#### Girl Scouts Enjoy Wiener Roast.

March 12 was the twentieth anniversary of the organization of the Girl Scouts in the United States. The local troop celebrated the event that night with a wiener roast at lodge on Twenty-Sixth Street In spite of the cold weather there was a good attendance, and many of those present proclaimed it the best meeting of the year.

Games were played and songs were sung while wieners were being roasted over the stove, which was recently given the troop by Miss Zona McMullan.

After a sumptuous feast of juicy wieners, pickles, potato chips, buns and marshmallows, the horseshoe around the neck and tie or button formation was made, and two new at B and at Y attach straps or tenderfoot Scouts - Athalene Mc-Clinton and Frances Jarratt, were the waist. Homespun Sense by Traylor.

The friends of Melvin A. Traylor are giving him a speedy send-off in an attempt to push him into the presidential chair. The former Texan has said in When the saffron rays of the evening sunset public addresses, among many other pithy bits of wisdom: "In my opinion, no great division of human A staunch old ship comes sailing society has ever been lied to and lied about, as much in the same period of time as has the American farmer Friendship; it spans the ocean of troubles, in the last ten years."

#### Watching the Health Details.

The death of one fine Scurry County young man and the serious condition of another, as a result of complications resulting from minor illness reminds all of us that a cut finger, an aching stomach or a throbbing head deserve and command immediate attention. Nature demands, as a rule, nothing more than simple attention but that attention must be as regular as the meals you eat and the hours you sleep. For in that measure your bread will return

#### The Need for Citizenship.

Certainly most of us, whether we have seen 21 or 87 winters, know little of the true meaning of Will you anchor that heart from rocking, citizenship. One of the longest steps toward giving the word a new meaning for the next generation of The crew of Friendship is many, voters is being taken by Snyder High School. Students excelling in all points that make for better citizenship are given special credit and public recognition. Our children may be teaching us some political wisdom of the Jeffersonian variety in a year

#### Monday Was THE Day.

Monday was one of the liveliest days, aside from Saturdays, that Snyder has seen in several months. While the rest just sheepishly glean it We can't exactly refer to is as a red letter day, however, for borrowing money, even from the government, is not what it was "cracked up to be" six or eight or ten years ago. The startling thing about borrowing money is that the loaner expects to be paid back sometime, much to the borrower's chagrin. Personally, we'd rather live on cornbread and beans, bought with cash, than to eat ice cream and cake from a borrower's table.

#### They Belong to All of Us.

Those rural youngsters who come to Snyder Saturday of this week, and the group that will be here Saturday of next week, belong to all of us-Snyder, Hermleigh, Fluvanna, Turner, Crowder, Ennis Creek a re-toot: The Caton-Dodson advertising manager and all the others. #### Political Squirming.

National politics must be hitting on eight by now, for daily newspaper headlines and the mail that comes to the Times office are rank with campaign fodder. A year ago it was uncommon to see congressmen, senators and cabinet members call their political enemies liars, even in polite language. Now you could

meet a political liar on every Washington corner, if

you believe the reports that make their ways through the mails, the telegraph wires and the ether waves. One mail brings a lengthy letter from James C. stone, chairman of the Federal Farm Board, defending his organization's cooperative marketing tactics, salaries, etc. Another brings bitter accusations of the tors and others. In between these extremes stand such conservatives as you and I probably are, who think that the Farm Board's mistakes, which are

#### EDITORIAL OF THE WEEK.

REMEMBER WHEN YOU VOTE.

Aside from urging South Plains support for Pink Parrish of Lubbock and Ernest Thompson of Amarillo -simply because they know more about the needs of this country than any of their rivals-The Morning Avalanche does not expect to actively campaign for any candidate for congress-at-large. We do, however, expect to campaign against some of the aspirants as promised on October 14, 1931, when making public the list of state senators who voted against congressional redistricting.

Two of the 13 state senators who discriminated against West Texas by voting against redistricting have already announced for congressman-at-large, If you want to get the most out of life, don't let third is running for the State Railroad Commission the politicians feed you too much applesauce about and others may enter the coming political fray. I find that the solution of the Arthur Wells mystery—for we did solve it—takes three divisions in my mind. Each one is a sitting, followed by an investigation made by Sperry and myself.

But for some reason, after Miss Jeremy's second sitting, I found that my reasoning mind was stronger than my credulity. And as Sperry had at that time determined to have nothing more to do with the business, I made a resolution to abandon reason to believe that I would have altered my attitude toward the case, had it not been that I saw in the morning paper on the Thursday fol-lowin gthe second seance that Elinor Wells had closed her house, gone to Florida.

Other things also increased my uneasiness as the day wore on. There was, for instance, the matter of the back door to the Wells house. Nothing was more unlikely than that the key would still be hanging there. I must, therefore, get the key.

Going through my desk I found a number of keys, mostly trunk keys and one the key to a dog-collar. # CORRESPONDENCE FROM RURAL COMMUNITIES IN SCURRY COUNTY

# County Line News

Mrs. Dick Hardee, Correspondent

After one week of snow, rain and cold weather the farmers were out Monday morning real early to try to make up some of the time they have lost. Very little plowing was done in our community last week, and the little garden stuff that was up and looking pretty can be seen no longer. Those who waited until after Easter to start their gardening are as well off as the others, as most of it is to do over. This has certainly been an unusual month for weather.

with the CRANKCASE DRY to prove the PENETRATION of Germ Processed Oil and Value of the "Hidden Quart"

"Hooey!" jeered one of the bystanders in a Muskogee, Oklahoma, filling station when F. J. Morgan told how the "Hidden Quart" of Conoco Germ Processed Oil had protected many cars from harm when run with the crankcase empty.

