Flash bulletin from Mobilgas Economy Run

**FORD WINS IN ECONOMY TOO!**

**V-8 WINS CLASS A**

In this year's Economy Run a new Ford V-8, with Fordomatic was the official victor over every car in its field, with a winning average of 47.7643 ton-miles per gallon. This means that the sturdier, heavier Ford carried more weight, with greater gas economy per pound, than any car in its field.

This latest Ford victory was scored over a rough and rigorous 1,468.8-mile route running from Los Angeles to Colorado Springs. The winning Ford threaded its way over the tough and twisting course averaging better than 40 mph. Through the heat of Death Valley and over the chilling height of an 11,000-foot mountain peak... through

the gas-eating stop-and-go of city traffic and over the straight-line open road... Ford proved anew its traditional reputation for economical performance.

The winning Ford was a regular-production model taken right from the assembly line and officially impounded until the starter's gun sounded. It was no different than thousands of '56 Fords you see on the road and in dealers' showrooms. This proves that Ford, the Performance, Style and Safety leader, leads in Economy, too! That adds up to four big reasons why the '56 Ford is worth more when you buy it, while you drive it, and when you sell it, too!

The "ton-mile" formula is used by contest officials to insure equal chance for all cars in each class regardless of size or weight. Ton-miles per gallon equals the car weight (including passengers) in tons, multiplied by the number of miles traveled, divided by number of gallons of gasoline consumed.

Test Drive the Economy Winner... '56 Ford

We invite you to try GMC's

# great new RSD\* ride

**-makes roughest roads boulevard-smooth**

IT'S A FACT—the new 1956 GMC pickups with exclusive Road Shock Dumper Suspension give you a ride comparable to the finest passenger cars in smoothness.

Gone are jolting jounces, front-wheel slither, steering-wheel jitters. GMC's amazing RSD ride makes the roughest road boulevard-smooth—eliminates even the drumming from expansion joints on superhighways.

No longer need you slow down for rough going. Wheel-hop is ended. Travel is safer—steering easier—driver fatigue greatly reduced. And fragile loads are protected from breakage.

Only an actual ride can show you what a sensational improvement RSD Suspension is. We invite you to try it—over the roughest road you know. Come in today for a demonstration.

\*RSD Suspension is standard on the Suburban—optional at slight extra cost on other 1/2-ton models.

**Only pickups with these Blue Chip Features** • New 180-h.p. V8 and 130-h.p. six engines with the largest displacement in the industry • New optional fast-cruising axle ratio and Safety Power Steering • New Kudu Stabilizer • Tubeless tires and 12-volt electrical system are standard equipment.

See the difference RSD makes

With ordinary suspension wheels hop and bounce violently on rough roads as shown by actual oscillograph records.

With RSD suspension (on the same road) every wheel bounce is instantly counteracted, smoothed out to a mere flutter on the oscillograph.

See us, too, for Triple-Checked used trucks
