Impromptu New Members of Club

A banquet complimenting new members was held by the Business and Professional Women's Club Tuesday evening in the banquet hall of the Manhattan Hotel at 7:30 o'clock.

Mmes. E. M. Deakins and Munker Y. Lewis and Miss Allene Curry were hostesses for the affair. Gay Halloween decorations decked the room, and the long table was centered with strings of black and orange paper centerpieces were baskets of sunflowers. Halloween lanterns softened the lighting effect, and spookly Halloween cats kept close watch over events of the evening.

As the group was invited into the banquet hall, new members were presented with Halloween caps, which they wore all evening. Places were marked by girls in Halloween masquerade, and party favors were noisy Halloween whistles.

The Halloween motif was also emphasized in the evening menu, which consisted of chicken à la king, English peas in potato nests, stuffed celery, carrot and pineapple salad, pickled apples and cucumber pickles, rolls, pumpkin pie with whipped cream and coffee.

BLACK-DRAUGHT

"Such a Good Laxative," Says Nurse Writing from her home in Festus, Mo., Mrs. Anna LaPlante says: "I am a practical nurse and I recommend to some of my patients that they take Black-Draught, for it is such a good laxative. I took it for constipation, headache and a dull feeling that I had so much. A few doses of Black-Draught—and I felt just fine."

Because so many people know from having used it that Black-Draught is a good, purely vegetable laxative, millions of packages of it are sold every year.

"Frances and Joan have normal action and are gaining weight continually. I am thankful for Dr. Caldwell's Syrup Pepsin."

Tigers Outpunch Rotan to Keep in Tie for Leadership of District 13

"Red" Hill's Tigers played off-again-on-again football Saturday afternoon on their home field. That brand was good enough to down last year's district champions, the Rotan Yellowhammers, 13 to 0, and give the Snyder crew two conference wins to no losses.

The Tigers now share with Roby the first place in district 13, the Lions having won two starts. Roscoe has won one and lost none.

Snyder's margin of victory was three backs—Wiese, Wolcott and William Boren—who made repeated yardage on off-tackle thrusts and center bucks. Rotan made a second-quarter drive inside the 15-yard line, featuring a 21-yard run by Acker, but they were held for downs, and failed to get so close again.

Hammers Try the Air.

The Hammer aerial attack clicked occasionally, but it was nipped in the bud by Boren, whose elongated form bolted up to intercept three passes, and by other "Tiger" defense men. Acker outpunched Wiese repeatedly to put the local crew at a disadvantage. Five of his boots went out of bounds inside the Tiger 10-yard stripe.

Snyder drove 52 yards for her first touchdown near the close of the first quarter. The initial first down was aided by a 5-yard Rotan penalty. After that, Wolcott, Boren and Huestis clicked with gains of 6 to 14 yards until Huestis made the tally. He failed to deliver the extra point.

Rotan picked up three first downs to Snyder's two in the second period. Several fumbles and frequent penalties marred the third period. Wiese's 22-yard return of a Rotan

punt early in the final quarter paved the way for the final marker of the day. Huestis featured the drive from the 30-yard line with a 17-yard rally, and Wolcott ended things by sidestepping 6 yards across the goal. Huestis converted that time.

Snyder Takes Charge.

It was mostly Snyder after that. Wiese made one 17-yard gain, and William Boren intercepted two passes in that period, in addition to making a 15-yard gain through the Hammer defense.

The fleet Wolcott was not completely stopped, but alert Hammer backs, plus his team mates inability to block with much success, prevented him from making any of his now-famous touchdown runs. He passed all except one tackler in a 25-yard push in the second quarter.

In the line, Otha Lee Clark at center and Patterson at left tackle looked better than the rest. Captain Fred Gerth at Rotan's left tackle and Wilson on left end were the best visiting linemen. Quarterback Acker and Halback Moore, both light-weights, shared backfield honors for Rotan.

Game Has Color.

An active Tiger band, a snappy white-uniformed Yellowhammer pep squad, a sizeable Snyder pep squad, and a fair crowd of spectators added color to the game. The mix-up was postponed until Saturday because of funeral rites Friday afternoon for Charles W. Burk, a member of the Tiger squad.

