## Bunch Given 20 Years In Slaying; Decision Reached in 3 Hours

(Lubbock Avalanche Saturday, August 9, 1958)

A 72nd District County jury here Saturday found Glynn Hollis Bunch, 33-year-old ex-Marine and former Silverton agriculture teacher, guilty of "murder with malice" in the shotgun shooting of his brother-in-law, and assessed punishment at 20 years in the state penitentiary.

The verdict was returned at 5:35 p. m., after the jury had deliberated three hours and 11 minutes. Bunch remained seated for the verdict. He showed no emotion. He looked directly at the jury when the verdict was read by Judge Victor H. Lindsey. Bunch's wife was seated at his side.

**NO NOTICE OF APPEAL**

The defense gave no immediate notice of appeal. Travis Shelton, Lubbock attorney, who led the defense said Saturday night that an announcement about appeal probably would be made Monday following conference with the defendant and his wife.

Bunch was taken to the Lubbock County jail.

Members of the family of Wayne Bearden, 20 year old Brownfield oilfield worker who was killed by Bunch last October 25, nine miles south of Silverton, were in the courtroom when the verdict was returned. They sat quietly as spectators and there were no demonstrations.

**COURTROOM IS FILLED**

The courtroom was filled most of the day Saturday as attorneys made their closing arguments. Some spectators brought lunches and ate in the courtroom. It was about half-filled when the verdict was returned.

The state asked the death penalty but softened that request with one for a "long sentence."

Closing arguments consumed most of the courtroom time Saturday. The trial opened Monday.

The defendant has 10 days in which to give notice of appeal or in which to accept formal sentence from the judge.

**LINDSEY ACCEPTS VERDICT**

Judge Lindsey, 72nd District Court, accepted the verdict from the jury. On the bench through-out the trial was Judge L. D. Ratliff, Spur, from the 110th District. The case was transferred to Lubbock on a change of venue.

**SHOOTING CLAIMED ACCIDENT**

Testimony in the lengthy trial unraveled an account of a trip by Bunch and Bearden in a pickup truck last October 25 from Brownfield to the scene of the fatal shooting near Silverton.

Bunch, on the stand, said he got out of the pickup and fired one shot at a rabbit in the pickup's lights. Then, he said, with the other shell automatically in the chamber, he placed two more shells in the magazine for a load of three.

He claimed that a moment later, Bearden apparently turned off the pickup's lights because of a bad battery and started describing Mrs. Bunch, his sister, in foul language.

Bunch continued "there was a struggle; my bad leg gave way, and as I fell back and hit my head against the open door, the gun went off."

The state contended Bearden was shot four times.

Four shell cases were found at the scene, investigating officers testified.

Bunch testified he went to Brownfield on the fateful day "to make my final contribution to reconciliation of the Beardens."

Accounts were given in the trial of how both the Bunch couple and Bearden couple had been estranged but "went back together."

Mr. and Mrs. Farris Martin, Brenda and Ginger have been recent weekend visitors with Mr. and Mrs. Judd Donnell and family at Las Vegas, New Mexico.

## Crop Outlook Good At This Time Agent's Check Reveals

Briscoe County crop conditions were good through this past week. Some places were getting dry, but others had received good showers that enabled cotton and sorghum to make maximum growth. This was especially true in the Quitaque and lower plains area.

Irrigated cotton made the best growth and development that it has made in several years. It is uniformly good. Much of the irrigated cotton has from medium to heavy incidence of bacterial blight or angular leaf spot. The damage that this disease will cause won't be determined until harvest. It may reduce yield somewhat, but other favorable factors are probably off-setting this. Bollworm activity has been at the lowest at any time during the past five years. Farmers should watch their cotton for buildup immediately after irrigation.

Many farmers have experienced the buildup of false chinch bugs in their early heading grain sorghum. These small bugs do severe damage to heads in the milk and soft dough stages. They literally ruin the grain that they attack. Control should be made with Parathion or Malathion at this stage of the game. Malathion will probably give better residual kill than parathion. Other insecticides should not be used on grain that is going into trade channels. The Pure Food and Drug act gives zero tolerance on most other insecticides this close to harvest.

County Agent Ledbetter said he would like to call farmers' attention to the grain sorghum demonstrations and cotton fertilizer demonstrations on the following farms. James Barefield is carrying on a grain sorghum demonstration south of Quitaque with five varieties replicated twice.

The Bill Long farm south west of Silverton has six varieties of grain sorghum replicated twice. Bill Helms has a fertilizer demonstration with six rates of fertilizer on cotton in the sand.

The Bud Bailey farm east of Quitaque has the same demonstration as Mr. Long.

**"MY ELECTRIC HOME FREEZER MAKES MEAL PLANNING SO Easy!"**

**SAYS Mrs. H. S. Hackfield, 2132 56th STREET, LUBBOCK, TEXAS**

"An electric home freezer is the perfect answer to meal planning, especially for working wives," says Mrs. Hackfield. She continues, "There are many advantages of owning a freezer. For example, it's such a convenient appliance and, because we can buy in quantity when prices are lowest, our freezer lets us realize a big savings in food costs. But, getting back to meal planning—when I have odd moments I can prepare complete meals in advance, freeze them, and then when we have dinner guests it's a simple matter just to 'heat 'n serve.'" The same advantages that Mrs. Hackfield speaks of can be yours just as soon as you get that electric home freezer you've been wanting for so long—why wait—there's never been a better time to buy!

Dimmitt, Tex., Man Reports—

### "Ammonia makes a big difference in my wheat"

Frank S. Wise, who farms 960 acres near Dimmitt, knows from experience that Phillips 66 Agricultural Ammonia makes a big difference in my wheat yields. I figure I get an average of 20 bushels more to the acre by putting 80 to 100 pounds of Phillips ammonia pre-plant."

Other successful Southwestern farmers use Phillips ammonia to give them higher grain yields... and more grazing. The 82% nitrogen in Phillips 66 Agricultural Ammonia gives young wheat a fast start, supplies plenty protein-rich forage that puts on more beef at less pound.

Many of these farmers plow down Phillips 66 ammonia the fall on maize land. They know that 82% nitrogen decompose crop residue, to provide extra plant food for the soil more productive. Remember, Phillips 66 gives you more nitrogen per dollar than any other fertilizer—a full 82%.
