Traffic Ordinance To Be Enforced

You Are Ask to Observe Parking and Cycle Ordinances

The City this week has put up a sign asking not to park on the red line loading zone in front of the postoffice at any time, day or night.

VIOLATION CARRIES FINE OF \$25.00

This will be enforced and if you are caught parked there you will be given a ticket and brought before the City Judge and fined \$25.00.

The postal department requires that no one be allowed to park in the loading zone so that incoming and outgoing mail can be loaded and unloaded. This must be strictly enforced or it will be turned into the postal department.

PARKING REGULATIONS

Some months ago the City Council passed and put into effect a parking regulation which was observed for a time, but you are becoming slack on parking as you should. These ordinances are for your protection and must be observed.

ORDINANCE AGAINST BICYCLES ON SIDEWALKS

Also there is a City Ordinance against riding your bicycles on the sidewalks as there is danger of hurting someone. Do not ride your bicycles on the sidewalks.

ALVIN REDIN, Mayor, City of Silvertown.

BROWN COUNTY GATHERING OF PIONEERS AT LUBBOCK

You are invited. Former residents of Brown county will gather May 18th at 10:30 for that annual reunion in the McKenzie State Park at Lubbock. The reunion site is North East part of the Park, same place that we used last year. Look for Brown County Banner. Large attendance is expected, says Mr. Wheeler, president. Bring well filled lunch baskets.

Ora Ellis, Secretary.

Mr. and Mrs. E. Posey went to Clovis, New Mexico, last Saturday to meet her sister, Mrs. Lila Lyles, who had been visiting relatives in Los Vegas, New Mexico.

Texas' Quota for June Set at 384 Men Wakefield Said

Austin, Texas, May 7.—State draft boards will be called on in June for only 384 men, Brigadier General Paul L. Wakefield, state Selective Service director, announced.

Quotas to local boards for this call, smallest received by the state since July, 1951, will be figured and placed in the mail on or about May 7. The June state quota of 384 is Texas' share of a national quota of 10,000.

General Wakefield predicted that calls on Texas will increase greatly, beginning in July. He pointed out that the first draftees inducted after invasion of South Korea will be eligible for release late this summer and early this fall.

He said everything points toward heavier calls the remainder of this year and the first four or five months of 1953.

Mrs. C. C. Garrison Will Present Pupils In Recital May 13

Mrs. C. C. Garrison will present her music pupils in recital at the First Baptist church Tuesday, May 13, at 8 p. m.

Students appearing on the program are: Sharon Weaver, Nancy Brooks, Ann Wingo, Reba Jo Maples, LaGuan Thompson, Carolyn Garrison, Marsha Kay White, Dona Garrison, Sharon Eddleman, Joy Ann Gatewood, Wanda Ashley, Margerie Forst, Mary Jane West, Shirley Fitzgerald, Paula Reid, LaWanda Reid.

Dismissal will be by Rev. G. A. Elrod.

NOTICE

We have our cemetery in good shape, but keeping it in shape takes more money and that is one thing we don't have. Please pay your pledges. Thanks.

G. W. Seaney, president.

Mrs. Willie McJimsy, who has been a patient in the local hospital was able to be moved to her home Saturday.

Mr. and Mrs. G. R. Brown, of Plainview, visited Mrs. Carter Sunday.

Mrs. Ada McDaniels, of Plainview, visited in the home of Mrs. P. D. Jasper Tuesday.

Mr. and Mrs. E. V. Ridlehuber Moving To Lubbock

Mr. and Mrs. E. V. Ridlehuber are moving to Lubbock today (Thursday) to make their home, and Mr. Ridlehuber will be employed with M. B. McKee Company, in that city. This company sells all kinds of gin machinery.

Mr. Ridlehuber has been manager of the Farmers Gin Company here for the past three years until recently when the company sold their gin.

Mr. and Mrs. Ridlehuber will make their home at 2301 14th Street in Lubbock.

Funeral Services For William Jesse Hollingsworth

Last rites were held at the First Baptist Church Friday, May 2, 1952, at 2 o'clock for William Jesse Hollingsworth, 82, conducted by Earl I. Cantwell, assisted by Rev. G. A. Elrod. Interment was made in Silvertown Cemetery under direction of Douglas Funeral Home.

Mr. Hollingsworth died suddenly Thursday morning, May 1, 1952 at his home in east Silvertown. He had been in failing health for several years. He had been a member of Church of Christ for 50 years.

William Jesse Hollingsworth was born December 25, 1870 at Little Rock, Arkansas. He was married to Mary Elizabeth Shelton December 25, 1893. To this marriage four children were born, two sons and two daughters, Jack Hollingsworth, of Roaring Springs; Jord, of Silvertown; Mrs. V. W. Womack, Floydada and Mrs. Ralph May, of Plainview. His wife died in 1927.

He was married again on March 9, 1930 to Mary Mollilda Grewe, and she preceded him in death March 31, 1946. Five step-children survive, they are Mrs. R. L. Galleher, of Earth, Texas, George Shelton, Olney, Texas, Mrs. R. L. Brown, Plainview, and Edd Grewe, of California and Arthur Grewe, of Silvertown. Also surviving are twenty-seven grand children, twenty-six great grand children and one great-great grandchild.

Mr. and Mrs. R. L. O. Riddell were business visitors to Geary, Oklahoma, Saturday.

Funeral Services For Thomas Leonard Autry Held Here

Funeral services for Thomas Leonard Autry, 72, was conducted Wednesday afternoon at 4 o'clock at the First Baptist Church, Rev. G. A. Elrod officiating, assisted by Rev. H. M. Secord. The body was taken to Tioga, Texas, by Douglas Funeral Home, where burial will be at 2 o'clock this afternoon (Thursday) in Indian Creek Cemetery.

Death came suddenly late Tuesday evening about 7 o'clock, May 6, 1952, to Mr. Autry. He was born March 9, 1880, in the State of Tennessee and came to Texas at the age of eight years, settling in Cook county near Tioga, Texas. He was married to Miss Lou Baxter in 1901. They moved to Briscoe County in 1943, settling in Silvertown. He had been a member of the Baptist Church 15 years, and a member of the Masonic Lodge 44 years. He was a retired farmer. Mr. Autry loved music and taught singing schools for 20 years.

He and Mrs. Autry had just returned Sunday night from Dallas where they visited their two daughters. Saturday he attended the cemetery association at Indian Creek, visiting with old friends and relatives and at this place is where he will be laid to rest.

Surviving are his wife, two daughters, Mrs. R. E. Cox, and Miss Lavonia Autry, of Dallas; two sons, W. E. Autry, Silvertown; Percy Autry, Plainview. Ten grandchildren and 5 great-grandchildren; two brothers, Homer Autry, of Albuquerque, New Mexico; Delbert Autry, Bakersfield, California; three sisters, Mrs. Meda Steek, and Mrs. Nora Priddy, of Fort Worth; Mrs. Minnie Faulkner, of Glen Rose, Texas.

BAPTIST WORKERS CONFERENCE

Among those attending the Floyd County Baptist Workers Conference Tuesday at Matador were: Rev. and Mrs. G. A. Elrod, Mesdames Luke Thompson, Floyd Williams, A. A. Howard, R. C. Bomar, Jim Bomar, C. C. Garrison, C. O. Allard.

Mrs. Una Burson, who has been living in Dallas returned to Silvertown Friday to make her home.

Mr. and Mrs. Riley Day, of Matador, visited their daughter and family, Mr. and Mrs. Ware Fogerson Monday night.

Guests in the home of Mrs. W. Allard were: Mr. and Mrs. Hill Braley and daughter, Agnes, of Plainview and Mr. and Mrs. Gus Laney, of Corpus Christi, Tuesday.

Mrs. Jeff Simpson visited in the home of her sister, Mr. and Mrs. Ben Turner Sunday afternoon in Turkey.