The line-ups:

Rotan—	Snyder—
Wilson left end	Crenshaw
F. Gerth (c) left tackle	Patterson
Pryor left guard	D. Johnston
H. C. Gerth center	O. Clark
Shelton right guard	Moffett
Dodd right tackle	Morgan
Dry right end	Beavers
Moore left half	Wolcott
Vaughn right half	W. Boren (c)
Vittito fullback	P. Johnston
Acker quarterback	Huestis
Substitutes—Rotan: Carlyle for	Dodd, Kennedy for Shelton, Dodd
for Carlyle, Shelton for Kennedy,	Snyder: Wiese for P. Johnston,
Chapman for Crenshaw, Tate for	Moffett, J. Boren for Huestis, Huck-
abee for Chapman, Webb for Bea-	vers, C. Clark for Patterson.

Touchdowns—Huestis, Wolcott. Points after touchdown—Huestis, 1. Passes—Rotan attempted 20; completed 5 for gain of 61 yards; 5 intercepted; 10 incomplete. Snyder attempted 7; completed 3 for net gain of 9 yards; 1 intercepted; 3 incomplete.

First downs—Rotan 5, Snyder 11.

THE WEEKLY DOZEN

After the Ball Is Over.
 Talkative Tillie thinks the shortest skirt was the quickest way home for many a Colorado Lions Club softball player Tuesday afternoon.

But Not Hoover, Please.
 Pessimism Pete, peering into the future, says the only way to put the fear of the Lord into some Scurry County folks will be to elect a Republican president in 1936.

Beside the Still Waters.
 At least one Snyder parent believes the first path to the state penitentiary may lead beside the still waters that are slot machines and the quiet valleys that are town loafing places for youths in their teens and twenties.

The Three Big "F's."
 Food, clothing and shelter were once considered the three necessities of humankind. Judging from the number of feed stores that have sprung up in Snyder, the West Texas necessities are now feed food and fodder.

You Can't Beat the Band.
 The Tiger Band is the only organization in town that does its own tooling, yet it is an organization that requires outside assistance before it toots 100 per cent. Snyder will do well to consider the true worth of its band, and render moral and financial support accordingly.

After the Crowning's Over.
 Now that the World Series is over, and the Dean boys have been crowned, radios will be turned back to punts and passes, employees and employers will not be finding excuses to get a breath of air just after lunch, and we can take up with the New Deal where we left off.

Those Eight Amendments.
 Eight proposed constitutional amendments will be sentenced to death or life by the Texas electorate November 6. If to death, they may be brought out again under new colors at the next election; if to life, they may prove to be giants in babe's clothing. Voters must study long and with logic on these proposals before they can ballot intelligently.

Lessons From the Old World.
 America thinks she's extremely modern, with her long-distance airlines and her scientific farming methods. But she can take a few experimental lessons from Russia, where more than 1,000,000 acres of wheat were sown by airplane this summer; or from Italy, where thousands of acres of marsh lands were converted last year into rich cereal-growing areas.

Socialism? Communism?
 Maybe it doesn't mean much, but curiosity bids us look with interest at the full corps of state candidates put forward by the Socialist and the Communist parties for consideration in the November election. None of them will be elected, of course, but their growing influence cannot be questioned in the face of California's recent nomination of a confirmed Socialist for the governorship.

Relief Gets a Knock.
 The president of the Texas Medical Society took this severe and probably deserved cut at public relief during the district convention of doctors at Abilene last week: "Whereas first outlays for relief were eight to ten millions, we find the other day the commission asked for \$44,000,000 to care for Texans this winter. The further we lead people into expecting things done for them, the more this 'morphine' habit will grow, and our relief bills in the future will mount."

Crime vs. Education.
 If the gospel of education against crime were preached more religiously, not only our children and our pocketbooks but education itself would be the winner. Tell the average school teacher or school official—or the average parent, for that matter—that crime in the United States costs about five times as much as education, and he will reel with her. But we are doing little about it, in the school room or in the home. Dollars for crime, dimes for education. So runs the latest American travesty.

