CATTLE PRICE RANGE

Frank M. King in the August 16 number of Farm and Ranch Market Journal said: "There is a wide average of prices being paid for cattle in West Texas. I notice at Beaumont, Texas, steer and heifer calves have recently been contracted for \$22.50 and \$30.00; two and three year old heifers, \$30 to \$37.50; dry cows, \$45 to \$55; cows with calves by their sides, \$60 to \$75; yearling steers, \$30 to \$40; two year old steers, \$45 to \$50, and three and up, \$60 to \$75. While at Midland, where the cattle are of better breeding the average prices of contracted stuff are: Steer calves, \$40 to \$50; heifer calves, \$37.50 to \$47.50; two and three year old heifers, \$60 to \$75; dry cows, \$50 to \$75; cows with calves by their sides, \$85 to \$100; yearling steers, \$55 to \$60; two year old steers, \$60 to \$80. No such thing as three and up in steers. The above is a fair average of different localities in West Texas.

NOLAN COUNTY HAS PRETTY YARD CONTEST

In all 109 Nolan County women have made some kind of yard improvement during the two-year contest that came to a close June 12 when the judging committee awarded Mrs. J. B. Mearse a free trip to the A. and M. Short Course for having averaged the most improvements, according to Harvey Thompson. The nature of the improvements may be judged from the outline of the demonstrations given by the agent which covered these points: methods of disposing of waste water, prevention of flies and mosquitoes, sanitary methods of disposing of sewage, reasons for planting flowers and trees and shrubs, making home grounds look hospitable and inviting yet comfortable and retiring, flowers that thrive in West Texas climate and how to grow them, and a new paint and general clean-up campaign.

"DADDY IS MY PARTNER"

He was a bright-eyed little chap, just old enough to join the young people's clubs. He had just started to double back with the disk, having gone over his acre once, and was ready to cross-disk his acre of land when we saw him. He looked small to be driving two large mules and doing the work of a 200-pound man, but he was doing it better than many do.

This youngster had just become of the age, the tender age, at which boys may become club members. He was at work on the biggest job he had ever tackled. No one had discouraged him. His father had permitted the county agent to select the best acre on the farm and was furnishing the best seed he could buy, the land, fertilizer, implements, team, and he had offered to help with the work. But Bobbie wanted to do all the work himself. Wasn't it his corn patch? Bobbie had plowed the land, harrowed it, and was now double-disking it. In a

few days he would be planting his corn and then cultivating it. Later on will come the harvest.

"Which had you rather do, Bobbie, work your cornfield or go to school?" we asked. "I do both and like them both," was the prompt reply. "How did it happen that you became a corn club member?" "The county agent told us about it at school not long ago."

"Did you have much trouble getting your father's consent to your joining the corn club?" "No, sir," was the reply. "Daddy is my partner."

Could a boy more highly compliment his father than Bobby did? We wish that more fathers would take their sons into confidence and be their partners.—The Progressive Farmer.

GUESSING WEIGHTS IS EXPENSIVE

Guessing livestock weights may be a popular sport, but it's mighty poor business, especially for the fellow who doesn't keep in practice. Not long ago a skilled hog buyer stopped at the home of a farmer and bought his herd of hogs, 100 in all. They agreed on the price with little trouble and since there was no scale on the farm, they estimated the weight. The farmer had sold his hogs at a good price and he was happy. He never knew that he had "guessed" his hogs 10 pounds too light and that the better judgment of the buyer had cost him something like \$100.00.

Selling livestock and grain by guess costs many farmers hundreds of dollars every year, according to the research department of the National Association of Farm Equipment Manufacturers. Pigs and calves grow faster than their owners realize and the buyer who sees livestock weighed every day takes advantage of that fact. Selling grain by wagon box measure often costs the producer money, especially if it is of high quality and weighs well.

A new pitless farm scale with a capacity of 5,000 pounds has recently been developed which is especially adapted for use on small farms where the amount of weighing does not seem to justify the expense of a higher priced pit scale. The new scale, as its name indicates, requires no foundation pit and can easily be moved from place to place. It will weigh a wagon load of grain or several head of livestock.

Mr. and Mrs. Walla D. Fish expect to move into their beautiful new home on the West Side Sept. 1.

