: Mrs. W. A. Holt, Mrs. J. A. Ziegler and Mrs. Olive Wallace, of Silverton; Mrs. S. J. Ellis, of Plainview; Mrs. G. H. Boyce, Center, Colorado; Mrs. Birdie Austin, of Albuquerque, New Mexico; three sons, U. G. Seay, Dallas; Dewey Seay, Tulia and Riley Seay, Lancaster, California. Mr. Seay is also survived by 49 grandchildren, 87 great grandchildren and 8 great great grandchildren; two brothers, M. A. Seay, of Childress, and Joe Seay of Detroit, Alabama.

**Out of Town Relatives and Friends**  
Mr. and Mrs. J. Pointer, Mrs. Lee Driver, Quitaque; W. H. Brooks, Borger; Mrs. Elmer Terry, Mrs. Duddy Mayfield, Mr. and Mrs. Roy Bass, Lubbock; Mr. and Mrs. Lorraine McCain, Amarillo; Mr. and Mrs. Roy Vaughan, Mr. and Mrs. Alton Seay, Mr. and Mrs. Jack Seay, Dewey Seay, Mr. and Mrs. Dickie George, Tulia.

Rev. and Mrs. Britain, Olton; Mr. and Mrs. J. D. Ellis, Mr. and Mrs. Applegate, Hale Center; Mrs. Handley, Mrs. J. S. Hill, Lockney; Mr. and Mrs. Bird, Mr. and Mrs. M. A. Seay, Childress; Mr. and Mrs. W. G. Seay, Jr., Mr. W. G. Seay, Sr., Dallas, Mrs. E. J. Wagner, Mrs. Birdie Austin, Albuquerque, New Mexico; Mr. and Mrs. Charlie Ellis, Mr. and Mrs. Mallow, Mr. and Mrs. Bob Greer, Mr. and Mrs. Pollie Huntington, all of Plainview; Mr. and Mrs. Cline McClendon, Kress.

#### VISITORS IN C. C. STINSON HOME FOR HOLIDAYS

Mr. and Mrs. C. C. Stinson had as their guests during the week end holiday, their children: Mr. and Mrs. Leon Stinson, of Morton, Texas; Mr. and Mrs. J. H. Clayton and children, of Morton, Texas; Sgt. Billy R. Stinson, of Carswell Air Force Base, Fort Worth, Texas; Miss Corinne Stinson, of Dalhart, Texas, and Miss Mary Dale Stinson, of Denton, Texas.

Miss Corinne Stinson is County Home Demonstration Agent of Dallam County. Miss Mary Dale Stinson is a student at Texas State College for Women, Denton, Texas.

Mrs. J. E. Henderson spent the week end in Gainesville visited her son and family, Mr. and Mrs. Roy Henderson. Roy brought his mother home and attended to business here Monday.

### Ceremony Is Read In Hardin Home For Their Daughter

The marriage of Miss Joyce Hardin of Lubbock, daughter of Mr. and Mrs. W. R. Hardin of Silverton, and Arlas Cavett of Fort Worth, son of Mr. and Mrs. M. R. Cavett of Olton, was read at 5 p. m. Saturday in the home of the bride's parents.

The Rev. G. A. Elrod, pastor of First Baptist Church here, officiated at the double ring ceremony before an arch decorated with white Easter lilies and flanked with tapers in candleabra.

W. R. Hardin gave his daughter in marriage. She wore a white two piece dress with gored skirt and jacket embroidered with aqua. Her shoulder length veil of lace was attached to a white cap with a band of aqua stephanotis across the top. Her bouquet was of white orchids with a background of stephanotis. She wore her mother's wedding band.

**Sister Is Attendant**  
Miss Ouida Cavett of Lubbock, sister of the bridegroom, was maid of honor. She wore a dress of aqua shantung similar to the bride's and a corsage of white carnations.

Serving as best man was Bill Crabtree of Levelland. A reception followed the ceremony in the home. The wedding cake, composed of three heart-shaped cakes, was decorated with pink and white. Miss Billie Ogletree of Lubbock served punch. Miss Pat Ballard of Lubbock served cake.

For a wedding trip to Mexico, the bride wore her wedding ensemble with a white hat with aqua trim, aqua accessories and a deep rose coat. The couple will be at home in Fort Worth after April 27.

The bride graduated from Texas Tech in 1950 with a BBA degree in business. She has been employed by Great Western Drilling Company, in Lubbock for two years. Cavett was graduated from Tech in 1948 with a BBA degree in management. He is employed by Stanolind Oil and Gas Co. in Fort Worth.

Mr. Cavett served three years in the U. S. Navy.

#### LOUIE REITHMEYER REMAINS CRITICALLY ILL

Louie Reithmeyer, who is a patient in the Northwest Texas Hospital, Amarillo, remains critically ill, according to reports Wednesday. Reithmeyer was first carried to Tulia hospital for treatment, and later moved to the Amarillo hospital where his illness has been diagnosed as "Sleeping Sickness."

Pfc. Buck Hardin, of Fort Leonardwood, Missouri, arrived home Friday night for a short visit with his parents, Mr. and Mrs. W. R. Hardin, and attended the wedding of his sister, Miss Joyce Hardin, Saturday evening to Arlas Cavett, of Fort Worth.

Mr. and Mrs. J. W. Lyon, Jr., were in Amarillo Sunday, while here they visited Mr. and Mrs. M. K. Summers. They report Mr. Summers' condition as slowly improving.

Lucille and James Ray Clemmer spent the week end at Hart visiting Mr. and Mrs. Bill Swindle. Mr. and Mrs. Jim Clemmer went after their children Sunday afternoon.

Mr. and Mrs. Harley Redin and son, of Plainview, visited Saturday with his parents, Mr. and Mrs. Alvin Redin.

### Mrs. Ben O. King Guest Speaker at Lone Star Club

Mrs. Ben O. King, of Silverton, was guest speaker when Lone Star Home Demonstration Club of Floyd County was host to the Sunny Side Home Demonstration Club of Floydada.

Mrs. W. M. Hartman was hostess lady at her home. The home was decorated in tulips and other Spring flowers along with Easter motifs.

Guests were greeted by Mrs. Raymond Teeple, program chairman, and co-worker. Each guest was presented an Easter chick corsage to wear.

After a very descriptive introduction, Mrs. Teeple introduced Mr. Wily D. Nance, who gave the group accordian music entertainment.

Mrs. Bailey Henderson, gave a reading.

Mrs. Ben O. King, of Silverton, who was guest speaker, gave a travel logue to Dallas, Houston, New Orleans, to Florida, Sarasota, to the home of the big cypress trees. A nice long stop at the Shrine Bock Tower. Other old and lovely cities, such as Natchez, then we were back home. The travel logue was very ably presented by Mrs. King and was enjoyed very much by the group of ladies.

Refreshment plates of sandwiches, cake, mints, iced punch, were served to the following: Sunny Side Home Demonstration Club members, Mesdames W. D. Burke, S. J. Latta, Roy Curry, Claude Price, Robt. Day, W. H. Hilton, C. W. Denison, Fay Hart, J. J. McKinney, Will Snell, John T. Hopper and W. A. Lovell.

