Dreams for sale.

It's easy to forget that emergencies do happen. And when there is a crisis, you'll need a nest egg to fall

The Payroll Savings Plan is one of the easiest ways to make sure you've something saved for when you need money fast. When you participate in the Payroll Savings Plan where you work, an amount you designate will be set aside from each paycheck and invested in U.S. Savings Bonds. It's an effortless way to build up a

And now there's a bonus interest rate on all U.S. Savings Bonds-for B Bonds, 516% when held to maturity of 5 years, 10 months (4% the first year). That extra 1/2%, payable as a bonus at maturity, applies to all

Bonds issued since June 1, 1970 ... with a comparable improvement for all older Bonds.

Let's hope there are no troubled waters in your future. But remember, emergencies don't always happen to the other guys.

Bloat Control Recommendations **Given By Agent**

The problems of death loss on if bloating started suddently. wheat pasture is still with us this Generally, most cattle will conlate in the year.

precautions we take are the ones ules per head per day. fur. In a soil deficient of sulfur, belch excess gas. it is possible to get a higher accumulation of nitrate in the plant due to slower conversion of the Cotton Production nitrate to protein. According to the Bushland Experiment Station, we do not have a deficiency of sulfur in this area. To assure protection of a cow from wheat poiwould have to consume one acre Jimmy Vanstory. ficient magnesium oxide. In addi- SPD. tion magnesium and sulfur have Billy C. Gunter, district agent no effect on controlling bloat.

The best recommendation for ordinating the meeting. these three conditions are those backed up by research. These re- sistant director of research for the commendations are as follows:

WHEAT POISONING

This is a problem mainly in cows that are heavy with calf or rarely in steers, open heifers or bulls. A good salt mineral containmagnesium requirement for cows ready to calve or those that have just calved would be much higher calf. The cow needs to consume Littlefield, will chair the event. two (2) ounces of magnesium oxide but one formula that is readily consumed is 1/3 salt, 1/3 magnesium oxide and 1/3 dry molasses.

NITRATE POISONING

Plants growing rapidly on rich, ing a period of cloudy, cold wea- face. The discussions will center The soil temperature reroots of the plants continue to pick up nitrates from the soil which accumulate in the plants. This is one of the known causes of high levels of nitrates in wheat lic at large, with a special invitapasture. Understanding the essential elements necessary to produce of Deaf Smith, Randall, Arma potentially dangerous situation is the first step in preventing the problem. These elements are: (1) Long spells of cloudy weather, (2) Cold temperatures, (3) Plants growing in the shade, (4) Restricted water, (5) Damage to the plant: trampled, blown down in a storm. hail, etc. Animals are able to consume a high nitrate level if they are on a high energy diet. Also the South Plains. forages high in nitrate can be diluted with forages that are low in nitrate. If nitrate buildup is suspected, samples should be sent to a laboratory for analysis.

BLOAT

The process of an animal bloating is complicated and varied. Conditions capable of producing bloat are warm weather, good soil moisture and fast growing wheat.

Even a partial explanation would be too long for this article, but conditions capable of producing bloat are warm weather, good soil moisture and fast growing wheat.

Two methods of preventing bloat, their advantages and limitations are:

(a) Roughage: Advantage - it stimulates rumen motility; reduces the amount of wheat consumed in given time and increases production of saliva. Disadvantage -unless close surveilance is maintained some animals may not consume enough.

(b) Detergents: Be careful for some are irritating to stomach. Poloxalene: Available in bloat guard blocks, granules, and molasses liquid mix.

The best prevention is roughage and possible low level bloat guard in cold months when wheat is not growing very rapidly. When weather warms up and wheat is growing fast, provide bloat guard blocks at the rate of one block per five

head of cattle and add one block when one half of each block is consumed. Remove all other salt. Cows could have high magnesium mineral with no salt. It usually takes time for cattle to start eating a new feed. Therefore, the low level feeding of Poloxalene would hopefully reduce this new feed time lag

sistently consume granules in the According to Dr. Gene Cope, grain mix better than blocks, if Area Extension Veterinarian in troughs are available. Formulas Amarillo, precautions to prevent may vary widely as to the total bloat, nitrate poisoning, and wheat daily ration consumption, but repoisoning are best initiated prior gardless of the formula used, a 500 to the onset of the problems. Also, pound calf should consume threeit is extremely important that the tenths ounce of Bloat Guard gran-

that have the best potential to con- Nearly all bloat produced by trol the problem. Some people wheat is of the frothy type. The advocate control of bloat, wheat reason Poloxalene is effective is poisoning, and nitrate poisoning that it reduces surface tension alby spraying wheat with low con- lowing the gas to escape and rise centrations of magnesium and sul- to the top so that the animal may

Quality cotton production is the soning, she should consume two subject of an evening meeting to (2) ounces of magnesium oxide per be held in Earth April 16 of cothead per day. The Litter Critter Says . . . DRIVE AND ARRIVE

SIX FLAGS ON THE GROW — Six Flags Over Texas will feature Good Time Square, an allnew section for 1973. Shown in the artist's rendering above, the five acres include two major rides, a miniature circus, a games area and new restaurant facilities. Built at a cost of some one and one-half million dollars, it is Six Flags' largest expansion program in several years. Good Time Square reflects the architecture of a Texas town at the turn of the century.