Motorcade Disbands Friday at Brownwood

The West Texas Chamber of Commerce motorcade that started off with a bang at Snyder Monday, Aug. 6, concluded with another bang at Brownwood last Friday, when the citizenship of that city tendered the visitors a reception and banquet.

After covering more than 1,800 miles visiting two states and stopping at more than forty towns, the third annual motorcade of the West Texas Chamber of Commerce reached Brownwood late Thursday afternoon and disbanded after the big banquet. Most of the party members left immediately for their respective homes, tired but happy in the thought of having seen the most picturesque section of the Lone Star State.

The motorcade began its journey at Snyder Monday, Aug. 6, visited the famous Carlsbad Caverns in New Mexico, turned back into Texas and then traversed the greatest sheep and goat section of the world. Wednesday night was spent in San Angelo. Thursday morning stops were made in Miles and Ballinger. Lunch was served in Coleman, after which the party went to Brownwood, and after a tour of the city was tendered a banquet.

To practically every member of the party the journey was a revelation in that it took them to country beautiful almost beyond description. They gazed upon the greatest sheep and goat ranches in the world and several times saw as many as 10,000 head of sheep in a group. They saw mountains several thousand feet high, then they waded in the river said to be one of the most beautiful and picturesque in the Southland.

MOTORCADE RECORD BREAKER

According to Sec'y Wm. A. Wilson of the Dal-Paso Cavern Highway Association, the motorcade will arrive in Snyder Friday evening, Aug. 24 (tomorrow) at 7:30 and will spend the night here.

There has been some question as to the requirements before being permitted to join the motorcade. The officers desire that as many people and as many cars as possible join the motorcade here at Snyder. The caravan will leave at 8:00 a. m. Saturday. There are no fees, nothing required for entry. Everyone will be left free to do as he pleases, with the exception that all will be asked to co-operate in the effort to keep all the cars together.

BEANS ARE PROFITABLE HOWARD COUNTY CROP

A net profit of over \$30 an acre has been made by W. F. King of Howard County from a crop of pinto beans planted on 500 acres of land on which he made a cotton failure last year. He had never planted beans before and did not, therefore, use enough seed, but even from his poor stand he made 160 sacks of beans from the two he planted.

JERSEY MEETING

A meeting will be held in the district courtroom Saturday afternoon at 3 o'clock for the purpose of seeing if a carload of registered heifers can be bought cooperatively. A load of registered heifers that are priced in line have been located and if possible to place this load, plans will be made at this time for shipping and handling. Anyone at all interested in registered Jerseys should be at this meeting. This is the most practical way in which to import cattle and also the cheapest.

SOLID COMFORT FROM HOME MADE SHOWER

An old barrel or an inexpensive steel tank set on four posts or a platform and equipped with faucet and a short length of garden hose makes a shower bath for father and the boys and the hired man during the hot dusty months on the farm. The gas engine or windmill can be turned on a few minutes in the morning to fill the tank, and the old reliable water heater, the sun, removes the chill from the water during the day.

Mr. and Mrs. Henry Rosenberg are expected home from the St. Louis and Chicago markets Sunday.

MUD-SLINGING

Time was when the people of Texas enjoyed mud-slinging in political campaigns and would go long distances to hear one candidate pour it on another. But that time has passed. The advent of the automobile had something to do with it. Unless a candidate can have a constructive platform and talk about what he will do if elected to the office he seeks, people will go riding instead of to his speaking.

No man is perfect. Fault is a human failing, and the private life and conduct of very few men will stand the close scrutiny of a political adversary. The evolution of politics will continue until candidates can announce and leave voters free to make a successful selection without the vile personalities being injected primarily to create interest and avoid the discussion of things really worth while.

HUDSON Patents F-Head Motor

The U.S. Patent Office has granted patents to the Hudson Motor Car Company on the "F-Head" high-compression motor. The patent—No. 1,656,051, relating to internal combustion engines—covers the entire arrangement of valves, spark plugs and combustion chamber.

With the new patented design Hudson motors now are built with a compression ratio of nearly 6 to 1—or 20 per cent above the average—with correspondingly high standards of acceleration, fuel economy and power. It is practically impossible to make the motor knock under even the most adverse operating conditions. The motor is the liveliest, most powerful and economical Hudson has ever built.

vanna community. Crops are looking fine, although most of them are late as a result of the spring drought.