Guests, Mrs. Ben O. King and Mrs. O. T. Bundy, Silverton Miss Wanda Hartman, Lubbock, Mr. Wiley D. Nance, Lockney.

Members Lone Star Club present were: Mesdames Hubert E. Frizzell, W. D. Nance, Raymond Teeple, C. L. King, Mark Martin, Bailey Henderson, Albert King, Ben McGhee, A. O. Foster, Carl Capers, M. D. Hartman.

Mrs. Bailey Henderson, Reporter.

### W. S. C. S. of Methodist Church Met Monday

The W. S. C. S. of the Methodist Church met Monday afternoon at 2 o'clock for the first of a series of four studies entitled "The Family."

We had fifteen members present and will meet at 2 o'clock for the next three studies.

Mesdames H. M. Secord, M. G. Moreland, Gordon Montague, gave very interesting parts. Mrs. Arnold Turner gave the devotional and the meeting was dismissed with a prayer by Mrs. Joe Smith.

Recording Secretary.

Mr. and Mrs. Hugh Sanders, of Brice, spent Sunday with Mr. and Mrs. Hugh Stodghill.

Mr. and Mrs. Jim Mercer, of Pampa, visited from Friday until Monday with his parents, Mr. and Mrs. J. B. Mercer.

Mrs. C. L. Cowart returned home last Tuesday from Savannah, Missouri, where she went for treatment several days ago.

Mrs. Fred Garrison, is visiting in Dallas with her parents, Mr. and Mrs. C. M. Barrett.

### Read the Label on Your Insect Controlling Compounds

The problem of controlling insects may soon become a major job on a lot of Texas farms. Never before in history have agricultural producers been asked to plant and harvest crops as large as those asked for in 1952 and Allen C. Gunter, entomologist for the Texas Agricultural Extension Service, says the final production figures for the year will reflect just how well crop destroying insects were controlled.

He says there is a lot more involved in a good insect control program than buying an insecticide and applying it to the crop. First he suggests that farmers secure copies of bulletins and circulars from their local county agents that describe the insects and list the recommended control measures. The second suggestion is of prime importance. Know what insecticide is needed and then read the label on the container to make sure that it is the one recommended, says the specialist.

### Little Diana Jo Seefeldt Honored on Fourth Birthday

Mr. and Mrs. Harold Seefeldt honored their little daughter, Diana Jo, on her fourth birthday, Monday afternoon at 3 o'clock with a party at their home.

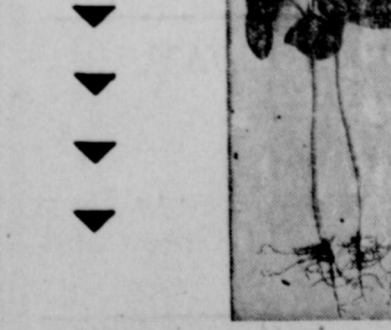

In and out-door games were played by the guests. Refreshments of sandwiches, punch and cake was served to the following children and their mothers: Gail Whitfill, Martina Williams, Sharla Francis, Wayne Nance, Truett Brannon, Joe Bob Watson, Cliff and Jimmy Walker, Ronnie Brown, Johnnie Seefeldt, and the honoree, Diana Jo Seefeldt.

Mr. and Mrs. Kenneth Jones spent Sunday with relatives in Brownwood.

#### VISITORS IN C. R. BADGETT HOME OVER WEEK-END

Mr. and Mrs. C. R. Badgett had as their guests over the week end Mrs. Frank A. King, Houston; Mrs. Dyke Boothe, Mrs. Mrs. Agnes Henshaw, Joe Brown, all of Fort Smith, Arkansas; Bill Brown, Los Angeles, California; Mr. and Mrs. Jack Brown, of Los Angeles; Mrs. Mary Bell Savage, Washington, D. C., Mr. and Mrs. Ray Savage, of Borger, Texas.

#### Mrs. Geo. Jones and Mrs. T. D. Wallace were business visitors in Lubbock Friday.

### For a BETTER COTTON CROP

PROPER SEED TREATMENT MAY MAKE THIS DIFFERENCE

The photo above shows ten good cotton seedlings, well on the way to the kind of growth which can produce a good crop of cotton. This is the result you may expect when properly treated cottonseed is planted... seed that has been treated with a recommended seed disinfectant.

Below, the effects of seed decay, sore-shin, and both pre-emergence and post-emergence damping-off are illustrated. This seed was not treated and this is one reason why it is often necessary to replant.

Treated seed can be planted 3 to 5 days earlier—can get off to a good start even in cool weather. Once a good stand is established and growing well your chance for a better cotton crop increases.

## More Stuff About Social Security To Look Into

"Don't stop too soon, but don't go too far," says John R. Sanderson, manager of the Amarillo Social Security Office.

Sanderson's plea is directed to the bookkeeper who fills out quarterly social security wage reports. Top amount for one employee in a year used to be \$3000. Under the new law, the ceiling is \$3,600.

"Some firms still seem to be reporting no more than \$3,000 even when the worker is making more than that," says Sanderson. "That's bad—a correction must be made, or the worker doesn't get full social security wage credit."

"Other firms report more than \$3,600 in a year for one employee," state Sanderson. In these cases, as he pointed out, the firm, and perhaps the worker too, have paid more than the required social security tax, but the worker can get old-age and survivors insurance wage credit only for \$3,600 in a year.

## Controlling Pond Weeds Improves Fishing

There are a lot of ponds and tanks—more than 150,000—on Texas farms and ranches that could be utilized for producing fish. Many of these tanks have been stocked with fish but where good fish pond management practices haven't been followed trouble is often caused by heavy growths of pond weeds. According to R. E. Callender, specialist in wildlife conservation for the Texas Agricultural Extension Service, these growths can be controlled.

He points out that pond owners should remember that pond weeds under control are beneficial. They provide excellent habitat for water insects and tiny crustaceans which are valuable fish food. They also provide hiding places for the smaller fishes and he suggests that such growths not be completely eradicated from the fish ponds.

### CARD OF THANKS

I wish to thank all my friends for remembering me during my illness with cards, letters and floral offerings. And especially those who donated blood.  
 SYBIL WATTERS.

### ENJOY EASTER EGG HUNT

Those enjoying an Easter egg hunt Sunday were Mrs. J. B. Sweek, of Mineral Wells, Mr. and Mrs. M. B. Self and Zobia; Mr. and Mrs. R. E. Sweek and girls, Mr. and Mrs. W. T. Masey and boys; Mr. and Mrs. Jim Brooks and Jane, Mr. and Mrs. Robert London, Mrs. Rags Riddle and Alton.

Mr. and Mrs. Bill Cox, of Plainview, Mr. and Mrs. Morris Moreland, of Amarillo, visited their parents, Mr. and Mrs. M. G. Moreland, Sunday.

