"The Magic Box"

"DANCING MOTHERS" SHOWS FAST SET.

If you're just a little tired of comedy; if "Westerns" bore you the least bit; if spectacles no longer make you leave your comfortable seat by the fireside; if you are one of that large army who have one, or many of the above symptoms—then you're going to enjoy the new Herbert Brenon Paramount picture, "Dancing Mothers," which is at the Palace Theatre next Monday and Tuesday.

For the benefit of those who did not see the Selwyn-Goulding stage play, it might be wise to explain that "Dancing Mothers" is described as a "society drama." But it is much more than that description would seem to imply.

"Dancing Mothers" is the tale of a pretty woman who was almost cheated out of life by a heartless husband and a thoughtless daughter. As the mother who started out in order to save her child from throwing herself at a notorious bachelorette, and ended by falling in love with him herself, Alice Joyce gives the finest performance of her career. And Conway Tearle in his role as the bachelorette, rises to new heights. Clara Bow, known as the screen's perfect flapper, does her stuff as the child, and does it well. Taking the picture as a whole, "Dancing Mothers" has been characterized by those who have seen it as "perfect entertainment."

PATENTS GRANTED TO TEXANS

List compiled by Munn & Co., Patent Attorneys.

Of 877 patents issued in the last week, Texas inventors obtained 14.

James N. Watts, of Clyde, cultivator attachment. This relates to cultivator attachments, and contains particularly to a combined weeding and hoeing device adapted to be fixed to and across two of more shanks of a cultivator machine. Mr. Watts assigns one-half of his patent to Julian F. Bailey.

William H. Whisler, of Houston, Shock Absorber. This relates particularly to shock absorbers of the type in which a pivoted lever is operatively associated with op-

positely acting spring elements to afford a cushioning action for both the shock and rebound.

Hugh Foley, of Sour Lake, Apparatus for Rotating Pipe. This provides gripping mechanism capable of being positively moved into position for gripping and arranged to take hold of the object and rotate it quickly and without slipping.

Emery R. Nabors, of San Antonio, Advertising Device. This machine will also incorporate a toy which gun, for example as well as an electrically flashing sign. Mr. Nabors assigns one-half of his patent to Thomas E. Breed.

Joseph Becker of Waring, Pump Mechanism. The main object of this invention is to provide a mechanism for repressurizing the piston of a pump so that water can be drawn through a pump from a subterranean level.

Robert E. Chatam, of Dallas, Signal Device for Railways. This relates to improvements in railway signals and in such connection it relates more particularly to that part of the signal apparatus which provides the connection between the track and the wire connections leading to the semaphore, or the like.

Benjamin J. Greer, of Athens, Wrench. A further object of this invention resides in the provision of a wrench which is caused to grip the work with a pressure carrying with the amount of force applied to the lever of the wrench. Mr. Greer assigns one-half of his patent to J. R. Wood.

William Hubert Fitch, of Fort Worth, Pencil. This relates to pencils and has for an object to provide a pencil of the type wherein a lead is maintained in position for writing purposes during such writing operations and withdraws when the writing has been completed for protection.

Ralph E. Wilson, of Dallas, Cotton Feeder. This invention aims to provide a simple but effective means whereby rotation may be imparted to the feeding shaft of a cotton feeder.

John William Carpenter, of El Paso, Milk Bottle Holder. This device has been designed with a view of compelling the customer to place empty bottles in the container in exchange for the full bot-

tle to avoid the loss of both the empty and the full bottle.

Charles Edwin Welch, of Waco, Holder. This invention relates to improvements in roll holders especially adapted to hold rolled toilet paper.

Walter G. Vreeland, of Houston, Traveling Block. This invention relates to a traveling block particularly designed for use in connection with well dripping apparatus. Mr. Vreeland assigns his patent to Lucey Manufacturing corporation.

GUM-DIPPING the Extra Process for Extra Miles! Breaks all Tire Records

The 500 Mile Speed Classic at Indianapolis has always been a Battle of Tires. In 1911, Firestone won with fabric tires at 74.59 miles per hour. In 1920, Firestone won with cord tires at 88.55 miles per hour. In 1925, Firestone won with Full-Size Gum-Dipped Balloons at the record breaking average speed of 101.13 miles per hour.

In 1926, Firestone again won with Full-Size Gum-Dipped Balloons. The ten cars that finish "in the money" were all Firestone-equipments. They went the distance without a single blowout and with but two tire failures—one due to a puncture and the other to a leaky valve.

This performance is even more remarkable when you consider the terrific speeds at which the cars traveled over this fifteen-year-old, rough brick track.

Experienced race drivers will not risk their lives or chances of victory on any other tires. And in the commercial field, large truck, motorbus and taxicab fleet operators, who keep careful cost records are among the big users of Firestone Gum-Dipped Tires.

The City Transportation Co., of Tacoma, Wash., writes: "One of our 12 buses on Firestone Gum-Dipped Tires has gone over 40,600 miles and still looks good for many miles of extra service for all around tire safety and mileage, Firestone cannot be beat."