Many farmers are getting uneasy about the appearance of worms. Much of the cotton is infested with lice. Worms are not doing any serious damage yet, but if rains continue it is feared they may do so, says a dispatch from Fluvanna.

Grass is exceedingly fine and, of course, water is plentiful. As a result the O. B. Ranch in Borden County received at Fluvanna recently nine cars, or 433 head of cattle. The management states that they will soon receive through that station additional shipments amounting to 1500 head.

Evidently very heavy rains fell on Thursday and Friday nights on the upper part of Double Mountain river. That stream, 11 miles north of Fluvanna, was on a rampage all day Friday, and it was reported here Saturday that a 15-foot rise was on that morning.

This is said to be eight feet higher than was ever known. As a result all travelers wishing to cross the river on the R. Q. M. No. 7 highway were compelled to turn back or detour.

Fortunately this condition will not long continue since the Austin Bridge Company has a force on the ground putting in a steel bridge on the road mentioned near Justiceburg.

TOM LOVE OUT OF RACE FOR LT. GOVERNOR Thomas B. Love, candidate in the August 25 run-off primary for the Lieutenant Governor nomination,

announced his withdrawal in a statement at Dallas last week.

Love's name was barred from the ballot in several counties in the first Democratic primary because of his announcement and refusal to support Governor Al Smith, Democratic presidential nominee.

The Democratic State Executive Committee at San Antonio the day before Love's statement appeared voted to certify Mr. Love's name on the run-off ballot, amending its action with a resolution deploring its action.

Love was opposed by Lieutenant Governor Barry Miller for the nomination.

SNYDER SCOUT TROOPS REGISTERED MONDAY

Registration of the two Snyder Boy Scout troops, Nos. 47 and 48, was completed Monday night, according to F. D. Craft, Scout executive.

These two troops are the last to be organized in the Buffalo Trails Council and increase the number of troops in the council to eighteen, says the Sweetwater Reporter.

Chubby Ritzenthaler will be in charge of Troop 47, which is sponsored by the Methodist Church, and Joe Drake will lead Troop 48, sponsored by the Baptist Church.

Registration certificates and badges were presented to the Scouts Monday night. Le Roy Fesmire and Fred Yoder, Eagle Scouts, are assisting in the work.

A Court of Honor will be held for the Sweetwater troops August 27.

Both troops at Big Spring are now on camping trips. Troop No. 1, under the leadership of Assistant Scoutmaster Walton Meason and Troop Committeeman S. Holmes, are camping on Concho river south of San Angelo.

Troop No. 2, under the leadership of Scoutmaster Claude Wilk, left Tuesday on a Gypsy tour of 1,000 miles, taking them to Carlsbad Caverns, Davis Mountains and the Mexican border.

STOCKMEN MAY FIND USE FOR ANCIENT CURSE

Sap Cedar, long cursed by stockmen because it hurts grazing land, may prove a blessing in disguise and become a great resource to the state in the opinion of J. H. Faubion of Burnet, who has been investigating the possibilities of using it in tanning leather.

The supplies of tannic acid, which have been taken from oak and hemlock trees, are steadily dwindling and the scarcity of this necessity in tanning leather has added greatly to the cost of leather goods. On top of this the demand for leather goods is increasing.

Mr. Faubion believes that the sap cedar of Texas will offer an inexhaustible supply of tannic acid. He says that the Indians once used the cedar extensively for this purpose during the Civil War. The foliage of the tree is used.

Boost the Fair!

There are three Constitutional amendments running in the Times-Signal, all of which you should read now—this week—while they are running. Be prepared to vote intelligently upon them this fall. If you like them, vote for them, and if not, black them in November.

Boost the Fair!

To the Voters of Scurry County

In this last issue of the paper before the run-off primary I wish to thank all who have been and are supporting me in this campaign, and ask you to give me your vote and influence next Saturday.

It would not be fair to my opponent to state new matter in this last issue, so I shall repeat only what I stated in the first and only article by me since the first primary; that I am asking for a first term and my opponent for a fifth term, and all I ask is a chance; and that the county is behind on current expenses and should be put back on a cash basis.

We owe, net, \$129,889.24 on current expenses with no money to pay it with, or we owe \$135,909.15 with only \$6,019.91 on hand, which under the law must be held to pay old warrants when they come in. These figures were read publicly Saturday from the treasurer's signed report in the presence of my opponent and the treasurer and several hundred people.

