## All Around the Town

by Mary Ann Sarchet

An Associated Press news release recently stated that "many voters have clammed up" in regard to their Presidential preference. If they have a favorite in the race they aren't even telling their best friends about it. Do they have a favorite?

Our Briscoe County News poll started last week we have received several answers, some with comments, but only a very small percentage of our subscribers are replied.

One cast a ballot for the Kennedy - Johnson team with this comment, "I am not Catholic, but I'm convinced I am voting right."

Another comment was from a voter choosing the Nixon - Lodge side of the question. He (or she) stated that for twenty years he had voted the Democratic ticket, but that he had voted Republican since 1952.

Our poll so far stands at:  
Nixon - Lodge 7  
Kennedy - Johnson 2

What has pulled the zipper on the lips of the voters? We hope to see more replies from our subscribers, so that we can more accurately feel the pulse of our community.

Politicians from all over the state, putting on the most intense presidential campaign in Texas political history, say they just can't answer these questions. It carries some of them, with the November 8 general elections so close.

Pointing out the uncertainty of the outcome is the unrelenting campaign by both parties. They are striving to outdo each other in organization and by calling on all the party big names that can be heard from other uncertain states to help nail down Texas' 24 electoral votes.

The trend two weeks ago over the state seemed to be leaning slightly to Senator Kennedy, and this week it has seemed leaning slightly toward Mr. Nixon.

A fresh pickup for Richard Nixon could be sensed based on the intensifying foreign policy debate between the candidates before the national television audiences, with Nixon's seemingly tougher stand on the defense of Quemoy.

You add that to Nikita Krushchev's antics and threats at the United Nations and the answer seems to come out Nixon.

Send us your votes in order that we may know locally how the political cookie crumbles.

A customer at a local farm store the other day asked if the product is guaranteed. "Sure," they told him. "If it doesn't grow, just get it back and we'll refund your money!"

We had a check for a subscription renewal this week from Mrs. N. Sheid of Sagerton, Texas. She writes, "Be sure and send the check next week. I haven't missed a few copies in over thirty years."

Dee Skeen was in from Amarillo last Friday afternoon to receive the paper. Being a former resident of Silverton, she wanted to keep up with local events.

Don Morris has come up with the horrible reality that there are 66 shopping days until Christmas. Of course, money is the gift everyone in the family would appreciate most this Christmas—the trouble is, you can't charge

## Silverton Receives More Than Four Inches of Rain

Residents of Silverton have sloshed about town since last Saturday when the rains began to fall. From Saturday through Monday evening, an almost constant rain continued. Skies cleared on Tuesday and the sunshine came bursting through. Tuesday night the rains began again, dumping 1.01 more in the official rain gauge of Ray C. Bomar which had already caught 4.29.

Many measurements indicated that much heavier amounts were received at other points in the county. At the Gilbert Elms farm in the San Jacinto community in the Northwestern corner of the county the measurement was eight inches on Tuesday. Traveling completely across the county to the Eastern extremity, eight inches was reported Tuesday from the Charles Gowin farm four miles East of Quitaque. The city of Quitaque received something less than that. Mrs. Joe Oneal, who lives Southwest of Silverton, reported that five and a half inches had been received there before the Tuesday evening rain.

The general consensus of opinion seems to be that not too much crop damage has resulted locally. The cotton grade has been lowered but it is generally thought that if we miss a freeze and the skies clear to favor us with warm weather, the crop will be harvested in fairly good condition.

These strong breezes pose another problem for the mila men. Too strong a wind with the ground as wet as it is will cause their grain to fall. A lot of it has been harvested, but there is also a lot that is still green, and probably some that needs to be cut right now. It'll take a while for the ground to dry enough to hold up a combine.

If we miss the damaging winds, hail and freeze, we will have been lucky during this storm. Most of us realize that no matter how this situation looks at face value, usually much long term good in such a rain. We realize that the time will come when we will wish for a rain many, many days before it comes.

Besides, we think the farmers who have their wheat planted and the ranchers are smiling and looking to next year.