Mr. and Mrs. H. L. Dobbs and Barbara, of Crosbyton, came Monday to visit her parents, Mr. and Mrs. M. K. Summers.

Sunday visitors in the T. J. Word home were Mr. and Mrs. John Buth, of Lubbock, and Mr. and Mrs. H. H. Word, of Tulia.

Last Thursday Clyde Wright was in Amarillo and Mrs. Wright went to Hereford to attend Presbyterian Thursday evening and Friday morning. Friday afternoon they visited relatives and went with friends on an annual tour of new homes of Hereford.

Baccalaureate Service Sunday Night, May 11

Baccalaureate service will be held Sunday, May 11, 1952 at 8 p. m. at the high school auditorium for fifteen high school seniors.

Honor students of the class this year are: Richard Tunnell, son of Mr. and Mrs. C. A. Tunnell, salutatorian, and Miss Junis Mercer, daughter of Fred Mercer, valedictorian.

Following is the program for the evening: Processional, Miss Marjorie Frost.

Invocation, Rev. G. A. Elrod. Song, audience. Announcements, Supt. M. G. Moreland. Message, Rev. H. M. Secord. Special song, Gaston Owen. Benediction.

Navy Seeks College Men for Flight Training

Single men between 18 and 27 who have completed at least two years of college are needed immediately to apply for the Navy's Flight Training Program, it was announced today by Captain H. R. Nieman, Jr., USN, Commanding Officer of the U. S. Naval Air Station at Dallas.

After having been closed for nearly a year, the Naval Aviation Cadet Program is again "wide open." Captain Nieman's command in Dallas is charged with the responsibility of enlisting Naval Aviation Cadets—or "Nav Cads," as they are termed, from the State of Texas.

Captain Nieman said that a continuing need exists to interest college students, particularly graduating seniors, in Naval Aviation. For those who expect to have Selective Service obligations to fulfill, Navy flight training offers an alternative to ordinary enlisted service.

Pre-flight and basic training is conducted at the "Annapolis of the Air," Pensacola, Florida. Advanced training is carried out at Corpus Christi, Texas. NavCads who successfully complete the 18 month period of training are designated Naval Aviators, and commissioned Ensigns, U. S. Naval Reserve, or 2nd Lieutenants, U. S. Marine Corps Reserve.

NavCads are paid \$105.00 per month, plus food, quarters and uniforms. Pay and allowances upon commissioning amounts to \$355.75 per month without dependents, or \$430.75 with dependents.

Men desiring further information on the program should write: NAVCAD, U. S. Naval Air Station, Dallas, Texas. Transportation costs are paid for applicants who wish to take the qualifying physical and mental examinations.

Flunoy Hutsell and Jimmy Tidwell, of Hobbs, New Mexico, came Saturday night for Mrs. Tidwell and children, who spent the past week with her parents, Mr. and Mrs. R. C. Hutsell. They returned to their home Sunday night.

Mr. and Mrs. Glenn Lindsey spent the week end in Lubbock with his parents, Mr. and Mrs. Geo. Criswell.

Mrs. Bill Middleton, of Amarillo, visited Wednesday in the home of Mr. and Mrs. C. R. Badgett.

Rev. Grady Adcock Will Show Pictures of Holyland Here

Rev. Grady Adcock, of Miami, and former pastor of the Silvertown Methodist Church, who just recently returned from a trip to the Holyland will show pictures made on the trip at the Methodist Church, Wednesday night, May 14, at 7:30. There will be no charge, all are invited to attend.

Remember, Wednesday night, May 14, at 7:30 p. m., plan to attend.

Mrs. T. D. Wallace and sister, Mrs. Alice Dameron and brother, John Medrock, of Lubbock, spent the week end in Hollis, Oklahoma.

Mr. and Mrs. Rex Vaughan, of House, New Mexico, are moving here this week to make their home. Rex is the son of Mr. and Mrs. Veral Vaughan.

Mr. and Mrs. Rags Riddle were business visitors in Lubbock Monday.

Mrs. Ann Wood, of Cyril, Oklahoma, visited her sister, Mrs. Dick Bomar last week.

Graham Golf Club Members Play Floydada Sunday

Several of the local golf club members went to Floydada Sunday afternoon and played match with the Floydada club members on their course.

Members playing were: Hall, Gibson, Bedwell and Settle, of Quitaque; Webb, Artberry, Tucker and Ritchey, Tulia; Simpson, Alexander and Wilson, of Silvertown.

The local club members won three match, drew three, and lost none.

NEW MEMBERS ADDED TO LIST

New members coming in on the golf club are: Johnnie Wilson, South Plains; Ben Whitfill, Silvertown; Hubert Gilbert, Quitaque; J. B. Webster, Jim Crow, Silvertown; J. F. (Bud) Bailey, Quitaque; Joe Mercer, Silvertown; H. B. Settle, Quitaque.

This week there will be considerable work done on the course. The fairways will be mowed, markers will be put up on fairways, and re-golfing of the greens, which should put the course in good shape. Before too long the course will be in good enough shape to invite neighboring clubs to play here. Score cards have been printed and are ready to be used by the players.

With the new members added to the old list, the total membership now is 29.

Mr. and Mrs. W. W. Yancy, of Lubbock, visited his son, Mr. and Mrs. E. W. Yancy, over the week end.

Mr. and Mrs. J. S. Watson visited in the home of their son, O'Neal Watson and family in Amarillo last week.

Mrs. Charles Lindsey and little daughters returned to their home in Abilene after visiting her parents, Rev. and Mrs. G. A. Elrod.

WANTED BY THE FBI

FREDERICK J. TENUTO, with aliases: Leonard Durham, Leonard Durken, John Thomas Lestella, Frank Pinto, Durso Thornberry, "St. John," "St. Johnny," "The Angel," and others.

UNLAWFUL FLIGHT TO AVOID CONFINEMENT (Murder)

Age 37, born January 20, 1915, Philadelphia, Pa.; height, 5 feet 6 inches; weight, 143 pounds; build, stocky; hair, black; eyes, dark brown; complexion, dark; race, white; nationality, American; education, 6 years; occupations, butcher's helper, sheet metal worker, laborer; scars and marks, mperfect tattoo "S. J." on left forearm, imperfect tattoo on right forearm which may be "ANA," "ANNA" or "AMA," small brown nole on right cheek, 1 1/4-inch scar over right eye. Remarks: Has suffered from a recurring skin eruption.

Tenuto is believed to be armed and considered extremely dangerous. A complaint was filed before a U. S. Commissioner at Philadelphia, Pa., on February 17, 1950, charging this subject with violating title 18, U. S. Code, section 1073, in that he fled from the State of Pennsylvania to avoid confinement after conviction for the crime of murder.

Any person having information which may assist in locating this individual is requested to immediately notify the Director of the Federal Bureau of Investigation, United States Department of Justice, Washington 25, D. C., or the Special Agent in Charge of the Division of the Federal Bureau of Investigation listed on the first page of the local telephone directory.

Auto Safety PROGRESS

Down through the years progress in safety devices has led the way in the development of the automobile. Note the interior of this antiquated model. The types of emergency brake, long-handled gearshift, and starter used in those days have been replaced by improved and better-located models.

Whips sweep upward in a broad arc across wide-vision curved windshields of safety glass. There are many other automotive safety devices, but unfortunately even those modern inventions cannot prevent traffic accidents caused by inoticated, incompetent, or careless drivers.

Letter by Army Policeman Proves Value of Courtesy

An Army sergeant recently learned that courtesy has no citizenship, sincerity no state boundary, and appreciation no national banner. His discovery points up a lesson for all servicemen and civilians who travel in other countries. It proves the value of the "good neighbor" policy on a personal level.

Sergeant First Class Frank Pearce, (1346 Divisadero Street) San Francisco, Calif., intended only to express his "thanks" to the Royal Canadian Air Force crew which flew him and a group of other combat rotation personnel home from Japan last fall.