### CPL. L. C. JASPER HOME

Cpl. L. C. Jasper, of Army Air Force arrived last Thursday to visit his parents, Mr. and Mrs. Milt Jasper. Cpl. Jasper has been in Japan and was given a twenty day furlough. He visited his wife in Oklahoma, and his parents from Thursday until Sunday when he left for Greenville, S. C., where he will be stationed.

### JUNIOR NEWS

It is getting close to April 18. That is the night of the junior-senior banquet. We have already sent out the invitations to the senior class and all the teachers. Everybody is working very hard to put on a good banquet. We will be decorating the gym this week.

Zephyr Bingham.

The young people of Silverton wish to express their appreciation to the Century of Progress Study Club for the tennis courts that were put in the park a few weeks ago. Everyone is enjoying the tennis courts and they are occupied practically every minute of the day. The tennis courts are not completely paid for and the study club is working very hard to get them paid for as soon as possible and we want to thank them again for their hard work and effort to help the young people in our town and community.

# Britain Spring Calendar Offers Many Attractions

NEW YORK—When the dark blues of Oxford and the light blues of Cambridge row their 250-pound shells from Putney Bridge to Mortlake-on-the-Thames on March 29, they will mark the 96th anniversary of the best-known sporting event of its kind in the world.

An annual event since 1856 when the crews wore top hats and, in comparison with the present-day effort, rowed almost in slow motion, the Oxford-Cambridge Boat Race today attracts visitors from all over the world.

### Seeking Win

This year Oxford hopes to erase its record of five years of defeat with a gimmick borrowed from America's Ivy League—a training barge in the form of a double-barreled shell, nicknamed "Leviathan." Rowed by sixteen instead of eight oarsmen, it's an aid to the coach in selecting a final crew.

Great Britain has given more sports to the world than any other nation, and the Spring sports calendar is especially good. The flat racing season opens March 26 with the Lincolnshire Handicap, at Lincoln, just three hours from London. On April 5, everything in Britain stops, including tea, for the greatest horse-racing event in the world—the Grand National at Aintree, Liverpool. Special four-day tours by air will be arranged for this event.

Visitors can also see American football's early ancestor—an old British sport called "Hare Pie Scrambling and Bottle Kicking." Played on Easter Monday in Hallowton, Leicestershire, it is one of Britain's many robust, colorful old customs, which are becoming more and more popular with overseas visitors. On Hare Pie Bank near the town, children scramble for pieces of yeast pies and villagers kick beer-belled casks toward the "goal-posts," two streams a mile apart. The scrimmage that results is clearly a relic of an ancient, if messy, form of American football.

Vivid sporting events in the crisp spring air are just one phase of Britain's early season offering, when a wider choice of accommodation prevails and the visitor can take advantage of low-cost travel rates.

### Theater Land

The Shakespeare Festival at Stratford-on-Avon will open on March 13, lasting until October 24, the longest season on record. Drama lovers find London a dream of good theaters, varied productions, and a long season, lasting practically the year round. One big attraction is the price: \$1 buys good seats. Another advantage is an early 7 o'clock curtain. No need for rushing through dinner (have tea instead); you'll be out early enough to explore the restaurants for a leisurely dinner after the play.

For art lovers, the Royal Academy's winter exhibition runs until March. Many of the paintings now on view are on loan from homes and palaces throughout Britain, and include works by Reynolds, Gainsborough, Lawrence, Turner and Constable. In addition, there's the National Gallery, the Wallace collection, the Tate Gallery, and many smaller showings sponsored by private dealers.

### American Ingenuity Broke Bottleneck on Instrument

ELGIN, Ill.—How American production ingenuity has perfected an "insurance policy" for ships at sea has been revealed by William H. Samelius, director of the Elgin Watchmakers College.

Samelius told how the U.S. jeweled watch industry, which had never made a marine chronometer prior to 1941, began production when European sources were inadequate to meet the demand during World War II.

Not only did the industry tool up from scratch for one of the world's most complicated timing instruments, Samelius explained, but it also improved on European methods by developing a new escapement and balance unit that could be replaced quickly in case the original unit was damaged.

Ship's chronometers, considered the most accurate timepieces manufactured, were developed in England and have been used since 1761 to provide an exact longitude check for ocean vessels.

### Young Woman Becomes Bride And Widow at Same Instant

LAROCHELLE, France—At the instant young Yvonne Bardin became a bride, she also became a widow.

Miss Bardin met Sgt. Jacques Guinau when he was on leave from Indochina. After he returned, they decided to be married by mail, a procedure authorized for French servicemen. The sergeant signed his part of the contract and put it in the mails.

Before the documents arrived in France, however, he was killed by a hand grenade. The girl's parents tried to have the absentee marriage stopped then, but officials ruled it could go ahead. So Yvonne became a bride and a widow before a mayor and witnesses.

### Geographers of Space Find Vast New Celestial Bodies

Geographers of space have discovered vast numbers of new celestial bodies, great and small, near by and far away, in previously unexplored regions of the universe.

The discoveries have been made in the course of a comprehensive Sky Survey now being carried on by the National Geographic Society and the California Institute of Technology at Palomar Observatory. They are described in a recent article by Dr. Albert G. Wilson, astronomer in charge of the program.

New clues have been uncovered to the mysteries of how large the universe is and how it is put together. New evidence is being collected on the question of whether all space is exploding outward at inconceivable speeds.

National Geographic's report marks the near half-way point in the four-year Survey, launched in 1949. When complete, an atlas of 1,670 photographic plates will be published. It will chart more than three quarters of the entire sky—all that can be seen from Palomar—and give astronomers enough material for a century of study.

Among the discoveries already made by Palomar's wide-angle 48-inch Schmidt telescope camera and the giant 200-inch Hale telescope are many new comets and large numbers of new "baby planets," or asteroids.

Farther out in space millions of new stars have been photographed. A new and far more detailed picture is emerging of the Milky Way, the galaxy or huge wheel of stars in which the earth and its solar system are located.

Faint luminous clouds of dust and gas, hanging in space between the stars of the Milky Way, are being revealed for the first time in Sky Survey photographs. Astronomers had long suspected this material was there; until now they have never been able to photograph it directly.

### Safety Director Cites Home Accident Causes

Most of the 4,000,000 yearly home accidents are due to ignorance or lack of training rather than to carelessness, according to Thomas Fansler of Chicago, director of the home safety division of the National Safety Council.

Mr. Fansler was one of the speakers on an "Occupation Housewife" program which featured the closing session of the twelfth annual Congress on Industrial Health, a national event.

He pointed out that the average housewife has little more training than that afforded by an elective home economics course in high school. With this, he added, she is expected to deal daily with steam and hot liquids, fire, sharp hand tools, glass and other fragile objects, detergents, harsh cleansers and abrasives, active poisons and complicated mechanical and electrical appliances.

"In a factory," he said, "a worker dealing with such materials would be given not only a complete set of protective clothing, including goggles, but also a complete course of training and instruction under supervision as to how best to do the job. Somehow, the young woman who gets married and sets up housekeeping is supposed to know how to do the work without hurting herself and other members of her family."

