Extension Service Leather Specialist To Demonstrate Here Monday And Tuesday.

Farmers, ranchers and others who wish to get first-hand information about tanning leather or making leather goods are invited to attend the demonstrations and talks to be brought here Monday and Tuesday afternoons by M. K. Thornton, leather specialist of the Extension Service.

The Monday meeting will begin at 9:00 o'clock in the morning, and the demonstration will continue into the afternoon and through a part of the following day. Anyone interested in having hides used in the demonstrations may contact the county agent.

The leather specialist has conducted similar demonstrations in a number of Texas counties. "He is both interesting and highly skilled in his work," County Agent W. R. Lacey said yesterday, "and no one will regret setting aside several hours for this unusual work."

Thornton demonstrates the various problems encountered in each stage, demonstrates the cutting of leather and the making of harness and other leather goods.

Several sheep, goat and cattle hides have been processed for two weeks or 10 days, and will be ready for a finished job at the hands of the demonstrator.

Continuation of Reduced Rate on West Texas Feed

The Commodities Purchase Section of the Agricultural Adjustment Administration has informed Congressman George Mahon that an agreement has been reached with railroad officials and approved by the Interstate Commerce Commission, which will make possible a continuation of the reduced rates on shipments of livestock feed for the drought area.

The agreement which made possible these reduced rates during the last few months expired May 31, and Mr. Mahon had been working with this section and with the Interstate Commerce Commission on this proposition for several weeks.

The new agreement provides a basis of two-thirds of the regular rate to apply on hay, and 50 per cent of the hay rates on other feed shipments. The agreement took effect June 8 and will continue until August 31.

The destination territory to which the reduced rates apply includes 131 counties in five mid-western states, 60 of which are in West Texas. Scurry and Borden are included.

\$300 TAKEN AT BRYANT-LINK'S

Bryant-Link's third robbery within less than two years netted the robbers about \$300 in cash Sunday night, Manager E. E. Weathers reported when the store was opened Monday morning.

Entrance to the building was gained by prying an iron bar from the skylight. The large safe door was evidently broken with crowbars or other heavy instruments, according to local officers. The door was broken in several places. More than \$150 in checks, as well as all records in the safe, were untouched. No merchandise was missed. The looters left by the rear door.

Several hundred dollars in merchandise was taken from the store in 1933. A portion of it was recovered, one suspect was killed and two later captured in Oklahoma. A second attempted robbery was thwarted several months ago, but the store breakers escaped.

Gloves were evidently used on Sunday night's job, so no fingerprints were discovered. Officers report no progress in finding the burglars.

Penalty Against Stock Grazing on State Roadways

G. R. Austin, Scurry-Borden state highway superintendent, has been notified by Gibb Gilchrist, state highway engineer, of the legislative action that made it a fineable offense to allow livestock to run loose on state highway right-of-ways.

Senate Bill 143, passed by the last session of the Legislature, makes it a misdemeanor for any person owning or having control of domestic livestock to permit it to roam at large unattended on the right-of-way of a state highway where same is enclosed by fences on both sides.

Penalty for violation of this law shall be a fine in any sum not exceeding \$200, and each day such livestock shall be permitted to roam at large on the fenced highway shall constitute a separate offense.

Austin states that livestock on highways in West Texas are a constant menace to driving, especially at night. He urges full cooperation of Scurry and Borden County livestock owners in seeing that stock is not allowed to run free.

Addition of this equipment follows only a few weeks after installation of a large refrigerator, which was recently changed from an ice to an electric-cool box with Fridgair unit.

"We are making a specialty of fresh fruits and vegetables," says Fred and Henry Wilhelm, "and we believe we are as well equipped now to handle a large volume of fresh stuff as any store in West Texas outside the city."

Most of the rain throughout the spell has been drizzly and therefore much more beneficial to the county.

FARMER DEBT MEET WILL BE HELD TUESDAY

Zone Session of Texas Farm Debt Conciliation Committee Set For Sweetwater.

Everyone interested in seeing distressed farmers helped with their debt burdens is invited to a zone meeting in Sweetwater next Tuesday of the Texas Farm Debt Conciliation Committee, according to Guion Gregg, district supervisor, who was in Snyder early this week.

Similar meetings will be held at Lubbock Friday of next week, and at Paducah Wednesday of next week. All sessions will be in the courthouses at 2:30 p. m. Gregg's territory, known as state District No. 1, embraces 56 West Texas counties, with headquarters at Lubbock.

