Carolyn Garrison Named Dist. Two 4-H Garden Winner

Carolyn Garrison, 14 year old daughter, of Mr. and Mrs. Pascal Garrison of Silverton was named the District Two 4-H Garden winner. To achieve this honor, Carolyn has been in 4-H four years and has had gardens each of these years. This year she was the County Garden winner. District 2 is composed of 20 South Plains and Panhandle Counties.

Other things that were taken in consideration when the District Committee met was the all around record that Carolyn submitted. This record is a detailed account of each of Carolyn's years in 4-H Clubs. Some of the things that were noticed in the record are that she was County Gold Star Girl in 1956. She was an entrant in the South Plains Fat Stock Show Princess Contest from Briscoe County in 1958. She was the Danforth Foundation winner in 1957 for all around excellence in Club work and as an excellent citizen in the community.

Carolyn's records were sent to A. & M. College where they were placed in competition with 11 other district winners. State Garden winners are entitled to attend the 4-H Congress in Chicago. They are also in the running for one of eight College Scholarships given each year by the Allis Chalmers Corporation. Carolyn was not one of the State winners. Being a freshman in Silverton High School, gives her several more years to try for the State and National honors.

1959 Oldsmobile to Be On Display Friday, October 3

Theron Crass, owner of Crass Motor Company announced today that the 1959 Oldsmobiles will go on display in his showroom on the above date.

The 1959 Oldsmobile will feature two new family-size body styles, two completely new and more efficient Rocket engines, increased passenger and luggage space, new Air-Scoop brakes on all four wheels and many other advancements, according to Jack F. Wolfram, general manager of Oldsmobile and vice president of General Motors.

"Oldsmobile for 1959 represents the most outstanding product in Oldsmobile's history in styling, quality and value," Wolfram stated. "And our two new Holiday hardtops introduce an entirely different trend in passenger car design," he added.

The Holiday Sport Sedan is a sporty four-door family-size car. The two-door Holiday Scenic-Coupe has an entirely new silhouette, a snappy appearance and exceptional visibility in all directions. The two new styles will be available throughout the Oldsmobile line.

An extra large, heat-resistant rear window on the Holiday Scenic Coupe curves high into the roofline to give unparalleled visibility. Rear window glass area on this model measures a big 1792.5 square inches. On the Holiday Sport Sedan the rear window wraps around beneath the extended rear edge of the roof.

Total glass area in all models has been increased up to 36 percent to give increased visibility in all directions. The new "Vista-Panoramic" windshield has up to 570 square inches more glass area and contours deep into the roofline offering an unobstructed view of overhanging traffic signals. Electric windshield wipers, with a wider cleaning area, are standard equipment.

For 1959 Oldsmobile if offering 15 body styles in its Dynamic "88", Super "88" and "98" series. In each series are the Holiday Scenic Coupe and Holiday Sport Sedan, a four-door sedan and a convertible. In the Dynamic "88" series, in addition, there is a two-door sedan and a Fiesta station wagon. The Fiesta is also built in the Super "88" series.

All models are marked by their thin rooflines, with increased passenger compartment roominess and comfort. Shoulder room has been increased over four inches and yet the overall width of the car was increased less than an inch. Rear seat passengers have over an inch more leg room in the Dynamic "88" and Super "88" series. Trunk space has been increased up to 64 percent. In the "98", a new larger body, distinctively Oldsmobile, gives rear seat passengers 4 inches more leg room.

At noon a barbecue lunch will be served at \$1.00 per person and the afternoon program will deal with questions and answers on research developments in cotton and sorghum breeding, fertilizer uses, crop rotation, grass seed production, mechanization, new crops and other phases of research work.

Also officials of the three hosting groups will discuss the overall development of agricultural progress in West Texas. The field day is open to the public and farmers are especially urged to attend. The Experiment Station is located just east of Lubbock off the Idalou highway.

The modern man's idea of prosperity: 1912 taxes, 1928 dividends, 1932 prices, and 1958 salaries.

Some people are so busy learning the tricks of the trade that they don't learn the trade.

It's foolish to worry about confused, miserable teenagers. Give them a few years and they'll turn out to be confused, miserable adults.

When all is said and done, there's generally more said than done.

U. S. OFFERS 3% PER CENT INTEREST ON SECURITIES

The government wants to borrow another 3% billion dollars to pay its mounting bills. To get the money, it's willing to double the interest it offered just seven weeks ago.

The two to interest rates on government securities reflect a reaction to tighter money conditions—now quoted by the Federal Reserve Board in hopes of keeping inflationary pressures at bay.

The Treasury announced the terms on which it will borrow money needed to back its supply of treasury bills. The latest auction shows an opening rate balance of about four billion dollars—less than a three weeks' supply.