A Gem From Pecos.
 This clipping from the Pecos Enterprise is too interesting to keep: "Judge Drane says that he always reads the notices posted in the local post office. They carry valuable information, he says. The other day he was reading over the notice which concerns the new star mail route to Carlsbad, via Mentone. He noticed that mileage to Mentone was given as 23 miles and some fraction. The judge did a little mental calculation and found that he had unintentionally been beating the state out of some money. In turning in mileage traveled to court sessions he had been figuring Mentone as 28 miles instead of 23. The judge did more figuring and found out that on all his various trips the extra mileage he had turned in and been paid for totalled about six dollars. So Judge Drane sat down and wrote out a check for the difference and mailed it, with an explanation, to the state comptroller. Showing there is no reward on earth, for an honest man, all he got was a cryptic receipt: from the state no letter or anything."

 I will think—talk—write . . . Texas Centennial in 1936! This is to be my celebration. In its achievement I may give free play to my patriotic love for Texas' heroic past; my confidence in its glories that are to be.

Relieving the Relief Situation.

Three years ago The Times was first to jump to the defense of the Red Cross program of relief for destitute people. Two years ago we hailed with pleasure the transfer of relief from the Red Cross to governmental agencies. Last year we began to have serious doubts concerning the entire relief program. The administration of this gigantic relief program has not worried us so much. Considering the amount of money that has been handled, the emergency nature of the problem, and the history-proven weakness of human agencies, Texas relief money, whatever its source and whatever its destination, has been re-

In Scurry County particularly, the relief situation markedly well administered. What we are worried about is that "relief" has become the largest word in millions of American vocabularies. It has displaced "love" and "hope" and "work" and even "God."

Our hearts are hurt. They beat with our neighbors, and they are soft when our neighbors suffer. But may it not be the better part of wisdom to re-install the gospel of work, even if in the process we see a few of our people suffering more than they are suffering now?

What can we build in its place?
 If the American tradition of self-help passes away, May it not be possible that a drastic cut in the nation's relief bill would be a quicker turn toward prosperity than our built-over-night dole system?

The financial pressure of our relief system is enormous, and will increase as the years lengthen. The economic pressure is almost stifling. But the moral or spiritual pressure is so severe that we may awaken some fine morning to find that we have relieved ourselves of all the fine character-building traits that have made America great and Texas an empire in her own right.

Our workers are cooperating in a fine way. We are anxious that the parents cooperate and thus the status of affairs will soon be materially changed.

ETS meets at 6:15 p. m. All of our people can find a place of training in church usefulness, denominational loyalty and Christian efficiency. Let's show our pride in our church work by being loyal to its program of service.

Last Sunday was a good day. The spirit was fine, the atmosphere worshipful, the fellowship superb and the attendance good. The choir was at its best.

To those who are sad and need comfort, to those who are sick and need healing, to those who are weary and need rest, to those who are lost and need a Saviour, to those who are idle and need a vineyard in which to labor, to those who are weak in the faith and need strengthening, to those who are confused and need help—to you we open wide our doors and in the name of Jesus say come. "Come this way and we shall do thee good."—Lawrence Hays, pastor.

Private reports from the Mellon Institute for Industrial Research at Pittsburgh indicate further progress by scientists fighting the pneumonia microbe. Well known is the fact pneumonia ranks after cancer and heart disease as a killer, rating above fatalities by automobile, gunmen, diabetes combined.

Drs. Alice G. Renfrew, C. L. Butler and Leonard H. Cretcher at the institute have been working with a white crystalline powder, optochin; (quinine derivative), which has a very narrow margin for doses between toxic and curative powers. At first a lethal dose of optochin either blinded or killed the patient, and the doctors have widened this gap between a toxic and curative dose. It is too soon to expect a "cure all" for this brilliant tidbit of research.

A group of paleontologists directed by Dr. Barnum Brown of the American Museum of Natural History are touring by plane a 12,000 mile territory in search of famed dinosaur bones for scientific and commercial purposes. The territory includes the Great Lakes region, Wyoming, and as far southwest as the painted desert of New Mexico. Dinosaur bones are as a matter of fact not located by plane, but this group looks at clay and silt stratas, marks by x's spots likely to contain fossil deposits. At first scientific, the expedition is now backed by Harry Ford Sinclair, oil tycoon; has the dual purpose of finding dinosaur specimens for Sinclair ads and a home in the museum. For instance, at the Century of Progress the Sinclair dinosaurs were plastic compositions of rubber, and electric motors swishing composition tails and closing jaws filled with genuine teeth.

