Frank Stovall Will Appreciate Your Vote And Influence

As a little boy, I had a burning ambition to be an athlete and play on the football and basketball teams when I got to High School. I have also had chronic asthma since I was born, and the doctors advised against my participating in athletics. I continued to work toward my goal and I played and lettered in basketball four years and played regularly on the football team for three years, being captain my senior year and making the all regional team. Many times while playing football, I would become so choked up with asthma that I would have to call time out, jog to the bench and inhale from an atomizer in order to unstop my lungs so I could breathe and then trot back on the field and continue to play. My coaches taught me that regardless of the score and regardless of whether you were winning or losing, you must play your best until the last whistle sounded. I have found this to be true in the game of life. A quitter never wins and a winner never quits. You may rest assured that I will be working to be your Representative until the final ballot is counted on August 23rd.

I am deeply grateful to all of the people of the 89th Representative District for the many courtesies you have extended to me. From the bottom of my heart, I thank you for your vote and support. Knowing that a man can only be measured by his friends and supporters, I am humbly grateful to you who have placed your faith in me. I know that I have a big hill to climb, but I believe the people of this progressive and expanding district want a Representative who will fight the battle for all the people and not be controlled by any minority group or clique. I seek your help; I need your help; I hope you will give it to me.

Sincerely,
FRANK STOVALL

Many of you know, I fought a uphill fight, as the liquor I fought me underground all day, but I am glad now the day in all this vast area, knows and on that and other issues, since I think the platform G's (Wells) was the next to my own, and because I am older and more mature, believing he will not support a terrible general, ruinous sales on the little business man consumer, and since H. BOATING SAFETY TIPS ARE OFFERED FOR YOUR CONSIDERATION

Small boat accidents are responsible for some 1,400 water fatalities each year—or more than one-fifth of all annual drownings in this country.

These grim statistics were disclosed today by Ed Mongeon, Red Cross Director of Safety Services for 16 midwestern states, in a statement giving suggestions for preventing boating accidents.

Mongeon pointed out that there are now 7,100,000 small recreational boats on American inland and coastal waterways, with an estimated 35,000,000 devotees of the sport.

He said, "Outboard motor boats are greatly in the majority of small crafts. The great popularity of the support and resulting accident hazards turn many a weekend pleasure cruise into tragedy."

Mongeon listed the following safety rules which can prevent most boating accidents:

Stay ashore in bad or threatening weather. Learn to recognize signs of storms so that, when out in a boat, you can return in time when bad weather threatens.

Don't "over-power" your boat. Many boats carry the Outboard Boating Club of America plate telling the maximum horsepower the boat's outboard motor should have.

If your boat does not have such a plate, consult a reliable marine dealer for the information before buying your outboard motor.

Don't overload your boat. One adult passenger to a seat is considered a good rule of thumb. Avoid sudden or excessive bursts of speed.

When in trouble, think, don't panic. For the sake of boating safety, Mongeon also listed the following points:

Know how to swim. Before leaving shore, tell someone where you're going, and then stick to this cruise plan.

Provide a life preserver for every passenger. Insist that non-swimmers wear a life preserver when in your boat.

Equip your motor boat also with oars, an anchor and line, a fire extinguisher, a first aid kit, a whistle for signaling, and, if you go out at night, flares for signaling too.

"Most boats will float when swamped or capsized," Mongeon pointed out. "Boat owners should look to their boats as a safety device, and if it is floating after an accident, by all means stay with it."

The American Red Cross has special craft safety courses which are offered to all at no charge in the interest of public safety. These courses cover recommended methods of small craft handling and "rules of the waterways." Boat owners are advised to contact their local Red Cross chapter for further information about the ARC Small Craft Program.

ADULT EDUCATION PROGRAM PLANNED FOR JUNIOR COLLEGE AT CLARENDON

A program of Adult Education is in the planning stages for Clarendon Junior College for the fall term of school. This has been discussed a number of times by the school board and the go-ahead signal has been given to President W. W. Pinkerton and Dean Oliver Abel to see just what the demands are for the people of Clarendon and surrounding communities.

Adult Education is a program primarily for the adults of the community who would like to further their education through night courses. A program of this kind serves two purposes: (1) to extend a service to the people who would like to extend their education, and (2) to help the college increase its enrollment in order to meet the standards as set up by the Junior College Council of the Texas Education Agency. An enrollment of 150 students is highly recommended in order for the college to maintain its present high standards.

At present it is unknown as to what courses will be offered in the night school. However, the school board and administration of the college, will make every effort to offer any course in which there is sufficient demand. It is the present trend that ten students is considered sufficient demand to offer a course.

Any person who has received 60 semester hours or less college credit can be counted in the enrollment figure. People of the community who think they might be interested in participating in this program are urged to contact either Mr. Pinkerton or Mr. Abel and give them information as to just what type of course they would like. Courses in Bible, English, Education, Business Law, Commercial courses, Art, Mathematics, and Speech are usually popular in adult education programs. Tuition will be \$15.00 per course and full college credit will be given.

Also, people in the community who are qualified to teach various courses are urged to contact the administration.

Surprised Lady...

A housewife-motorist recently paid her first visit to a Phillips 66 Station, and reported as follows . . .

"All I expected from my Phillips 66 Dealer was ten gallons of gasoline and maybe the windshield wiped. But the first thing I knew they had cleaned the windows all around . . .

"Was I surprised when the attendant suggested he check the tires, including the spare! Then the battery and radiator. I figured he must have me mixed up with someone important. Wife of the mayor, maybe?"

"You could have knocked me over with a feather when he started brushing out inside the car. 'You do this for everybody?' I asked. That's what he said . . . everybody!"

"About the gasoline . . . I got that, too. And that Phillips 66 Lite-Fuel makes my car run swell!"

"50% OF A SPORTSMAN'S WORRIES ARE OVER IF HE HAS A FREEZER TO PRESERVE HIS CATCHES!"

SAYS Mr. Lee Pool,
924 WEST FIRST STREET,
MULESHOE, TEXAS

What better "insurance" for a good catch than a home freezer, as Mr. Pool, a partner in an insurance firm, testifies. Says sportsman Pool, "When I get home with fish or game, regardless of the hour, I can immediately put the catch in my freezer and preserve its fine quality. One of my great joys in hunting and fishing is sharing of the fish I catch and the game I shoot, all year, with friends, relatives and neighbors." Whether or not you're a sportsman, you'll like the fine way an electric food freezer preserves the flavor and freshness of foods. Ask anyone who owns an electric home freezer.