He wrote his letter—a simple, honest statement of appreciation and commendation—to the office of the Consul General, Dominion of Canada, in his own city. He requested only that it be called to the attention of the commanding officer of the plane crew.

In addition, his praise for the "courtesy and efficiency of the entire crew" was forwarded to Brooke Claxton, Canada's minister of defense.

The spontaneous nature of the letter apparently delighted Mr. Claxton because he wrote to Secretary of the Army Frank Pace, calling his attention to "a very unusual thing."

"I greatly appreciate this mark of international courtesy, particularly as it is not usual to get it from such a source," the defense minister's letter said in part.

Mr. Pace, in turn, wrote both to Mr. Claxton and Sergeant Pearce.

In the letter to the high Canadian governmental official, the Secretary of the Army said: "I can well appreciate your reaction to the sergeant's spontaneous gesture of friendship toward the Canadian people which was inspired by the courtesy he received from the Royal Canadian Air Force."

Measuring Earth

In 1948, the National Geographic Society sent out eight scientific teams along the 5,000-mile track of an annual eclipse of the sun from Burma to the Aleutian Islands. This "Operation Eclipse," a project of unprecedented size and scope in studying solar phenomena, brought back valuable data for mapmakers and mathematicians.

It opened the way for more accurate measurements on the earth's surface, helped in tying together geodetic surveys of different countries, and proved the possibility of making accurate astronomical observations from aircraft flying high above the weather in the thin, clear air of the stratosphere.

Salad Dressing
A little touch of seasoning can make the difference between a salad with personality and one that is flat tasting. Most salad dressings can be made from three basic recipes—French dressing, mayonnaise, and cooked salad dressing.

ATTEND DISTRICT MEETING

A group of Methodist Youth Fellowship attended a Plainview District meeting at Lockney Saturday night. New officers were elected and installed. A very pleasant evening was spent.

Absence of Stuttering Among Indians Subject of Study

The virtual absence of stuttering among Indians would seem to indicate that they may have a way of life or philosophy which has aspects of superiority over the more highly "civilized" forms of existence.

Dr. John C. Snidecor, professor of speech at Santa Barbara College of the University of California, lived for several months among the Shoshone and Bannock tribes of south-eastern Idaho, interviewed 800 Indians and received indirect data on 1,000 others, without finding a single full-blooded Indian who stuttered.

"From 18 to 40 stutters would have been discovered in a normal similar-sized white population," said Dr. Snidecor.

Contrary to general opinion, Dr. Snidecor found that the Indians could speak with great fluency, frequently with poetical symbolism which had the qualities of great literature.

Dr. Snidecor found that the Indian father and mother exert very little pressure upon the child to speak. "The ability to speak appears to be evaluated as a normal process not to be quickened by overanxious parents for purposes of display," he added.

The speech correctionist likewise found that adult Indians do not speak under pressure unless they so choose and may sit and cogitate for a long time before making an answer. Dr. Snidecor said the Indian had no exact word in his language for stuttering.

'Banking With Mirrors' Is Latest Banking Device

A device that reduces parking problems in congested areas by providing fast curbside banking service to motorists is the latest thing in the banking world.

Called the "Snorkel," the ultra-modern banking device is about the size of a five-foot gasoline pump which is installed outside a bank on the sidewalk next to the curb. According to its manufacturers, an ingenious system of two-way periscope type mirrors and microphones enables a motorist to see and talk with the bank teller who is safely seated below the sidewalk in the bank's basement.

Without getting out of his car, the motorist simply places his deposit on a small tray-like elevator which takes it down to the teller. In about 30 seconds the bankbook will be back with the transaction completed.

Illiteracy Report

When figures on illiteracy were first reported in 1870 for persons over 10 years of age, the rate was 29 per cent—11.3 per cent of the white population were illiterate. By 1920 illiteracy for persons 15 years old and over had been reduced to 6.5 per cent and by 1930 to 4.8 per cent. Data for 1930 are lacking but the Census Bureau's most recent data, derived from a special study, show further reductions to be between 3.0 and 4.0 per cent in 1940 and to 2.7 per cent in 1947 for persons 14 years old and over. In spite of this unusual record of social achievement, in 1947 there still were 2 1/2 millions of Americans over 14 years of age who could not read or write in any language. Moreover, the percent of illiteracy among the non-white population was 11.0 per cent—not merely 2.7 per cent—and for the residents of rural farm areas it was 5.3 per cent.

Fire Control

One minute and nine seconds—that's about what a man needs to put on his shirt and tie. Yet, in the same interval, Columbia, S.C., firemen can move their apparatus from the fire station, drive through daytime traffic and busy intersections, and reach a fire a mile away. Columbia's secret? A fire station fully equipped with the latest electric devices to eliminate guesswork and delay all along the line. Heart of the station's intricate electric system is a remote-control wiring installation. With its help, a man sitting at a switchboard in the first floor office can turn on or off every light in the fire house, open and close its eight doors, and control every one of the city's 88 traffic lights at the flick of a switch.

New Asteroid

Astronomers call them asteroids, meaning "little stars." They are flying mountains whirling through the solar system—juggernauts of stone and metal weaving among the planets. Only rarely does one come near the earth. Recently, one did. "The seventh asteroid known to cut across the earth's orbit was discovered on August 31, 1931, on photographic plates of Palomar Observatory's "Big Schmidt" sky survey telescope. The new minor planet measures only one to two miles across. At time of discovery it was about 19,000,000 miles from earth, going away. It had been about 1,000,000 miles closer a few days before.

Center of Population

The center of population for 1930 is located 8 miles northwest of Olney, Illinois—some 40 miles farther west than the center of population in 1940. The center of population has moved westward, and southwestward, in each successive census year. The shift from 1940 to 1950 was the longest in 60 years. This calls attention to the increase in westward migration during the past 10 years.

Story of Job and Newly Discovered Tablet Similar

Prof. Jean Nougayrol, a curator of the Louvre museum, reports a surprising resemblance between the Old Testament story of the afflictions of Job and a Babylonian tablet about 1,000 years older than the biblical tale which he translated recently.

He assigned a date of 1650 B.C. to the tablet because of its dedication to King Ammiditana, a Babylonian monarch reigning in the 17th century before Christ.

No exact date could be placed on the writing of the Book of Job, the professor said, although sections appear to have been transcribed from old folk tales about 600-700 B.C. That would indicate the Job tale existed for about 1,000 years before the Old Testament.

"The text of this Babylonian tablet is concerned with a theme that runs through the Holy Book—man overwhelmed by God," Nougayrol said.

"The tablet is a poetical prayer of a righteous man afflicted by the Lord. It is quite similar to Job's trials and patience in the Bible."

The Louvre tablet, he explained, was only part of a four part text, so its story is fragmentary.

Magnetic Tape Is Causing Revolution in Recording

A revolution is in progress in the science of capturing and reproducing sound.

The year 1932 marks the 75th anniversary of Edison's invention of the phonograph, the National Geographic Society notes. At the same time a spectacular medium of sound recording is just coming of age—the magnetic tape.

Plastic or paper tapes coated with magnetic iron oxides—highly refined rust—now make the master copies for nearly all new photograph records and motion picture sound tracks. Tape records White House press conferences, takes office dictation, preserves battle orders in Korea, gives telephone weather forecasts, operates automatic machinery and electronic computers.

From Edison's first tin-foil-covered cylinder croaking "Mary had a little lamb," to a newly invented machine which can turn out hundreds of magnetic tape duplicates without losing a syllable or musical note, three-quarters of a century of engineering wizardry has made recorded sound today virtually indistinguishable from the original.

Dirt-Resistant Compound

Good news for laundry-conscious mothers is that cotton clothes may some day be "dirt-resistant." James A. Kime, of the United States Department of Agriculture, recently reported that experiments indicate a new compound, "CMC," may soon develop for general use as a "dirt-resistant" for cottons. The new compound, a low cost derivative of cellulose, appears to coat cotton fibers with a smooth film that keeps dirt from coming in close contact with the fabric. Three level tablespoons of "CMC" in a gallon of rinse water is said to give cotton goods improved soil resistance without changing the feel of the fabric, according to Kime. When treated with the compound, cotton clothes would resist dirt. And, once soiled, cleaning would be easier, requiring little scrubbing and soap.