From Calumet Motor Coach Co., Hammond, Ind., the following: "We operate 40 buses on all equipped with Gum-Dipped Tires. The very low cost per mile on which these tires operate is considerably less than that of any other make." Hayes Bus Lines, Columbia, S. C., says: "We operate 19 buses equipped with Firestone Gum-Dipped Tires. A number of these tires have run over 45,000 miles without ever having been removed from the rim."

The largest taxicab companies in the world standardize on Firestone Gum-Dipped Tires. W. R. Rothwell, taxicab operator, Detroit, Mich., writes: "Two of my Firestone Gum-Dipped Tires have run 76,000 miles."

Hundreds of thousands of car owners voluntarily testify to the safety, comfort and economy of Full-Size Gum-Dipped Balloons. W. H. Peacock, Birmingham, Ala., testifies: "I have had Firestone Balloons for thirteen months and they have delivered in that time 24,469 miles." H. C. Stachle, Minneapolis, Minn., says: "My Firestone Balloons have gone 49,900 miles and are still in good condition."

These records of endurance, speed, safety and mileage could only have been made because of Firestone development of the Gum-Dipping process which insulates and saturates every fiber of every cord with rubber, reducing friction and heat and building greater strength and endurance in the cords—assuring you at all times—

FLUVANNA NEWS.

Cemetery Working and Picnic.

Perhaps the most outstanding event of the past week, in our community, was our cemetery working, decoration of graves and community picnic of last Saturday. While we have a regular cemetery association operating under charter and in accordance with the laws of Texas, the work and program of Saturday was under the auspices of the local Camp of W. O. W., it being the regular time for the decoration of graves of all deceased Woodmen. The public, having been notified of the plans and program for the occasion, responded with alacrity, so much so that the work was all done long before the noon hour. This, too, including the grubbing of a half mile of lane preparatory for grading. About eleven o'clock the large crowd repaired to a lovely hackberry grove a few hundred yards away, along the banks of Deep Creek and inside the Will Beaver pasture. It was both neighborly and commendable in Mr. Beaver to allow us to use this beauty spot for the spreading of our free-for-all dinner. Mr. L. F. Beaver was master of ceremonies but not the master eater. Judging from remarks (and other indications) the blue ribbon on that score went to some of our Snyder visitors—possibly to F. A. Cary; he has capacity, you know. However, this may be, if anyone left the place of feasting hungry, it was his own fault. After it appeared that all were fully satisfied, some "twelve baskets full" were taken up.

Following the feast came a season of speech-making. Of course we were all largely incapacitated for either speaking or hearing, so soon after dinner. The first speaker introduced was Mrs. A. H. Goldsticker of Stamford, representing the Woodmen Circle—the women's department of woodcraft. Mrs. Goldsticker spoke felicitously, commending the occasion, expressing gratitude for being able to attend and commending the work of the Circle, including its insurance to the consideration of our women. The next brief address was by the Village Preacher who commended the people for the interest taken in the up-keep of their cemetery; the W. O. W. for its spirit of fraternity and co-operation. He referred to the cemetery as being not only a burying ground, but a perpetual bond of common interest and an open book of community history. He closed by urging the constant cultivation of the spirit of co-operation, fraternity and fellowship so beautifully exemplified on this occasion. The next in order was the introduction of the several candidates who spoke in a very cordial manner and presented their claims as follows: A. Rhodes and F. A. Cary candidates for the office of County Judge; C. F. Sentell for County Attorney; Mr. Jenkins for sheriff of Borden County; Miss Ida Kelley for County Treasurer; Mrs. Kate Cotten and Mrs. Mabel Y. German for County Clerk; F. M. Frownfield, W. L. Camp, between Bethel and H. Newman for Sheriff and Tax Collector; J. I. Baze, Sterling A. Taylor and J. W. Stinson for County Assessor.

These speeches being over, the people repaired again to the cemetery where the Woodmen of the World conducted fitting ceremonies, interspersed with readings by several of our girls and appropriate songs and depositing flowers and evergreens on all W. O. W. Graves. It should be added that many graves, not of Woodmen, were decorated by relatives. The whole program was concluded with prayer, following which the people dispersed either for town or their homes. Late in the afternoon a large crowd assembled at the Fluvanna baseball diamond and witnessed a lively game between Bethel and Fluvanna, which resulted 8 to 11 in favor of Fluvanna. No ball

game was played here Sunday. For this our young men are to be congratulated—Jas. H. Tate.

Church Services.
Rev. Moore filled his usual appointment at the Methodist church last Sunday.

Rev. A. D. Leach, likewise, held his regular services Saturday night, Sunday and Sunday night. The attendance and interest at all of these services were good. Of course the Sunday Schools and young peoples meetings were keeping step with the day.

The Village Preacher will be glad to welcome all who will attend services at the Presbyterian church next Sunday. He has a message for you.

John Hammett and wife of the Arah community, lost a tiny babe last Friday.

Business and Crops.
A. J. Evans of Cumbly, Texas, is buying of his brother, Roy, one car of cattle and shipping same this week.

The crop prospect in the Fluvanna section, is very satisfactory at this time. The stand is generally good, the plants are healthy and the general condition, including the state of cultivation, is quite good. The spring season has been cool and backward, as the weather men had long before told us would be the case; nevertheless, the rainfall has been ample, in fact, with us, just right. We have had no flood rains, no wind storms and only one moderate hail storm, however, did some damage. The outlook now is fine.