### "Into The Future"

The high-fashion colors developed for women's clothing often become so well liked that they subsequently appear as painted wall and fabric colors in the nation's homes. As a consequence, those who like to be in the vanguard of decorating styles keep an eye on the advance announcements of color stylists, such as the press bulletin of the Textile Color Card Association of the United States. Their current announcement of colors that will appear in the "silk and man-made fibres" line in the fall of 1952 include Garnet Red; Goldflake—a mellowed antique gold; two new blues: the greenish Kingfisher version and the hazy grayish shade—metal blue; Sugar-pine, an animated forest green; Copperglaze, an interesting spicy shade; Wood Iris, a rosy violine tone, and Dusky Gray, a hazy smoke type.

### Proving Up

Soldierly neatness is being required for Army personnel in Japan for a new reason. The troops have been reminded that their appearance can make a lie of the Communists' claim to the Japanese that the American soldiers are "the scum of the Yank Army." The Army's slogan is—"Remember, You Represent The United States."

### Why We Dream

Psychologists do not agree as to the cause of dreams, though probably the most general explanation is that the dream is the disguised fulfillment of a repressed wish. In other words, it is the safety valve of the unconscious through which possibly harmful tensions that have accumulated are drawn off in symbolic form. Some authorities go farther and say that the dream in addition is the voice of the unconscious as it tries to tell the conscious personality the individual's real aspirations. But, on the other hand, the view is also expressed that a dream is simply uncompleted business of the previous day.

### Fish of Aliases Lead Commercial Catch in U.S. Nets

WASHINGTON, D. C.—Menhaden—what are they?

Most inlanders and even some of the salty mariners who helped catch a billion and a half menhaden in U.S. coastal waters of the Atlantic in 1951 might fail to answer that question in a quiz program.

Yet more menhaden have been taken from American waters than any other fish species. The 1951 catch, when finally tabulated, will run just about one-fourth of the year's total of 4.4 billion pounds of U.S. commercial fishery product. Fish and Wildlife Service estimates indicate.

Oily, mealy, and bony, the menhaden has never been popular on American dining tables—a good reason why it is little known back from the Atlantic coast. More people come into contact with it, however, than with any other fish, since it yields oil widely used in making soap, paint, linoleum, and waterproofing compounds, and in tempering steels. The residue after oil extraction is ground into meal for farm animal and poultry feed. A small part of it is used as fertilizer.

Numerous aliases make menhaden unfamiliar by that name to some of the men who live by catching them. Along the Maryland and Virginia coasts they are known as bughead, bugfish, oldwife, alewife, greentail, and chebog.

Delaware adds mossbunker to the list. Connecticut's fishermen talk about whitefish, bonyfish, and bunker. Southward, Carolinians refer to menhaden as fatback and poggy. The menhaden is one of the many members of the herring family. Full grown, it weighs about three-fourths of a pound and measures a foot long. Its name is derived from a Narragansett Indian word meaning "enricher of the earth." The Indians well knew its value as fertilizer placing a fish in each hill of corn as they planted.

### Recuperating Polio Victim Aids in Rescue of Skater

NORTH HAVEN, Conn.—A 13-year-old polio victim, still wearing leg braces, crawled out on the ice in a pond here to help rescue a young skater who had broken through.

Danny Holt, a newspaper delivery boy who is recuperating from polio, was the first to reach Edward Ashby, 11, struggling in the water.

Stretching himself on the ice, Danny seized the younger boy by the arms and supported him until three other boys could pull him to safety.

Danny, stricken in 1944, is not able to skate himself.

### Professor Says More Honey Used if Food Value Known

STATE COLLEGE, Pa.—An increased number of consumers would use more honey if they knew its true food value, says Prof. E. J. Anderson, in charge of apiculture research at the Pennsylvania State College.

Clear, attractive honey on the market usually is filtered honey, yet tests conducted recently show that the filtering process sometimes removes certain ingredients and lowers the food value of the product, he explains. If consumers were fully aware of the situation, they would use more natural honey with its abundance of such elements as sugars, proteins, vitamins, and minerals, Professor Anderson believes.

For many years beekeepers have been trying to improve the appearance of market honey, and in most cases, the beekeeping scientist says, the heating and filtering operations needed for such steps actually reduce the nutritive quality of honey. In special experiments now under way, a new B complex vitamin was recently discovered in honey.

### Mobile Armed Forces Radio Stations Entertain Troops

TOKYO—Two mobile Armed Forces Radio Stations now are operating north of the 38th parallel in Korea, transmitting information and entertainment to frontline soldiers.

Master programming for the two 400-watt stations—known as Troubadour and Gypsy—is done at Taegu, Korea. The local programming comes from record libraries and tape recordings.

Operating 23 and one-half hours daily, the two stations have their own power units as well as short-wave receivers which pick up programs from Japan and the United States for re-broadcast to nearby troops.

### Hotel Menu Playfully Pokes Fun at Illinois 'Neighbors'

DELEVAN, Wis.—The recent horse meat scandals prompted the Colonial hotel here to print "a special menu for our friends from Illinois."

Owner Dich Sheehan says it is all in fun, but the "Stable d'Hote" offers: Pony of brandy, assorted horse d'oeuvres, horses neck, mareinated herring and soup a la sea biscuit.

"Mane entrees" are: Colt cuts and end tails, filly mignon, horse n' pfeffer, chow mane with curry, pancakes and stirrup, habletonian sandwich on thorough bread, and perch-eron.

### PERSONALS

Mrs. H. Roy Brown and Mrs. Arnold Brown, visited with Mr. and Mrs. Durward Brown in Plainview Saturday.

Mr. and Mrs. Gerald Vinyard, of Ponca City, Oklahoma, and Mrs. Kenneth Vinyard, of Chicago, visited Mrs. Avis Cowart and Mrs. Raymond Sanders Saturday.

Visitors in the home of Mr. and Mrs. Wylie Brown Easter were: Mr. and Mrs. N. A. Lyde and children, Mr. and Mrs. Roy Bomar and Roybeth, of Lubbock; Mr. and Mrs. Leo Comer and children; Mr. and Mrs. Burbs Momar and children, of Tullia, and Mrs. Pearl Simpson.

Visitors in the home of Mr. and Mrs. Ware Fogerson Sunday were: Mr. and Mrs. W. W. Stephenson, Tullia; Mr. and Mrs. Howard Stephenson, Happy; Mr. and Mrs. Lyde Spear, Amarillo; Mr. and Mrs. Orblee Baker and children of Amarillo; Mr. and Mrs. Odie Hudson, of Happy; Mr. and Mrs. R. A. Day, of Matador.

Mr. and Mrs. J. S. Fisher visited Sunday in Tullia with Mr. and Mrs. W. R. Humphries and family.

Mr. and Mrs. Ware Fogerson made a business trip to Lovis, New Mexico, last Wednesday.

Mr. and Mrs. G. D. Estes and family visited from Thursday until Sunday in Fort Worth with their daughter, Mr. and Mrs. A. J. Hamey.

Visitors in the home of Mr. and Mrs. T. D. Wallace recently were: Mr. and Mrs. Charlie Wallace, Bird Wallace and Mr. Waster, of Caster, Louisiana.