I again thank you and ask for your vote and influence on next Saturday, and assure you that, win or lose, I shall hold no malice toward anyone.

Yours truly,

C. F. SENTELL

POINTED PARAGRAPHS

Written by W. S. Patrick, secretary of the Spur Chamber of Commerce and a former resident of Snyder: Do you ever tell anyone about the good place in which you live? Did it ever occur to you that there are thousands of individuals living in your own state would be happy if they were afforded the joys that are yours?

Are you spending your money and your time in helping make your city a better place in which to live? How much do you spend annually for trees, shrubs and flowers that add so much to the physical beauty of your home and your city?

Would you like to hear someone say, "Your city has the cleanest looking yards and streets of any city I have traveled through between Los Angeles and Atlantic City?" And it would be a pleasure to us if someone could truthfully say, "I have been all over the state, and this is my first city to pass through where there are no tin cans or the wreckage of motor cars to be seen."

We can never be able to say the things for our city that we would like to say, nor can we expect to hear others offer their praise of our accomplishments unless we make a continuous effort to develop in the mind of our constituents that great, far-reaching civic pride which causes every individual to feel that "We are doing things," rather than "They are not doing things." In other words, to go forward we must get the habit of assuming rather than shifting responsibilities. Every well-kept lawn, every beautiful flower, every shapely tree and every bit of shrubbery that you are responsible for growing in your city carries with it a two-fold value. First, you are able to visualize the results of your efforts in adding physical beauty to your home life, not just for yourself, but your neighbor as well, for all love the beauties of nature.

A second value is measured in a monetary way by the increase in civic pride which causes every individual to feel that "We are doing things," rather than "They are not doing things." FOR YOUR CONSIDERATION The primary purpose of sanitary plumbing is to protect the health of the household and the community at large.

Convenience is secondary but not to be overlooked nor underestimated. In order to properly plan and install sanitary plumbing it is necessary, first, that one have a thorough knowledge of how each fixture, fitting, trap, vent and drain should be placed and why it is installed at a certain place and in a certain way. Second, that all fittings, joints, etc., be so constructed and joined together that there will never occur a leak or allow sewer gas (which is very poisonous) to be discharged in the house or near enough any door, window or other opening that it may enter the house. Owing to the fact that our state sanitary law as it now reads covers only cities of five thousand population or more, it is necessary in the smaller towns to be very cautious. When employing a plumber, it is well to ascertain whether or not he has a bond, a city license and a state license. While the latter is not compulsory in towns of less than 5,000 population, it is a good mark of efficiency and stands for your protection.

PROPOSED CONSTITUTIONAL AMENDMENT—AUTHORIZING LEGISLATURE TO GRANT CONFEDERATE PENSIONS REGARDLESS OF DATE PENSIONER CAME TO TEXAS OR WHEN WIDOW MARRIED PENSIONER OR WHEN SHE WAS BORN.

HOUSE JOINT RESOLUTION proposing an amendment to Section 51, Article 3, of the Constitution of the State of Texas, authorizing a tax levy for Confederate soldiers and sailors and their widows, and providing for submission of same to the qualified electors of this State at any election to be held on the first Tuesday after the first Monday in November, A. D. 1928, and providing the necessary proclamation and appropriation to defray expenses of proclamation, publication and election.

It is resolved by the Legislature of the State of Texas: That Section 51, Article 3, of the Constitution of the State of Texas be amended so to read as follows:

"The Legislature shall have no power to make any grant or authorize the making of any grant of public moneys to any individual, association of individuals, municipal or other corporations whatsoever; provided, however, the Legislature may grant aid to indigent and disabled Confederate soldiers and sailors under such regulations and limitations as may be deemed by the Legislature as expedient; and to the widows of indigent and disabled Confederate soldiers who, under special laws of the State of Texas, during the war between the States, served in organizations for the protection of the frontier against Indian raids or Mexican marauders, and to indigent and disabled soldiers of the militia who were in active service during the war between the States, and to the widows of such soldiers who are in indigent circumstances, and who are or may be eligible to receive aid under such regulations and limitations as may be deemed by the Legislature as expedient; and to grant for the establishment and maintenance of a home for soldiers and sailors, their wives and widows and women who aided in the Confederacy, under such regulations and limitations as may be provided for by law; provided the Legislature may provide for husbands and wife to remain together in the home. There is hereby levied in addition to all other taxes heretofore permitted by the Constitution of Texas, a State ad valorem tax on property of seven (7) cents on the one hundred (\$100) dollars valuation for the purpose of creating a special fund for the payment of pensions for services in the Confederate army and navy, frontier organizations and the militia of the State of Texas, and for the widows of such soldiers serving in said armies, navies, organizations or militia; provided that the Legislature may reduce the tax rate herein levied, and provided fur-

ther, that the provisions of this section shall not be construed so as to prevent the grant of aid in cases of public calamity."