Commercial business is, by no means, rushing at this season, but the farmers are rushing almost to the limit, and well they may, for much depends on them.

The move for an independent school district, at this place, was carried at the polls, by a large majority—68 to 16—last Saturday.

Visits and Trips.
Several of our people attended the Chautauqua at Snyder last week.

Jno. A. Stavelly and family visited at Southland last Sunday.

Mrs. Russell Jones of Post visited relatives here during a part of last week.

Messrs. John Truss, H. H. Haynes and Will Beaver made a flying trip to Big Spring Tuesday. (We suppose they flew if John was driving). H. H. will remain over a few days for a visit with his father.

Wilbur Sewall and family of Post visited relatives here last Sunday.

Mrs. J. L. Deitz and two sons, Logan and Charles of Waxahachie are here for an extended visit with relatives and friends.

Doubtless Jim Holdridge will be making trips right along now since he is supporting a fine new car.

Strange, isn't it?
Isn't it strange that people will buy, and pay liberally for, prize boxes, prize tickets, guessing contests and all sorts of chance schemes (sometimes even in violation of the law)—always hoping to get something for nothing; when, in fact, salvation and eternal heavenly glory is offered to all "without money and without price" and yet only about one-third of our population are accepting it. "How oft would I * * * and ye would not."—Jas H. Tate, Cor.

POLAR DOTS.
Polar farmers are very busy this week. Crops are in good shape after the showers last Thursday night.

We are very sorry to report that Brother R. M. Elkins is in a serious condition, caused from an eye operation. He is at the Lubbock Sanitarium. His sons, A. C. and Ernest, and their mother visited him today, accompanied by his sister, Mrs. Hattie Moore.

We are glad to report that Uncle Kin Elkins is doing fine from his operation.

Ernest Massingill was seen in Polar Sunday.

Jim Wilson seemed to be all smiles until Sunday night.

Ed Hall received a square meal at Ernest Ford's home Sunday.

ZERO HOURS OF AUTOMOBILE ACCIDENTS, 4, 5 AND 8 P. M.

Stewart-Warner Automobile Safety Council

ONE thousand thirty of Chicago's 11,785 auto accidents last year, according to the Stewart-Warner Safety Council occurred between five and six o'clock, just when congestion is at its worst in the home-going rush. Only 47 of these 1,030 accidents were fatal. Four o'clock is the children's zero hour. Thirty-three of the 182 children killed by autos in Chicago last year came to grief at four o'clock, playing in the streets after school. Seven to nine is the dangerous time for adult auto fatalities, according to Chicago's 1924 record. Eighty-six of 353 such deaths occurred around the theater-going hours.

5:00 P. M. B. A. Cumbie of Clairmont was visiting J. R. Massingill and family of Polar Sunday.
4:00 P. M. T. V. Cumbie was on the sick list Sunday.
8:00 P. M. Brother Harris of Snyder delivered a great message Sunday morning at Polar which was enjoyed by all.

There are some prospects of Dean Cochran teaching a singing school somewhere this summer.
J. T. Sims spent Sunday with Mr. and Mrs. A. C. Cargile.

The high winds have blown Kenneth McKinzie and Richard Blair back to Polar.
J. A. Bean of Slaton, Mr. and Mrs. J. L. Bean of Houston and Mr. and Mrs. E. F. Sears of Snyder were pleasant visitors at Polar Monday.—Dotts.

KNAPP KNAPLINS.
Weather and Crops.
The time has been when clouds and showers were the exception to the rule in these parts, but not so this season; they are the rule now, and the outlook for crops is fine unless an old cultivator here and there breaks down just when there is not one minute to spare, for the weeds are pressing their claims, the grasshoppers are claiming their rent and some of the farmers are poisoning.

Sick List.
Somewhat it seems difficult for our people to get rid of the flu and its ravages. Among those still suffering including cases of recent development, are Mrs. Georgie Bishop, who has been down for several weeks, but is now slowly improving.
Mrs. Holder has been ill for some time but is making some improvement now.
The Lee family have been having quite a tussle with mumps, but are some better at this writing.

Mrs. Owen Miller is slowly improving.
C. N. von Roeder was quite sick last week.
Mrs. Jim Weathers has been real sick the past week.
Mrs. E. A. Birdwell received a message Sunday evening from Abilene stating that her daughter was very sick. She left at once for Abilene to be with her.

Visiting.
Mr. and Mrs. Walker Huddleston and children visited her mother, Mrs. V. R. Hayley of Sweetwater Saturday night.
Mrs. K. L. Daugherty of Oklahoma City visited her mother, Mrs. V. R. Hayley Sunday.
Mrs. R. E. Warren and children visited Mrs. R. O. McClure of Snyder last Monday.

Roy Lockhart made a business trip to Snyder Thursday.
Grandpa Bishop visited his son, Ross, the past week.
Billy Cantrell visited his uncle, David Bishop, the past week.

Alex. Murphy and his mother visited with Mr. and Mrs. Owen Miller Saturday afternoon.
Mr. and Mrs. Arthur Bell and children of Snyder visited with Mr. and Mrs. Harley Smith Sunday.
Miss Oreon Franks of Ben Wagon ranch visited Mrs. R. E. Warren this week.