The meetings will be held in an effort to acquaint farmers, civic leaders and others interested in the farm debt question, of the service that is available through the state committee, which is an agency of the Farm Credit Administration. Leaders in the district meetings will include a Washington representative, who will assist R. J. Murray, state chairman. A representative of the Federal Land Bank will also be present.

Newly appointed conciliation committees for Scurry County, just announced by Governor Allred, are as follows: Ben F. Smith, chairman; Joe Cason and H. P. Winters. These committees, along with the old county committee, county agent, secretary-treasurer of the National Farm Loan Association, and farmers who wish to have their debts adjusted are especially invited to the zone meetings, the district supervisor said.

The visitor said his district set-up has been responsible for farm debt reduction of more than \$200,000 during its first year of operation, and that a number of farmers, including several from Scurry County, have been able to adjust heavy mortgages through the government agency.

"We have been of valuable service to many district farmers," he pointed out, "because through our adjustments we have prevented wholesale foreclosure of farms."

Old Certificates Being Exchanged Or Kept in Pool

This special pool will close in about four months. It is being organized to supply surplus tags in regions where cotton will soon be picked.

It is understood here that another pool, similar to the one that operated last fall, will be organized this fall for the benefit of those who have a surplus of 1935 certificates.

Auxiliary Meets Monday.

"Lead Us Not Into Temptation" was the subject for study for the Ruth Anderson Auxiliary of the First Methodist Church at its Monday meeting. Mrs. Ivan Dodson led the program. Others present were Mmes. Fred Joiner, T. J. DeShazo, T. W. Pollard, J. O. Littlepage and R. H. Odum.

How Cardui Helps Women To Build Up

Cardui stimulates the appetite and improves digestion, helping women to get more strength from the food they eat. As nourishment is improved, strength is built up, certain functional pains go away and women praise Cardui for helping them back to good health. Mrs. G. E. Hatfield of Hinton, W. Va., writes: "After the birth of my last baby, I did not seem to get my strength back. I took Cardui again and was soon sound and well. I have given it to my daughters and recommend it to other ladies." Thousands of women testify Cardui benefited them if it does not benefit YOU, consult a physician.

Esrudoma Class Meets Thursday.

The Esrudoma Class of the First Baptist Church met Thursday morning in the home of Mrs. Gailther Bell with Mmes. Amos Joyce and Opal Cleavenger as assistant hostesses.

Following a short business session, a "white elephant" sale was held. Dainty refreshments were served to Mmes. Addison Casstevens, A. A. Bailey, Lawrence Hays, J. H. Agee, Wayne Williams, Joe Graham and G. B. Clark Jr., and Miss Clara Belle Clark.

Laxative combination folks know is trustworthy

The confidence thousands of parents have in good, old reliable, powdered Theodore's Black-Draught has prompted them to get the new Syrup of Black-Draught for their children. The grown folks stick to the powdered Black-Draught, the youngsters probably will prefer it when they outgrow their childish love of sweets. Mrs. C. W. Adams, of Murray, Ky., writes: "I have used Theodore's Black-Draught (powder) about thirteen years, taking it for biliousness. Black-Draught acts well and I am always pleased with the results. I wanted a good, reliable laxative for my children. I have found Syrup of Black-Draught to be just that."

BLACK-DRAUGHT

Ritzenthaler and daughter, Dorothy, and of Salisbury, who will visit with relatives and friends in O'Donnell for several weeks before their return home in July.

THE WEEKLY DOZEN

Plenty of Huey, Too. Now that Father Coughlin has withdrawn from the air, outwardly to care for his growing duties, radio listeners will expect static only from the swamps of Louisiana.

The Week's Best Crack. The best newspaper "crack" we have read in a week suggests that Huey Long need not be worried about a vice presidential candidate to run on the third-party ticket with him, as long as W. C. Fields is up and about.

Settling the Relief Problem. Talkative Tillie, who has been watching the relief situation more closely than mere man imagines, prophesies that the bumper cotton crop that is coming up this fall will automatically settle most of the problems that are now so pregnant. She still believes that most folks had rather work than live off charity.

Crops and Marriage. Pessimism Pete says crops in Scurry County are like marriage: We usually make much over the few faults and setbacks that creep in, but fail to recognize the larger advantages and possibilities. Just now there is a tenor of walling among those who have to plant over several times, but this fall they will probably reap a crop that has seen few equals in county history.

