Everyone in Model Tennessee Town Owns His Home

NORRIS, Tenn.—Everyone in the town of Norris—population 1,200—owns his home, there are no delinquent taxpayers, and there's no bonded indebtedness.

That's an astonishing record, even for a model community.

Five years ago Henry David Epstein a young Philadelphia real estate dealer, paid \$2,107,500 for the town. For his money Epstein got 341 dwellings, a few scattered buildings, a schoolhouse, and 1,284 acres of land.

He announced that everyone would have a chance to buy their own homes and the town plan was to become the finest model community in the United States.

Mayor R. G. Crossno reports that Epstein got back his original investment from sale of the dwellings, the schoolhouse, and some lots. Prices paid for the houses ranged from \$4,700 to the \$14,500 the mayor paid for his three-bedroom house.

The town has one policeman and only four other full-time employees—a clerk-manager, two firemen and a water-system manager.

There has been only one major crime—a killing—in the town history. Last year the policeman made only 11 arrests.

The townspeople are so civic minded they once demanded that the City Council raise the tax rate to repair the streets.

Vienna Taxicabs Are Hand-Cranked

VIENNA—Vienna has 1,300 taxis and most of them are models ranging from 1912 to 1920 and are a marvel of the modern world, far surpassing London, Rome and Paris vintage models on all counts.

However, 100 used sedans bought from surplus U. S. Army stocks is expected to revitalize the service somewhat.

A few of Vienna's cabs have to be hand-cranked. Even those with self-starters often are hand-cranked. Upholstery and trimming have long since been substituted by horse blankets, pieces of cardboard—or just bare boards.

But the otherwise glum, shabby interiors are—as in many London taxis—brightened by the addition of a vase or two of live flowers.

Stories about the cabs are legion. Customers have been known to open rear doors and have them come off in their hands. Batteries and other parts have been known to drop off while the cars were in operation.

But the taxis have survived two world wars and the drivers are philosophical about their service.

Canadian Tells Why Women Buy

OTTAWA—At the convention of the Canadian Dietetic Association, Mrs. W. R. Walton, Jr., national president of the Canadian Association of Consumers, gave these nine reasons why a woman buys:

1. Because hubby says they must.
2. Because nobody has one like it.
3. Because everybody has one.
4. Because it makes them look thin.
5. Because it's imported—it must be good.
6. Because it's going to be scarce.
7. Because it's pretty.
8. Because it's a bargain.
9. Just because.

Modern Fuels Are Aid To Motoring Economy

A recent survey reveals that if you drive a "jalopy," do your own repair work and cut out garage rent, you can operate your car for two or three cents a mile.

A relatively new car will cost about eight cents a mile and a more expensive make runs something like ten cents a mile.

The modern car owner is considerably better off than in 1903, however, when the cost of operating a relatively new car of ordinary class varied from 10 to 20 cents per mile.

Two gallons of today's gasoline will do the work that three gallons did in 1925, yet the cost, without taxes, is about the same.

Motorized Mailmen

The aching arches of the nation's mailmen soon may be given relief by expanding mechanized delivery service. In order to speed delivery service, and at the same time cut costs, (the relieving of arches being purely incidental) the U. S. Post Office is conducting experiments with scooters, hand-carts and special trucks in Nashville, Houston, Miami, Milwaukee and Washington.

A Cat in the Engine

SYRACUSE—When James E. Knapp's automobile coughed and sputtered he was astonished since it was supposed to be in perfect condition. He investigated and found a big "blob of matted fur" under the fan belt.

He borrowed some tools and went to work and released his Angora cat, apparently none the worse for wear.

Joe Ray Stodghill, who has been here visiting his father, Hugh Stodghill, and Mrs. Stodghill and other relatives for a couple of weeks, returned to San Marcos on Saturday where he will attend the Baptist Academy again this semester.

Rev. and Mrs. G. A. Elrod attended the funeral of her brother in law, John L. Hawkins, at Stoneburg, on Wednesday, August 19. On Wednesday of last week Rev. and Mrs. Elrod were called to Roscoe where Rev. Elrod preached the funeral of Mrs. Bill Beavers.

Mesdames P. L. Brown and Jean Grundy were business visitors in Amarillo on Friday.

Visitors with Mr. and Mrs. W. R. Hardin Sunday and Sunday night were her sisters, Mrs. Alice Murphy, of Compton, California, and Mrs. A. L. Boles, of Lewiston, Idaho, and her niece, Mrs. Archie Welle Zeigler, of Spur, Texas.

Mr. and Mrs. L. D. Griffin and Wayne McMurtry have returned recently from a vacation in Colorado.

You're "sitting pretty" behind the wheel

Take this Bel Air model. First thing you'll notice is the quality of the interior. Rich-looking appointments. Roomy seats with foam rubber cushions. Turn the key to start the engine and you're ready to go.

You can see all around

You look out and down through a wide, curved, one-piece windshield. The panoramic rear window and big side windows provide a clear view in all directions.

And it's the lowest-priced line

A demonstration will show you that Chevrolet offers just about everything you could want. Yet it's the lowest-priced line in the low-price field.

Biggest brakes for smoother, easier stops

An easy nudge on the pedal brings smooth, positive response—right now! Chevrolet's improved brakes are the largest in the low-price field.

I figure this demonstration saved me many hundreds of dollars!

I expected to pay that much more for a new car until I discovered I was better off in every way with this new Chevrolet!

Let us demonstrate all the advantages of buying a Chevrolet now!

MORE PEOPLE BUY CHEVROLETS THAN ANY OTHER CAR!

You get greater getaway with the new Powerglide*

A lot finer performance on a lot less gas. That's what you get with the new Powerglide automatic transmission. There's no more advanced automatic transmission at any price.

You get more power on less gas

That's because Chevrolet's two great valve-in-head engines are high-compression engines. In Powerglide* models, you get the most powerful engine in Chevrolet's field—the new 115-h.p. "Blue-Flame." Gear-shift models offer the advanced 108-h.p. "Thrift-King" engine.

It's heavier for better roadability

You're in for a pleasant surprise at the smooth, steady, big-car ride of this new Chevrolet. One reason is that, model for model, Chevrolet will weigh up to 200 pounds more than the other low-priced cars.

*Combination of Powerglide automatic transmission and 115-h.p. "Blue-Flame" engine optional on "Two-Ten" and Bel Air models at extra cost.