Mr. Lola Grant took dinner with her sister, Mrs. E. C. Houser, Saturday.
Mr. and Mrs. W. B. Cox of Fluvanna visited Mr. and Mrs. Lee Bunch Sunday.
Mrs. L. L. Eubanks visited Mrs. G. H. Bishop Saturday afternoon.

Mr. Andy Trevey made a business trip to Snyder Saturday.

Mr. and Mrs. Oscar Webb of Ira community attended Sunday School and singing at Bison Sunday.
Mr. and Mrs. Henry Richter took dinner with Mr. and Mrs. Andy Trevey Sunday.
Mr. and Mrs. Brenkley and Mr. Pennell of Canyon community visited Mr. and Mrs. G. H. Bishop Sunday afternoon.
Mr. Clyde Ke left Monday for Canyon to attend school.
Singing at Mr. and Mrs. Emmett Trevey's Sunday night was well attended and enjoyed by all.

The Sunday School was very well attended. There were 38 present, collection \$2c. Like to see twice as many out next Sunday and remember, come early, for Bro. McGaha will preach for us at the eleven o'clock service.—Reporter.

THE AUTO VANDAL.

The New York Farm Bureau Federation has taken a step we believe other states could follow with profit in launching a campaign against the annual depredations of thieves and vandals, seeking first to curb the temptation to steal and then, if these warnings do not help, to arrest all who are caught stealing. It is declared that tourists who make stealing a part of their touring cost the farmers of New York State a million dollars last year. But the auto vandal is not confined to that state, as we have frequently warned the people of Snyder and community. Hundreds of fellows too shiftless to work for a living are now traveling over the country and living off of the country as they go. They camp at free touring camps, and more and more robberies in these camps are being reported—the work of a habit of unprincipled auto vandals who prey upon their fellow travelers. They never spend a cent for a place to remain all night, and can usually steal enough from rural residents to provide for their meals without a cent of expense.

Already many communities are abolishing the "free" touring camp and cleaning out the vandals by making a charge for each auto remaining over night. It is difficult to separate the legitimate traveler from the vandal, but our authorities have a perfect right to question all strangers, and now that it has been found necessary to do so all over the country we hope officials in this country will not be backward in protecting the public from a new menace, and a dangerous one.

A hen with only one chicken may be a sign of poverty, but a fellow with thirteen children is no proof that the father is financially prosperous.

An American judge recently ruled that an auto is not an auto without a motor. How about a "ford" when it has three cylinders "missing"?

Mrs. Edith Wilkerson of Dallas, candidate for governor, declares that some of the men candidates are stealing her campaign thunder. From the way Mrs. Wilkerson talks, there is likely to be a storm.

Some are wholly excusable in some instances for not being able to tell their twins apart, but parents certainly are to blame if their children are unable to tell their mother from their father on account of the way they dress.

Don't forget that we have an union meeting in progress at the City Tabernacle. This is the meeting Christian people of the town have been anxiously waiting for. Don't attend it merely to please the preacher, but go seeking salvation or an increase of your faith, and you certainly will be blessed.

Davidson has declared that Moody ought not to be in the race. There are a whole lot of folks who are quite certain that Dan is giving Lynch a certain defeat concerning Lynch is just in hard luck—that's all. Lynch tried to beat the Fergusons, and couldn't. If Dan Moody can't beat them, there is not a man in the State than can.

Joe Lung, a Chinaman, who for many years operated a restaurant in Austin, died a few days ago at the age of 62 years. Lung came from Canton, China, thirty-eight years ago, and reared a family of nine children all of whom he educated in the State University. The life of this Chinaman would be worth emulating by some of our American-born citizens, especially those who put forth no effort to give their children educational advantages.

"DANCING MOTHERS" ALSO HAVE "STEPPING FATHERS"

When father starts "stepping," does mother stay at home by the fireside? That's the question answered in "Dancing Mothers," the new Paramount picture which comes to the Palace Theatre next Monday and Tuesday. And the answer would seem to be, that, although this may have been the correct thing to do years ago, when driving a horse and buggy was considered the height of fashion, in this year of our Lord it is distinctly not so. No, sir, in the words of the song, "Mamma goes where papa goes, or papa don't go out tonight!" So—we have the situation of a "dancing mother" who falls in love with her daughter's bachelor friend. And then—but you'd better see the picture in order to find out what happens. Herbert Brenan directed "Dancing Mothers" which co-stars Conway Tearle, Alice Joyce and Clara Bow.

TWO KINDS OF "HOGS". This hog furnishes food for the body, and Scurry County needs more of them. This "Hogg" is giving the people of Snyder and Scurry County food for the soul—a food which is greatly needed in this community. Dr. Hogg lives at Memphis, Tennessee, but is now in Snyder conducting a great revival at the city tabernacle. He is beyond doubt one of the South's greatest preachers. Don't fail to hear him. This space is contributed by the Times-Signal.

Backing the Farmer

There is no season of the year when a farmer can afford to be without the backing and support of his bank. Especially at this season of the year the farms the bank offers are necessary to the success of every farm customer. Talk over your affairs with this institution; handle your business here and thereby establish credit for yourself and the backing you may later need.