Just to show how novel ideas click sometimes, the idea of plastering filling stations and highway ads with dinosaurs depicting the vast age of petroleum for Sinclair products originated with bald, speckled copy writer Joel M. Nichols, F. A. G. employee. A letter just received from Walter Granger, Curator Fossil Mammals of The American Museum of Natural History, says Barnum Brown and party will visit this section of West Texas if they have time. This column has worked for some time, directly and indirectly, to bring West Texas fossil beds to the attention of Dr. Brown, not so much because West Texas would be depleted of valuable specimens, but because field men spend money hunting intact fossil bones. This, of course, is not free advertising; it is merely presented from a scientific angle.

Interest in Debate Club At High School

Much interest has been shown in the recently organized Debate Club at the Snyder High School by students, teachers and town-folk. Subject for the year is "Resolved: That the Government Should Own and Operate All Power Utilities." Letters and other materials have been received by the club from as far away as the state of Massachusetts.

Officers for the Debate Club are: Estine Derward, president; Irene Wolcott, vice president; La Frances Hamilton, secretary; Richard Erice, treasurer; Rosanna Reynolds, reporter. Miss Effie McLeod is sponsoring the club.

First Baptist Church

Sunday, October 21, is State Mission Day. Our people will be happy to contribute to the needs of state missions by putting their special offerings for this worthy cause in the envelopes especially prepared and sent out last Sunday. We are expecting an offering to be made in every church of the 34 churches of the Mitchell-Scurry association for state missions Sunday morning. We will quit giving when God quits giving to us.

Sunday school begins promptly at 9:45 a. m. The 15-minute opening departmental program is not to kill time until more folks get into the building. It is a vital part of the teaching hour, and is necessary for devotional worship, preparatory to the right kind of teaching. Departmental announcements are made, which are of major importance to the entire school. Since the adult and young people have their assembly together, the adults will have charge of the opening program one Sunday and the young people another. This 15-minute period can be made profitable and more worth while in proportion as our people give themselves in cooperation.

The pastor will preach at the morning hour on "The Cry of a Great Heart." Read Romans 10. There will be special music. Sections are provided that the workers may keep the classes and departments for the worship hour. Sunday school ought to build around the church, not away from it. Our workers are cooperating in a fine way. We are anxious that the parents cooperate and thus the status of affairs will soon be materially changed.

Hermleigh Baby Is Buried October 14

Death came to the A. J. Dajank home at Hermleigh Sunday and claimed the life of Henry Lee Dajank, one year and 11 days old. Services were held Monday afternoon at the Pyron tabernacle, with Rev. E. C. Leslie officiating and Odum Funeral Home in charge. Burial was at Pyron.

Gaither Mayo and Charlie Hatcher were pallbearers. The flower bearers were Ann Fay Lapour, Anton Lapour, Mary Joyce Lapour and Charlie Odstrick.

Says Joe York One Of Leading Ropers

"Joe York, Snyder, who admits that he is near the 40 mark, is one of the best rancher ropers a fan will see," Harry Holt said Sunday in his column in the Sweetwater Reporter called "From the Top of the Hill."

"Joe is riding a sorrel horse that is now 12 years old. Joe says he and the horse made \$187 the first show they entered," Holt continues. "Joe is a little fellow and he does not throw the calves hard down against the ground like some of the big huskies, but he gets them down."

York is seen in many a rodeo in these parts. Justiceburg is really his post office, but Snyder is glad to claim him as her own.

THINGS YOU MAY NOT KNOW . . . ABOUT YOUR TELEPHONE

The telephone had its birth 58 years ago in a make-shift Boston research laboratory, where Alexander Graham Bell watched a tiny straw attached to the eardrum of a human skull trace a wavering line on smoked glass.

Since then, telephone history has been told in countless scientific problems solved. Bell Telephone Laboratories, research arm of the telephone service, is the reason you now may talk across continents and seas, that most telephone wires are underground, that a single long distance line may carry four simultaneous conversations.