Indian Population Increases

Indians are American citizens. Many Indians were granted citizenship long ago through treaties with Indian tribes or by Acts of Congress. To make certain none were left out, Congress passed a special law, the Citizenship Act of 1924, stating that all Indians born in the United States are citizens of our country. Whether or not they live on reservations, they have the vote in every State on the same basis as other people. Contrary to the usual impression, Indians are not dying out. There are now 400,000 Indians in the United States, compared to the about 250,000 around the close of the 19th century. Some 25,000 Indians were in the armed services in the recent World War. Major General Clarence Tinker, who reorganized our air forces after the attack at Pearl Harbor, was an Osage Indian.

Population Change

In 1950 the total population of the continental United States was 150,000,000. The increase of more than 19 million persons over 1940 does not represent an unusually high per cent of gain if judged by pre-1930 standards. However, it represents a rate of increase twice as rapid as that which occurred between 1930 and 1940, and it brought the nation's total population almost to the figure which in 1940 had been predicted for 1980—a full generation hence. Thus the total population figure for 1950 itself indicates a sharp acceleration in the expected growth trend.

The Musk Ox

A shipwreck was responsible for the disappearance of the Musk Ox from one of its best feeding grounds, Banks Island in the Canadian Arctic. Sir Robert McClure abandoned his ship on the shore of Banks Island and marched with his crew to safety overland. Eskimos discovered the ship, and traveled from all parts of the Canadian Arctic Archipelago to collect the iron in the wreck. Once on the island, they destroyed the abundant herds of musk oxen.

THE STATE OF TEXAS

To any Sheriff or any Constable within the State of Texas—GREETING:

You are hereby commanded to cause to be published once each week for four consecutive weeks, the first publication to be at least twenty-eight days before the return day thereof, in a newspaper printed in Briscoe County, Texas, the accompanying citation, of which the herein below following is a true copy.

CITATION BY PUBLICATION THE STATE OF TEXAS

To: W. M. Burger, his heirs and assigns and his unknown heirs and assigns, and Mrs. Julia A. Warren, her heirs and assigns and her unknown heirs and assigns, Defendants, Greeting:

You are hereby commanded to appear before the Honorable District Court of Briscoe County at the Courthouse thereof, in Silverton, Texas, by filing a written answer at or before 10 o'clock A. M. of the first Monday next after the expiration of forty-two days from the date of the issuance of this citation, same being the 16th day of June, A. D. 1952, to Plaintiff's Petition filed in said court, on the 3rd day of May, A. D. 1952, in this cause, numbered 1429 in the docket of said court and styled Farris W. Martin, Plaintiff, vs. W. M. Burger, et al, Defendants.

A brief statement of the nature of this suit is as follows, to-wit: Tresspass to try title on Lots Nos. Sixteen (16), and Seventeen (17), in Block No. Forty six (46) in the town of Silverton, Briscoe County, Texas; and for damages, Plaintiff also pleading the Three, Five, and Ten year Statutes of Limitation; as is more fully shown by Plaintiff's Petition on file in this suit.

If this citation is not served within ninety days after the date of its issuance, it shall be returned unserved.

The officer executing this writ shall promptly serve the same according to requirements of law, and the mandates hereof, and make due return as the law directs.

Issued and given under my hand and the seal of said court at Silverton, Texas, this 3rd day of May, A. D. 1952.

(Seal) Attest: Dee McWilliams, Clerk, District Court Briscoe County, Texas.

PERSONALS

Despite the high production of recent years, the U. S. reserve of low grains are now at five year lows. Higher production of these crops are needed to meet the ever increasing demands both for livestock and human food.

Farm and ranch operations should be planned well in advance of actual work in order to make the most efficient use of farm labor.

Silage, next to pastures, is the cheapest source of food for the dairy cow. "Canned pastures" should be included in the complete forage program for every livestock producer. Now is the time to plant the silage crops.

The recent general rains should boom the practice of controlling mesquite with chemicals. Adequate soil moisture is a factor that materially effects the final result of such a program. Airplanes will be widely used for applying the chemical spray.

C. D. Wright was in Quitaque on business Monday afternoon.

Home gardeners are reminded that tomatoes furnish vitamin C which helps to make sound teeth, firm gums and strong blood vessel walls. When supplies of tomatoes become plentiful, don't waste them but can for later use.

Mrs. C. L. McWilliams, Sr., and Mrs. Bob McWilliams and baby, visited Monday in Flomot with Mrs. Bob McWilliams' mother, Mrs. Welch.

Mrs. R. G. Alexander and Mrs. Bob Dickerson attended the Amarillo Presbyterian at Hereford all day Thursday and Friday morning and also visited relatives.

Mrs. Frank Hunt visited her sister, Mrs. Wayne Gerdes in Tullia Friday.

W. S. C. S. MET WITH MRS. ED THOMAS MONDAY

The Woman's Society of Christian Service met in the lovely country home of Mrs. Ed Thomas on May 5, at 2:30 for a special Mothers Day program. Each member invited one or more ladies to be their mother for the day, unless she was fortunate enough to have her own mother present.

Mrs. Orville Turner was leader of the program. Mrs. Joe Smith gave the devotional. Mesdames Leo White and Herbert Brown gave parts. We dismissed with a prayer by Mrs. Arnold Turner.

After the business meeting Mrs. Thomas served delicious refreshments consisting of punch, cookies and mints. A social hour was enjoyed by the twenty one ladies present.

Recording Secretary.

CARD OF THANKS

I wish to thank all my friends who remembered me with cards, flowers and gifts of any kind during my recent illness. Everything was appreciated. May God bless each one of you.

Mrs. Steele Stone.

PERSONALS

Members of the 1925 Study Club attended a luncheon Wednesday in Plainview. Attending were: Mesdames M. G. Moreland, G. R. Dowdy, E. E. Minter, Clyde Wright, A. J. Jackson, T. C. Bomar, Grady Wimberly, G. A. Elrod, W. Coffee, Jr., Alton Steele, and R. G. Alexander.

Mr. and Mrs. H. P. Rampley visited relatives in Stephensville and Hico last week.

Mr. and Mrs. Geo. Caven, of Floydada, visited recently in the home of Mr. and Mrs. Ralph Glover.

Parrot Fever Is Threat, Health Service Warns

WASHINGTON—Surgeon General Leonard A. Scheele of the public health service warns the public about "parrot fever" from birds from southern Florida.

The case which called attention to the disease was that of a Minnesota physician and his wife, whose son brought home an infected parakeet from Florida. The bird died a week after it reached Minnesota. Five days later the young man's parents had psittacosis and required hospitalization. They recovered after treatment with antibiotics.

No human cases have been found in Florida thus far. Fourteen birds from southern Florida were found to be infected in laboratory tests. As a precautionary measure, the public health service has put an indefinite quarantine on the import of birds of the parrot family at the port of Miami. Psittacosis is spread principally by parrots, parakeets, cockatoos, love birds and others of the parrot group. It is a virus disease, with symptoms similar to those of influenza and pneumonia. It has been successfully treated with antibiotic drugs.

What-The-Heck Students Get Inside Red Embassy

WOONSOCKET, R.I.—A dozen high school students told how they had been taken on a twenty-minute tour of the Russian Embassy in Washington.

The students, on their way home after a visit to the capital arranged by the Rhode Island world affairs council, got inside the stately mansion by simply knocking at the front door.

Charles A. Donlon, high school principal and leader of the group, gave this account of how his charges had pierced the "iron curtain."

The students were walking by the embassy building when one of them suggested in a "what-the-heck" spirit that they try to get inside. Two of the students knocked on the door. A man opened it and said: "We're closed for business now, come back at 9 tomorrow."