TIMES-SIGNAL SIGNALS.

The season is here when the Snyder man who can't afford to travel enjoys it more than the man who can.

We've also noticed in our rounds that no man is a hero in his old home town.

Mother's Day comes on Sunday, but if father ever has one it will come on Friday along with the other poor fish.

It's a little early to start wishing, but so far as Snyder is concerned we hope next spring won't let the overcoat and the straw hat travel so close together.

A few years ago it was hard to get one broadcasting station and now it's hard to keep from getting

a dozen at a time.

They say that not all the shocks in Russia came from earthquakes. Some come from getting a square meal.

Another thing we dare any Snyder man to explain is why a Ford runabout always darts around like it was anxious to bite a piece out of a five-ton truck.

Why is it that whenever we start to save up for a rainy day the sun always comes out and stays out?

The great nations may be burying their hatchets but they're marking the spot so they can dig them up in a hurry when they need them.

Maybe the reason you don't see some Snyder men with their wives oftener is they never know where to locate them.

The first thing to do when going into a restaurant is to forget the time when you could get a square meal for a quarter.

In the matter of advice, most men believe that it is better to give than receive.

We suppose the time will never come when the average Snyder woman won't get mad if she has to stop to thread a needle for her

husband.

The bed-bug is the low-brow of the insect race, but there's no ever to be had of one of them ever starving to death.

We've noticed that about every two weeks a girl of 16 meets the only fellow she ever did love.

It doesn't take an ad in a matrimonial paper for some Snyder girls to let everybody know they want a husband.

There wouldn't be so many divorcees if women were as unselfish about other things as they are about giving their husbands a piece of their mind.

COMING BACK STRONG.

We are glad to notice in a number of exchanges reaching our office that the old-time family reunion and picnic is coming back strong and we hope it spreads to this community until we have more of them this season than ever before. The auto enables members of the family now living at a distance to get to and from those reunions without loss of time and insures a fuller representation. Nothing serves to break the monotony

and grind of everyday work like renewing family ties and talking over "old times" at these annual gatherings. So join in the movement this season, and plan for a family reunion, for one day of unalloyed enjoyment with your own flesh and blood, and a dinner in the world's finest dining room out-of-doors. And don't forget that we are anxious to have a report of it, for your neighbors will be interested in reading about it. Tell the Times-Signal man about your summer trip.

STATEMENT OF OWNERSHIP.

Required by the Act of Congress of August 24, 1912.
Of Scurry County Times-Signal, published weekly at Snyder Texas, for April, 1926.
County of Scurry, ss
Before me, a Notary Public, in and for the State and County aforesaid, personally appeared J. L. Martin, who, having been duly sworn according to law, deposes and says that he is the owner of the Scurry County Times-Signal, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 27, 1912, embodied in section 433 Postal Laws and regulations, printed.

That the name and address of the publisher, editor, managing editor and business manager is J. L. Martin, Snyder, Texas.
That the known bondholders, mortgagees and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages or other securities are: First National Bank, Snyder, Texas; Mergenthaler Linotype Co., Brooklyn, N. Y.
J. L. MARTIN.
Sworn to and subscribed before me this 24th day of May, 1926.
(Seal) CHLOE HARRIS,
My commission expires June 1, 1927.

Mr. and Mrs. Eston Bertram and daughter, Doris, of Sweetwater, visited here Sunday with relatives.

READ IT FIRST.

Quit signing every petition that is passed around without first reading it. One thing that makes our government so costly is the fact that thousands of people sign petitions for referendums, recalls, bond issues, special elections and this, that and the other without first investigating to see what it is all about. And half the time the people who are passing petitions are doing so at the request of something to sign, or even when it is handed you by a resident of Snyder taking time to read it carefully. The petition-passers word for word for what it is all about isn't always safe; there may be a "sleeping" in it somewhere that you won't learn about until too late to correct your mistake. Take time to inform yourself before placing your name on any document and you'll save both money and annoyance.

INADDALE NEWS

Everybody enjoyed the rain we had last week as all were needing it.

Sunday School was well attended last Sunday. The program that Classes Nos. 3, 4 and 5 put on after Sunday School was greatly enjoyed by all. Rev. Mr. Watson filled his regular appointment at this place Sunday evening.

NO-NOX

MOTOR FUEL

STOPS KNOCKS

Turns Mountains into Mole hills

FOR years the carbon knocks, clicks, pings or detonation in automobile engines have been a menace to motor efficiency and a sore spot to the motorist. GULF No-Nox Motor Fuel has turned the old time carbon bugaboo into an asset, in fact it has put carbon to work.

No-Nox and Carbon are Power Twins

Compression is power—Carbon adds compression—No-Nox withstands compression and the combination gives wonderful motor efficiency.