To prove his point, Mr. Morgan had the Germ Processed Oil drained from his crankcase and, accompanied by the doubter, started for Checotah, 27 miles

A crowd met the car at Checotah, but Mr. Morgan drove on to Eufaula, 14 miles farther, 41.6 miles from Muskogee. Chevrolet mechanics tore down the motor and pronounced it undamaged. The doubters became

The oil that protects a motor under such conditions will give you better, safer lubrication in every-day driving! Conoco Germ Processed Oil is the only oil that actually penetrates and combines with metal surfaces. That's why a "Hidden Quart" stays up in your motor and never drains away. It cuts down costly starting wear, saves gas, gives your motor longer life, with fewer repair bills.

Change to Conoco Germ Processed Oil for safer, surer lubrication. . . . . .

We neither encourage "dry crankcase" experiments nor guarantee success under all conditions. But unsolicited letters from motorists, now in our files, tell of this and hundreds of other runs with empty crankcases but without damage.

#### Gives Low-Down on Deep Subject By Ring Lardner

To the Editors It seems like as if it was up to me to settle a big argument which has occurred between Al Mamaux and Jack Kieran. It must be exclaimed that Mr. Kieran is one of the base-ball writers on the New York Times and a prominent golf player. Mr. Mamaux is somewhat of a veteran big league baseball pitcher who used to be the best singer in the big leagues. The argument was report ed by Mr. Harry Salsinger of the Detroit News. Mr. Salsinger is a tall skinny handsome brunette who looks not unlike the writer only he

has more hair. Well it seems like Mr. Mamaux and Mr. Kleran got into a fishing argument namely Mr. Mamaux has claimed that if you took a bucket, the bucket would weigh just the same like as if no fish had been dropped into i

"A live fish can't possibly increase the weight of water" said Mr. Ma-maux. "A dead fish, that is different matter, because that would be dead weight.

Well, they went to a laboratory in Detroit where this bitter argument started and asked the profes sor of fish which was right and who was wrong, so the professor said he would make a test but he didn' have no live fish on hand that day and Mr Mamaux would not stand for no test being made with a dead fish. Finely they went to a fish market and they had a tub full of water there weighing 95 pounds and they found a fish named Carp who Bullock Elected as Member of Oil weighed three pounds and they it in the tub and then weighed the total which weighed 97 pounds so Mr. Mamaux claimed that clinched his argument because in the first place the carp was dead and in the second place he only increased the weight of the tub two pounds whereas the fish man admitted that his the tub was three pounds

"That shows how right I am." said Mr. Mamaux. "No it don't," retorted Mr. ieran. "All it proves is that nobody with on the program. any brains should ought to buy fish from this market.'

Well, friends, the reason I feel called upon to leap into this argument is that all my life I been making a study of weights and displacements and etc. and I will give you a few facts to prove that it is a very tricky subject and a person should not ought to get into no argument in regards to same unless they have

But get drowned, they will come to the surface looking like drowned rats, and at the same time proving that they didn't weigh nothing or they would of sank. It is kind of dangerous to make this test in a pail of beer as the rats goes right to it and are libel to reach the singing

The most conclusive test I ever made along these lines was one time when I took a night boat from N. Y. to Albany on the Hudson River First it was necessary to weight the river and then the boat when it was empty and afterwards when all the passengers got aboard. Then I made all the passengers come into the weighing rooms and get weighed one by one. When the boat got to Albany the next morning the river looked just like it did the last time I was up there.

Prof. Sump of Severe University, New Hampshire, once made a experiment which perhaps proves more than the foregoing. He weighed all the passengers that was going on a ship from New York to Cher-Mrs. Philip C. McGahey will feaagain when the ship got to Cherburg. They didn't weigh nowheres

#### Large Wool Loss Is Due to Moth Larva

This statement of interest to ev-ery home-maker comes from the Hardy in their latest comedy -Rex Research Foundation, Chicago, which is engaged in a constant war on household insects which are a menace to life and health and source of damage to property. It is based on this fact known to science: If 50 per cent of the eggs of a single female clothes moth are fertile and reach maturity and 33 per cent of these are female, two generations (roughly one year) under favorable conditions will con-sume .10 of a pound of wool. Muttiplying this figure by the popula-tion of the community yields the amazing total given above.

Many Farmers Terrace.

Helped by the county agent, 112 farmers in San Augustine County terraced 3,100 acres of land in 1931 The Commissioners' Court furnished 12 levels to farmers who are trained to lay out terrace lines. College of Texas, county agents and others. The program is sponsored by the local produce plant of Swift & Company. The meeting, which will be an

all-day affair, will be called to order at 9:30 by R. F. Humphrey. G. V. Jeck will discuss poultry ills that cause heavy losses to farm flocks. F. M. Simpson of Chicago will talk on how the butter, eggs and poultry of Texas are marketed D. F. Eaton, county agent, will offer some helpful hints, and Professor S. C. Evans, A. & M.
