All Around

A postcard was received in Sil-  
verton this week addressed to  
"Postmaster" by M. L. Gunter,  
19 Fieldcrest Road, Parsippany,  
New Jersey 07054. He wrote:  
"While watching WNEW-TV,  
Channel 5, New York City, I saw  
a news item on the 10 o'clock  
news about Silverton, Texas, need-  
ing a doctor. It showed a farmer  
on a tractor, the druggist packing  
pills, and a lady, Mrs. Patton, I  
think. This was on the Sunday  
night news. Some of the nicest  
people I have ever known were  
from Briscoe County. I taught  
school at Haylake in 1935. I heard  
Haylake was so tough that they  
stole the lions whenever the cir-  
cuses came through. Quite the con-  
trary! The school board went on  
my note in order for me to get  
the money to go to summer school.  
The Jim Brooks family treated me  
as one of the family. I taught with  
Mrs. Bomar. I came across O. C.  
Rampley, an ex-student and a Ma-  
rine in Hawaii. I was privileged to  
be Tom Brooks' best man at his  
wedding in New York State. I  
wish I could recall all of those  
who were nice to me, my students,  
their parents, and others who  
helped to make Haylake and Sil-  
verton great. My cousin, Carrol  
Gunter, was once druggist in Sil-  
verton."

### Farmers For Hightower Have Meeting In Pampa

The bi-monthly meeting of the  
Farmers for Hightower Political  
Committee was held in Pampa.  
Delegations of farmers and stock-  
men from most Panhandle coun-  
ties were in attendance.  
Chairman Beryl Long of Sil-  
verton read a telegram from Jack  
Hightower. The State Senator from  
Vernon expressed regret at not  
being able to attend the meeting.  
Hightower cited the need for car-  
rying out his responsibilities at  
the Constitutional Convention as  
his reason for remaining in Aus-  
tin over the weekend. He wired,  
"Time is running out on our con-  
vention and our investment of  
time and tax dollars must be sal-  
vaged."

The Democratic candidate ex-  
pressed his concern for rising  
costs, spiraling interest rates, and  
uncertain commodity prices.  
Hightower, seeking his first  
term as the U. S. Representative  
from the 13th Congressional Dis-  
trict expressed concern that the  
district had not already received  
designation as a drought disaster  
area enabling farmers to qualify  
for low interest loans to finance  
next year's crop. He stated, "The  
governmental machinery is there.  
It just takes a push from a con-  
cerned representative to get it  
moving." He emphasized, "As your  
congressman you can be sure that  
I will always be immediately re-  
sponsive to your needs."

Following the reading of Hightower's  
telegram, the Executive  
Board of Farmers for Hightower  
Committee then moved into a busi-  
ness session. Routine business re-  
lated to approval of the minutes  
of the organizational meeting and  
the financial report which was re-  
viewed by those present.

A delegation of ranchers and  
cattle feeders attending the meet-  
ing requested a merger to further  
Hightower's candidacy. This mer-  
ger was agreed to and by unani-  
mous consent the committee name  
was changed to Farmers and Stock-  
men for Hightower. The Executive  
Board will be expanded to include  
an equal number of stockmen.

The committee address remains  
P. O. Box 570, Canyon, Texas  
79015. Donations should be made

### Pinkeye Problems In Cattle Can Be Reduced

Pinkeye is a serious problem in  
some beef cattle herds in Texas  
during the hot summer weather.  
The disease can cause considerable  
weight loss and even the loss of  
sight.

There is no single cure—all for  
pinkeye, but there are several  
practices which you can follow to  
help reduce pinkeye problems,  
notes Jimmy Vanstory, County  
Agent for the Texas Agricultural  
Extension Service.

Clipping pastures before seed-  
heads develop on grass is one  
practice that helps. These seed-  
heads may irritate the eyes of the  
cattle and increase the chances of  
pinkeye infection.

Flies spread certain kinds of  
pinkeye. Vanstory recommends re-  
peated spraying of the face of  
cattle with Clodrin insecticide to  
control face flies. Dust bags, face  
wipers and backrubbers also help  
in controlling flies. Locate them  
near or on the salt box, on the  
way to water, or in shaded loafing  
areas.  
An adequate amount of Vita-  
min A helps keep eyes healthy.

## Terra Cotta CowBelles CATTLE CHATTER

by Alice Allen, President

Message from American National CowBelle President: We are through the halfway mark for the 1974 year, and the many problems we faced at its beginning are still with us; some have worsened. I could continue on and on with the gloomy picture, but I am forced to recognize the sunshine spread everywhere by the cattlemen. You are stalwarts to stand by your husbands, to share the worries of operation, the joy of new calves in the field, the concerns of the fluctuating market, the interest of health and well-being of the family, the need to be thrifty and cautious in buying, and the planning and preparation of food. Why do we stay in the cattle business? Many of you feel as I do: to be close to the land is satisfying.

The sunshine you CowBelles spread is enveloping many and I am deeply impressed with your efforts and unity. Your many accomplishments through warm friendship are contagious.

Texas, although organized for only two years, boasts of 1600 unified members and set its goal for 2000 by the end of the year. I listened to their committee reports. Their accomplishments are many; their interest in beef promotion high. Texas CowBelles will have much accomplished by the end of the year.