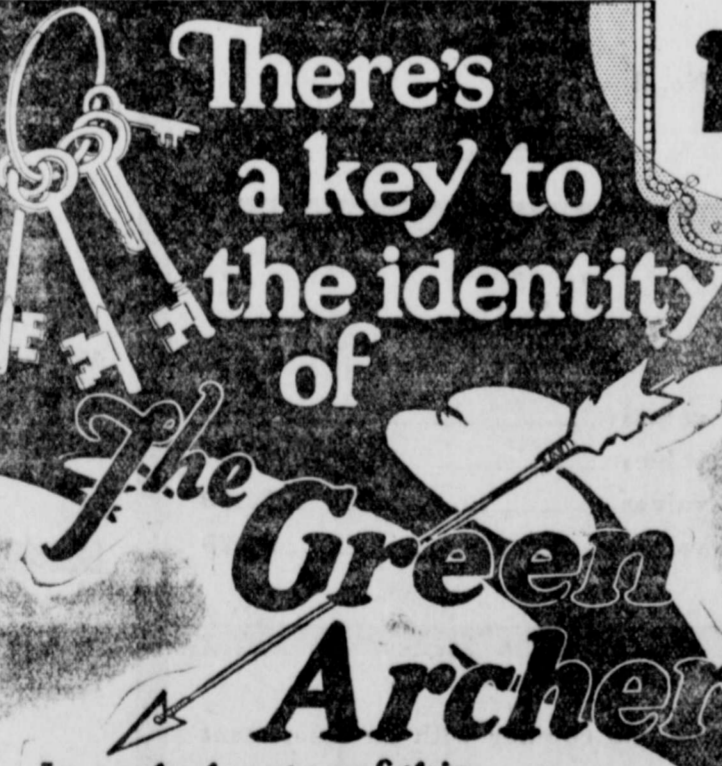

GULF No-Nox Motor Fuel not only withstands the high compression of the modern automobile engine—but also the added higher compression caused by carbon deposits on the walls and piston head which increases with the age of the car;—clicks and knocks are eliminated—greater efficiency is accomplished—followed by more power and greater mileage.

This Guarantee goes with it

GULF No-Nox Motor Fuel is Non-Noxious, Non-Poisonous and no more harmful to man or motor than ordinary gasoline—that it contains no dope of any kind—that the color is for identification only—and will not heat in summer driving.

GULF No-Nox Motor Fuel is priced three cents per gallon higher than ordinary gasoline—and is worth it.

KITCHEN KORNER

Mrs. J. M. O'Donnell, winner of the first place, class 2, in the recent kitchen corner contest, gives the following history of her kitchen improvement:

"My kitchen was a large room 14x16 feet, dark, dingy and not well arranged. We used this room for both kitchen and dining room. My stove was placed in the north side of the kitchen, cabinet east, milk table south, and dining table west, almost as far apart as I could place them.

My furniture is so arranged that I only have to stop or turn around from stove to cabinet, and to the water supply I only have to make one step. I can prepare a meal in less than one-half the time it used to take me.

The expense of improving both rooms was \$9.29. Half of this was for the dining room, so my kitchen improvement cost me about \$4.75. I had old dark green window shades over the windows. I now have light fluffy cheesecloth curtains. They are thin enough to let in the light, yet they make the room look more fresh and dainty.

You may wonder why I have not done this before when I needed it so badly. It is just like this, I never had the help and encouragement from a Home Demonstration Agent before. I did not know that so much improvement could be made on such a small amount of money until I had it demonstrated to me.

"Big Foot" Wallace, a Lone-Star Hero. To the reader of American history it seems that Texas has more than her share of frontier heroes. For what a splendid list it is! Houston, Crockett, Bowie, Travis, Bonham, Ross, Hayes, Capt. Bill McDonald—that is only a few of them, but one more name should be added, "Big Foot" Wallace.

Wallace was a Virginian who came to Texas as a lad to join an older brother, only to find that he had been killed with Fannin's men by the Mexicans at the Goliad massacre. That may account for Wallace's later fame as a fighter of the Mexicans. His nickname of "Big Foot" was not derived from any physical peculiarity but from his sworn feud with Big Foot, a celebrated Comanche chief.

Wallace trailed him many times, but never succeeded in killing him. Fate ruled that Shapley Ross, the Texas Ranger leader, was to have that distinction.

One incident in Wallace's life shows well the mettle of the man. He had joined the ill-fated Mier expedition into Mexico in 1842 and was one of the survivors who were taken prisoners to San Antonio. There Santa Anna, the Mexican dictator, ordered that one out of every ten of the Texans should be kept.

They draw from a jar filled with white and black beans. The man who drew the black beans died.

One of Wallace's companions was a young fellow who had a wife and child waiting for him back in Texas. At the thought of them he broke down and cried as the drawing began. Wallace had just drawn a white bean, but at the sight of the grief-stricken boy he took anything in his hand, a young man and whispered "Here, take this one. I'm feeling lucky today."

Then he plunged his hand into the jar again—and drew another white bean.

One day in Wallace's later years, while riding in the Seven Rivers country, he mounted the top of a hill and saw before him a band of 60 Indian warriors herding before him a bunch of stolen horses. The Indians discovered him at the same instant and raised a whoop of triumph. Wallace's horse was tired and he knew that he would not have one chance in a thousand in a race with the savages.

But the Texan did not stop for an instant. Jamming the spurs into his horse's flanks, he dashed forward and as he charged he waved his hat toward the rear and shouted: "Come on, boys, we've got 'em now." His magnificent bluff worked. The Indians fled without even taking the horses. Wallace rounded them up, and by nightfall he had restored them to their rightful owners.

