BALLOTING ON BEER PLANNED FOR SATURDAY

Poli Tax Payments Indicate 3,000 May Vote on Legalization Of 3.2 Per Cent Brew.

It is possible that more than 3,000 voters will go to the polls Saturday to determine whether 3.2 per cen beer by weight may be legally sold in Scurry County. No Beer!

A vote against legalization of beer in Scurry County is a vote for aw enforcement and sobriety. Vote against beer if you would protect your home and your children against a gradual movement back to legalized liquor of all forms.

The Times is no alarmist, nor does it believe in much of the flag waving and propaganda of too-ardent dries. But it does believe that the many reasons given by wets for legalization of beer are largely mere excuses. What most of these beer wanters really want is direct benefit for their pocketbooks and exhilaration for their stomachs.

Beer has been sold illegally in Scurry County for several weeks. All of the 229 qualified voters who signed the beer election petitions admitted this fact by their signatures. It beer has not been sold illegally these several weeks, as a few contend, why call an election to determine whether beer shall be sold legally in Scurry County? Obviously, there is no answer. The age-old reply concerning revenue is what the brewers used decades ago when they gradually took a

stranglehold on the American people. This brief editorial is not written because there is any likelihood that Scurry County will vote wet Saturday. Rather, to state the Times position without equivocation, and to remind a few conscientious voters who might be on the fence that the beer propaganda is the same old wet story that Noah must have heard from his doubting neighbors. When the voters of this county vote against beer Saturday, The

Times will make no bones about arousing public sentiment against

these who are selling beer or any other liquor without legal sanction.

THURSDAY SET AS FINAL DATE FOR CONTRACT

More Than 1,000 Farmers Have Told Government They Will Reduce During 1934-35.

Thursday, February 15, is the final ate on which farmers may sign 1934-35 cotton reductions contracts thereby securing cooperative benefits offered by the government.

Extension of the date, announced late last week, brought a number of new signers into the county agent's About 1,100 farmers have already agreed to help Uncle Sam solve the cotton problem.

Reduction of the lint average from 100 to 75 pounds made it possible for a large number to participate in the program who could not otherwise have done so. Most of these had already filled out papers, however, with the expectancy of some uch reduction action by the secetary of agriculture.

made from plants Thedford's BLACK-DRAUGHT is Thedford's BLACK-DRAUGHT is made from plants that grow in the ground, like the garden vegetables you eat at every meal. NATURE has put into these plants an active medicine that stimulates the bowels to act — just as Nature put the materials that sustain your body into the vegetable foods you eat.

In Black-Draught you have a natural laxative, free from synthetic drugs. Its use does not make you have to depend on cathartic chemical drugs to get the bowels to act daily. Now you can get Black-Draught in the form of a SYRUP, for Children.

P.-T. SESSION PLANNED HERE LATE IN APRIL

Plans for Fourteenth District Meet ing April 27-28 Made at Lubbock Saturday.

Plans for the annual fourteenth district meeting of the Texas Congress of Parents and Teachers, scheduled to be held in Snyder April 27 and 23, were discussed in Lubbock Saturday at an executive board meeting conducted by Mrs. J. B.

Mrs. P. C. Chenault, local P.-T. A. resident and general chairman of he April meeting to be held here, and Mrs. Nelson Duan, attended the Lubbock meeting. "The Child and the Community" will be the heme of the local conference.

Additional plans were made on Thursday afternoon of last week by district officials and members of the executive committee of the Snyder association. The question of who may sign one of the new 1934-35 cotton contracts may always be answered by deciding who has control of the land in 1934 and 1935, declares G. E. Adams, who is in active charge of the campaign at extension service headquarters at Texas A. &. M.

The government seeks to take 6,-420,000 acres of cotton land out of production in 1934. The Secretary of Agriculture is ready to contract with the men who have that land in control for 1934. There is no question about the eligibility of the farmers who operate their own land to sign contracts, nor about the necessity of landlords signing, except where a landlord has rented for cash for both 1934 and 1935. Furthermore, all tenants are ruled out exceps those who may qualify as "managing share tenants." If a managing share tenant has a contract with his landlord for the en-tire farm for 1934, he is the man who has control of that farm for 1934 and without whose signature no contract may be made with the government. In such cases the contract calls for a 50-50 division of the rental payments. The landloro must sign also, for the contract covers both 1934 and 1935, and there must be a guarantee that the contract will be fulfilled both years. A managing share tenant is de-fined in the new contract as "one who furnishes work stock, equipment and labor used in the pro-

duction of cotton and who manages the operation of the farm."

The parity payment of at least \$5 per bale to be made about next Christmas on 40 per cent of the average five-year production of the farm, known as the farm allotment, is to be divided between all land-lords and tenants according to their usual share agreements. This farm allotment is fixed in the coming campaign for the duration of the contract, and parity payments made on it may be larger in 1935 than in 1934. It is an important payment which should not be overlooked, for in the long run it may yield nearly as much money as the rentals.