The students showed up at 9 A.M. the next day, and a man they had not seen the night before came to the door. Donlon stepped forward and explained that the students had been "invited" to return at that hour. The man at the door disappeared, but soon returned with another who invited the students inside.

Mr. Donlon said the most memorable impression of the tour was the sight of two floor-to-ceiling portraits of Premier Stalin and Nikolai Lenin, founder of the Communist party.

The principal said the Russian guide did not talk much, although many "leading questions" were directed to him. Asked the purpose of the embassy, the man replied: "We are here for the protection of the Russian people."

WANT ADS

FOR SALE—By owner, the south half of Section 20, block D-1, Floyd county. Joins town section of South Plains, with or without crop. 250 acres good wheat, 60 acres to be put in cotton. C. W. George, Sr., Dimmitt, Texas, Box 48, telephone 213-W. 19-2tp

FOR SALE—Early Arizona maize seed, at \$3.25 per bushel, bring your sack. J. K. Bean. 19-4tp

FOR SALE

160 acres land located two and one-half miles of Silverton, Texas. Would consider good house and lot at Silverton as trade-in. Bonnie Smith, Route 2, Box 84, Phone 1586-J2, Pampa, Texas. 17-5tp

FOR RENT—Furnished Trailer House to be moved to any place in Silverton or maybe left at present location. T. J. Word. 19-1tp

THREE BULLS FOR SALE—Two four year old registered bulls; one yearling bull. G. W. Lee. 19-2tp

FOR SALE—12x16 Olson Rug, in good condition. City Shoe Shop. 19-1tc

FARM AND RANCH LOANS—SEE ROY TEETER for Farm and Ranch Loans. 18-1tc

FOR SALE OR TRADE—Motor Scooter, A-1 condition. See Charles Mayfield. 19-2tp

FOR SALE OR TRADE—Two well located lots—one on pavement. Dutch Tidwell. 19-1tp

FRESH MILCH COWS for sale. Snooks Baird, Silverton, Texas. 17-3tp

SEE ME For Hospitalization and Life Insurance. I represent reliable insurance companies. Carl S. Crow. 4-1tc

If you want to buy a farm, see Roy Teeter, Phone 87-R. 44-1tc If you want to sell a farm, see Roy Teeter. Phone 87-R

FOR DISC GRINDING AND IRRIGATION PUMP SERVICE. See Bob McDaniel. Phone 3341. 18-3tp

FOR SALE—1/2 Section irrigated land 12 miles west of Silverton. See or call D. R. McKenney, telephone No. 3101, Silverton, Texas. 15-4tp

THE LOCKNEY GENERAL HOSPITAL

wishes to announce to the public the visiting and clinic hours for hospital patients:

10:30 to 11:30 a. m.
2:00 to 4:00 p. m.
7:00 to 8:30 p. m.

Clinic open Monday through Saturday 9 a. m. to 12 noon; 1 p. m. to 5 p. m. Closed Sunday except for emergencies.

Lockney General Hospital and Department of X-Ray: State Approved Laboratory.

Visitors wishing to inspect the hospital are welcome at any time. 4-1tc

FOR SALE—Modern homes and town lots in Silverton; also farm land, with irrigation in Swisher and Briscoe counties. Will appreciate you listing anything you have for sale with me. Carl S. Crow, Real Estate and Insurance. 4-1tc

OVER FIFTY ENTRIES MADE FOR HOBBY SHOW

Over fifty entries were made in the hobby show which was held by the March of Time Study Club last Thursday. Articles such as crocheted bed spreads, dolls, ceramic, applique, copper tooling, coins, rugs, blowing horns, quilts, china, vases, sewing, woodwork, embroidery, paintings of all kinds and many other articles were shown to between 85 and 90 guests.

The blue ribbon went to Mrs. W. E. Schott, Jr., for her collection of copper tooling; second place to Mrs. Ware Fogerson for her embroidered pictures, and third to Mrs. Joe Smith for a table which was made from a chest over 100 years old, which was brought to Texas from Illinois about 1830.

The club wishes to thank every one who helped to make the show a success.

CARD OF THANKS

I wish to express my sincere thanks and appreciation to all who were so thoughtful and kind during my recent illness, and for the beautiful flowers, cards and other gifts.

May God bless each of you.
Mrs. Jim Stevenson.

For a BETTER COTTON CROP

PROPER SEED TREATMENT MAY MAKE THIS DIFFERENCE

The photo above shows ten good cotton seedlings, well on the way to the kind of growth which can produce a good crop of cotton. This is the result you may expect when properly treated cottonseed is planted... seed that has been treated with a recommended seed disinfectant.

Below, the effects of seed decay, sore-shin, and both pre-emergence and post-emergence damping-off are illustrated. This seed was not treated and this is one reason why it is often necessary to replant.

Treated seed can be planted 3 to 5 days earlier—can get off to a good start even in cool weather. Once a good stand is established and growing well your chance for a better cotton crop increases.

ON BITING WIND AND COLD AND SNOW... his numb fingers bent around an M-1 rifle... this soldier is living with the same hardships suffered by General Washington's troops at Valley Forge 174 years ago.

His equipment is immeasurably better than any those first Yankees could have dreamed of. His chances of survival are equally improved. But, like them, he is doing a grim, hard job for the defense of his country.

Defense is your job, too. It is your job to maintain and support America's economic strength as this soldier is supporting her military strength.

It's an easy job... and one of the best ways to do it is by buying United States Defense Bonds regularly. For with bonds and other forms of savings you are making yourself and your country stable and strong. And America must be kept strong—economically as well as militarily. For we must always remember... in this cold-warring world, peace is only for the strong!

The U. S. Defense Bonds you buy give you personal financial independence

Don't forget that bonds are now a better buy than ever. Because now every Series E Bond you own can automatically go on earning interest every year for 20 years from date of purchase instead of 10 as before! This means that the bond you bought for \$18.75 can return you not just \$25—but as much as \$33.31! A \$37.50 bond pays \$66.66. And so on. For your security, and your country's too, buy U. S. Defense Bonds now! Bankers recommend them as one of the safest forms of investment.

Peace is for the strong... Buy U.S. Defense Bonds now!

Thousands of Farmers Find Wood is a Good Money Crop

Never bury your money in the ground. Never take a wooden casket. Unless you happen to be a farmer, that is. Then you can plant little money in the ground and make it grow into lots of nickels and dimes and dollars—all made from wood.

Wood is a good money-making crop—especially when it's in hardwood trees. Thousands of American farmers and timberland owners are giving nature a boost this year by planting 5 1/2 million hard-wood seedlings. In addition to this, 10 million walnuts will be planted before the season is over with 4-H youngsters, Scouts, and Future Farmers of America cooperating in the planting program.

This adds up to a lot of hardwood trees—and hard cash in the pockets of a lot of Americans—those foresighted enough to see the advantage of putting in a money-making crop that offers big returns for a minimum investment of time.

Hardwood trees, planted in proper soil, are the most valuable timber, turning more dollars per thousand board feet than any other species.

Japan's Heaviest Earthquake Picked Good Place to Happen

The earthquake that hit the northern Japanese island of Hokkaido early in March had all the specifications of a major disaster except heavy loss of life.

The tremor, named "The Earthquake off Tokachi," was described by Japan's central meteorological observatory as the heaviest in the area in 63 years, which would make more severe than the 1923 temblor that caused some 143,000 deaths in the Tokyo-Yokohama area.

In addition, the latest quake was accompanied by a series of seismic waves—often mislabeled tidal waves—which devastated the coast of eastern Hokkaido, sweeping away fishing villages and boats and smagging coastal property.

The death toll, however, was less than two score. Officials say there are several reasons for the small casualty list. Hokkaido is sparsely populated; the efficient Japanese warning service predicted seismic waves, or tsunami, after the initial shock, and the earthquakewise population did not even wait for the warning, but deserted the coast minutes after the quake.

