# EVERY DAY ... MOTHER'S DAY

Mother's Day will be upon us Sunday, and if the past is any guide to the future the occasion will be marked by a great deal of useless It seems to be a habit of ours to work ourselves up to a perfect

lather of sentimentality about something one day in the year, and then to ignore it for the other 364 days. Not that the sentiment isn't very pleasant and touching. There

is something heart-warming about the custom of setting aside one day to let Mother know that she is loved and appreciated. The flowers, the little gifts, the extra attentions that appear on Mother's Day come from the heart, and it's good for us to give them. But why, oh, why, must we pack it all into one day? Why can't

carry over a little of this sentiment for use the rest of the year? In the first place, Mother isn't just the gray-haired old lady of the Mother's Day pictures. She's a lot of people, some of them eld and some of them young, some of them rich and some of them poor. She's the girl at the spindle in the textile mill and the woman back of the department store counter, the dining room waitress and the telephone girl, the farmer's wife and the woman on relief,

Being all these people, and more besides, she has a few commo wants that are in evidence every day in the year. Sh wants a decent measure of economic security and a chance to lock forward to old age without undue fear. She wants things for her children-a comfortable home, good

schooling, a chance to grow through a happy childhood to useful manhood and womanhood. She wants a world that will stay put without dissolving, every so often, into the chaos of war or economic

Are we doing a tenth part of what we could do, day in and day out, to provide those things for her? We ignore the old-age pension movement so scandalously that it falls into the hands of brainless and irresponsible cranks and

quacks. We put into one squadron of cruisers more money than we have spent on slum clearance since our nation was founded. We find hundreds of millions for our army and cut down on the school and playground budget. We let children waste and die from diseases that our science could prevent, and we do next to nothing to abolish war from the world.