### Soil Conservation District News

New plantings of grass need care the first year, just as our other crops in the Cap Rock Soil Conservation District do. Young grass seedlings are very delicate and are easily killed during the first few months after they are up.

Many things are factors in producing a stand, or in eliminating it altogether. In this district, wind, weeds and livestock may figure in the above. A sandstorm may completely eliminate a planting of young grass if it doesn't have a stubble for protection.

Weeds can destroy a young planting by shading and using the available moisture. Weeds can be controlled by mowing or spraying. It may be necessary to mow more than once during the first year, but it usually isn't needed after that.

Livestock may seriously damage a planting of grass if allowed to graze it too closely. It is a good rule to completely exclude grazing for the first growing season. If the grass seeding has done well, limited grazing can be practiced after frost. Light, limited grazing after frost can actually be beneficial. A good rule-of-thumb is to never take over 1-2 of the year's growth. Take 1-2 and leave 1-2 on the ground.

Visitors in the home of Mr. and Mrs. Sam Brown Sunday were their children: Mr. and Mrs. A. A. Heard and children, Mr. and Mrs. Burton Lambert, of Fort Worth, Mr. and Mrs. Johnny Freeman, Dallas, Mr. and Mrs. Doc Brown, Tullia, Mr. and Mrs. Roy Brown and so, Dan, Mr. and Mrs. R. L. Brown and Ronnie.

Silverton.

Mrs. W. A. Rowell visited Sunday in Lubbock with relatives.

### The "Wear-Everywhere" Coat

ON BITING WIND AND COLD AND SNOW... his numb fingers bent around an M-1 rifle... this soldier is living with the same hardships suffered by General Washington's troops at Valley Forge 174 years ago.

His equipment is immeasurably better than any those first Yankees could have dreamed of. His chances of survival are equally improved. But, like them, he is doing a grim, hard job for the defense of his country.

Defense is your job, too. It is your job to maintain and support America's economic strength as this soldier is supporting her military strength.

It's an easy job...and one of the best ways to do it is by buying United States Defense Bonds regularly. For with bonds and other forms of savings you are making yourself and your country stable and strong. And America must be kept strong—economically as well as militarily. For we must always remember... in this cold-warring world, peace is only for the strong!

### The U. S. Defense Bonds you buy give you personal financial independence

Don't forget that bonds are now a better buy than ever. Because now every Series E Bond you own can automatically go on earning interest every year for 20 years from date of purchase instead of 10 as before! This means that the bond you bought for \$18.75 can return you not just \$25—but as much as \$33.33! A \$37.50 bond pays \$66.66. And so on. For your security, and your country's too, buy U. S. Defense Bonds now! Bankers recommend them as one of the safest forms of investment.

Peace is for the strong...  
Buy U.S. Defense Bonds now!

# MR. FARMER

F. M. Mitchell from Lorenzo will be in this vicinity the last week in April to do custom cottonseed cleaning and treating. If you have cottonseed to be cleaned and treated be sure to leave your name at the FARMERS GIN or SILVERTON FARM STORE.

Mr. Mitchell guarantees his work, he has good equipment and plenty of experience.

### New Concept of Cause Of Migraine Headaches Told

A new concept of the cause of migraine headaches—that they are the result of the disrupted equilibrium between love and aggressive or hate instincts—was expressed by Dr. A. R. Furmanski, of Van Nuys, Calif., associated with the Ross-Loos Medical Group, Los Angeles.

The basic incompatibility of these instincts requires that they be alternately expressed, or that one become dominant and the other inhibited. Dr. Furmanski stated in the Archives of Neurology and Psychiatry, published by the American Medical Association.

As long as this compromise can be maintained, little conflict results, he said. However, when certain needs are frustrated or the aggressiveness stimulated, the equilibrium is disrupted by the increase in hostility, and a migraine becomes manifest. This hostility is sometimes an unconscious one.

Dr. Furmanski based his theory on a study of 100 persons suffering from migraine, 65 of whom were women, and 35 men. The duration of the migraine ranged from one year to over 30 years, and appeared from before puberty to after the age of 40 years.

"In all the patients, the migraine attack began when hostilities accumulated beyond the individual's capacity for tolerance of frustration," he added.

Migraine tendency develops in childhood from the lack of demonstration of affection or from the strictness of training by the parents, causing frustration of certain needs, according to the article. In the group studied, 80 per cent of the patients considered one or both parents undemonstrative of affection, and 89 per cent considered one or both parents strict in training and discipline. One or the other of these two parental attitudes was present in all but one case.

### Supporting Our Government Tops Savings By \$20 Billions

Government revenues—Federal, State and local combined—have been running ahead of total private savings of the economy, business and individual together, by margins of \$20 billions or more every year since the end of World War II, according to figures compiled by the U.S. Department of Commerce.

For the five years, 1946-50 inclusive, the margin of aggregate Government revenues over private savings added up to a total of \$131 billions. These revenues come, for the most part, from taxes of various kinds.

Nothing even approaching such margins were recorded before World War II. The trend since 1945 indicates the extent to which the yearly charge on the economy for support of Government has been outstripping what the people and business have been able to put aside in savings annually. A part of this period, of course, was one of a defense build-up.

What this trend portends for the future of the economy and the traditional basis on which it has operated, time alone will tell, and may have far-reaching implications. Right now, the cost of Government is rising rapidly, primarily at the Federal level, because of the defense effort and the fact that taxes are being imposed to support it, instead of the Government's resorting to vast borrowing as it did during World War II.

### Fire Proofing

The Army Chemical Corps has developed an improved method of permanently fire-proofing cotton, woolen, and part-rayon fabrics. Treated fabrics will char but will not flame after being treated with the new chemical. The fabrics may be laundered, dry cleaned, or water-proofed without affecting the permanence of the fire-proofing. The cloth will not deteriorate any faster than untreated fabrics. The new technique has been tested extensively by Army Chemical Corps personnel working in plants producing incendiary bombs. Tests now are under way to determine whether this new fire-proofing method may have military possibilities.

### Twice Drafted

A Brooklyn-born sergeant, Natoli Domenico, not only has been drafted twice but he has been drafted by two different countries. Now a squad leader with the Eighth Infantry Division at Fort Benning, Ga., Sgt. Domenico was trapped behind the German lines in Italy, where he was attending school during World War II, and pressed into service in the Italian army.

### Golden Quills

California condors live to be 35 years old or more. Once they ranged the west coast from the Columbia River to Baja California. Now the last threescore members of this dying vulture family cling grimly to a rocky sanctuary in California's Los Padres National Forest, about 100 miles north of Los Angeles. The condor's claws are so weak that it can scarcely walk on them. It requires a lurching run or a sharp cliff to make a good takeoff. Once in the air, however, it can soar as high as 15,000 feet above the mountains, its nine- to 11-foot wingspan, second only to the wandering albatross of cold southern seas, giving it unbelievable grace.