Several CowBelle Locals and TAP sponsored a Beef Display in Sunset Center Mall July 11-12-13. Each day from 10 a.m. until 6 p.m. CowBelles and TAP representatives were on duty in the mall to hand out Beef Promotion material and talk to interested persons about different methods of cooking beef. Beef recipes were given away, also instructions on how to choose good beef cuts at the market. There was a drawing for the several cuts of beef on display. The beef was contributed by Glover Packing Company.

Terra Cotta CowBelles sponsored a program and refreshments for the blind in Swisher County Tuesday, July 8, from 3:00 to 5:00 p.m. in the parlor of the First Methodist Church in Tulla.

Terra Cotta CowBelles also entertained at a breakfast for the Plainview Chamber of Commerce Thursday, July 10. This was another attempt to put BEEF before the people.

Until our next CowBelle col-

## America the Beautiful...

From the time that Columbus discovered America... men have thought of this country as something special. It was here that Ponce de Leon sought the Fountain of Youth, and men have long admired America's majestic mountains and beautiful valleys. However, the real beauty lies not in the land, but in the people. The people came... seeking a land where they could worship God in freedom, and under God developed a kind and loving spirit. This is what makes America beautiful.

Attend church regularly... help keep America beautiful.

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

### Indemnity Approved For Brucellosis Reactors In State

Texas cattlemen will now be able to receive federal indemnity payments from the U. S. Department of Agriculture for brucellosis reactors in their breeding herds when the infected animals are marketed for slaughter.

According to Jimmy Vanstory, County Agent for the Texas Agricultural Extension Service, the indemnity will be paid only on reactors found in official herd tests—not in tests at sales yards.

The decision to make the payments was made at the request of the Texas Animal Health Commission to strengthen efforts to eradicate brucellosis in the state.

All states are now participating in the brucellosis indemnity program, points out Vanstory. At present about 99 percent of the nation's cattle are free of the disease, but the remaining one percent continued to threaten the livestock industry. A large percentage of the infected herds are in southern and southwestern states, adds Vanstory.

Reactors will be branded with the letter "B" on the left jaw and will be tagged in the left ear. They must go to slaughter directly after the test.

According to Vanstory, indemnity claims will be initiated by state or federal regulatory officials or accredited veterinarians. First indemnity payments may be delayed several months after claims are received, but such delays should be eliminated once the program becomes established.

The indemnity payment program has been expanded to allow federal authorities to pay on reactors found at auction markets. When the program was first announced, payment was only authorized on reactors found in official herd tests.

However, indemnity payments have been lowered, points out Jimmy Vanstory. The indemnity is now \$40 on grade cows (down from \$50) and \$80 on registered cows and bulls (down from \$100). No indemnity is allowed for grade bulls, steers or spayed heifers, as previously announced.

### Time For Fall Gardens

Despite the hot summer weather, it's time to get things in shape for that fall garden, says a vegetable specialist for the Texas Agricultural Extension Service. Most popular spring vegetables can be planted in July and August along with the cold-hardy types such as broccoli, cauliflower, cabbage, greens, parsley and carrots. Adequate watering is the major consideration for fall gardens due to hot, dry conditions. It's best to grow your own transplants; this will require four to five weeks.

### VETERAN SHOULD ACQUAINT HIMSELF WITH BENEFITS

Many men and women who have served in the Armed Forces of the United States are unaware of their eligibility for medical care through the Veterans Administration hospital system. Unfortunately for some, the inquiry concerning this eligibility comes only after they have spent all of their ready assets for private hospital care. Every veteran should acquaint himself with the benefits to which he may be entitled, according to Billye Kesler, Veterans Service Officer for Briscoe and Swisher counties.

Under present laws, a veteran may be eligible for admission to a VA hospital if the period of military service terminated under conditions other than dishonorable. This applies to both men and women, and to wartime and peacetime service. Some veterans may be eligible even though their discharges were other than the regular honorable type.

Eligible for admission to a Veterans Administration hospital for treatment of any condition is the veteran whose discharge was either Honorable or General under Honorable Conditions. If a person received an Undesirable Discharge or a Bad Conduct Discharge, he may or may not be eligible for VA hospital care, depending upon the circumstances causing the discharge. In such instances, a veteran should apply for medical care when it is needed, and the VA will obtain the military records and determine whether the discharge is a bar to benefits. A Dishonorable Discharge is given as a result of a General Court Martial, and will always serve as a bar to veterans benefits.

A number of veterans who served only during a period of peacetime have in the past been denied admission to a VA hospital. Such veterans, if their service was honorable, may now be eligible for hospital care. Public Law 93-82, effective on September 1, 1973, placed wartime and peacetime veterans on the same basis with reference to VA hospital care. Any veteran who is in need of hospital care should contact his local Service Officer and determine whether he is eligible for treatment in a Veterans Administration facility.

### MANAGING FINANCES

Farmers and ranchers should develop a financial management plan to increase their profit-making potentials, says an economist for the Texas Agricultural Extension Service. Three items required for such a plan are a financial statement, profit-loss statement and cash flow ledger. The time invested in developing a sound financial management plan can mean increased return on capital. Efficient capital use is important in maximizing profits.