Sec. 2. The foregoing constitutional amendment shall be submitted to a vote of the qualified electors of the State at an election to be held on the first Tuesday after the first Monday in November, A. D. 1928, at which all ballots shall have printed thereon "For the constitutional amendment authorizing aid to Confederate soldiers and sailors and their widows in indigent circumstances and authorizing tax levy therefor," and "Against the constitutional amendment authorizing aid to Confederate soldiers and sailors and their widows in indigent circumstances and authorizing tax levy therefor." Each voter shall scratch out one of said clauses on the ballot, leaving the one expressing his vote on the proposed amendment.

Sec. 3. The Governor shall issue the necessary proclamation for said election and have the same published as required by the Constitution and laws of this State. The sum of \$5,000.00 or so much thereof as may be needed is hereby appropriated for the expense of publication of said Amendment.

Approved by the Governor, March 30, 1927. 7-4tc.

Garza County has 14 club boys learning to caponize, and Knox Parr believes they will have several hundred capons to sell next spring besides those that adults are learning to caponize through the work of the boys. Club members plan to show their capons at county and state fairs this fall and to market them collectively in the spring.

Fourteen pure bred Jersey bulls have been brought into Stonewall County as a result of several weeks of intensive work by Fred S. Reynolds. They have been placed in bull circles organized at Aspermont, Swenson and Peacock. Purchases were made from Ed C. Lassater of Falfurrias. Keep Cool With the Citizen's Ice Company That Has Located in Snyder to Stay

Our set price of 50c a hundred pounds is a fair and equitable price for ice that is pure, clean and of guaranteed weight. When we opened in Snyder, our competition were getting eighty cents a hundred for cash, and 72 cents a hundred with a book. When The Citizens Ice Company opened, our price was 60 cents a hundred. Shortly after we started, our competition lowered their price to 60c cash and 54c with book. After we got into full production, we established a price of 50c a hundred, cash. At that time our competition went to 40c a hundred at their dock, then to 30c a hundred in block lots, and

Now Twenty Cents a Hundred For White Blocks Which is the Same Grade of Ice Snyder People Paid 80 cents a Hundred for Last Year.

The Citizens Ice Company deserves your support and business. We cannot hope to combat a company with millions of resources at their command. We are asking only fair play and the support of the people of Snyder and Scurry County. Owners of the Citizens Ice Company are Snyder and Scurry County residents and are directly the cause of bringing the price of ice down to a fair and square price to all. We play no favorites.

The Citizens Ice Co.

Glenn Sample, Manager Phone 467 for Delivery Snyder, Texas

Owned by Snyder and Scurry County Capital

"WE ARE FREEZING TO PLEASE YOU."

Last Year Snyder People Paid Eighty Cents a Hundred Pounds when they did not purchase a book.

WHY???—80c??

The price of good, fresh water in Snyder has never been as low as at the present time; the supply has never been better.

Then why should Snyder citizens pay EIGHTY CENTS A HUNDRED for ice, whether delivered at your door or when you go to the ice station for it?

Local residents and merchants tell the Times-Signal that this condition has existed since 1919. When cities the size of Austin pay but 30 cents a hundred pounds; Fort Worth, 30 cents; with Abilene and San Angelo paying 40 cents, there is no earthly reason or excuse for paying the outlandish price that Snyder is paying. Any organization should be accorded a fair profit on their investment in stock, machinery and other appliances, but when the price is nothing more nor less than a hold-up, then forbearance ceases to be a virtue.

The Times-Signal stands for Snyder and Scurry County first, last and all the time and will continue to champion every just cause. When needed, the paper can kick like an old Georgia mule and won't stand hitched when the cause of the people is at the bottom of any proposition.

Who Has Brought the Price Down?