Research scientists at the Laboratories search constantly for inventions and improvements that may be devoted by the Southwestern Company, and the other Bell operating companies, to keeping the price you pay for telephone service low.

Back of this fundamental policy is the belief that in an undertaking planned like the telephone service for the long pull, what is best for the telephone user becomes in the end the policy that will bring us the sounder, more enduring measure of success.

HIS TEETH ARE PERFECT!

...but how about his eyes?

At the ripe old age of three he was an expert at taking care of his teeth—brushing them carefully morning and night and so on. His Mother takes great pride now in his perfect teeth, as well she might.

But—how about his eyes? The chances are he has been allowed to read, study and play just anywhere he wanted to, without a thought having been given to whether or not the lighting in the room was right for his eyes—it may have been too dim, too bright, glaring or anything else that lighting is apt to be if it is not carefully studied and arranged to suit the user.

Here's a suggestion—before another day goes by, analyze your home lighting and see just what you should do to improve it. Eyes are far more precious than teeth—make sure they are not mistreated by improper lighting.

Socialism Trend Seen in Medical World by Doctor

The manner in which rebel cases were handled in Texas during the last year is the most drastic step toward socialism in the medical profession. Dr. Sam E. Thompson of Kerrville, president of the Texas Medical Society, told members of the Mid-West Texas Medical Society during the annual convention at Abilene Thursday of last week.

Dr. R. C. L. P. Burton of Snyder presented a paper at the afternoon session on "Chronic Ulcerative Colitis." He and Mrs. Robertson attended the evening banquet, at which Dr. Thompson was the principal speaker.

"The profession is silently drifting toward socialism," the state president said. "No man can become a drunkard or a morphine addict, neither can a man become a socialist in one day. But there is a medical league for socialized medicine, which had a charter membership of 750 licensed doctors and which advocated the idea of putting all physicians on a salary and sending no patient a bill.

"Anything which reduces the efficiency of medicine makes the public the goat. The movement to place all doctors on a salary would largely destroy the progressive initiative of the individual, as has been demonstrated time and again. It will be the patients who will suffer in any such trends.

"Every man should earn his bread, if by the sweat of the brow, a man said many years ago. And it is so today. The individual should be responsible for his daily bread. There is nothing free under the sun, even the air we breathe must be pumped for. And when the government forces people to yield responsibilities which are rightfully theirs, then degradation and loss of self respect inevitably follow."

Alfred on the Air. James V. Alfred, governor-elect, will address Texas people over the South West network, from 7:15 to 7:45 p. m. this (Thursday) evening.

During the afternoon business session, Loraine was selected as the next meeting place. The meeting was set for the month of January. Among those present from Loraine were Leonard Davis and Jim Marshall, who will probably be in charge of entertainment at the January meeting.

Before the close of the meeting Sunday morning was conducted by Roscoe led an inspiring consecration service. He spoke on "Services of the Present."

Suggestions Given For Fall Gardening

Cabbage and lettuce seed should be started in a small plant bed in a protected spot. In three or four weeks the plants will be large enough for transplanting to the permanent location in the garden.

Sprouting of Irish potatoes is hastened and insured by treating them with a chemical known as ethylene chlorhydrin. The seed are cut in the ordinary way about eight hours before they are to be planted and then are dipped in a solution made by mixing one pint of ethylene chlorhydrin in four gallons of water. The potatoes should remain in the water just long enough to become thoroughly wet. One quart of ethylene chlorhydrin in eight gallons of water is sufficient to treat ten bushels of Irish potatoes. As soon as the potatoes are treated, they should be planted immediately.

The home was decorated in Halloween colors and in the bedroom a pot was placed in the center of the room, which was filled with many lovely gifts. The bride was given a spool of thread and told that the witches were calling her, and that she must follow the strings until she came to the end, and there she would learn what to do next. The string was tied to a broom and a note was found, telling her to look until she found a pot of gifts. Each present was carefully untied by the bride and passed around to the guests in the room. After the gifts were all added by everyone, cake and hot chocolate were served to each one present.

Those presenting gifts were: Mmes. C. Karnes, Ferrill Bowlin, J. G. Reed, M. U. Vernon, R. C. Walker, Roscoe Williams, J. M. Appleton, J. D. Pignone, R. M.
