J.C.PENNEY CO

You'll call Pontiac the happy medium . . . quality you won't do without, at a cost you can easily pay *

It isn't difficult to learn what most people want in a motor car. We all want pretty much the same fine qualities-and we want them at a moderate price.

You will find this combination in the Pontiac-that fine General Motors car. Thus, if it's a damp day when you first drive a Pontiac you will notice how snug and dry it is inside. The same with heat, cold and traffic noise-because Pontiac's fine Fisher bodies are tightly insulated.

Appreciating the comfortable seats, you will remark also the absence of road shocks. This is due to hydraulic shock absorbers and rubber cushioning at 43 points in the chassis.

When you first step inside the Pontiac you will see something unusual-genuine mohair or whipcord upholstery in the closed carss fine leathers in open models.

Even though you feel that most cars have satisfactory engines, you will be surprised at the smoothness with which Pontiac's engine does its work. As you drive you will admire the quick pick-up and power of that big, easy-working motor.

Good looks? Smartness? We can leave the proof to remarks you will hear and the approving glances you will see! (Bodies by Fisher.)

Possibly we are prejudiced -- yet owners praise this car more than we would dare to. The values they have discovered will be clear to you once you have driven the Pontiac. Why not do that! Any Oakland-Pontiac dealer will arrange a demonstration.