Fluvanna News Notes

Mr. Jas. H. Tate (V. P.) is the authorized correspondent for Fluvanna, and as such is authorized to receive renewal and new subscriptions. Cooperate with him in building a fine weekly news column for this thriving town.

Weather and Crops

V. P. has often had the question put to him, "When is it going to rain?", but now the query is "When is it going to quit raining?" This last question clearly indicates that we have had an abundance of rain during the last few weeks. Apparently the results are both good and bad. So far as the super-abundance of rain is concerned, it has been fine for the grass and for all sorts of feed crops, but in the case of cotton it is proving disastrous. Grass is very fine, and as a consequence cattle are fat and fine. Although the feed crop, like the cotton, is late, nevertheless it is promising a fine crop. Thus far the outlook is fine, but when we turn to consider the cotton outlook—not only in this community but pretty generally over this and adjoining counties—the prospect is far from being encouraging. In the first place, much of this crop is very late, and in the second place, the lice and worms are wreaking havoc, certain newspaper reports to the contrary notwithstanding. It is a great injustice to the farmer and also a bad business policy to put out glowing reports which cannot be made to stand up. Better either tell the truth or say nothing about it.

It is evident that very heavy rains fell to the northwest of Fluvanna on last Thursday and Friday nights, at which time we also had rains here. On Friday the Double Mountain river, a few miles north of Fluvanna, was on a rampage, and travel was completely blocked. On Saturday the situation was even worse, the river being eight feet higher than was ever known, according to reports. For the time the R. Q. M. No. 7 highway ended at the river. This situation will, however, soon be relieved by the new bridge being put in near Justiceburg.

It goes without saying that the farmers are very busy when the fields are dry enough for work. Commercial business is quiet as usual at this season. Some lands have recently been leased to oil companies, thus strengthening our faith in oil prospects.

We understand that drilling in the Koonsman well has reached a depth of 1900 feet the first of this week and is in salt formation. On last Saturday the O. B. Ranch in Borden County received at this place over the R. S. & P. nine cars of 433 head of cattle. We understand that other similar shipments will follow soon.

A building enterprise is in the air here, about which we will probably be able to give more definite information a week hence.

School and Church On last Saturday O. S. Willis and Clarence Dowdy returned from Dallas bringing the new school truck which is to be used in bringing in the school children of the Favorite community. The truck, or bus, is a Chevrolet, '28 model and, it is said, has a carrying capacity of from 30 to 35 students. It is of the sedan type and a veritable school room on wheels.

One thing usually calls for another; hence the coming of the aforesaid bus makes a garage on the school grounds a necessity; accordingly our trustees are having such a structure erected this week. At the same time this new building is being so constructed as to give housing for the manual training department.

In addition to the usual Sunday schools there were preaching services at the Fluvanna Baptist and Presbyterian Churches last Sunday morning. Rev. C. C. Carr of Snyder filling the pulpit for the pastor, Rev. Massey, and Jas. H. Tate, pastor, preaching for the Presbyterians. In the afternoon quite a few of the Fluvanna people motored to Snyder where they heard Evangelist Winsett on the Al Smith-for-president question. V. P. did not go down, but he is stoutly of the opinion that the fewer of the Al Smith type we have in office—either county, state or national—the better off we will be.

On next Saturday night the First Baptist Church is expected to begin its revival meeting for the season, same to be held at the arbor.

Trips and Visits

W. H. Jones and wife departed last Wednesday on their vacation trip. Mrs. Jones leaving her husband at Dallas and going to Waxahachie where she is visiting a sister, Mrs. J. L. Deitz, while Mr. Jones proceeded on to Detroit, Mich., where he will see the sights in a great lakes area and manufacturing city and then proceed to drive back in a new Dodge coupe. Best wishes, old boy!

DID YOU EVER STOP TO THINK

Edson R. Waite, Shawnee, Okla.

Homer W. Wood, publisher of the Porterville (Calif.) Evening Recorder, says:

THAT your home town or your home community grows by its trade area or natural resources and advantages. It does not grow by counties, county government

or boundary lines. Therefore, to make your town grow, develop the home industries, whatever they may be. A great majority of communities are agricultural. A better and more intensified development of agricultural industries will, then, help your town to grow. Are your ranchers raising the crops from which they can get the most out of the land? Do your home merchants buy all they can from the ranchers? Perhaps the subdividing of land into small ranches will serve to bring more people. In turn this will mean more business and more industries in town.