## Yancey Purchases Local Cafe

Melvin Yancey has recently purchased Bill and Dimp's Cafe in Silverton. This establishment, which has lovingly been called the "Plum-Nelly" (Plumb out of town and Nelly in the country) for years, is now operating as the Y-Drive Inn.

A number of improvements have been made by Yancey, who specializes in real hickory pit barbecue. They have been repainting and redecorating at night in order not to inconvenience their lunch patrons.

Melvin says that future plans may include plate lunches, but only and if they can serve fresh vegetables. He adds that they have thrown away the can opener, and plan to serve nothing out of a can.

## Owls Fall To Ralls In First District Game

Silverton's Owls battled the Ralls Jackrabbits through a scoreless first half in last Friday night's contest, before falling in defeat to the tune of 26-0.

Ralls completed 12 first downs, while the Owls made only 3. In the fumble department, Silverton led with 3, as compared to Ralls' two. Ralls recovered two of ours and let both of their own get away. Actually, Silverton has fumbled just about every kickoff return all season, but they aren't counted in these statistics because the Owls have managed to come up with the ball.

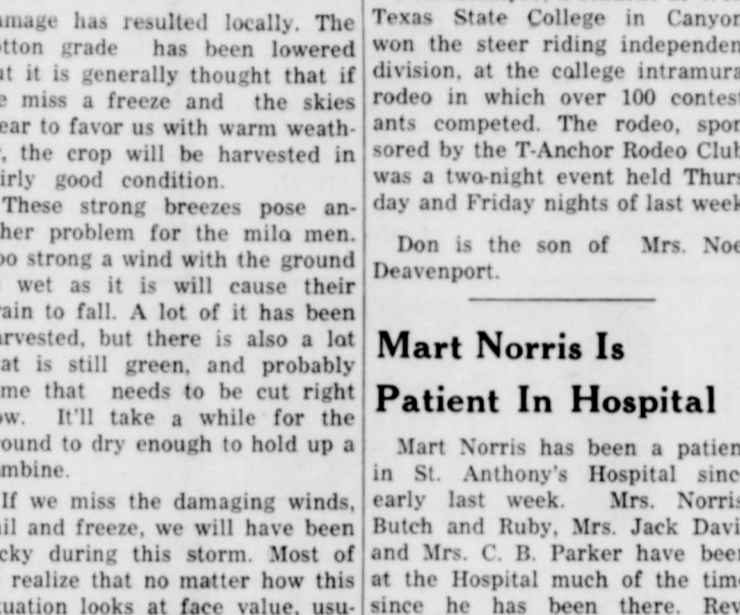

Ralls attempted 13 passes, completed 3, had 2 intercepted and had 8 fall short. Silverton tried five times, and all five were incomplete.

Neither team was penalized many yards and the offenses were mostly for delay of the game, being offside, etc. Good clean ball, free of many 15-yard penalties, is always to be respected.

The first half of the conference tilt was a real struggle, and it looked very much like a contest at half time with a 0-0 score. However, the Jackrabbits came roaring back with energy to spare and steamrolled the "pooped" Owls.

Scoring began about halfway through the third quarter when Jerry Smith charged over from five yards out to score. The conversion pass was incomplete and

## Swimming Pool May Soon be A Reality

Jack Strange, temporary treasurer of Silverton Pool, Inc., a proposed non-profit corporation, has announced that share subscriptions totaling \$15,000.00 have been sold and the expectation of providing members, their families and guests with a swimming pool here in Silverton will undoubtedly be realized.

Negotiations for the proposed location east of Silverton High School have been completed and title transfer papers are being circulated. The modern pool proposed will be gunite walled complete with heater, chemical filter and diving board. Although over two-thirds of the 1800 square foot surface area of the pool is of a depth of 2 to 4 1/2 feet, experienced swimmers will enjoy the 8 1/2 feet deep water at the diving board and deep end. The pool, concession and dressing area, utility building, concrete deck area, metal shade port enclosed by a fence, will occupy an area of about 8400 square feet. The cost of the entire facility including the land is estimated between \$21,500.00 and \$24,635.00. As soon as share subscriptions total sufficient funds to completely pay for the facility, an organizational meeting of all shareholders will be held to elect directors who will be responsible for letting the contract.