Calvin Coolidge on Religion. Calvin Coolidge, the quiet president whose memoirs have become almost legendary only a short time after his death, said that the church-going people of a community, even if they are in the minority, set up the moral tone of that community. So it is that the Methodist revival now in progress here will leave a trail of purer living and increasing Godliness.

The Railroads Move On. This is Railroad Week. Most of the country is justifiably joining in a celebration of the empire-building nature of the rails that brought the East and the West, the North and the South, much closer together. After an admitted period of lethargy, the railroads are waking up to the new order of things—to speed, to streamlining, to travel comfort, to intense courtesy. As a consequence, they are regaining some of the prestige they lost in their doldrum days.

Who Killed the Dogs? Do you remember a rather pointed statement from an exchange that The Times published a few years ago about the nature of a dog poisoner? The statement is lost, but memory recalls something about a cross between a rattlesnake, a polecat, a worm and a horse's neck. The sentiment lingers on, after west side folks were upset a few days ago because dog poisoners put in overtime on their dirty work.

Let's Clear Right-of-Ways. Most livestock owners do not realize what a hazard their foot-loose stock offers motorists who traverse our state highways. If they did, they would certainly be more careful and considerate. All of us know that stock on right-of-ways often cause fatal accidents, demolished cars and terrible suffering. We're out of the horse-and-buggy days in transportation. Let's move up a notch in livestock grazing.

They Expect No Samaritan. Whether it be reliance on their own resourcefulness or the salutary lesson of experience, the members of the great middle classes expect no Samaritan. They look to themselves for succor. They are the country's real forgotten and neglected. Their tragedy is that they are remembered only when their earnings and their savings are needed to make good the promises spawned in political laboratories.—Merle Thorpe, in Nation's Business.

Our Revenue Increases. Scurry County's revenue is picking up considerably in recent days. We refer not only to the new crop prospects, but to other activities: Highway building; oil well drilling, leasing and surveying; telephone line re-wiring; hospital; sewer line; tourist traffic. Adding it all up, you'd be surprised at the gross revenue from outside sources. This added income means that vacant business and residential property has been practically unknown here for many a month.

What About the Centennial? Scurry County would do well to get organized on this Centennial idea. Now that the money for a sizeable and history-making celebration is at hand, the one-hundredth anniversary of Texas independence will be properly observed. It remains for the counties, including Scurry, to capitalize on their historic backgrounds so they will be able to point them out to travelers from afar. And Scurry County, as all of us know, is studded with historically-rich grazing grounds.

Brisbane: "What's in a Name?" The first item in Arthur Brisbane's Monday column is filled with too much rich meat to be skipped: "What's in a name?" Some young Republicans want the old Republican party to change its name from 'Republican party' to 'Constitutional party.' Long ago, when the New York Herald, since dead, reduced its price, the late Joseph Pulitzer wrote in a short editorial 'the trouble is not with your price, it is with your newspaper. Change that.' The trouble with the Republican party is not with its name."

Senator Collie Serves.

State Senator Wilbourne B. Collie has served so effectively during his short time in office that he deserves the praise of every citizen in this district.

It is rare for a legislator to become widely recognized during two or three terms in Austin. Senator Collie has achieved that distinction in the space of less than a four-year term.

The distinction carries double weight because the senator has won his spurs without any fanfare or hullabaloo, just as he won his campaign more than two years ago. He is recognized because he is aggressive, clean-cut, forward-looking and honest.

Senator Collie's heavy duties as secretary of the crime investigating committee, which worked out an anti-crime bill that became law, probably headlined his achievements. This forward step in crime prevention and detection will undoubtedly have much more effect on the state than most of the much-debated questions combined. It takes Texas out of the horse-and-buggy days into a streamlined era of crime control.

Just as the collie typifies the highest qualities of faithfulness, service and intelligence that one wants in a dog, so does Senator Collie typify the highest qualities that the average citizen wants in a public servant.

Snyder Does the Job Right.

Snyder put on her working clothes when she went out after the hospital. She rolled up her sleeves and did the job right. The men who led the hospital parade are deserving of more credit than they will receive from the majority of us who will benefit from having a modern, well-manned hospital within a short distance of our homes.

Judge Jim Stinson, who delivered the dedicatory address, declared the hospital project was without parallel in the recent development of West Texas. Snyder folks went out after the hospital because they wanted an institution here that would live to serve. Investors in Snyder General Hospital, Inc., consider that their money was placed in a health investment, not in a money dividend investment.