Encouraged me to the extent that I felt greatly elated. And so deeply enthused I could hardly wait until I reached home to tell my husband, who had become just as much interested as I was. So here we go. We tore down the ceiling, took the windows out, and carried everything into the big old kitchen. My, what a conglomerated mess we had. Could we ever do anything with that old junky looking lumber. Our home demonstration agent said we could. Dear little Audacity sent for every bulletin that could be of any possible assistance to us, so our work, and my really began. We put a petition in making a kitchen about 7x14 feet and a dining room 6x14 feet. I now have some built in cabinets, one double window, and one-half double window. My working surface is exactly correct.

I was just a nervous wreck. I was so nervous, I was running around in a condition, says Mrs. Martha F. Marlow, of Broken Bow, Okla. 'I tried numerous remedies to try at least to keep going, but I could not. I was weak and tired—just no good at all. My back ached and I had hot flashes until I was so very nervous I smothered myself with a blanket. I couldn't sleep and I was never hungry, and I kept getting weaker. I couldn't stand on my feet. Wonder of Nature Is Vision Given to Birds

The vision of birds is an amazing thing. A vulture soaring almost out of view sees a carcass lying perhaps in a quite inconspicuous position; a kestrel hovering at a height of 100 feet, spies a mouse creeping about in the grass; a gannet, cruising round 200 feet above the sea observes a fish swimming some distance below the surface, says W. W. White, in the Nineteenth Century Magazine.

The gannet's sight is by no means the least remarkable among keen-eyed birds, for it has to penetrate water as well as air. A gannet's huddle on fish beneath well expresses the action. At once it checks its flight, poises for a second, half closes its wings, and dives with tremendous speed. There is a curious corkerewlike motion in the downward sweep, and at the moment of entering the water the long, pointed wings are folded.

Day's Length Varies in Different Parts

If you met a man, and he casually remarked that he ate 315 meals yesterday, you would either be amazed at his appetite or take him for a hardened rascal. But the man may be from Spitzbergen, where they have a day three and a half months in length.

And on the whole it would be wise, if one should undertake to do certain work to receive so much a day in payment, to understand just where the work is to be done, or one might have to labor 18 1/2 hours

at Stockholm, if it happened to be the longest day of the year, or all the time from May 21 to July 22 if in some parts of Norway. In Leningrad the longest day is 19 hours and the shortest 5 hours. In Finland there is a 22-hour day. In London and at Bremen the longest day is 19 1/2 hours; at Hamburg and Dantzig 17 hours, and at Washington about 15 hours.

New Rays Discovered

Science has established the existence of new rays, stronger than ultra X-rays and 1,000 times greater in frequency, with ionization the same at all times of the day or night and of 10,000,000-volt variety. They were partly described by Dr. R. A. Millikan of the California Institute of Technology to the convention of the National Academy of Sciences in Madison, Wis. He has studied them since the World war, beginning where German scientists left off. Millikan won the \$40,000 Nobel prize for first measurement of the electron. The rays, unnamed, are due to atoms passing over to other atoms, with the sun having the effect of the action, he said. They appear throughout space, bombard the earth from all directions at all times, and have extraordinary absorbing power.

Was Well Stocked

A day book of a retail grocer located in a midwestern town shows the entire list of imported articles sold by him in 1925 as follows: Coffee, tea, figs, mustard, pepper, cloves, allspice, nutmeg, ginger, cinnamon, lemons, oranges, sage, prunes, raisins and almonds. Other goods handled by him were: Eggs, molasses, dried apples, dried peaches, cranberries, potatoes, sugar, vinegar, saleratus, butter, cheese, crackers, lard, smoked haddock, whitefish, dried herring, rice, sirup, salt, cream of tartar, beans, rye, coffee, peanuts, beef, veal, pork, lemon extract, onions, cabbage, turnips and native nuts. If this storekeeper had other foods they were not indicated on his charge account for two years.

Nothing Ever Lost

Elements which enter into the making of a soap-bubble film are as lasting as those which form granite rock; no material thing is ever lost or destroyed, says science. Man's immortality is fairly well assured both by science and the Bible. It was the Frenchman, Lavoisier, who first proved with his fine balance, that in all chemical operations it is only the kind of matter that is changed, the quantity remaining the same. This was the discovery of the conservation of matter to which knowledge of the conservation of energy has since been added.—Cappie's Weekly.

Clung to Austrian Pikes

Arnold Von Winkelried, Swiss hero, is said to have decided a Swiss victory at Sempach, in 1386, by clinging to all Austrian pikes he could reach, thus opening up the enemy's ranks for compatriots to pass through.

Tales of the Old Frontier

By ELMO SCOTT WATSON

(Copyright 1925, Western Newspaper Union.)

UNCLE SAM'S FLEET OF SHIPS OF THE DESERT

Once upon a time Uncle Sam had a queer navy, composed of 75 "ships of the desert" which, paradoxically speaking, navigated the dry seas of the great Southwest. This was before the Civil war, when transcontinental railroads had not yet been built and the government was seeking a solution of the transportation problem over the southern route to California.

