Thirty farmers attended the cotton insect field demonstration held Thursday, August 13 on the Joe Mercer farm. Dr. F. A. Fuller Texas A. and M. Beneficial insects that do predominant damage to the bollworm are the Flower Beetle, Lace Wing Fly, Alligator Bug and Abid.

Indications from the demonstrations and further counts Friday and Saturday show that the bollworm is building up fast and in several fields there is definite need for poisoning as soon as the weather permits. There has been a marked absence of the beneficial insects in the fields noticed Friday and Saturday, reported Robert Ledbetter County Agent.

Moisture Puts Most Land in Shape For Cover Crop Farmers and ranchers over the county are enjoying the rains of the past few days. These rains are making favorable the planting of legumes and cover crops for the winter. Disappointing results of legumes such as vetch, Austrian, Winter peas, Madrid clover, and alfalfa can be largely prevented by early planting. Plantings should be made no later than the first of September and plantings made the 20th of August will even be better. Early plantings give the plant time to develop enough root system to keep from freezing out when first cold weather hits. Rye or a combination of rye, vetch, Madrid clover, Austrian winter peas, and alfalfa will give good results.

Since there are going to be wheat and cotton allotments, this will be an ideal time to start a legume program. It will pay more than any other thing that can be done to the land. "There simply must be some kind of a legume program started on the cultivated land in Briscoe County," stated County Agent Robert Ledbetter.

Further information on winter legumes and cover plantings may be had by dropping by the County Agents or Soil Conservation office.

You're "sitting pretty"
behind the wheel

Take this Bel Air model. First thing you'll notice is the quality of the interior. Rich-looking appointments. Roomy seats with foam rubber cushions. Turn the key to start the engine and you're ready to go.

You can see all around

You look out and down through a wide, curved, one-piece windshield. The panoramic rear window and big side windows provide a clear view in all directions.

You get more power
on less gas

That's because Chevrolet's two great valve-in-head engines are high-compression engines. In Powerglide* models, you get the most powerful engine in Chevrolet's field — the new 115-h.p. "Blue-Flame." Gear-shift models offer the advanced 108-h.p. "Thrift-King" engine.

smoother, easier stops

An easy nudge on the pedal brings smooth, positive response —right now! Chevrolet's improved brakes are the largest in the low-price field.

Mr. and Mrs. Edwin Crass were over night guests of friends in Plainview Sunday.