Persons interested in subscribing should contact one of the following persons who will furnish additional information: Dee McWilliams, Jack Strange, Gene Morris, Hugh Nance, H. A. Cagle, Carman Rhode, Doyle Stephens, George Seaney, Bill Long or George Miller.

### OWLS FALL—

Continued from Page One

fensive ball in the first half, but were never able to get started offensively.

This Friday night we meet Idalou on our home field. The Wildcats are ranked as the seventh best team in our class in the state, and according to their coaches they are a lot better than last year. Our Owls will be trying very hard for a win, and we hope that a large crowd of fans will be there to cheer for them.

The new scoreboard has arrived and it is hoped that it will be installed for this game. All who have not donated to the Score Clock Fund in one way or another should take a proud look at it, and ante up. Even though it is here and will soon be installed, it is not paid for, and the Seniors have bitten off a big chunk of debt to get it here this soon.

Apologies to Larry West for our crediting Larry May with the against Turkey. We appreciate all touchdown he made in the game that both boys have done for our team this season—looks like we should simply say—"Larry did it." Then we'd be pretty safe.

### THE WORD OF LIFE

No scientist of earth is able to define, much less explain, the thing we call life. The best definitions stand as much in need of explanation as that which they purport to explain. What a marvelous thing is life, transcending far beyond the comprehension of man, who has learned very many facts concerning life, but can give us no intelligible explanation of them. But if none of us can say what life is, we can all distinguish between that which is living and those objects which have no life. Between the two there is a great gulf which only divine power can span; only the living God can impart life to that which is lifeless. The written Word of God contains the characteristics found only in living things, as it exhibits not merely the perishable life that we are familiar with, but life of a different order imperishable and incorruptible.

The Bible differs from other books in its perpetual freshness. This characteristic will be recognized by those who know the in that intimate way which comes from living with it as with a member of one's family. The Bible never becomes exhausted, never diminishes its power to quicken the soul who comes to it - like a fountain of living water, always fresh and always refreshing. The most familiar passage yield as much (if not more) refreshment at the thousandth reading as at the first. Like the living companion to whom we go for help and fellowship, this living Book adapts itself to every new phase of our experience and new conditions of life. From the most familiar passages, there comes again and again a new message, just as our most familiar friend or companion has something new to say as new situations require it. This is true of no book of man from which we obtain the writer's message the first perusal. However beautiful its language may be, the second reading is seldom enjoyed.

The difference is between the living and the dead, for the Bible is a living word. Like the mechanical processes which generate electricity; this Word of Life, if received and kept in the human heart, generates the spark and spirit of immortality which shall one day bring that soul still alive into eternal glory.

SOIL CONSERVATION DISTRICT NEWS

Charles A. Rodgers  
Soil Conservationist

It has been determined by experiments, as well as by the experience of farmers, that crop residues left on the surface is a means of protecting the land. There are several farmers and ranchers throughout the county who are carrying out this practice and receiving profitable returns.

A good example of this practice being applied on wheat stubble is the H. T. Luther Ranch and the E. A. Birdwell Ranch. Another ex-

ample of crop residue management on grain sorghum being applied is on the Johnnie Burson Ranch and C. E. Bedwell farm. These residues should be managed through the critical erosion periods, which would be until about August 15th for spring harvested crops and until about April 1st for fall harvested crops.

One way to provide adequate residue protection is by a system of stubble-mulch farming. Such a system involves the use of implements which do not necessarily invert the soil and do not bury the residue. This may be accomplished by the use of sweep-type implements or sub-surface tillers. Dish-type tools can be used to a limited extent, but they usually cover too much residue.