A Missing Link

Metallurgists are in search of a missing link—to short-cut atomic heat to electric power. They want to bypass the costly and cumbersome installations required to use atomic heat to make steam which, in turn, would drive dynamos to generate the electricity. It is believed that this steam-power link could be eliminated by an electronic device if only a new alloy could be invented to withstand the terrific heat of an atomic pile. This alloy is the "missing link." That a direct electronic process can do the trick has been demonstrated, it has been announced, by two young Chicago scientists who have invented a "nuclear thermometer." Their objective was to create a thermometer to control the heat in an atomic pile at its peak without danger of an explosion. They found that their thermometer, a very small instrument, weighing only two ounces and measuring 6 1/4 inches, developed one watt of electricity through displacement of atomic particles.

Electronic Watch

A laboratory model of the electronic wrist watch of tomorrow, a plastic timepiece that carries its own source of power and runs initially more than a year before its tiny energy capsule needs replacing, was unveiled recently by Elgin National Watch Company. The first watch of its kind ever built, it requires no winding or winding mechanism. It will keep nearly perfect time because it is driven by a motor that gives it power at an absolutely constant rate. Yet the energy capsule, motor and watch movement together fit inside a man's wrist watch of conventional size. Potential of the same electronic principle can be used in women's wrist watches, which are often less than half as big as a man's watch.

Rural Schools

The rural school system is having its face lifted. Outmoded, inadequate and too frequently overcrowded, the "little red schoolhouse" is being moved off the American scene by a "new look" school which is lifting the envy of the farmers' cousins. Most of these new schools are ground-hugging masses of cement, steel and glass block offering commodious classrooms decked with glassless daylight. They are designed for function with utility, to provide the latest educational facilities without excessive cost. And they're replacing substandard rural schools at the rate of 50 a year.

Consistent

The Ancient Chinese not only read from top to bottom, they built their houses the same way. They "first" columns to support their exotic roofs with upturned corners. Then they built the walls, simply filling in the space between roof and ground.

Viruses Can Cause Cancer In Man, Scientist Reports

Evidence that viruses can cause certain cancers in man is now as strong as it can be without resorting to the all but impossible experimental transmission of virus cancers in man.

This is the opinion expressed recently by Dr. Warren Bostick, associate professor of pathology in the University of California School of Medicine, San Francisco.

Dr. Bostick reported on his researches, which have continued for several years, on virus nature of Hodgkin's Disease, a form of cancer which tends to attack younger people, more frequently males.

Viruses have been demonstrated to cause cancer in animals, but final proof that such agents are responsible for cancer in man has been difficult to obtain.

Dr. Bostick has obtained an extract of Hodgkin's Disease tissue which possesses many of the accepted characteristics of viruses. It causes virus interference phenomena, it will pass through filters that catch all but the tiniest agents, and it is invisible to the microscope. The scientist said that the only thing lacking is a demonstration that the extract can be transmitted in man, which is not feasible.

The scientist said that the virus apparently is not transmitted by contact with infected persons as in ordinary virus diseases.

Spanish Doctor Had Answer To Problem of Getting Up

Rare is the person who isn't seized with the desire to roll over and go back to sleep when the alarm goes off in the mornings. It's a big temptation to just forget responsibilities and enjoy the luxury of rest as long as possible.

One Spanish physician, said to have lived in the 19th century, grew so weary, or envious, of visiting the bedside of his patients that he decided to reverse this procedure. So in 1875 he took to his bed and had his patients visit him.

Contrary to what one would think, his reputation and practice flourished. He profited equally in both—he not only conserved his energy, but he also saved the necessity of assuming a bedside manner by placing this responsibility upon his patients. He kept up this unique practice for over 16 years.

Wearily, over-worked doctors today probably envy the Spanish physician because they know so well the necessity and benefits of plenty of rest.

Accident Rate

A realistic look into the future of U.S. traffic conditions and highway casualties has brought a prediction that unless a public awakening to the growing menace of automobile accidents takes place, there will be twice as many accidents and injuries and a 50 per cent increase in traffic deaths by 1967. Projecting rates of increases since the end of World War II into the next 15 years, it is predicted that by 1967 the nation will have 107,200,000 licensed drivers and a total of 16,700,000 automobile accidents in a one-year period. It is also estimated that a total of 56,000 persons will be killed in 1965 as a result of traffic accidents, an increase of 19,000 over the 1951 figure, which already has risen 9,000 over the 1945 highway death toll, unless the rapid deterioration of highway safety in recent years is reversed.

"Sad Roads"

Highways are wearing out faster than they can be rebuilt because of unexpected traffic. A. C. Clark, deputy commissioner of the Federal Bureau of Public Roads, reports. He estimated that it would cost \$32,000,000,000 to get Federal-aid roads up to standard. Road planners miscalculated on traffic volume, he says. As a result, he said, the nation's highway network was "crumbling." Highways we thought would be good for ten years more are already overcrowded and congested. Many pavements have failed structurally beneath the pounding of heavier truck traffic." He estimated that within the next year 52,000,000 vehicles of all types would travel some 500,000,000,000 miles. That sort of traffic was not considered probable for ten to fifteen years.

Insurance Companies

There are now 684 legal reserve life insurance companies in the United States, according to a tabulation made by the Institute of Life Insurance of reports from the state insurance departments. This is 50 more than two years ago, and about 200 more than six years ago. Every state but one, Wyoming, has one or more life insurance companies. There are about 200 life insurance home-office cities, one city, Dallas, having a record 49 home town companies. Texas leads the states, with 138 companies; Louisiana is second with 80; Illinois and South Carolina each have 29. Twenty-five states have 10 or more.

Trumpet Went to Court

In Europe, from the 14th to the 16th centuries, the trumpet was reserved for ceremonial occasions and only official court trumpeters were allowed to play it. Today it is one of the most popular of all musical instruments.

Great Water Control Project To Open Everglades Land

The United States' semi-tropical show case—the rich and lushly vegetated Florida Everglades—is scheduled for some new decorating effects at the hand of man.

Presently under construction is the first phase of \$208,000,000 master plan to tame the 'Glades—a plan that reaches into an area larger than Connecticut, Delaware, and New Jersey combined, including a third of Florida's people and nearly half of its wealth.

Projected by the United States Army Corps of Engineers, the massive water-control scheme calls for drainage of swamps, control of floods, and reclamation for agriculture and cattle of extensive reaches of grass lands.

Although the plan encompasses the eastern part of Florida from Orlando south, first-phase work is primarily concerned with the Lake Okeechobee region, the lower east coast and the Everglades proper, often called America's "last frontier."

For well over a century Floridians have been stirred to action by dreams of making productive a part or all of the 4 1/2-million-acre Everglades area which lies south of Lake Okeechobee. Although dominated by nearly flat and usually flooded grass marshes, much of the area's soil is rich, organic muck capable of producing a crop in 60 days.

U.S. Church Membership Is Up 51.5 Per Cent Since 1926

The rate of increase in American church membership since 1926 has been more than 20 per cent greater than population growth, a recent survey made by the National Council of Churches revealed.

The survey showed church membership increased 51.5 per cent while population grew by an estimated 30 per cent.

Described as the first of its kind in a number of years, the survey tabulated the membership of 54 bodies, all with membership over 50,000. Combined, these groups account for about 97 per cent of church membership, it is reported.

Of the three major faiths, Protestantism showed the largest percentage gain adding 16,954,322 new members for a 56 per cent growth. During the same period the number of Roman Catholics increased by 9,005,305 for a 48.4 per cent rise, and the Jewish congregations 918,758 for a 22.5 per cent rise.

Total membership of the religious bodies, which include a number of Eastern Orthodox churches, rose from 53,230,413 to 80,682,575, the survey reported.