### Brown Apples

What causes an apple to turn brown after it is exposed to the air? In apples, potatoes, etc., there is a compound called tyrosin. When exposed to the oxygen of the air, a very complex reaction occurs, involving another material called tyrosinase which is also present. This leads to the formation of a pigment called melanin, causing the dark color. Melanin is very widespread in nature. It is also responsible for the color of dark-skinned races, dark hair and brown eyes.

### Young Israel State Adds Marble to List of Exports

The young state of Israel is taking another step in its vigorous drive for self sufficiency by exporting marble from quarries unused for almost 2,000 years.

The first major shipment of Israeli marble, three tons for use in a new Brooklyn synagogue, arrived recently in New York in the Israeli flag freighter "Henrietta Szold." Building stone thus is added to the nation's already important exports, which include citrus fruits and cut and polished diamonds.

In addition, plans are under way to revive the once-flourishing trade in potash extracted from the waters of the Dead Sea. Intensive oil exploration is being conducted in areas which geologists consider exceptionally promising. Israel already has a modern oil refinery at Haifa.

Marble played an important part in building construction in Biblical times, but it is not believed to have been exported in any quantity.

Solomon's temple contained stone described as marble. King David, gathering the material for his son Solomon to use in the temple, said in the First Book of Chronicles that he had obtained "marble stones in abundance."

Most modern authorities believe, however, that the "marble" used in the temple was actually a glistening, soft white limestone, quarried near the Damascus gate of Jerusalem, rather than the metamorphosed, crystalline limestone that is marble by today's standards.

### Modern—But Mellow

An inviting kitchen containing cabinets and counters with a natural wood finish has walls painted in a velvety gray-green. Against this background the copper pans that hang near the range show to especial advantage. The wood tones of the cabinets appear again in the brown and buff pattern of the linoleum. On the chairs at the breakfast bar are cushions of a rosy terra cotta tone that is repeated again in the paint used for the ceiling.

### PERSONALS

Mr. and Mrs. M. E. Self went to Rotan Saturday after his mother, Mrs. Sweek, who will spend sometime with her son and family.

Dinner guests in the home of Mr. and Mrs. G. W. Seaneey Sunday were: Mr. and Mrs. Dee McWilliams and boys, Mr. and Mrs. Cecil Seaneey and boys, of Amarillo, Mr. and Mrs. Arnold Brown and children.

Visitors in the home of Mr. and Mrs. Oner Cornett Sunday were: Mr. and Mrs. J. Custer, of Petersburg; Mr. and Mrs. Homer Welch, of Fort Sumner, New Mexico; Mickey Cornett and Johnnie Ted Bingham, of Austin. Mr. and Mrs. J. F. Bingham and children.

Mr. and Mrs. Albert Smith and children, of Rosevent, Oklahoma, Mrs. J. W. Smith, Mr. and Mrs. Charles Henigan, of Plainview, were visitors in the T. M. Marshall home Sunday.

J. D. Bingham, who underwent surgery in a Lubbock hospital several weeks ago, is able to be down town greeting his friends the past few days. He is slowly improving.

Sgt. Burley and Sgt. J. W. Brown and wife, of Amarillo Air Base, visited Easter Sunday in the home of Mr. and Mrs. Hugh Stodghill.

Mrs. Joe Mercer took her mother, Mrs. J. R. Stone, to Plainview Tuesday for a check at the hospital. She is doing nicely.

Jack Strange, of White Deer, visited over the week end with his mother, Mrs. Bryan Strange.

### CARD OF THANKS

We wish to express our deepest appreciation to everyone for their aid and assistance during the illness and departure of our father, and also for the beautiful floral offerings.

THE SEAY CHILDREN.

Billy Tennison, of Harold Payne College, Brownwood, spent the Easter holidays with his parents, Mr. and Mrs. W. H. Tennison.

Are some of your Series E Government Bonds maturing this month?

# Now they can earn more money for you!

New law provides 10 more interest-earning years for your Series E Bonds . . . and you need not do a thing!

Are you one of those smart and patriotic Americans who began an automatic saving program with Series E Government Bonds in 1941? Then you're one of the lucky people who can profit by a new law now!

A bill recently passed by Congress now makes it possible for your United States Defense Bonds to continue earning interest ten years longer than was originally planned.

For example, a Series E Bond which cost you \$18.75 in 1941 will pay you \$25 in 1951. But if you hold that bond ten extra years, until 1961, it will pay you \$33.33, an average interest of 2.9% compounded annually. You get similar increases on Series E Bonds of every denomination.

And there is nothing for you, as a bond holder, to do. You need not exchange the bonds you have. You need not sign any paper, fill out any form. You simply keep your bonds as you have been keeping them.

You may still redeem any Series E Bond at any time after you've owned it for sixty days. But unless you really need the cash you're much better off to hold your bonds. For United States Defense Bonds are as safe as America itself.

When you buy your bonds regularly and hold them, they are steadily building a sum big enough to buy something really worth while—a home, a business, a retirement fund, an education for your children.

And bonds are safer than cash! If you lose or accidentally destroy cash it's gone for good. But when you have your cash in United States Defense Bonds, the U. S. Treasury will replace lost or destroyed bonds at no cost or loss to you.

So if some of your bonds are coming due, take advantage of this new offer of your government—just sit back and let them go on making money. Meanwhile keep adding to your savings by buying more U. S. Defense Bonds regularly—through the Payroll Savings Plan where you work or the Bond-A-Month Plan where you bank.

If you want to be paid your interest as current income—

The new law also allows you to exchange your Series E Bonds, in blocks of \$500 or more, for Special Series G Bonds which pay interest semiannually at the rate of 2 1/2% per year. For full details, ask at any Federal Reserve Bank.

Look how your maturing bonds go on earning under the new law!  
(This table shows \$25, \$50, and \$100 bonds as examples of how All Series E Bonds grow.)

Original maturity (or face) value	\$25.00	\$50.00	\$100.00
Issue price	18.75	37.50	75.00
Period after issue date	Redemption values during each year		
11 years	\$25.31	\$50.62	\$101.25
12 years	25.94	51.87	103.75
13 years	26.56	53.12	106.25
14 years	27.19	54.37	108.75
15 years	27.81	55.62	111.25
16 years	28.44	56.87	113.75
17 years	29.06	58.12	116.25
18 years	30.00	60.00	120.00
19 years	31.33	62.67	125.33

# Ancient Church Uncovered in Aegean Isle

WASHINGTON, D.C.—A bulldozer leveling part of the Aegean island of Lesbos (Mitilini) in the construction of an airport, has unburied the ruins of what may be one of Christendom's earliest churches.

Archaeological research bears scientific estimates that these are those of a truly early church, an important addition will be made to the already monumental ruins of the Aegean Islands.

The study of ancient history, religion and legend.

Lesbos, lying less than ten miles off the Turkish coast, is one of the largest of the islands that dot the Aegean arm of the eastern Mediterranean Sea, separating the Asian peninsula from Asia Minor.

The islands are Greek except for a few of those lying close to Turkey's coast.

### Trojan Horse Legend

Like all the other Aegean islands, in the tiniest, Lesbos has its wealth of history. It was the home of the poets Sappho and Alcaeus in the seventh century before Christ, and the philosopher Theophrastus, successor to Aristotle, was born there.