Residue cover causes the soil to absorb water much more rapidly and thus reduces the total runoff. It also reduces the amount of soil lost by either water or wind ero-

**AN EDITORIAL**

It has been wisely said that corrupt governments are made by good people who do nothing. To help correct this dangerous state of affairs, the Boy Scouts of America and the Freedoms Foundation, Inc., of Valley Forge, are launching the Get-Out-The-Vote campaign for the third time in a decade.

In both campaigns of 1952 and 1956, executed on a strictly non-partisan basis, the Boy Scouts and Freedoms Foundation were praised for their help in producing record numbers of voters at the polls.

We are happy that the South Plains Council is already actively involved in the giant scheme to get out the voters with about 8,000 Cub Scouts, Boy Scouts, Explorers, and their leaders already adding their force to the five million Scouts participating nationally.

On Saturday, October 29, our

boys will hang Liberty Bell cut-outs imprinted with pleas to vote on 65,000 front doors in the area. A committee has been formed to administer the campaign in an orderly and colorful fashion, with Jimmy Lumus as the General Chairman.

Students of American history question whether the wealth and success of America has brought about a deterioration of patriotic vigor. Where is the rugged civic and national consciousness of the contemporaries of Washington and Jefferson?

Such a vast civic undertaking as the 1960 National Good Turn, the Get-Out-The-Vote campaign, can be a trumpet call to the conscience of every voter and start a revival of old-fashioned Americanism.

We congratulate the Boy Scouts of America and the Freedoms Foundation for daring to put this mass awakening of the citizenry. Let's all help to make it a triumph.

**WSCS Meets In McWilliams Home**

The W.S.C.S. met in the home of Mrs. Glenn McWilliams on Monday, October 17. Mrs. M. G. Moreland gave a very interesting program to eight members and one visitor.

Mrs. Gene Morris dismissed the group with a prayer. Refreshments were served by the hostess.

Mrs. R. L. Hill spent one day last week with her mother, Mrs. W. T. Haley, in Plainview. Mrs. Haley is a former Silvertown resident, and is now recuperating from a recent leg injury. The leg was cut in a fall and some fifteen stitches were required to close the wound.

and in our courtrooms, men did strange things to "test" truth in a court trial. Our notion of evidence in law courts is actually only a few centuries old. It entered court procedures at about the same time that Galileo and Newton used scientific evidence to upset older theories of nature.

Before then, men talked to prophets, fortune tellers, and augurs before they acted. These men would look into the sky and find out how many and what kind of birds flew in from what quarter. Sometimes they looked at the

Court tests for truth in the Middle Ages were many, but somewhat drastic.

You might dispute with your neighbor over land. If so, the court might order a test by ordeal. The contestants would walk through fire. They might be tied and cast into water or you might meet your opponent with sword and shield. You or your agent might fight it out with your neighbor on the theory that Providence would not let the unjust win; or, after due

rites, the court might toss you both into the water. If you did not drown, you won. Or perhaps you both grasped a red hot iron or walked barefoot through hot coals. If you came out without blisters, they believed your story.

As you can see, few people went to court of their own will. The risks were many, not the kind you'd choose.

Later in England, where we got most of our law, men had other ways to reach decisions. For example, take the 'oath helpers.' Suppose your case was to be tried

You'd not go into court with facts, as today. No, you took with you a fixed number of men called "oath helpers." Oath-helpers would swear that your neighbor had wronged you. In turn, he would bring his oath helpers and do the same.

(This newsfeature, prepared by the State Bar of Texas, is written to inform—not to advise. No person should ever apply or interpret any law without the aid of an attorney who is fully advised concerning the facts involved, because a slight variance in facts may change the application of the law.)

**Training Union Attendance Hits New High**

Training Union Director L. B. Monk announced to the congregation of Quitaque First Baptist Church recently that the largest attendance since he had been in the office has just been reached. Expressing his pleasure at the presence of the 69 people, he challenged the church membership to take the task of training even more seriously, and aim at a regular attendance in the 70's.