If you do not like your Chamber of Commerce, get into it and fight for and with it. If the leadership is wrong, change it. Is your Chamber of Commerce doing the real constructive development work it should? If not, then use your head and figure out what it should do in the way of working out a development program. Put some constructive ideas of what your community needs in writing,

Commerce does not act, give them to your home town newspaper. Your newspaper will carry the message to the people. When you criticize, however, be sure you have a remedy.

Factory towns are few. You cannot get factories to locate in a town that is not a logical factory site. By developing the land round about in the proper manner, or by raising crops that must go through a packing house in town, you are getting more people to your town by the right kind of development. Oftimes it is worth while to hire an expert to advise. An outsider looking in may have some new ideas unbeknown to an insider looking out.

To All Users of Natural Gas in Snyder

SNYDER has been and is now enjoying natural gas, and as the fall season comes on, more will be using this commodity. We want to advise that your present fire policy does not protect you against a gas explosion. To provide this protection the policy may be amended by attaching a gas permit to your present fire policy which will cost you the sum of \$0.05 per \$100.00, or fifty cents per \$1,000 insurance, and our agency strongly recommends the attaching of this clause to each and every policy issued by our agency, and we do this for the protection that we feel we are rendering to our customers.

It is our intention to attach this clause on all renewal policies unless otherwise advised, and if any present policy holders should want this protection before his or her policy expires, kindly notify our offices and the clause can be attached to the unexpired term of your policy.

We offer this explanation mainly for the information of not only our Snyder and Scurry County patrons but the public in general. Our agency always stands ready to give the utmost in service and satisfaction.

FERGUSON NAMED DISTRICT CHAIRMAN

According to an announcement from Baylor University at Waco, Re. W. F. Ferguson, pastor of the First Baptist Church and alumnus of Baylor, has been appointed chairman of the Mitchell-Scurry Baptist Association to assist in the Greater Baylor Campaign for \$2,000,000.

Removal of the debt against Baylor will relieve Texas Baptists of the bulk of the state denominational debt. The campaign's success really means \$4,300,000 for the university, for Dallas and Waco have promised gifts of \$1-

000,000 each, and the General Education Board will make a gift of \$300,000 when Baylor's endowment is increased. Campaign money will be used for retirement of indebtedness and to create additional endowment.

Ather Chandler of the Ira community presented the Times-Signal with a fine Tom Watson melon which the force enjoyed this afternoon. We'll Renew that Frock

IT'S surprising what a difference scientific dry cleaning—the sort we do—makes in the appearance of a frock or other item of apparel. And not only in the appearance, but in the life and service of the garment as well. Why not call our truck and let us add you to our long list of satisfied customers? We clean everything from gloves and hats to the most delicate lingerie.

Our Service Is Prompt and Exactingly Painstaking

EACH dress we clean, regardless of material, is cleaned, dried, pressed and inspected separately. This enables us to give each garment individual attention. But, after all, it is not our method that you are interested in; it is the condition your garments come back to you in. You will find your dresses fresh, clean, retaining their original luster, and well pressed, if cleaned by

To All Parties Interested in
FIRE INSURANCE PROTECTION
On Their Property in Snyder, Texas

WE now have natural gas in our city and same is being used and enjoyed by some of our citizens at the present time, and of course will be used by a large majority of our citizens soon, and this is to advise that your present fire policy does not protect you against a gas explosion damage, but same can be amended by attaching a gas permit to your present policy, which will cost the sum of \$0.05 per \$100.00, or \$5.00 per \$1000.00 insurance, and we, the undersigned agency, strongly recommend the attaching of this clause to each and every policy issued by our agency and do this for the protection that we feel we are rendering to our policy holders.

It is our intention to attach this clause on all renewal policies unless otherwise advised, and if any present policy holders should want this protection before his policy expires, you can kindly notify our offices and it can be attached for the unexpired term of the policy.

We offer this explanation mainly for the information of the public in general, and assure you that we stand ready at all times to render the best service and protection possible for us to give.

THE NEW HATS

Are of
Felt and Soleil

The secret of the charm of most of the new hats for fall lies in the shape of the hat itself—for trimmings seem incidental. Brims turn up off the face and sports types have narrow and becoming scoop brims that are deeper at the sides than at the front and back.

All the lovely new shades of autumn are here in beautiful hats of velvet, felt, hatter's plush and soleil.