The Killer Whale

The greatest enemy of all marine mammals is the killer whale. It will attack seals, sea lions, sea elephants, and even other whales that may be several times its own size. Attaining an over-all length of twenty to thirty feet, the killer whale has been known to do away with an eighty-foot whale of another species. They run in packs and thus add to their effectiveness. Tricky, and clever, the killer whale has long been known to scientists and seafarers as one of the smartest of animals. It has a highly-developed brain. Packs have been known to slip under an ice floe which held a herd of seals. Acting together they would tip the floe over and then slaughter the luckless animals as they fell into the sea. Not uncommon in Pacific Coast waters, the killer whale can be spotted by its huge dorsal fin, which is sometimes six feet in height.

Desert Main Street

Department stores are deserting their traditional spot on Main Street for the suburbs, as millions of Americans use their cars to avoid congestion and the high cost of transportation by public transit. Retailers are meeting this demand with outlying shopping centers having gigantic parking lots and stores almost as big as the big city operations. The shopper in these new suburban havens spends his money at places like the Crenshaw development south of Hollywood, Calif., with its facilities for parking 3,700 cars or the Shoppers' World west of Boston, with its 6,000 car parking lot. This business retreat to the suburbs is an outgrowth of our insistence on using our ears for shopping trips.

Sofa Beds

Dual purpose sleeping equipment first came into prominence following the Civil War. This was largely due to the Reconstruction Act, which was passed in 1867, enabling trade and commerce to again resume its normal place in American business. At this time, bedding manufacturers began experimenting with folding beds as a means of increasing the efficiency of the smaller homes which were becoming so prevalent. Since that time, dual purpose bedding has become one of the most popular pieces of home furnishings.

Music Aids Learning

George Bernard Shaw contended that music sharpens the mind. Today educators agree that musically trained youngsters show excellent study habits in all courses as a result of learning the art of concentration.

T. E. L. Class First Baptist Church Entertained

The T. E. L. Sunday School Class of the First Baptist Church entertained the Good Samaritan Class, and elders of the other churches of our city with a tea and program recently in the basement of the First Baptist Church.

As the guests arrived they were registered by Mrs. H. P. Howard. The table was covered with linen cloth, and centered with an arrangement of spring flowers. Mrs. Shelby Haynes and Mrs. Dee Garvin presided at the crystal service.

Mrs. A. H. Chappell introduced the guests and ushered them into the entertainment room. Mrs. A. A. Howard, leader of the program introduced the speaker.

The program was opened with the T. E. L. Class song. Mrs. G. A. Elrod gave the devotional, the song of the bible.

Mrs. C. O. Allard and Mrs. A. A. Howard sang Jesus Lover of My Soul, with the melody written, Silver Threads Among the Gold. Mrs. L. K. Gilkeyson presented a book review, the Life of Carry Jacobs Bond.

Mrs. E. J. Vaughan being the eldest lady present was presented the registration book that was made up of poems and hand painted flowers, gold and white, with lavender and pink ribbon.

Those who registered for the occasion were: Mesdames A. D. Arnold, Mary Allard, Pearl Hodges, L. K. Gilkeyson, J. R. Guest, Cowser, J. J. Vardell, Joe Smith, W. L. McMin, J. H. Bursen, Jeff Simpson, J. H. Carter, Flora Dickerson, T. G. Olive, Matt Weaver, Mose Edwards, J. T. Neese, Brags, E. J. Vaughan, A. A. Dunnagan, S. P. Brown, H. P. Howard, A. H. Chappell, Shelby Haynes, C. D. Durrough, A. A. Howard, J. C. Bomar, Dee Garvin, G. A. Elrod, W. H. Tenison, Pearl Simpson, Anna Badgett, W. A. Stephens, Gabe Garrison, J. E. Arnold, R. C. Bomar, C. O. Allard and Miss Eunice Cox.

Mother's Day

Are some of your Series E Government Bonds maturing this month?

Now they can earn more money for you!

New law provides 10 more interest-earning years for your Series E Bonds . . . and you need not do a thing!

Are you one of those smart and patriotic Americans who began an automatic saving program with Series E Government Bonds in 1941? Then you're one of the lucky people who can profit by a *new law now!*

A bill recently passed by Congress now makes it possible for your United States Defense Bonds to continue earning interest ten years longer than was originally planned.

For example, a Series E Bond which cost you \$18.75 in 1941 will pay you \$25 in 1951. But if you hold that bond ten extra years, until 1961, it will pay you \$33.33, an average interest of 2.9% compounded annually. You get similar increases on Series E Bonds of every denomination.

And there is nothing for you, as a bond holder, to do: You need not exchange the bonds you have. You need not sign any paper, fill out any form. *You simply keep your bonds as you have been keeping them.*

You may still redeem any Series E Bond at any time after you've owned it for sixty days. But unless you really need the cash you're much better off to hold your bonds. For United States Defense Bonds are as safe as America itself.

When you buy your bonds regularly and hold them, they are steadily building a sum big enough to buy something really worth while—a home, a business, a retirement fund, an education for your children.

And bonds are *safer* than cash! If you lose or accidentally destroy cash it's gone for good. But when you have your cash in United States Defense Bonds, the U. S. Treasury will replace lost or destroyed bonds at no cost or loss to you.

So if some of your bonds are coming due, take advantage of this new offer of your government—just sit back and let them go on making money. Meanwhile keep adding to your savings by buying more U. S. Defense Bonds regularly—through the Payroll Savings Plan where you work or the Bond-A-Month Plan where you bank.

If you want to be paid your interest as current income—

The new law also allows you to exchange your Series E Bonds, in blocks of \$500 or more, for Special Series G Bonds which pay interest semiannually at the rate of 2½% per year. For full details, ask at any Federal Reserve Bank.

Look how your maturing bonds go on earning under the new law!
(This table shows \$25, \$50, and \$100 bonds as examples of how All Series E Bonds grow.)

Original maturity (or face) value	\$25.00	\$50.00	\$100.00
Issue price	18.75	37.50	75.00
Period after issue date	Redemption values during each year		
11 years	\$25.31	\$50.62	\$101.25
12 years	25.94	51.87	103.75
13 years	26.56	53.12	106.25
14 years	27.19	54.37	108.75
15 years	27.81	55.62	111.25
16 years	28.44	56.87	113.75
17 years	29.06	58.12	116.25
18 years	30.00	60.00	120.00
19 years	31.33	62.67	125.33
20 years	32.67	65.33	130.67
Extended maturity value (20 years from issue date)	33.33	66.67	133.33

Mr. and Mrs. Harley Redin and son, of Plainview, spent Sunday with his parents, Mr. and Mrs. Alvin Redin.

More rain means more work on the farm and this increased tempo of work can set the stage for many farm accidents. Members of the Texas Farm and Ranch Safety Committee urge farm families not to become careless and try short cuts that may end in disaster.

INVENTIONS

that serve you

J. P. HOLLAND

John P. Holland (1842-1914) was a young schoolteacher in Ireland when he heard of the astonishing victory of the Monitor over the Merrimac. It was then he began to dream about the possibilities of submarines. Coming to the United States where invention is encouraged by incentives in the Patent System, he developed a type of submarine that set the pattern for the whole world. A friend who backed him with an investment of \$347.19 ultimately found his shares worth millions. Our shores today are defended by submarines with basic principles originated by John P. Holland.

"patents make jobs"

A HOME TO LIVE IN

Small House Planning Bureau St. Cloud Minnesota

DESIGN C-230. In most cases this house could be placed on a lot only thirty feet wide. There is a full basement and the first floor consists of living room, kitchen-dinette, bath, three bedrooms and seven closets.

Kitchen cabinets and equipment are compactly arranged in one end of the kitchen, with the sink

under the front window. This allows for dining space under the side windows.

Wardrobe closets are used in the bedrooms and kitchen, linen cabinet in the bathroom and closets in the living room and hall.

Plans call for frame construction, wide siding, asphalt shingles on a hip roof, recessed tub, flower box and wrought iron railing. Floor area is 987 square feet with 19,180 cubic feet.