North of Lesbos lies the tiny Turkish island of Bozca Ada (Tenedos), which the Greeks withdrew from during the siege positions while the gull-trojans breached the walls of Troy to admit the wooden horse.

The south is Khios (Chios), home of Glaucus, who invented the art of fishing. Khios also claims it as the birthplace of Homer, but this claim is contested by other islands, among them Smyrna.

Many of the islands are closely connected with the early Christian church or with some particular manifestation of Christianity. On Lesbos is the Orthodox monastery of St. John, dedicated to John the Apostle, who is believed to have spent part of his later life there, writing his Gospel and the Book of Revelation.

The island of Naxos is closely connected with St. Dionysos of the orthodox church. On Naxos the legend is told that St. Dionysos planted a vine three times, first in the form of a bird, then in the bone of a man and finally in the bone of an ass.

The legend says, was made of the vine, and its intoxication through three stages. The first stage was like a bird, then as courageous as a lion, and then acted like an ass.

On Tinos (Tenos) is an icon of the Virgin, supposedly painted by St. Luke himself and capable of miraculous cures for the pilgrims who long there twice a year. The small island of Mikonos has several hundred churches, many of them erected as family chapels by retired sea captains.

Up to 1950, the coal companies in Illinois had planted more than 12 million trees on 11,246 acres of strip-mined land. Many of the earlier plantings are coming to the age where cultural treatments, such as thinning and pruning, will be needed to maintain a rapid growth rate and to eventually produce high-quality timber. Studies of proper management methods in these plantations are soon to be initiated by the Carbondale Research Center, in cooperation with the coal companies.

Written in non-technical language, the article briefly points out the possibilities of growing successful forest crops on strip-mined areas. Research has shown that the growth rate of trees planted on these areas is equal to or better than that of the same trees on unmined land. An indication of the future value of these spoil bank plantings was recently obtained from a small experimental cutting in a 20-year-old pine plantation in Indiana. Although the trees were immature, the harvest of posts and poles returned a gross income of \$335 per acre.

A fortune-teller told the mother of Hans Christian Andersen, who was regarded by the people of their town as "a fool and a lunatic," that he some day would be "a very great man." On the strength of that prediction, Andersen's mother advised her ugly duckling son to go out into the world to seek his fortune and thus fulfill the ambition he cherished. While there are still plenty of "fools and lunatics" who consult them, fortune-tellers apparently have lost their magic touch. No great improvement seems observable either in the talents or in the appearance of their clients, even after several visits.

NEW YORK—While 75 per cent of all U.S. families own life insurance, 86 per cent of the families which include veterans of World War II are life insurance owners, according to a survey by the Institute of Life Insurance.

In the case of the families with veterans of World War I, a 79 per cent ownership is reported.

The veteran's family is inclined to own a greater amount of life insurance, too. While 43 per cent of the non-veteran insured families put \$100 or more annually into life insurance premiums, 53 per cent of World War II veteran families and 67 per cent of World War I families own policies put that much into life insurance.

These facts on life insurance ownership are specially compiled from the 1951 survey on consumer buying habits made by the Survey Research Center of the University of Michigan for the Federal Reserve Board.

LIBERTY, Ky.—Mrs. Clara Belle Wilkinson, 71, had often told her husband that her only fear of death was that it would separate them.

On a recent morning, the husband, 75, died of a heart attack at his Brush Creek home, near Liberty.

Distraught, Mrs. Wilkinson called her son, Ralph, of Liberty.

While describing her husband's death to the son, she collapsed, suffering a heart attack.

She died in her son's arms within an hour after the death of her husband.

## Doctor Suggests Citizens' Committee on Baby Sitters

"Every city and town in America should appoint a citizens' committee of three qualified persons to investigate the problems of baby sitting and make necessary recommendations to the proper authorities."

That is the opinion of Dr. Martin L. Reymert, Ph.D., Consultant for The Parents' Consultation Service. It was expressed today following his review of newspaper clippings from the nation's press on crimes involving baby sitters, over a six month period.

From them, Dr. Reymert has drawn up what he calls "My Rogues' Gallery of Baby Sitters."

It includes a baby sitter who was accused of strangling a 6-year-old girl, after "a vision," and a baby sitter who was held on felonious assault charges after beating a four-year-old and his two-year-old brother who had to be hospitalized as a result.

Also included is a teen-age boy "who apparently lacked the elementary information on infant care and feeding required for the job." After giving beer to a year-old baby, with obviously unfortunate results, this young man tried to revive the dying child with orange soda pop. A physician observed later that "the baby might have been so intoxicated by the beer he choked to death on the soda pop."

Dr. Reymert feels his "Rogues' Gallery of Baby Sitters" would not be complete without the 15-year-old girl, described as "very reliable," who vanished from a physician's home with \$24,000 cash. Subsequent developments made a sensational reading for the American public. A tragic sidelight of the case occurred when the physician was found dead under mysterious circumstances, ten days after the theft. His friends and associates observed that he had been "suffering from a heart ailment" and "disturbed by the unpleasant publicity."

## Article Says Strip-Mined Lands Will Support Trees

"How Strip-Mined Lands Grow Trees Profitably"—that is the title of an article recently published in "Coal Age" magazine and written by Glenn H. Deitschman and Richard D. Lane, of the Carbondale, Illinois, Forest Research Center, Forest Service.

Written in non-technical language, the article briefly points out the possibilities of growing successful forest crops on strip-mined areas. Research has shown that the growth rate of trees planted on these areas is equal to or better than that of the same trees on unmined land. An indication of the future value of these spoil bank plantings was recently obtained from a small experimental cutting in a 20-year-old pine plantation in Indiana. Although the trees were immature, the harvest of posts and poles returned a gross income of \$335 per acre.

Up to 1950, the coal companies in Illinois had planted more than 12 million trees on 11,246 acres of strip-mined land. Many of the earlier plantings are coming to the age where cultural treatments, such as thinning and pruning, will be needed to maintain a rapid growth rate and to eventually produce high-quality timber. Studies of proper management methods in these plantations are soon to be initiated by the Carbondale Research Center, in cooperation with the coal companies.

A fortune-teller told the mother of Hans Christian Andersen, who was regarded by the people of their town as "a fool and a lunatic," that he some day would be "a very great man." On the strength of that prediction, Andersen's mother advised her ugly duckling son to go out into the world to seek his fortune and thus fulfill the ambition he cherished. While there are still plenty of "fools and lunatics" who consult them, fortune-tellers apparently have lost their magic touch. ## Sheriff's Sale

THE STATE OF TEXAS, County of Briscoe.