SEASON BEGINS

EXCITING NEW ATTRACTIONS ADDED TO SIX FLAGS LINEUP

Arlington, Texas — SIX FLAGS Over Texas' "We spent several years working on the conbiggest expansion program in several years has added a completely new entertainment area and project reflects the wholesome style of entertwo major rides to the theme park's growing list of attractions.

The new section—Good Time Square—covers nearly five acres adjacent to the Park's Boom-

Largest of the new rides is The Infernal Electrical Bumping Machines, a "giant size" version of the traditionally popular "bumper cars." The SIX FLAGS installation boasts fifty cars, which is approximately double the number usually found on such rides.

Another new ride, Crazy Legs, has seats which spin on the tips of long, arching arms that rise and fall as the entire ride turns in a huge circle.

Across the Square is Doc Snooker's Magnifi-cent Main Street Exposition, featuring sixteen games of the type which have been the most popular attraction at major fairs through the ames of the type which have been the most opular attraction at major fairs through the ears.

General Manager Robert W. Freeman said, the turn of the century.

tainment which has become a SIX FLAGS trademark."

Another highlight of the new section is the Dragon Bros. Circus, a fascinating miniature circus representing more than 10,000 hours of meticulous work by the late P. K. Schmitter of

meticulous work by the late P. K. Schmitter of Irving, Texas.

Mr. Schmitter, a technical illustrator who passed away in July, 1972, built the elaborate model as a hobby. The project occupied his spare time for more than eleven years.

The circus, with more than 4,000 tiny performers and spectators and nearly 2,000 miniature animals, fills a large building.

Still another entertainment feature is Doc Snooker's Medicine Show, a re-enactment of the humorous, razzle-dazzle sales pitch of the old time patent medicine peddler.

If your six year old saw something like this, would he know how to phone for help?

It's too important a question to leave to chance. That's why we're running this ad.

If there are any six- or seven-year-olds around your house, teach them how to report emergencies. Tell them to tack up the list near your phone. dial "O", give their name and tell our operator where they

are and what's wrong. With older children, train them to dial emergency num-

bers direct, since that's the fastest way to call for help. But don't stop there. Copy down the emergency

numbers listed on the inside front cover or first page of your telephone directory. Add your family doctor's number. And the number of the nearest hospital. Next,

Then get your kids to memorize it, in case it gets lost. By the time they're through memorizing those numbers, they're going to have every grownup in the house knowing them, too.

Which is also why we're running this ad.

WORSHIP BEGINS IN THE HOME

Our home is more than just a pretty structure, of course it does provide comfort, but beyond that, it is a place where joy abounds...it is a place where love is abundant, it is a place of cooperation, and it is a place where the Lord is worshiped. From the home, our relationship with God is carried over into the church. It is there that my family is able to share worshiping the Lord with others. Ours would not be a full life, if we did not participate in worship at home and church. Attend church this week and join us in worshiping the Lord.

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

> carefully read the ads and not make purchases on impulse, it is usually rather easy to differentiate the reputable ad from the so-called sucker bait.

ONCE UPON A TIME . . .

A man who "just couldn't get around to subscribing" to the hometown newspaper sent his little boy to borrow his neighbor's copy. In his haste the boy ran over an \$80 hive of bees and in 10 minutes he looked like a warty squash. His father ran to his assistance, and failing to notice the barbed wire fence, ran into that, cutting a hole in his anatomy as well as ruining a pair of \$10 trousers. The old cow took advantage of the gap in the fence and killed herself eating green corn. Hearing four-gallon churn of cream into a four-allon churn of cream into a basket of chicks, drowning the entire batch. In her haste she dropped a \$135 set of false teeth, which the family dog buried thinking it was a new type of bone. The baby having been left alone, crawled through the spilled cream and into the parlor ruining a \$250 carpet. During the excitement the oldest daughter ran away with the hired man, a stray dog broke up 11 setting hens, the calves got out and chewed the tails off four fine shirts on the clothes line, and the cat had a batch of kittens. All this just to save 10 cents. And in this case, the poor guy never did get to read that week's edition.

Don't let this happen to you Subscribe today!