For further information see Willson and Son Lumber company.

MAKE YOURS A *Universal* HOME!

"The LITTLETON"

An attached garage adds to all-over appearance of the home. Rooms are designed for proper arrangement of furniture. Nice size closets. Built-in cabinets in the kitchen. Kitchen plumbed for automatic washer. Jet-Flow heating unit takes no floor space. Lovely tile bath.

This Universal Home will be built in our plant and delivered to your lot, ready for you to move right in.

Tree-Ring Calendar Dates Early Human And His Climate

Fifty years ago a young astronomer drove a wagon down a pine-forested mountainside in northern Arizona.

He was thinking idly of sunspots, those remarkable blotches on the blinding face of the sun which come and go in a definite rhythm of years. Then he began noticing the aged trees around him and the changes in the forest as he progressed downward toward the desert floor.

If climate could so affect growth, and if sunspots affected climate, as some scientists were saying, should not a history of sunspots be written in the slow year-by-year growth of trees?

Such was the idea that has given science a calendar-record of weather and human life in the southwestern United States reaching back nearly 2,000 years.

The astronomer's name was Andrew E. Douglass. Today, at 84, he is still on the job.

Trees grow by adding a new layer of wood each year just beneath their bark. In climates where winter halts this process for part of the year, the bands or rings are separate and distinct, an exact record of the age of each tree.

Climate varies the width of these rings, particularly in regions where rainfall or temperature is a crucial factor in plant growth. Prof. Douglass found such ring patterns could be matched in trees growing over wide areas.

By "crossdating" trees, tracing their rings back through overlapping lives of generations of trees, he gradually constructed a chronology of hundreds of years.

Sparkplug Lover Feared Dead in Sierra Snows

QUINCY, Cal.—Manuel Herrick, 78, whose sashays as a congressman from Oklahoma made news in the 1920's, is reported missing in the snow-buried California Sierras and is thought to be dead.

The frozen body of George L. Welch, 73, Colfax, Cal., Herrick's companion when they headed into the high country was found by a search party.

Herrick, a Republican, went to congress from the eighth Oklahoma district in 1921. He failed to win re-election.

He was labeled the "aerial daredevil" of congress and the sparkplug lover of Washington. He won the titles by flying around Washington in Army airplanes and from his heart-balm court suits.

Binocular Vision Covers Up for the Optic Papilla

CHICAGO, Ill.—At the back of every human eye is a spot or disk about a twelfth of an inch in diameter which is insensitive to light, so that the act of seeing cannot occur there. This is the blind spot, or optic papilla, where the optic nerve enters the eyeball, says the Better Vision Institute.

We are not normally conscious of being completely blind at this point, because of a remarkable arrangement of the eyes in binocular vision. The part of the visual field covered by the blind spot in one eye is covered by a corresponding sensitive area in the other, and the other eye takes over the seeing job in that part of the field.

Nevertheless, anyone can demonstrate to himself that he has a blind spot. On a piece of white paper make two black marks, a couple of inches apart, the left one a square and the right a circle. Then close the left eye and fix the other on the square while the paper is moved toward and away from the eyes. A point will be found where the circle disappears. This is the point where the image falls upon the entrance of the optic nerve in the right eye.

Man Lives Full Six Months Without Dying in Hospital

NEW YORK, N. Y.—Sidney Grunauer, 55, left a Bronx hospital after four years. He was discharged because he hasn't "died" once in six months.

He suffers from a rare ailment known as a heart block combined with an "unknown factor" which creates a condition called ventricular fibrillation.

When an attack comes—and he's had dozens of them—Grunauer has no pulse. No heartbeat can be detected. His blood pressure becomes zero. A physician unfamiliar with his case might pronounce him dead.

The attacks last from seconds to several minutes. If they last more than eight minutes, hospital authorities said, the victim probably will die—permanently.

Meat Inspector Didn't Trust the Hamburger

BELLEVILLE, Ill.—A meat inspector walked into a cafe and asked to see the meat.

Escorted to the cooler by owner Joe Kosar, he carefully examined the hamburger for evidence of horse meat—which has created a big scandal in Illinois.

Then the inspector took off his hat and coat and ordered a hamburger plate.

Journey to Moon Made Possibility By Atomic Power

CINCINNATI — That fanciful dream of a trip to the moon is seen as a definite possibility in the future by a University of Cincinnati professor.

"Before the A-bomb, a trip to the moon was delightful fantasy, but now that scientists can experiment with atomic instead of gasoline power, such trips have become feasible," Prof. Bradley Jones, head of the university's aeronautics department, said here today.

If the thought of traveling at the speed of seven miles per second is alarming, Prof. Jones pointed out, just remember the earth is moving around the sun at a speed of over 18 miles per second.

"Seven miles a second is commonly known as escape velocity," the Cincinnati professor explained.

"It is the initial speed on leaving the earth's surface needed by a projectile to overcome the earth's gravitational pull, provided that no additional propulsion is furnished during the flight.

"No passenger-carrying rocket would actually attain this speed while traveling through the earth's atmosphere because friction would cause temperatures that would cook the passengers. For that reason, the first 5,000 or 6,000 miles of travel would have to be taken slowly.

"However, with seven miles per second as initial or starting speed, it would take about 80 hours to reach the moon, which is on the average 239,000 miles away—a distance roughly equal to 10 times the earth's circumference.

"That means that for about 72 hours the projectile would be hurtling toward the moon, and for the last eight hours it would be falling into the moon.

Some of the many problems involved in planning a trip to the moon were noted by Prof. Jones. These include the neutral zone, where the pull of earth and of moon becomes equalized and matter has no weight; the absolute zero temperature of the outer atmosphere; the necessity of carrying air for the trip, the stay on the moon, and the return; effects of cosmic radiation; and the need to compute exactly where to aim so that the projectile would "hit" the moon and also the earth on the return journey.

Chicago Firm Almost Put Out of Business by Theft

CHICAGO—Three burglars almost put the Metal Processing Co. out of business when they stole 75 bars of metal known to the trade as nickleanode.

The bars, weighing 30 pounds each, were valued at only \$3,000.

A company official said, however, that the plant needs a government allocation to get a new supply of the nickleanode, which is used for metal plating.

The firm will be forced out of business unless it can get the allocation, he said.

Blondes Have More Hairs On Head Per Square Inch

Blondes have it all over brunets in abundance of hair, according to the standard textbook of cosmetology.

The blond has about 140,000 separate hair shafts on her head; the brunet has about 110,000; the brunet and redhead are last with about 100,000. The textbook goes on to explain, in other respects the girls come out even. For instance, hair grows at the rate of about one-half inch a month, and the life of a hair on the head is from two to four years, after which it is replaced by a new one. Hairs are lost in numbers ranging from 25 to 50 a day. Normal hair will stretch about one-fifth of its natural length and spring back when released. If pulled out by the roots (perish the thought!), it will grow out again.

The chief function of scalp hair is to protect the skull against cold and injury. And of course it adds a lot to a girl's appearance, too.

Trade Commission Charges Dolcin Ads Are Falsehood

WASHINGTON—A federal trade commission hearing examiner ruled that the maker of Dolcin, a patent medicine, must cease advertising its product as a cure and a treatment for arthritic and rheumatic conditions.

Ahner E. Lipscomb, the examiner, said such assertions by the Dolcin Corp., New York, are false since the only active ingredient in Dolcin is aspirin and, therefore, will give temporary relief only to minor aches, pains and discomforts accompanying arthritis and rheumatism.

Under the terms of the initial decision, advertisements that Dolcin is inexpensive, economical and of low cost also would be banned.

Two Men With Same Name Meet at Tax Collection

HOUSTON—Two Texans, waiting in line to pay taxes, struck up a conversation.

When the first reached the tax window, he told the clerk his name was E. H. Meinke.

His new friend asked "Are you sure you got the right tax notice?" They checked and learned both had the same names—E. H. Meinke.