By virtue of an order of sale issued pursuant to a judgment decree of the 110th District Court of Briscoe County, Texas, by the Clerk of said Court on the 8th day of April, A. D. 1952, in a certain suit No. 1396, wherein The City of Silverton is Plaintiff, and The State of Texas, County of Briscoe and the Silverton Independent School District are Impleaded Party Defendants, and D. P. Brooks Defendant, in favor of said plaintiff, intervener, or impleaded party defendants, for the sum of Sixty Six and 55-100 Dollars for taxes, interest, penalty and costs, with interest on said sum at the rate of six per cent per annum from date

fixed by said judgment, together with all costs of suit, that being the amount of said judgment rendered in favor of said plaintiff, intervener, and or impleaded party defendants by said 110th District Court of Briscoe County, on the 28th day of September A. D. 1951, and to me directed and delivered as Sheriff of said Briscoe County, I have seized, levied upon, and will, on the first Tuesday in May A. D. 1952, the same being the 6 day of said month, at the Court House door of said Briscoe County, in the City of Silverton between the hours of 2 o'clock P. M. and 4 o'clock p. m. on said day, proceed to sell for cash to the highest bidder all the right, title and interest of said defendant in and to the following described real estate levied upon as the property of said defendant, the same lying and being situated in the County

of Briscoe and State of Texas, to-wit: Being all of Lot No. Eight (8) in Block No. Ten (10), in the town of Silverton, Texas; or, upon the written request of said defendant or his attorney, a sufficient portion thereof to satisfy said judgment, interest, penalties and costs; subject, however, to the right of the plaintiff for any other or further taxes on or against said property that may not be included herein, and the right of redemption, the defendant or any person having an interest therein, to redeem the said property, or their interest therein, at any time within two years from the date of sale in the manner provided by law, and subject to any other and further rights the defendant or anyone interested therein, may be entitled to, under the provisions of law. Said sale to be made by me to satisfy the above described judgment, together with interest, penalties and costs of suit, and the proceeds of said sale to be applied to the satisfaction thereof, and the remainder, if any, to be applied as the law directs.

Dated at Silverton, Texas, this the 8th day of April, 1952.

RAYMOND K. GELWE,  
Sheriff Briscoe County, Texas.  
By J. W. McCracken, Deputy.  
15-4tc

the groundwork never stops...

A growing telephone system can't afford to take a holiday. Even as one expansion project is completed, another is under way, whether in the planning stage, engineering, financing or actual construction.

As an example, when a telephone man visits your home to install a telephone, the work you witness may take only twenty minutes. But, the work you didn't see—the unseen groundwork which made that installation possible—could easily have required many months to complete.

You can be sure, each day of the year, that plans for your community's future telephone service are in the making. The gears of telephone progress are turning. The groundwork never stops.

**Soldiers and Their Families Aided by Army Relief Agency**

A price tag marked \$22,000,000 (M) sounds high even in these days, but officials of Army Emergency Relief don't think it is too much to pay for the happiness and peace of mind of thousands of soldiers and their families.

During the past ten years, AER has spent slightly more than that amount in loans and grants to members of the Army and their dependents. The money—which comes largely from voluntary contributions—has paid doctor and hospital bills, rent to landlords who demand payment three months in advance, train and plane tickets for emergency furloughs, and many other necessities.

Army Emergency Relief was organized in February, 1942, to give emergency financial aid to soldiers and their dependents. The Red Cross made the first contribution—\$1,500,000 (M)—so that initial funds could be distributed to Army posts. Contributions from individuals, corporations, professional sports and theatrical shows raised AER funds to more than \$20,000,000 (M).

The Red Cross works closely with Army Emergency Relief in straightening out financial problems for soldiers and their wives and children. In many cases, it is more convenient for the dependent to make the request for cash than for the Army man to do so. For that reason, the Red Cross chapter in the particular community or the Red Cross field director investigates circumstances of the case and arranges for the loan or grant. If the soldier asks for the money, he usually works it out with the Army Emergency Relief Section on his post.

AER Sections on military posts in this country and overseas are authorized to keep enough money on hand to meet emergency requirements of Army men and women under their jurisdiction.

**Arsenal of Drugs Holding Strong Line Against Epilepsy**

Medicine's great arsenal of drugs is holding the line against epileptic attacks, a Duke University neuro-psychiatrist reported.

"When the disease is kept under control by the use of drugs," Dr. Hans Lowenbach said, "there is nothing the epileptic can not do."

Phenobarbital, dilantin, tridione, mebaral, and phenurone, Dr. Lowenbach reported, are among the drugs which reduce the number of attacks and help epileptics lead useful lives.

An epileptic "fit" robs the central nervous system of its energy. The right drug at the right time, he explained, maintains the energy the patient needs to carry on. The drug also keeps the brain from overworking itself.

Epilepsy, "the sacred disease," is still almost as much of a taboo as it was to the ancient Greeks who thought epilepsy (Greek word for "being seized upon") was the spirit of a god descending upon an afflicted person.

Even today doctors don't know the cause of the disease. But, Duke physicians warn that a totally different problem probably causes as much misery as the disease itself.

"Don't shun the epileptic," Dr. Lowenbach urges. Doctors estimate that as many as half of the approximately 1,500,000 epileptics in this country are under 20. "We must teach these youngsters, their families and friends that they are handicapped—not invalid. The epileptic," the Duke doctor said, "is a thorough, conscientious person, capable of leading a productive and useful life."

**"Open Wider, Please"**

A dentist's equipment must always be immaculately and attractively finished, preferably in pleasant and harmonious colors. Such factors help create an atmosphere which contributes to the patient's comfort. Probably no other industry—except furniture manufacturing—requires a more exacting finish on its products than the dental equipment industry which produces dental chairs, dental X-ray equipment, dental operating units, dental engines, and other accessory products.

**Solar System**

There are 31 moons, or satellites in the solar system. As follows: Earth, 1; Mars, 2; Jupiter, 12; Saturn, 9; Uranus, 5 and Neptune, 2. Most recently discovered is the 12th satellite of Jupiter, which Dr. S. B. Nicholson, of the Mt. Wilson and Palomar Observatories in California, first located in September, 1951. Mercury and Pluto have no known moons.

**Floating Steel**

A solid piece of steel will not float but the ship will because there is a lot of open space inside the hull. Buoyancy depends on the relation between the weight of an object and that of the water it displaces. A body that weighs more than the displaced water will sink. However, if the ship were entirely watertight, and it could be pushed completely under the water, the water displaced would weigh considerably more than the ship itself. Actually a ship automatically sinks to such a depth that its own weight is balanced by the weight of the displaced water. Since the salt in sea water makes it heavier than fresh water, a ship rides higher in the ocean than it does in a river.

**Workshop on Home Grounds Improvement April 28, 29**

A workshop on Home Grounds Improvement will be held at Texas A. and M., April 28 to 29, announces Sadie Hatfield, homestead improvement specialist, with the Texas Agricultural Extension Service. This is the first such event to be held at College Station. Homestead improvement problems will highlight the program.

Miss Hatfield says method demonstrations will be used in the workshop and "talk" will be held to a minimum. Those attending will be divided into groups for the several programs that will be going on at the same time.

Generally the program will include information on selection, planting and care of shrubs, lawns, trees, flowers, recreation and outdoor equipment, safety around the homestead and making corsages and flower arrangement.

**CARD OF THANKS**

I wish to thank all my friends and relatives for their cards and kindness shown me during my stay in the hospital. To each of you I want to offer my thanks.  
 J. D. BINGHAM.