If a small return does come from the capital investment of \$20,000, it will be but a drop in the bucket in comparison with the sacrifices of time and money and energy that many local citizens have already put into the project.

Those who have not investigated the proposition fully are still doubting Thomases. "It is a wonderful thing you are doing," they say, "but how do you expect to make a success while hospitals are going on the rocks almost every week?"

There is more than one answer. In the first place, the hospital is being built with cash on the barrel head. Twenty thousand dollars in cash is quite different from \$20,000 on which high interest must be paid. Second, even conservative surveys of the hospital's possibilities indicate that the institution will pay for the beginning. Most hospitals that failed were built on hope rather than on intensive survey by conservative men. Third, and probably most important of all, the chief hospital surgeon is the best known physician-surgeon in West Texas. His reputation is based on accomplishments. Many thousands of dollars have gone from this county to Dr. Grady Shytle because folks believed they were getting the best. They got the best. As Judge Stinson said, "If Grady Shytle says you should be operated, you should be operated. . . he will not cut on you just to get your money."

In the fourth place, Snyder and her surrounding territory are sold on the hospital, which will be strictly an open staff institution, with your doctor privileged to practice just as your neighbor's doctor is allowed to practice.

Snyder is doing the job right. Doubting Thomases have become so convinced that their walls decreased to whispers and finally to something akin to commendation.

CURRENT COMMENT.

By Leon Guilan.

One of the few American doctors the Japanese highly esteem as a benefactor to Korean lepers is Dr. R. Manton Wilson, eminent authority on the dreaded disease, and medical superintendent of the Biederwolf Leper Colony at Soonchun, Korea. . . Of Korea's teeming population of 20,000,000 one person in each thousand is afflicted with this most dreaded of human ailments, caused by a virus bearing germ dubious to trace. . . Well known is the fact physical touch and contact is necessary to transmit leprosy, and for that reason the Japanese government gave Dr. Wilson \$12,000 and a rocky peninsula for his colony. . . Here 1,400 cases are treated yearly (800 at Soonchun; 600 at Pusan), treatment being injections of chaulmoogra oil, plus physical labor and a balanced diet.

Born in Columbus, Arkansas, R. Manton Wilson finished the Columbus and Hope public schools, receiving his degree in medicine at Washington University in 1905. . . Completing post-graduate work in New York hospitals, he studied in Germany, and in 1908 went to Korea, against the advice of friends. . . The medical profession is as much interested in Dr. Wilson the man, as in his simple treatment of lepers. . . Prizes totaling \$2,500 will be awarded in the rodeo events and various other contests to be held in connection with the gathering of cowboys at Stamford July 2, 3 and 4 for the sixth annual Texas Cowboy Reunion.

Besides \$1,600 in cash, the prize list will include six handsome saddles, which are offered through the courtesy of the Salesmanship Club of Dallas, and various other trappings, such as bits, spurs, boots and hats coveted by cowboys and cowgirls.

The winner in the oldtime calf-roper's contest, open only to cowboys over 55 years of age, will also receive a saddle. Prettiest of all is the saddle to be awarded to the winner of the cowgirl sponsors' contest. Joe De Andre of Dallas is offering a pair of shop-made boots to the champion roper in the rodeo.

The cash prizes will be awarded as day money in the various rodeo events. Old fiddlers also will come in for a share of the cash prizes in their contest, totalling \$32.50. Another \$25 will be given for the best entries in the grand parade July 3.

Prizes will also be given the most typical cowboys attending the Reunion, one for a cowboy over 55 years of age and one under 55. Interest Cut to 3 1/2 and 4 Per Cent For Farm Loans

The interest rate on all Federal Land Bank Loans made through national farm loan associations will be reduced to 3 1/2 per cent for all interest payable in the one-year period commencing July 1, 1935, and to 4 per cent for all interest payable in the two-year period commencing July 1, 1936, according to Hugh Boren, secretary-treasurer of the Snyder National Farm Loan Association.

This announcement was made June 8, when Mr. Boren was notified of the new loan rate by A. C. Williams, president of the Federal Land Bank of Houston and general agent of the Farm Credit Administration of Houston.

This temporary reduction of interest on Federal Land Bank loans having installments due prior to July 1, 1935, is the result of new legislation, the Farm Credit Act of 1935, which was signed by President Roosevelt June 3. Interest payable on installment dates occurring after July 30, 1935, will be at the original contract rate, which is 4 1/2 per cent on loans now being made through national farm loan associations and varies from 5 to 6 per cent on loans made prior to April 1, 1935.