Several new faces have appeared in the Training Union leadership with the beginning of a new

year on October 1. Mrs. Peggy Stephens is Nursery I leader, Mrs. Bruce Price, Nursery II, Mrs. Odell Johnston, Beginners, Mrs. Bob Beck, Primaries, Mr. and Mrs. Elmer Berryhill, Juniors, and Mr. and Mrs. Truman Merrell, Intermediates.

In 1911, the year a Baptist Church was organized in Quitaque, Southern Baptists had only 60,700 enrolled in Training Union and now there are 2,700,000. Training Union is the organization which trains in church membership, majoring on developing leadership abilities, teaching Baptist beliefs, and enlarging the Christian's vision of service.

## BIBLE SURVEY BEING MADE

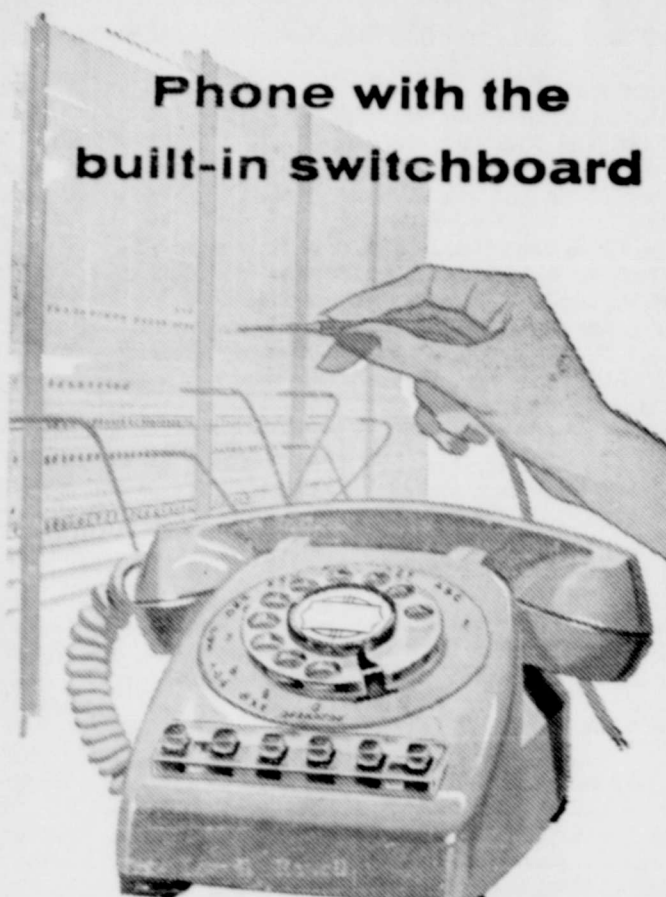

A survey of the entire Bible be-  
gan in the midweek service at the  
Baptist Church in Quitaque recent-  
ly. The time is Wednesday night  
at 7:30 o'clock. A study guide, en-  
titled **The Book of Books**, has been  
purchased by 20 families in the  
past few weeks. Pastor Bob Beck,  
who will be teaching the survey  
course, repeated a story to his con-  
gregation Sunday morning. "In  
California, the favorite target of a  
certain religious sect is Baptists,"

he quoted a Bible professor as  
ing. "The reason is that Baptists  
believe the Bible, but they don't  
know what's in it." So, said the  
pastor, he hoped that if this  
true a big portion of the church  
membership would study together  
on Wednesday evenings from now  
until December.

**built-in switchboard**

Here's a phone designed to play a big role in busi-  
ness offices. Right in this single instrument are  
all the conveniences of a telephone switchboard.  
Six push buttons give you complete control over  
all incoming and outgoing calls. You can select  
any of five lines — talk on one while holding calls  
on others — "buzz" your secretary — or use the  
phone as an office intercom. Lights in the buttons  
tell you which lines are busy, which are free.  
Our "phone with the built-in switchboard" is  
another example of how General Telephone works  
to make the telephone a more convenient and val-  
uable instrument of communications for everyone.  
Call or visit our Business Office and learn how  
little it costs to have the "switchboard" service  
of a push-button phone.