In 1855 congress authorized the War department to expend \$50,000 in purchasing camels to be used for military purposes in the Southwest and Jefferson Davis, secretary of war, sent to Turkey and Egypt to get the animals. On May 14, 1856, a herd of 34 camels was landed at Indianola, Tex., and driven overland to Arizona. The next year 41 more were imported.

At first the experiment seemed so successful that army officers in charge of operations were loud in their praise of the value of the beasts. But trouble soon developed. The sand of the Southwest was different from that of the camel's native land and they became sore-footed. The ignorance and prejudice of the mule-packers took hold of them and they further impaired their usefulness and when the near approach of the Civil war diverted attention from the experiment the whole thing ended in failure.

Some of the camels were sold to circus-men and others were sent to Drum barracks in Los Angeles, where they were purchased by a Frenchman who expected to use them in the mines. But he soon gave up the plan and turned the animals loose in the desert to shift for themselves. The majority were soon killed off by Apaches, who developed a fondness for camel meat, but for the next 30 years prospectors told fanciful tales of seeing wild animals in remote regions of the Southwest.

The last of the camels was captured by a Mexican in the Harjuna Mountains in 1885. He took his prize to Phoenix, but before he could find a market for the animal it had literally eaten him poor. Finally he allowed a creditor to take the beast for a \$10 debt. The new owner intended to sell the camel to the next circus that came along and turned it out in a pasture with his mules.

The next morning, according to a witness, "he found his mules hung all along the barbed wire fence and bogged down in the ditches while the more agile or more frightened were scattered all over the surrounding country."

Traveling for Pleasure

After considerable urging, Herr Schulze of Berlin took his wife on a tour of northern Europe. Arriving in due course at Nordkap, the promontory of Norway, they saw the midnight sun, and Herr Schulze idly scratched on a rock: "Sat here with wife. Fine! Schulze, Berlin." Three weeks later a neighboring rock read: "Sat here without. Finer! Meier, Hamburg."

Real Frigidity

Johnny was in the habit of swearing mildly when anything did not please him. One day the minister heard him and said: "Johnny, don't you know you must not swear. It is naughty of you to do so. Why, every time I hear you speak a cold chill runs down my back." "That's nothing," said Johnny. "If you'd been at my house the other day when my dad caught his nose in the clothes wringer, you'd have froze to death."

Unlucky Interference

A high ranking army officer, vain of his prowess at billiards, challenged a lieutenant to a game. The latter was a skilled player, but for the sake of policy, decided to let the other defeat him. He wanted to make the game close, however, and kept his score even with that of the high ranking officer's. Then the lieutenant had to make a shot that would decide the game. He, of course, intended to miss, but just as he was about to shoot, another lieutenant who feared the consequences to his friend if he should win, twitched his arm, and the result was that the shot went true and the lieutenant won the game.

Change Room's "Scenery"

Nothing is so refreshing in a room as to change its scenery, and a change of pictures on the walls does more than anything else to give fresh interest to the room. These pictures, which are magic windows in the home, may in their varying aspects give us new fields for the imagination, and isn't it always pleasant to wander in new fields and to receive new inspiration that comes with this? So let us follow the custom of the Japanese, that nation of artists, and change the pictures that hang on our walls from time to time.

Saw Nothing Pretty in Hopi Snake Dance

The only ceremonial Indian dance of which I know the date, or approximately the date, is the Hopi snake dance, which comes in August, near the last of the month. Mr. Harziman writes in Adventure Magazine. The Hopi themselves never know the exact date until near the time when a shadow hits a certain point on the mesa. The priests watch and when a certain shadow touches this particular spot, they they know the dance must be held a certain number of days later. This makes it vary from year to year, by a few days.

This dance is held either at Oraibi, Hotevilla or Walpi, though at times it occurs at Shungopavi or Mishongovi. It is the closing number of a nine-day ceremonial which they believe brings rain. The snakes are caught and brought in after much ceremony. The whole ceremony is a disgusting pagan rite, where men hold live snakes in their jaws and go dancing around the plaza. They drink an emetic of strong potency and all stand in a row and vomit over a cliff. Bah!

The Great Smith Family

The great family of Smiths bears a name which is not only the commonest but the oldest in the world. Professor Mahaffy, when deciphering the Petrie papyri, came upon one bearing the name Smith, unmistakably written. "We have never," he says, "found anything like it before, and it is surely worth telling the many distinguished bearers of the name that there was a man known as Smith in the twentieth year of the third Ptolemy, 227 years B. C., and that he was occupied in brewing and selling—beer!"

Innocence

Just before the polo match one of the players was talking to a lady friend who sat in the enclosure. "Have you ever seen a polo match before?" he inquired. "No, never," she replied, "but I'm sure I shall enjoy it, and I wish you'd hurry up and begin, for I'm just dying to see those beautiful ponies kick the ball about."

On the Train

"Where are you from?" "Schenectady." "That's a funny name." "Maybe so," replied the other. "Where are you from?" "Saskatchewan."

Miss Neoma Strayhorn returned the past week from Simmons University to spend the holidays with her parents. She was accompanied by a friend, Miss Bennie Duke who visited a few days in the Strayhorn home.