The Farm Credit Act of 1935 also provides for another important innovation. Under its terms, the Land Bank commissioner now may make loans to finance the purchase of farms by deserving tenant farmers. Formerly, commissioner loans could be made only for the purpose of refinancing debts, for repurchasing farms lost through foreclosure and for working capital. The act extends to January 1, 1940, the time in which the Land Bank commissioner may make direct loans to farmers on first and second mortgages. The commissioner loan plus any prior encumbrances on the property may not exceed 75 per cent of the appraisal normal value.

Commenting on the new provisions, Mr. Boren said: "The new

The Children's Day program was well received last Sunday night. The program was conducted in such a manner as to give evidence of painstaking care in rehearsal on the part of both the children and the directors. May we have more of such programs from our children. Now that both summer and vacation times are here, let everyone be as faithful as possible in Bible school and church attendance. Let us not even let Old Man Summer slump set foot inside our church this year.

provision enabling the Land Bank commissioner to make loans for the purpose of purchasing farms provides a new opportunity for young farmers and deserving tenants to become farm owners and home owners in their own right. We shall be glad to talk things over with worthy tenants who wish to buy farms of their own."

Since May 12, 1933, when the Farm Credit Administration was established, the Federal Land Bank of Houston, acting for itself and as agent for the Land Bank commissioner, has made 42,738 loans aggregating \$129,192,350.00. This is almost as large as the amount of business carried on the books of the bank on May 1, 1933, after 17 years of operation. The interest rate reduction provided by the act will affect only Federal Land Bank loans, all of which are first mortgage loans. The interest rate on Land Bank commissioner loans, which are made on either first or second mortgages on farm property, will remain unchanged at 5 per cent.

"50% of all motor wear occurs during the starting period"

... say automotive engineers

Measuring cylinder went with a precision gauge—accurate to a hundred-thousandth of an inch!

Only the oil with the "Hidden Quart" will stay up in your motor and cut down this starting wear!

Here are the facts: Oils not Germ Processed drain back into the crankcase when your motor is idle. Bearings, pistons and cylinders are dry when you start. Even in warm weather your motor makes at least a thousand revolutions before the quickest flowing oil can reach all parts. Bare metal grinds against bare metal—destructive wear occurs.

Conoco Germ Processed Oil cuts down this costly starting wear! The patented Germ Process—adding concentrated oily essence to highly refined oil—makes it penetrate and combine with metal surfaces. That penetrative film, forming the "Hidden Quart", becomes part of the metal itself and never drains away. Hundreds of dry-crankcase runs have proved the "Hidden Quart"

lubricating value. Cars using Germ Processed Oil were driven 15 to 75 miles with the crankcase empty but without motor damage!

Germ Processed Oil protects your motor another way. All cars built since 1931 have greatly increased pressures and must have oil of extra high film strength for safe lubrication. Straight mineral oils have no more film strength than they had 10 years ago—some have less! Conoco Germ Processed Oil, with 2 to 4 times the film strength of mineral oils, gives modern motors the lubrication they need.

Only Conoco Germ Processed Oil gives full motor protection—when you start, while you drive. You will cut motor wear if you use it!

Heat Waves Ahead
Take steps to make this the coolest Summer yet, in the kitchen.
You can make it so with a modern insulated Gas Range
With Summer nearly here, what about modernizing that kitchen to make it a comfortable one? This can be done with a modern gas range and done so inexpensively right now because of June Sale!
A modern gas range has improved insulation that keeps the heat in the oven, resulting in more cooking on the same amount of gas and a cooler kitchen. Oven heat control avoids the necessity of watching and opening oven doors for frequent testing. See these new ranges now and learn how little money is required to have one installed in your kitchen ready to help keep it cool when the first heat wave strikes.
COOKING SCHOOL Starts Monday!
You'll not only want to see how efficiently the modern Gas Range handles expert's orders, but you'll want to learn new recipes. So attend each session. The first of three is Monday.
You haven't a modern gas range if you haven't these four features:
AUTOMATIC TOP LIGHTER: Burners light by merely turning the gas cock.
OVEN HEAT CONTROL: Regulates temperatures for baking or roasting.
SMOKELESS BROILER: A depression in the pan catches juices; no smoke.
OVEN INSULATION: Keeps the heat in the oven where it belongs.
